

Catalog of Enzymes for Research from Worthington

A new 20-page booklet, "Worthington Enzymes for Research," covers all products offered by Worthington Biochemical Corporation: enzymes for research, specially purified enzymes, related microbial products; and enzymatic reagents.

We manufacture virtually all our products, carrying them from raw materials through processing, purification and packaging. This gives you important guarantees of product reliability, integrity and purity. It also gives you direct contact with our personnel directly responsible for preparing any particular batch of material.

Use the attached coupon to request your copy of the catalog.

1-3. Specialized Inst. on **Data Processing**, American Assoc. of Medical Record Librarians, Boston, Mass. (M. C. Beard, Director, Institute Dept., 840 N. Lake Shore Dr., Chicago, Ill. 60611)

1-3. **Open Hearth and Basic Oxygen Steel Conf.**, 51st natl., Atlantic City, N.J. (J. V. Richards, 345 E. 47 St., New York 10017)

1-4. **Materials Engineering/Sciences Exposition and Conf.**, Philadelphia, Pa. (H. F. Grebe, Reber-Friel Co., 117 S. 17 St., Philadelphia 19103)

1-4. **Thermophysical Properties**, 4th symp., College Park, Md. (A. B. Conlin, Jr., Meetings Manager, 345 E. 47 St., New York 10017)

1-5. American College of **Physicians**, 49th annual, Boston, Mass. (E. C. Rose-now, Jr., Executive Director, 4200 Pine St., Philadelphia, Pa. 19104)

1-5. American **Welding Soc.**, Chicago, Ill. (American Welding Soc., 345 E. 47 St., New York 10017)

2-3. **Pharmacy Management** Inst. and Pharmacy Counseling Program, 12th annual, Madison, Wis. (W. L. Blockstein, Chairman, Extension Services in Pharmacy, 190 Pharmacy Building, Univ. of Wisconsin, Madison 53706)

2-4. American **Astronomical Soc.**, Charlottesville, Va. (A. K. Pierce, Kitt Peak National Observatory, P.O. Box 4130, Tucson, Ariz. 85717)

2-4. **Fast Reactor Systems, Materials and Components**, Cincinnati, Ohio. (C. S. Robertson, Jr., General Electric Co., P.O. Box 132, Cincinnati 45215)

2-5. National Council on **Alcoholism**, New York, N.Y. (The Council, 2 E. 103 St., New York 10029)

3-4. Instrumental and Automated Methods for Chemical Analysis for **Water Pollution Control**, symp., San Francisco, Calif. (R. B. Dean, U.S. Dept. of the Interior, Federal Water Pollution Control Administration, Ohio Basin Region, 4676 Columbia Parkway, Cincinnati 45266)

3-4. Institute of **Electrical and Electronics Engineers** and American Soc. of **Mechanical Engineers**, joint railroad conf., Chicago, Ill. (Office of the Technical Activities Board, IEEE, 345 E. 47 St., New York 10017)

3-5. **Engineering Aspects of Magneto-hydrodynamics**, 9th symp., Tullahoma, Tenn. (L. E. Ring, Manager, Research Branch—PWT, ARO, Inc., Arnold Air Force Station, Tenn. 37389)

3-5. National Soc. for the **Prevention of Blindness**, New York, N.Y. (V. S. Boyce, Assistant Executive Director, 79 Madison Ave., New York 10016)

3-5. **Numerical Control Soc.**, 5th annual, Philadelphia, Pa. (Miss M. A. De Vries, 44 Nassau St., Princeton, N.J. 08540)

3-5. **Structures. Structural Dynamics, and Materials**, 9th conf., Palm Springs, Calif. (Meetings Manager, American Inst. of Aeronautics and Astronautics, 1290 Sixth Ave., New York 10019)

4-5. **Microphotography**—Fundamentals and Applications, Wakefield, Mass. (K. T.

Infuse unrestrained animals and patients

with 3 **SAGE** portable,
self-contained,
battery-powered
miniature
pumps

Sage Micro-Flow pumps permit continuous, long term chemotherapy of ambulatory patients and drug experiments on unrestrained animals.

They operate by electrolysis. A uniformly generated gas behind the piston drives the syringe at the selected rate.

Model 216, in a compact box only 4½" x 2" x 1", provides flow rates from 1 ml/¼ hr to 1 ml/24 hr and has 10 ml capacity for infusions of up to 10 days. Models 285 and 227 have capacities of 1 ml and 2½ ml respectively and can be attached to all but the smallest laboratory animals.

Model 216 is priced at \$215; others at \$125 and \$145.

the simpler the better: PhoroSlide® electrophoresis

This new zone electrophoresis system saves time, trouble and dollars. A unique PhoroSlide Strip provides the high resolution characteristics of cellulose acetate in a form that greatly simplifies handling and storage. Each strip accepts two samples. PhoroSlide Cells have plug-in electrical connections so that five or more may be used at one time. The solid-state Power Module needs no adjustments other than simple switch-selection of the pre-set operating voltage.

The PhoroScope™ Densitometer provides an instant visual presentation of the phoretogram on a cathode ray tube and an automatic meter indication of the actual percentage represented by each fraction in the separation. If conventional strip chart recording is desired, an outlet is provided on the back of the instrument.

Procedures are available describing the PhoroSlide separation of serum protein, hemoglobin, glycoprotein, haptoglobin and lipoprotein.

IMMUNOELECTROPHORESIS

All the advantages of the PhoroSlide system can be used for immunoelectrophoresis for which a special PhoroSlide strip is provided.

Write for descriptive literature and procedures. The Millipore Corporation, Bedford, Massachusetts 01730.

See it at the Federation Meeting, Booth No. 27 D, E & F

Millipore®

want
easy operation
and
superior
performance?

GET BOTH WITH THE CARY 15 RECORDING SPECTROPHOTOMETER

Convenient operation is just one benefit the CARY 15 offers. Equally important are its reliability and uncompromising performance in the 1850-8000Å wavelength range.

Why is the CARY 15 easy to operate?

Because the coupled wavelength and chart drive allows you to vary scan speed continuously from 1 to 150Å per second without affecting selected presentation. Versatile controls adapt the instrument for routine work or for such specialized studies as fluorescence and kinetics. And the monochromator's high absorption tolerance eliminates undesirable sample dilutions. Saves time, eliminates errors.

The strip chart recorder provides a continuous presentation over any wavelength range...without gear changes or chart paper changes. Wavelength, absorbance, and %T scales are linear so records are easy to read.

Performance is excellent. With proper sample handling techniques, analytical accuracy of 0.2% can be achieved. For example, at 2000Å photometric accuracy is 0.005 at 1 absorbance; resolution is 0.3Å. Stray light is less than 0.001%.

Reliability is assured. Rigid specifications control every step in the CARY 15's construction. Careful selection of components combined with thorough instrument calibration and testing assure long life and trouble-free service.

The CARY 15 guarantees outstanding performance, reliability, and ease of operation at moderate cost...less than \$12,000. For more information write for Data File E609-38.

...exclusively on WANG electronic calculators

Wang's unique approach to data manipulation (a revolutionary electronic circuit which digitally generates the natural logarithm of any number entered) reduces complex calculations to simple, logical key-strokes and eliminates from 67 to 93 per cent of calculation time.

On keyboard displays, about the size of a telephone, all basic arithmetic functions (+, -, \times , \div , $\frac{1}{x}$) are performed silently, in milliseconds. Optional keys produce X^2 , \sqrt{x} , $\text{Log} e^x$, e^x by a single key-stroke. (For unmatched economy, up to 4 keyboards can operate simultaneously from a briefcase-

size electronics package located up to 200 feet away.)

Other options include: 4 additional random-access storage registers (two are standard), 80 step, plug-in card programmer and/or built-in programs for single key-stroke calculations of $\sin \theta$, $\cos \theta$, $\arcsin x$, $\arctan x$.

Add-on compatibility makes it possible to expand into a powerful computing system that will branch, loop, do sub-routines, make decisions and manipulate arrays. *There is nothing comparable, anywhere.* For complete information, write or call:

Why are CD[®] rats so different? Because they're all alike.

When we supply CD rats, you supply the variables. Because Charles River rats are bred for uniformity. □ Every animal is COBS[®] (caesarean-originated, barrier sustained). That means the strictest controls imaginable. Like pasteurized food, sterilized bedding, bacteria-free air, nucleus stock kept in germfree isolation. □ The result: Absolute quality. Dependability . . . test after test. Just tell us how many animals you need. When and where. You'll have them within hours. Please write for our price list. Charles River Laboratories, Inc., Wilmington, Massachusetts, U.S.A. or Elbeuf, France.

Our standard model. Options slightly extra.

LABORATORIES, INCORPORATED TO RESEARCH

NOW...destain disc electrophoresis gels in 10 to 15 minutes

The Shandon Transverse Disc Destainer uses the electrophoresis technique, but takes the dye out transversely, or across the diameter of the gels, instead of longitudinally. This rapid destaining method completely clears dye from disc gels in 10 to 15 minutes versus the several hours necessary by washing or by electrophoresis in the disc apparatus itself. The Disc Destainer features a high-impact plastic case incorporating a totally enclosed cooling jacket. The interior is divided into two buffer/electrode compartments by a special cell which holds 10 or more gels for destaining at one time. Other features include accessible connections for power supply and coolant as well as a clear, ventilated top. D.C. power is supplied by a newly developed 75V 3A unit using a ten-step current controller and 0-3A ammeter.

Send for data sheet on the Shandon Transverse Disc Destainer and other disc electrophoresis apparatus. Shandon Scientific Company, Inc., 515 Broad Street, Sewickley, Pa. 15143 (Pittsburgh District).

FLAWLESS SPECIMEN SECTIONS WITH JUNG MICROTOMES

Tetrande Microtome for sectioning of very large specimens including whole human brains, entire lungs, laboratory animals, etc. Fully automatic feed to 30 microns in steps of one micron.

Heavy Duty K Microtome for the hardest specimens, including undecalcified bone, plastics, rubber, metals, etc. Fully automatic feed, 1-30 microns in steps of 1 micron... optional motor drive.

1120 Rotary Microtome for positively uniform serial sections of even very hard and non-homogeneous specimens. Fully automatic feed to 40 microns in steps of 1, 2 or 5 microns.

1200 Clinical Freezing Microtome for pathological laboratories, and histochemical, biochemical, isotopic and industrial research. Fully automatic feed, 2-40 microns in steps of 2 microns.

Jung has a Microtome for every sectioning need. With nearly a century of experience, Jung is the only manufacturer specializing exclusively in Microtomes and Microtome Knives. Inquiries on special sectioning problems are invited.

Take II or III... BIOSONIK® that is!

BIOSONIK® II with fully automatic feedback tuning

No panel meters necessary... automatically tunes itself for peak output. You always operate at maximum efficiency... regardless of variations in sample solution changes in viscosity, etc.

- **LIGHTWEIGHT**, dynamically balanced for hand operation.
- **5 ACCESSORY PROBES**... from continuous flow to micro... all interchangeable.
- **TOP POWER OUTPUT** of any probe in its price range... let us show you how much better the Biosonik II performs in your laboratory on your material... the only true test!

Top power for cell disruption from Bronwill...
Particularly effective with *Aerobacter*, *Bacillus*, *Clostridium*, *Escherichia coli*, *Hydrogenomonas*, *Pseudomonas*, blood cells and disaggregating tissue culture.

BIOSONIK® III the ultrasonic probe that converts into an ultrasonic cleaner

- **300 WATTS OF ENERGY AT THE TIP**... 93% conversion efficiency. Sturdy ceramic transducer provides high energy at 20 kh. Fully automatic tuning, solid state generator circuitry with stepless power control, even an integral probe support... simple, fool-proof operation.
- **POWER CONTROL COLOR-CODED TO ACCESSORIES**... Just set the panel dial to correspond to the color index of a specific accessory... allows attenuation of ultra-high power to assure maximum tip life.
- **NEW ACCESSORIES AND VERSATILITY, BROADEN USEFULNESS**... Among them: Heated 2½ gallon cleaning tank with many lab applications; syphoned ultrasonic pipet cleaner; and a variety of durable titanium tips for macro, micro and high intensity insonation.
- **FOR ULTRASONIC CLEANING**... Disconnect probe from the generator and plug in the cleaning tank or pipet cleaner. Then you can use your ultrasonic system for cleaning chores as well... another reason for a Biosonik III in your laboratory.

Why doesn't somebody design an inverted microscope specifically for tissue culture and other biological studies?

Somebody has. It's the Wild M-40.

This is no modification. It's the newest, highest state-of-the-art in inverted microscope design and construction. In mechanical precision. In optical quality. And in conveniences, operating speed and ease. It's the first of its kind, a typical Wild classic. Write for Booklet M-40.

Sharper separation with any ELECTROPHORESIS SYSTEM

(Including the new S&S)

NO. 2500 MEMBRANE

Customers tell us S&S No. 2500 Membranes are superior in clarity to the others they have tested, and their handling characteristics can only be termed as excellent.

Pure cellulose acetate. May be rendered completely transparent by saturating with liquid of same refractive index, i.e. $n_D = 1.47$. Results may be evaluated colorimetrically when separated fractions are cut from strip and dissolved in suitable solvent. Specimen volume requirement is minimal. Used for immunoelectrophoresis, bidimensional immunodiffusion, and regular electrophoresis.

The S&S No. 2500 Membrane possesses superior separation abilities. Separation of individual bands is clear and distinct. Only a short time is required for electrophoresis and evaluation. Image is sharp. Used in conjunction with S&S electrophoresis components, S&S No. 2500 makes possible a new standard in evaluation of fractions as well as convenience.

THIS FRACTION COLLECTOR IS

GOOD NEWS!

When laboratory instruments combine reliable solid state circuitry with low cost and compact size, that's good news. And that's ISCO's Model 270 Fraction Collector.

The highly dependable Model 270 features lift-off reels with 90 or 180 tube capacities and is ideally suited for either classroom or research use. At as little as \$220.00 complete, it is the lowest priced fraction collector available, yet it still incorporates both timed and volumetric control.

ISCO's other Fraction Collectors are good news too! The Model A is available for any combination of timed, drop counting, siphon or Volumeter (adjustable volumetric dispenser) operation and is equipped with a 240 tube reel. The Model AT offers much of the economy of the Model 270 and the flexibility of the Model A. The Model 240 is a preparative Fraction Collector especially designed for large volume collecting. All ISCO Fraction Collectors can be used in a cold room with no modifications and have a one year guarantee.

For more information about ISCO Fraction Collectors, please ask for Brochure FC37C.

RP-- a lab assistant that's a whiz at instrumentation setups

The Philbrick / Nexus RP is a self-powered, 5-amplifier operational manifold that serves you in many different ways. What do you make of it? Practically anything. It depends on the accessory amplifiers you plug in, your hookup and your capability in electronics and mathematics.

The RP computes physiological measurements, helps implement circuit design of process instrumentation, evaluates electronic filter performance, solves problems in fluidics, evaluates astronomical observations and serves as an interface between analog and digital systems — to mention a few. Put this lab assistant on your payroll and you'll be spending the time you save undertaking more projects. Contact your Philbrick / Nexus sales representative for complete details and specifications. Or write, Philbrick/Nexus Research, 25 Allied Drive at Route 128, Dedham, Massachusetts 02026.
