

21 different, new, low cost, corrosion-proof laboratory carts.

Electrostatic epoxy coating resists corrosion, takes hard use better than chrome or stainless.

Labconco carts are heavy gauge steel with all welded joints. No bolts or rivets to work loose. All metal surfaces are electrostatically coated with light green epoxy. Fiberglass, compressed asbestos and polyvinyl are other materials used.

■ Prices as low as \$45.00
■ Handsome, compliment any lab.

■ Free, fully illustrated catalog. Just contact your laboratory supply dealer or write Labconco Corporation, 8805 Prospect, Kansas City, Mo. 64132

Bulletin describes Mettler's five new analytical balances

Offered for either macro analytical or semi-micro analytical work, Mettler's five new single pan balances include such features as full-range taring, digital data presentation and a filling guide for high-speed weighing-in.

One-step preweighing is a feature of one macro unit. Another macro and a semi-micro have the Mettler print-out system which provides digital weighing results on adhesive-backed paper tape. Also included is a computer-compatible electronic balance providing an analog signal.

Bulletins are available from laboratory supply dealers or Mettler Instrument Corporation, 20 Nassau St., Princeton, N.J. 08540.

STOP...

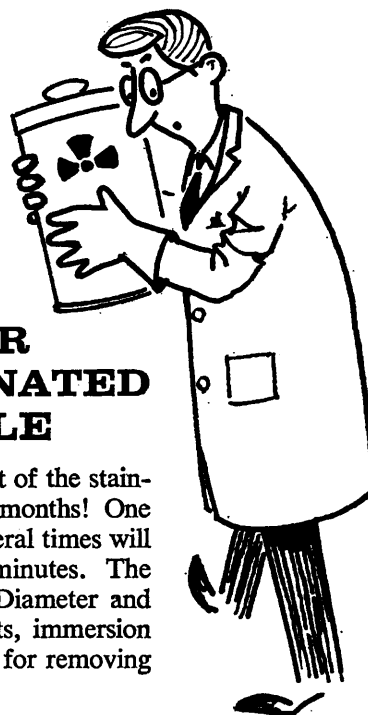

Throwing Away Counting Vials Contaminated by Radioactivity!

NEW BUCHLER REFLUXO-WASHER MAKES CONTAMINATED VESSELS REUSABLE

A busy laboratory can recover the cost of the stainless steel Refluxo-Washer in just a few months! One liter of solvent, which can be used several times will decontaminate 140 vials in just 90 minutes. The Refluxo-Washer is 18" High x 17" Diameter and is equipped with stainless steel baskets, immersion heater, cooling coils and a drain valve for removing contaminated solvents.

Request Buchler Bulletin S2-3100.

At Last...
a balance with
2610 g CAPACITY
0.5 g SENSITIVITY

That's fast
and convenient
and reliable
and reasonably priced!

The Dec-O-Gram is fast because we've added permanent magnetic damping. The tedium of "counting swings" is a thing of the past. Simply place your sample on the pan, adjust the poises, and read the weight.

The Dec-O-Gram offers many exciting new conveniences. The oversized pan and pan bow will accommodate large containers. The balance is not sensitive to out of level conditions (there are no more leveling feet)—just zero the beam and go to work. The balance need not be arrested between weighings. A self-storing specific gravity stand is built into the balance.

The Dec-O-Gram is an Ohaus balance—built to last, no matter how rugged the treatment.

The price? Only \$47.50
 (and this includes the attachment weights)

TRAINING

For Careers in
**HEALTH
 SCIENCE
 ADMINISTRATION**

Through the
 PHS Grants
 Associates Program

Scientists interested in the administrative challenge implicit in Federal programs supporting training, research, and services in health related fields are urged to consider opportunities in the Grants Associates Program of the Public Health Service.

The program provides a unique educational experience designed to prepare each associate for a career in health science administration. For a 12 month period the grants associate participates in an individually structured program. He has the opportunity of working with senior scientist administrators, attending seminars, visiting project sites, attending scientific meetings and taking part in evaluation and analysis of grant supported programs.

The nature of the biomedical and health services programs in the Public Health Service affords many opportunities for exceptionally well qualified Scientist Administrators.

If you hold a doctorate in a discipline related to the biomedical sciences, including the behavioral sciences, have some post doctoral research experience, and are motivated toward the administration of federally supported programs in the biomedical and behavioral sciences, you should investigate the opportunities offered by the Grants Associates Program. The beginning salaries for these Civil Service appointments range up to \$16,946.

For more information write: The Executive Secretary, Grants Associates Program.

protect yourself against laboratory-acquired infection with TSI CONVERSION LABELS

*before
sterilizing*

CONTAMINATED

*after
sterilizing*

STERILE

Identify contaminated laboratory materials with a TSI Conversion Label and reduce laboratory acquired infections. These pressure-sensitive labels stick tight to plastic, glass, cloth or metal. After the material has been serviced in an autoclave or sterilizer the word "STERILE" appears in bold black letters over the word "CONTAMINATED". Properly used, these labels can reduce infectious hazards.

Available through Laboratory Suppliers.

Personnel Placement

POSITIONS WANTED

Administrative Director. Contracts, subcontracts, construction, programs and budgets, public and industrial relations. Box 282, SCIENCE. 7/26

Versatile Biologist, Ph.D. Extensive research in microbial physiology, biochemistry, fermentations, and so forth. Industrial, academic. Box 283, SCIENCE. 7/26

Developmental Biologist, Ph.D. Experience in tissue culture, immunology, electron microscopy. Desires medical research with opportunity for independent investigation. Box 257, SCIENCE.

Marine Science Ph.D. 1968; Botany M.S., Oceanography minor; seeks research or teaching appointment. Woodward Personnel Bureau, 185 North Wabash, Chicago 60601. X

Biochemist, Ph.D., 34, male. Seeks academic position. Biologically oriented. Currently taking postdoctoral training. Publications. Box 287, SCIENCE. X

M.A. in Geology, August 1968. Experience in oil and minerals exploration. Seeks position directing Minerals Exploration and a real economic geology surveys. Prefers Central America or Canada. Minimum salary \$12,000. Box 289, SCIENCE. X

Plant Biochemistry—Food Science, Ph.D., 40, English. Extensive experience research on proteins, amino acids, saponins, polyphenols, also experience in university teaching, contract research as well as senior administration international organization seeks another professional or equivalent level research/teaching or research post. Box 290, SCIENCE. X

UNIVERSITY OF NEW SOUTH WALES, AUSTRALIA LECTURER

SCHOOL OF APPLIED GEOLOGY

Salary: \$A5400 range \$A7300 per annum. Commencing salary according to qualifications and experience.

The successful applicant who will be expected to enter on duty in January, 1969 will lecture in GEOPHYSICS to undergraduates and to graduates in a Diploma in Applied Geophysics, particularly in gravity and magnetic methods. Applicants should hold a higher degree and have experience in teaching and research.

The school is actively engaged in major research projects in geophysics and has good research facilities.

An application form and details of conditions of appointment, including superannuation, study leave and housing scheme may be obtained, from the Appointments Office, P.O. Box 1, Kensington, N.S.W. 2033. The closing date for applications is 31st August, 1968.

UNIVERSITY OF NEW SOUTH WALES, AUSTRALIA PROFESSOR OF PHYSICS

and

PROFESSOR OF THEORETICAL PHYSICS

The University is seeking applications from physicists of distinction to fill two newly-established Chairs in the School of Physics. The main interests of the School are in the area of solid state physics but the University would be pleased to receive applications from persons qualified in any area of physics.

Salary will be \$A12,000 per annum.

Subject to the consent of the University Council, professors may undertake a limited amount of higher consultative work. The University reserves the right to fill either Chair by invitation.

One typed copy of the application, together with the names of three referees and a recent photograph, should be forwarded to the Appointments Office, P.O. Box 1, Kensington, N.S.W. 2033. The closing date for applications is 12 August, 1968.

Biostatistician

Geigy has an opportunity for a skilled biostatistician to join our Pharmaceutical Division.

As a member of a group actively engaged in Drug Research emphasizing clinical investigation your responsibilities will include:

- Design of Experiments
- Analysis of biological & medical data
- Preparation of technical reports, presenting statistical analysis

LOCATION: We are located in beautiful, suburban Westchester County just 40 minutes from New York City.

If interested please send qualifications and salary requirements to: Personnel Director, Geigy Chemical Corporation, Saw Mill River Road, Ardsley, New York 10502

An Equal Opportunity Employer (M/F)

POSITIONS WANTED

POSITIONS WANTED

POSITIONS OPEN

INFORMATION SCIENTIST

We offer this newly created opportunity in our rapidly expanding medical information center.

Position responsibilities will involve close association with medical monitors and related personnel in the design of clinical case reports and protocols. Also included will be participation in the development of a system for the storage, retrieval and report generation of medical data.

Applicant qualifications should include a BS/MS in a biological science with 2-3 years of specific or related experience. Because of your contact with EDP personnel, some familiarity with the use of computer programs will be valuable.

The successful candidate will enjoy excellent benefits including liberal profit sharing and tuition refund and will be associating in the professional atmosphere of an internationally-respected pharmaceutical research firm. Please write in confidence stating current salary to:

Administrator of
Research Employment

SCHERING Corporation

60 Orange St., Bloomfield, N.J. 07003

An Equal Opportunity Employer

SR. ANALYTICAL CHEMIST—GROUP LEADER

Responsible for the organization and operation of the corporate quality control program. Work involves development of analytical methods, procedures, and techniques as related to the synthesis of labeled organic and biochemical compounds used in life science research. Position requires proven ability in the supervision of professional and technician personnel.

Instrumentation experience must include: Chromatography (paper, thin-layer, gas, column); Spectrophotometry (ultraviolet, visible, infra-red); Electrophoresis.

Requirements: Recent Ph.D. with degree in Analytical, Biochemistry, or Pharmaceutical chemistry. M. S. in these fields with strong background in analytical biochemistry will be considered.

Ph.D. BIOCHEMIST—SECTION LEADER

To establish a program involving the enzymatic synthesis of a wide variety of radioactive labeled compounds of biochemical interest. Should be familiar with isolation and purification techniques, enzyme assays, and mechanisms of enzymatic reactions. Must be capable of staffing and supervising a group of degree level biochemists and assume responsibility of another allied established group.

Requirements: Ph.D. in Biochemistry with several years' experience in Enzymology and laboratory supervision.

Send resumé including salary requirements in strictest confidence to:
Mr. Alan Aronson

New England Nuclear Corp.

575 Albany Street, Boston, Mass 02118

ACADEMIC PATHOLOGIST

Position involves chiefly teaching and research, with limited service responsibility. Opportunities for independent or collaborative investigation. Rank according to qualifications. Attractive salary and fringe benefits. Contact **Doctor Joseph A. Sisson, Chairman, Department of Pathology, Creighton University School of Pathology, Creighton University School of Medicine, 2500 California Street, Omaha, Nebraska 68131.**

Ph.D. BIOCHEMICAL GENETICIST

For research and teaching. Salary commensurate with qualifications and experience. Send resumé to: Chairman, Department of Agronomy and Genetics, Agricultural Sciences Building, West Virginia University, Morgantown, W. Va. 26506

UNIVERSITY OF PAPUA AND NEW GUINEA

Physicist, Ph.D. preferred, interested in the fields of micrometeorology or plant biophysics required in 1969. Undergraduate teaching and research in new University.

Salary range: \$A5900-\$A9250 per annum.

Details of travel and accommodation may be obtained from the Registrar and information on present and projected courses from Dr. B. Mainsbridge. Address: Box 1144, P.O., Boroko.

Criminalist (\$825-\$1002) (Starting salary based on qualifications) for City of El Cajon (pop. 50,000). College degree with major work in Criminalistics or a related field and two years' experience desirable. Will be responsible for collecting, analyzing and evaluating evidence relevant to police investigations.

Apply City of El Cajon, Personnel Department, P.O. Box 427, El Cajon, California 92022. Phone 442-4441 (Area Code 714).

A vacancy exists at a scientific institution in Israel for a **Director of its Library**. This is the main library of its kind in the country, specializing in agriculture (and allied sciences) and serving research and teaching staffs, students, and extension workers.
