Calendar of Events

National Meetings

July

8-11. **Soil Conservation** Service and Experiment Stations, Clemson, S.C. (G. R. Craddock, Agronomy and Soil Dept., Clemson Univ., Clemson)

9-13. American **Therapeutic** Soc., Essex House, New York, N.Y. (R. T. Smith, 37 Narbrook Park, Narberth, Pa. 19072)

12. American Assoc. for the Study of **Headache**, New York, N.Y. (S. Diamond, 5214 N. Western Ave., Chicago, Ill. 60625)

13-17. American **Medical** Assoc., New York, N.Y. (F. J. L. Blasingame, 535 N. Dearborn St., Chicago, Ill. 60610)

14-16. American Inst. of **Aeronautics and Astronautics**, San Francisco, Calif. (Meetings Manager, ASME, 345 E. 47 Street, New York 10017)

21-25. American **Veterinary Medical** Assoc., Boston, Mass. (Director, Business Div., 600 S. Michigan Ave., Chicago, Ill. 60605)

22-27. American **Medical Technologists**, Dallas, Tex. (American Medical Technologists, 710 Higgins Rd., Park Ridge, Ill.)

23-26. American Soc. of **Pharmacognosy**, Iowa City, Iowa. (D. P. Carew, College of Pharmacy, Univ. of Iowa, Iowa City 52240)

25-30. American **Podiatry** Assoc., Chicago, Ill. (J. Tipton, Convention Manager, 2301 16th St., NW, Washington, D.C. 20010)

August

1-3. Conference on **Dermatology**, Aspen, Colo. (W. C. Eisele, Univ. of Colorado Medical Center, 4200 E. 9th Ave., Denver 80220)

3-9. National **Poultry Science** Assoc., Fort Collins, Colo. (R. E. Moreng, Animal Science Bldg., Colorado State University, Fort Collins 80521)

11-15. National **Medical** Assoc., Houston, Tex. (S. C. Smith, 520 W St. NW, Washington, D.C. 20001)

12-14. American Inst. of **Aeronautics and Astronautics**, Pasadena, Calif. (W. J. Brunke, Meetings Manager, 1290 Sixth Ave., New York 10019)

12-16. American **Crystallographic** Assoc., Buffalo, N.Y. (W. L. Kehl, Gulf Research & Development Co., P.O. Box 2038, Pittsburgh, Pa. 15230)

Cahn G-2 Electrobalance

Sensitive to 50 Nanograms

(0.00000005 grams)

fast . . . rugged . . . easy to operate

When it comes to ruggedness *plus* sensitivity, no other balance can equal this Cahn G-2—an improved version of the world-famous Gram Electrobalance. It has a capacity of 2.5 grams, precision is one part per million of sample weight, and sensitivity (readability) is 0.00005 mg. Electrical ranges total thirteen . . . from 0-0.5 mg to 0-1000 mg full scale.

All solid state *printed circuitry* is used throughout. And there's a remarkable new all-electronic beam position sensor that makes it unnecessary for you to see the balance position of the beam.

Like all Cahn Electrobalances, this new portable instrument is so rugged and immune to its environment that it can be placed anywhere—even on the tailgate of a station wagon. You don't have to worry about vibration, temperature, air currents, leveling, or stray electrostatic and magnetic fields. And, since it can be read remotely from outside, you can put it in high vacuum or high pressure, in an oven or cryostat, dry box or humidity chamber . . . use it in temperatures from below -20°C to above 110°C .

Why not ask us for the entire G-2 story!

- | | |
|-----------|---|
| B-1371X | Cahn G-2 Electrobalance, Model 4000, complete with stirrups, pans, calibrating weights, forceps and instruction manual. For 100/117/130 volts ($\pm 20\%$), 60 cycles, 10 watts. Price \$1,475.00 |
| B-1371-2X | Cahn G-2 Electrobalance, Model 4001. Similar to Model 4000, but with battery power supply (batteries included). Price 1,355.00 |

Bio-Rad Second Generation Hydroxylapatite

Bio-Gel® HT

Bio-Rad Laboratories has completed an extensive expansion and improvement of its hydroxylapatite procedure.

With careful design and control, Bio-Rad's Tiselius method hydroxylapatite, Bio-Gel HT, is now superior to previous preparations—commercial or home grown.

The twin conspirators of low flows, inferior crystal strength and excessively fine particles, have been eliminated with no sacrifice in capacity or resolving power.

Flow rates as high as 300ml/hr/cm², five times faster than our previous standard, are now routinely obtained.

Bio-Gel HTP

Over a year ago Bio-Rad introduced dehydrated hydroxylapatite, Bio-Gel HTP.

By means of the same major improvements incorporated into our HT procedures, our powdered product, when rehydrated for use, possesses a respectable flow of 100 ml/hr/cm².

The principal advantage of HTP is its unlimited shelf life and excellent shipping durability.

Chromatographically, the two breeds of the new generation behave the same.

BIO-RAD Laboratories Dept. S-16

32nd & Griffin Ave.
Richmond, California 94804

Gentlemen:
Please send technical literature and pricing on Bio-Gel HT & HTP.

MEASURE BLOOD PRESSURE

From the
heart

The 1017 implantable blood pressure transducer is one of a family of precision, miniature physiological measuring instruments for in-heart measurement.

Because of its size and capability, the 1017 affords maximum performance at minimum cost.

- High output with solid state surety.
- Millivolts capability.
- Can be adapted to any recording device.
- 6.5 millimeters in diameter for easy implantation.

What's in a Name?

like the S&S series of
great **RIBBON** ash-
free filter papers

"Ribbon" means only one thing to a chemist. It means the S&S trademark for its series of highest grade filter papers for use in quantitative analysis. S&S grades are identified by color on the box. Scientists who use these analytical working tools claim they are the highest quality, best performing, lowest ash quantitative filter papers on the market. Select from these premium Ribbon grades.

**No. 589
BLACK
RIBBON**

Rapid. Soft. Loose texture. For coarse and gelatinous ppt's.

**No. 589
GREEN
RIBBON**

Extra thick. Provides increased retention without loss of filter speed.

**No. 589
WHITE
RIBBON**

Medium speed and retention. Quantitative gravimetric analysis.

**No. 589
BLUE
RIBBON**

Dense. Highly retentive. Filtration of crystalline materials.

**No. 589
RED
RIBBON**

High wet-strength. For very fine precipitates.

**S&S 589
Ribbon Series
Ash-Free Filter
Papers—world's
finest, but no
price premium**

**MAIL
COUPON FOR
FREE
SAMPLER**

**SCHLEICHER &
SCHUELL CO.,
KEENE, N. H.**

Please send the analytical filter paper sampler which includes black, white and blue high grade analytical filter papers; plus Conversion Table.

**maybe your
monkey is sick!**

Check his temperature with a YSI Tele-Thermometer and thermistor probe. In just a few seconds you'll know if he has a fever.

Or perhaps you're interested in heart chamber, intramuscular, and major vessel measurements. Maybe you are conducting thermal dilution studies, or want to implant a temperature sensing device in biological tissue.

When you need to measure temperature—lab animals to frozen food packages, beneath the soil, under the sea, or in the air—there is a YSI probe and Tele-Thermometer to do the job. Or if you want to control temperature, we have equipment for that, too.

Take care of your monkey, and write for our catalog of thermistor based temperature measurement and control equipment.

washing machine

Exclusive top-located water inlet... back siphoning is impossible.

Widest range of cycling speeds. Operates with water input from 1½ to 12 liters/min. Fast or slow cycles without extra attachments.

Increased tubing diameter permits faster cycling, complete draining. Slow cycling for soaking and washing—fast cycling for rinsing.

Rinser repeats automatically.

The NEW Nalgene® Unitary Pipet Washer-Rinser

Radically new design eliminates all pipet washing-rinsing problems. Molded in one piece of rigid, unbreakable linear polyethylene, no seams or welds. Use in the sink, connected directly to drainline. Size D for pipets up to 14" long, size E for pipets up to 24". Another new product from Nalge... the innovator in plastic labware. Specify Nalgene Labware from your lab supply dealer. Ask for our 1968 Catalog or write Nalgene Labware Division, Dept. 2718, Rochester, N. Y. 14602.
