SCIENTIST'S BEST FRIEND

ISCO's golden fraction collector will become your pal faster than the cutest furry kind of retriever. It will hold 210 test tubes but measures only 13 x 26 inches. Any tube from 13 to 18 mm diameter will fit without adapters. It will count drops, multiple siphon discharges, or time intervals for each tube. It is available with two different controllers, either of which are in their own cabinets and can be removed from the main unit for remote operation.

The removable racks circulate in a continuous pattern and will retrieve from two columns simultaneously. Both lateral and transverse movement is accomplished with just one motor and two spur gears: there are no chains, belts, ratchets, or levers to wear or become unsynchronized. The base is 1/4" thick solid aluminum—you can't damage it. Its gold anodized finish resists stains and wear. The Delrin racks can withstand almost anything spilled on them. Two models are available, priced from \$650 to \$850.

WE GIVE UP

For years we've been telling everybody that our tin-lined stills are great. That they're chemically inert in water. That they have purity ratings higher than any competitive still. But some people wouldn't believe us. They went out and bought a glass still anyhow. "It looks like laboratory equipment," they said. "You can see what's going on inside." So. For those who can't live with anything other than a glass still, we now have one for you. The

FI-STILL 4™. And it's better than The Other Glass Still. It's smaller. Has a higher purity rating. Better venting. Higher capacity. And it's a snap to operate. Push button control for all operations. Automatic start/stop. It's a beautiful

little still. Even if it is glass. The basic specifications are below. If you'd like the full story, contact your local Barnstead Dealer or Barnstead Company, 225 Rivermoor Street, Boston, Mass. 02132. Tel: (617) 327-1600.
