# Emancipate your time...

## New HP Stat-Pac Makes System 9100 Your Personal Statistician

You have some tough decisions to make. The data is ready but the time-share terminal is booked up for the rest of the day. An educated guess is too risky. What to do? Put the decision-making power of statistical analysis on your desk or bench. The HP System 9100 Computing Calculator puts answers to important questions just a touch away — no need to wait for the services of a programmer or wait in line for a time-share terminal.

The new Stat-Pac, latest addition to the 9100 software, contains 100 *applied* statistical programs that you use for decision-making in every field, from business to scientific

research. Areas covered are general statistics, distribution functions, test statistics, curve fitting, harmonic analysis, sampling theory, analysis of variance, operations research, and reliability and quality control. These programs are formatted and ready for entry into your 9100. For instantaneous entry, store often-used programs on the exclusive magnetic card. Since many of these programs include the HP 9125A X-Y Plotter, you will be free from tedious (and inefficient) hand plotting of graphs and charts.

How's this for a vital statistic? Users tell us that the System

9100 is solving 58% of their problems for \$1.11 per computing hour. Lease, rent, and purchase options available. For further information, or to arrange a "hands-on" demonstration at your desk, write: Hewlett-Packard, P.O. Box 301, Loveland, Colorado 80537. In Europe: Hewlett-Packard, 1217 Meyrin-Geneva, Switzerland.

090/32

**HP CALCULATOR SYSTEM 9100**

# It took us years to develop the best stereo microscope. Now give us a few minutes to prove it.

Let us compare our StereoStar/ZOOM to any stereoscopic microscope in your lab.

Our microscope offers high resolution, larger fields of view, greater working distance. We have as wide a magnification range as you're likely to need: a full 6 to 1 zoom range with magnifications from 3.5 X through 210 X. The zoom control knob is coupled—so that it's conveniently located on both sides, for either left or right-hand operation. And the entire head is easily rotatable through 360°.

135 years of optical excellence went into the AO StereoStar/ZOOM. Let us compare it to any stereo microscope in your lab. After all, if it's worth your money, it's worth your time.

Call your AO Representative. Or write for our convincing 24-page brochure.
