

was convened at the same place on 25 and 26 August 1971. After a review of the new experience gained in the meantime, two protocols for intra-uterine administration (extra- and intraamniotic) were agreed upon for preliminary evaluation during a 4-month period. These and other clinical results as well as various analytical methods will be discussed at a third meeting organized by the Centre in January 1972.

## RESEARCH METHODS IN NEUROCHEMISTRY VOLUME 1

Edited by **Neville Marks, N.Y.S. Research Inst. for Neurochemistry and Drug Addiction, Ward's Island, N.Y. and Richard Rodnight, Inst. of Psychiatry, London, England**

The introductory volume to this new continuing series is based on the actual research experience of the contributors, and it treats the following subject areas: ultrastructure and fragmentation of neural tissue, properties of intact neural tissue, cerebral constituents, and biologically active amines.

Many of the described methods represent innovations in the field of methodology pertaining to brain research, and findings are largely directed to investigators with a chemical or biochemical background.

## VASCULAR MECHANISMS OF THE BRAIN

By **G. I. Mchedlishvili, Georgian Academy of Sciences, Tbilisi, USSR**

A thorough study of the function and role of the vascular mechanisms of the brain in the regulation and pathology of cerebral circulation, this concise, comprehensive work embraces physical, histological, histochemical, and comparative morphological studies, among others. Excellent critical summaries of recent work in the field are also included.
