Forthcoming Events

October

14-22. Pan-Pacific **Surgical Assoc.**, 11th congr., Honolulu, Hawaii. (H. DeVault, Room 236, Alexander Young Bldg., Honolulu 96813)

16-17. Association of **Earth Science Editors**, 3rd annual conf., Houston, Tex. (W. D. Rose, Kentucky Geological Survey, Univ. of Kentucky, Lexington 40506)

16-17. National Conf. on **Fluid Power**, Chicago, Ill. (W. R. Smith, NCFP, 3300 S. Federal St., Chicago 60616)

16-17. **Rapid Excavation**, 2nd symp., Sacramento, Calif. (H. L. Hartman, Dean of Engineering, Sacramento State College, Sacramento 95819)

17-19. Society for **Social Responsibility in Science**, New Haven, Conn. (H. Bloom, SSRS, 221 Rock Hill Rd., Bala-Cynwyd, Pa. 19004)

18-23. American Acad. of **Pediatrics**, Chicago, Ill. (G. E. Hughes, Secretary for Education Affairs, 1801 Hinman Ave., Evanston, Ill. 60204)

19-22. American **Mining Congr.**, San Francisco, Calif. (R. W. Van Evera, Ring Bldg., Washington, D.C. 20036)

19-25. American College of **Gastroenterology**, 34th annual, Houston, Tex. (D. Weiss, Executive Director, ACG, 33 W. 60 St., New York 10023)

20-21. **Polymer-Modified Hydraulic Cements Symp.**, Philadelphia, Pa. (H. B. Wagner, Dept. of Chemistry, Drexel Inst. of Technology, Philadelphia 19104)

20-22. **George H. Hudson Symp.**, 5th annual, Plattsburgh, N.Y. (G. F. Kokoszka, Dept. of Chemistry, State Univ. College, Plattsburgh 12901)

20-22. American Assoc. of **Stratigraphic Palynologists**, University Park, Pa. (A. Traverse, Dept. of Geology and Geophysics, Pennsylvania State Univ., University Park 16802)

21-24. **Optical Soc. of America**, 54th annual, Chicago, Ill. (M. E. Wurga, The Society, 2100 Pennsylvania Ave., NW, Washington, D.C. 20037)

21-25. Association of **Engineering Geologists**, 12th annual, San Francisco, Calif. (P. Vardy, AEG, P.O. Box 985, San Francisco 94101)

23-25. American **Astronautical Soc.**, Las Cruces, N.M. (J. Penwarden, New Mexico State Univ., Las Cruces)

24-26. **Orton Soc.**, 20th annual, New York, N.Y. (V. A. Graff, The Society, 15 Claremont Ave., New York 10027)

25-29. American Soc. of **Anesthesiol-**

3 OCTOBER 1969

continuous scanning

... over the entire 4000-400 cm^{-1} range is just one of the unique features of the Bausch & Lomb/Shimadzu SPECTRONIC 270 IR Infrared Spectrophotometer. An automatic grating-and-filter interchange permits recording absorption spectra *continuously—with no scanning stop*. A vernier gives 10X readability over the paper, there's a 3 slit program for automatic operation, and you can make manual ad-

justments as well. You can get three different size spectra — normal, 2:1 scale expansion on the T axis, and reduced for report writing. There's a 5X wavelength scale expansion and a choice of four scanning speeds—10, 20, 45, and 90 minutes.

Performance is outstanding, too. Exceptionally high resolution—0.8 cm^{-1} at 1000 cm^{-1} (manually); $\pm 0.5\%$ T accuracy; 0.5% T reproducibility; and very low stray light. Care to compare? Write for our Catalog 39-6009, or insist on a demonstration. Analytical Systems Division, Bausch & Lomb, 75922 Bausch Street, Rochester, New York 14602.

Spectronic 270 IR Infrared Spectrophotometer

Coors U.S.A.
Crucibles
first because
they last,
and last,
and last

Extremely refractory and inert to most reagents, Coors laboratory crucibles are quality-made to hold up under repeated use. Coors production consistency insures uniformly thin wall structure for maximum resistance to thermal shock. There's a Coors crucible shape and size for all basic laboratory operations, such as ignition, fusion, filtration, washing, and drying, plus many others for special applications. Readily available in glazed chemical porcelain and high-purity alumina, and on special order in magnesia, thoria, and zirconia. See your local laboratory-supply dealer or write for catalog.

SCIENCE, VOL. 166

For years we've been telling everybody that our tin-lined stills are great. That they're chemically inert in water. That they have purity ratings higher than any competitive still. But some people wouldn't believe us. They went out and bought a glass still anyhow. "It looks like laboratory equipment," they said. "You can see what's going on inside." So. For those who can't live with anything other than a glass still, we now have one for you. The

WE GIVE UP

FI-STILL 4™. And it's better than The Other Glass Still. It's smaller. Has a higher purity rating. Better venting. Higher capacity. And it's a snap to operate. Push button control for all operations. Automatic start/stop. It's a beautiful little still. Even if it is glass. The basic specifications are below. If you'd like the full story, contact your local Barnstead Dealer or Barnstead Company, 225 Rivermoor Street, Boston, Mass. 02132. Tel: (617) 327-1600.

the everything centrifuge

FOR BLOOD BANKS AND SMALLER LABS

EVERYTHING?

Our new model 10R "Clini-Fuge" was designed especially for versatility and high performance at low cost.

It is probably the lowest cost refrigerated centrifuge available today, with a temperature control range from -20°C . to 40°C .

Features include 4000ml capacity trunnion rotor to handle blood bags, blood bottles and 1000ml bottles, continuous reading tachometer, electro-dynamic braking, timer and auto-transformer. Convenience, quality and economy . . . throughout. Write for Data Sheet 10R.

Circle No. 31 on Readers' Service Card

What in the world ARE YOU doing with a Brinkmann Micromanipulator?

First and foremost, Brinkmann micromanipulators were designed for biological applications, so it's no surprise they are widely used in microsurgery and neurophysiology.

What is surprising is that they have so many other uses. For example, in microchemistry, they're used to handle radioactive samples; in electronics, to probe microcircuits, and by physicists to align laser systems.

What could you be doing more efficiently with a Brinkmann micromanipulator? Over 40 different models permit precise movement in magnification ranges up to 750X. There are inverted models, models with calibrated high sensitivity drives, tilting and rotating devices, and a full range of accessories. Let our free catalog start you thinking of some novel new uses. Just write: Brinkmann Instruments, Cantiague Rd., Westbury, New York 11590.

HI PRECISION
RESEARCH

NANOLITER

LABORATORY

CRYOMATIC

HERE'S OUR OSMOMETER LINE, TODAY...

What more can you expect from a leader?

All of these outstanding osmometers are available from Advanced Instruments, the company which first introduced a freezing point osmometer back in 1955.

We set out to become the leaders in osmometry . . . and, if sales are any indication, we have succeeded. A few of the contributions we have made to

the science of osmometry are: The first schools of osmometry, the first modular osmometer, the first thermoelectric refrigerator, the first portable model, and the first Hot Line service system.

Now, in addition to the improved 1969 version of our original model we also have: a new air-cooled refrigerator with the longest life guaran-

tee in the field, a Hi-Precision Research Osmometer, and a Nanoliter Osmometer for samples less than one microliter. We are adding others to our growing line.

To us LEADERSHIP means continuing programs of product improvement, outstanding service, and fast delivery. We think this is the way a leader should act. Don't you?
