

NSF Postdoctoral Fellowship Program

Be it resolved that the Council of the American Association for the Advancement of Science urges the National Science Foundation to reinstitute its post-doctoral fellowship program.

Chile

Resolved that, in the light of the action taken by the AAAS Council at its 1 March 1974 meeting, the Board of Directors be requested to obtain and publish in the journal *Science* attributed statements from appropriate agencies on the present position of scholars in Chile, on their economic and professional status, conditions of employment, teaching, research, publication, professional organizations, and related matters.

International Women's Year

Whereas 1975 is designated International Women's Year by the United Nations to advance equality between women and men, full participation of women in the development of their societies, and their increased participation in strengthening world peace,

Therefore be it resolved that the AAAS celebrate International Women's Year by recognizing the achievements of women in the sciences and engineering, by taking appropriate initiatives in the conduct of Association business, and by exercising effective national leadership.

Native American Science and Technology

Be it resolved that the Council of the Association (a) formally recognize the contributions made by Native Americans* in their own traditions of inquiry to the various fields of science, engineering, and medicine, and (b) encourage and support the development and growth of natural and social science programs in which traditional Native American approaches and contributions to science, engineering, and medicine are the subject of serious study and research.

* The term "Native Americans" refers to the descendants of the aboriginal inhabitants of the Americas, often referred to as American Indians.

AAAS Annual Meetings

At the 1 March 1974 meeting, the Council requested the Committee on Council Affairs to place on the agenda for the 31 January meeting a topic of vital concern to the Association and to allow extended time for its discussion. The Committee and the Board of Directors, in a joint meeting in December, selected the topics of AAAS annual meetings.

Dr. Revelle reported on plans for the 1976 annual meeting in Boston. The general cochairmen are Howard Johnson, chairman of the MIT Corporation, and Gerhard D. Bleicken, chairman and chief executive officer of the John Hancock Mutual Life Insurance Company. Vice chairmen are Derek Bok, Richard H. Bolt, Helene Cahners, and H. Bradford Washburn. A planning committee appointed by the Board consists of representatives of the Board, Committee on Council Affairs, AAAS staff, and the local Boston committee. The meeting will emphasize the state of understanding in different scientific fields, although the uses of science for human welfare will not be neglected. The proposed central theme is "Science and Our Expectations: Bicentennial and Beyond." A number of central symposia on interesting current scientific questions are under consideration. Each will deal with what is known, what can be known, what needs to be known, and what ought to be known in that particular area.

In the extended discussion that followed, there was general agreement that the thrust of annual meetings should revert to the state of science itself. Arthur Herschman, director of

Meetings, reported that scientific sessions at the New York meeting had been much better attended than science policy sessions.

A number of other matters relating to annual meetings were considered: dates, number of simultaneous sessions, number of papers per session, desirability of scheduling contributed paper sessions, relations with the media, and relations with affiliated organizations. Some feeling was expressed that while these and other questions should continually be monitored to make sure the meetings are responsive to the wishes of the members, there is no doubt of the importance to the Association of continuing to hold annual meetings.

New Business

One member of the Council inquired whether or not Board or Council committees are active in communicating with the Administration and with Congress in regard to matters related to science and the support of science. Dr. Revelle replied that the Board has been concerned that AAAS has not had the impact on development of national science policy which it should and might, and expects the officers, as individuals or groups of individuals, to be more responsive in the future to opportunities to advise or give testimony on scientific and science-policy issues. Mr. Carey asked the Council's assistance in alerting him to issues on which they would like to see the Association exert its influence.

By acclamation, the Council voted resolutions of appreciation to Drs. Rieser, Abelson, and Mead.

AAAS Officers, Staff, Committees, and Representatives for 1975

Listed below are members of the Board of Directors, staff, Editorial Board of *Science*; officers of the three regional divisions, the Association of Academies of Science, and the AAAS sections; members of committees; and representatives to other organizations.

Delegates to the Council are listed under the groups they represent: the divisions, the Association of Academies of Science, or the sections. Section delegates include those elected by the electorate and those elected by the section committee of the section. Mem-

bers of the Board also serve on the Council. Terms of election or appointment expire on 31 December of the year given in parentheses.

Now concentrate 48 samples at once...

Brinkmann's new Sample Concentrator SC/48 accommodates up to 48 evaporation tubes in a stainless steel rack, eliminating handling of individual samples.

Concentration is by means of heat and vacuum, combined with an air current directed into each sample. A glass cover prevents fumes from escaping and permits use of nitrogen atmosphere. Solid-state circuitry, with a temperature range adjustable from 30 to 100°C. Ideal for drug

screening extractions, column chromatography, liquid scintillation and many other procedures.

For literature, write: Brinkmann Instruments, Cantiague Rd., Westbury, N.Y. 11590. In Canada, write: Brinkmann Instruments (Canada) Ltd., 50 Galaxy Blvd., Rexdale (Toronto), Ont.

When you must know what the others in the field are doing...

and the field is chemistry or chemical engineering. What do you do?

You do what hundreds of others throughout the world do. You contact an Information Center that provides services based on files licensed from Chemical Abstracts Service. The Center's staff will analyze your particular information requirements and work with you to develop methods of satisfying them. Whatever the approach, they will locate the information you need and you will pay only for the service you receive.

AAAS Fellows

A Fellow of the AAAS is defined as one "who has produced a body of work on behalf of the advancement of science that is scientifically distinguished or socially highly significant, or both." Fellows are elected annually by the AAAS Council upon recommendation by the Council Committee on Fellows, which now solicits nominations for consideration at its fall 1975 meeting. Forms may be obtained from the **Executive Office, AAAS, 1776 Massachusetts Avenue, NW, Washington, D.C. 20036.**

Forms completed by an individual member of the Association should be sent not later than 1 May to the secretary of the nominee's voting section for possible inclusion in the slate of nominees to be submitted by the section committee to the Council Committee on Fellows. Alternatively, nomination may be made by any three AAAS Fellows and the form sent directly to the Executive Office for receipt not later than 15 October. The Committee will give equal consideration to nominations from the section committees and from groups of three Fellows.

Names and addresses of the section secretaries will be supplied by the Executive Office upon request.
