# SCIENCE

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Preconvention Issue

# There's a world of science waiting for you at the AAAS Exhibit and Science Film Festival

Over a hundred exhibitors are expected. They will include leading book, magazine, and journal publishers; government programs and agencies; educational displays sponsored by major industries; computer manufacturers; and scientific instrument makers.

Approximately fifty of the best, newly released science films will be shown. Among the award-winning selections: *The Baby Makers* (CRM McGraw-Hill), *About Sharks* (National Geographic Society), *Dawn of Electronic Identification* (Los Alamos National Laboratory), and *Civilization in Ancient Chiapas* (Brigham Young University).

AAAS National Meeting 3-8 January 1982  
Washington, DC

# THE FIRST ANNUAL CONGRESS FOR **HYBRIDOMA RESEARCH**

15-17 FEBRUARY, 1982, LOS ANGELES, CALIFORNIA  
THE BILTMORE HOTEL

## CO-CHAIRMEN

**ZENON STEPLEWSKI • HILARY KOPROWSKI**  
**WISTAR INSTITUTE, PHILADELPHIA, PENNSYLVANIA**

The **FIRST CONGRESS ON HYBRIDOMA RESEARCH** has been organized by **SCHERAGO ASSOCIATES, INC.** and the Journal, **HYBRIDOMA** and **GENETIC ENGINEERING NEWS**. (Published by Mary Ann Liebert Publishers, Inc.)

## SYMPOSIA AND SPEAKERS

### **SYMPOSIUM I: GENES, IDIOTYPES, ANTIIDOTYPES**

#### *Chairman:*

Dr. Joseph M. Davie; Washington University, St. Louis, Missouri, USA

#### *Speakers:*

Dr. Latham Claflin; University of Michigan, Ann Arbor, Michigan, USA

Dr. Leroy Hood, California Institute of Technology, Pasadena, California, USA

Dr. Malcolm Gefer; Massachusetts Institute of Technology, Boston, Massachusetts, USA

Dr. Brian Clevinger; Washington University, St. Louis, Missouri, USA

### **SYMPOSIUM II: TERMINAL DIFFERENTIATION**

#### *Chairman:*

Dr. Giovanni Rovera; The Wistar Institute, Philadelphia, Pennsylvania, USA

#### *Speakers:*

Dr. J. Thomas August; John Hopkins University, Baltimore, Maryland, USA

Dr. Barbara Knowles, The Wistar Institute, Philadelphia, Pennsylvania, USA

Dr. Cox Terhorst, Harvard Medical School, Boston, Massachusetts, USA

Dr. Melitta Schachner; Universitat Heidelberg, Heidelberg, Federal German Republic

### **SYMPOSIUM III: ANTIGENS OF INFECTIOUS AGENTS**

#### *Chairman:*

Dr. Michael B.A. Oldstone; Scripps Clinic and Research Foundation, La Jolla, California, USA

#### *Speakers:*

Dr. Luc Perrin; Hospital Cantonal, Geneva, Switzerland

Dr. Walter Gerhard; The Wistar Institute, Philadelphia, Pennsylvania, USA

Dr. Michael J. Buchmeier; Scripps Clinic and Research Foundation, La Jolla, California, USA

Dr. Dwight Lopes; The Wistar Institute, Philadelphia, Pennsylvania, USA

### **SYMPOSIUM IV: ONCOFETAL ANTIGENS**

#### *Chairman:*

Dr. Richard Metzgar; Duke University, Durham, North Carolina, USA

#### *Speakers:*

Dr. Richard Metzgar; Duke University, Durham, North Carolina, USA

Dr. Zenon Steplewski, The Wistar Institute, Philadelphia, Pennsylvania, USA

Dr. Barton Haynes; Duke University, Durham, North Carolina, USA

Dr. Jean-Pierre Mach; Ludwig Institute for Cancer Research, Lausanne, Switzerland

### **SYMPOSIUM V: T CELL HYBRIDOMAS, HUMAN HYBRIDOMAS**

#### *Chairman:*

Dr. Fritz Melchers; Basel Institute for Immunology, Basel, Switzerland

#### *Speakers:*

Dr. Henry S. Kaplan; Stanford University, Stanford, California, USA

Dr. Carlo Croce; The Wistar Institute, Philadelphia, Pennsylvania, USA

Dr. Tadimitsu Kishimoto; Osaka University Hospital, Osaka, Japan

Dr. Steven Gillis; University of Washington, Seattle, Washington, USA

Dr. Philippa Marrack; University of Colorado, Denver, Colorado, USA

Scientists interested in presenting **poster papers** may obtain abstract forms from Zenon Steplewski, Wistar Institute, 36th & Spruce, Philadelphia, PA 19104.

**Regular Registration: \$275 (includes Banquet and Subscription to the Journal, HYBRIDOMA)**  
**Student Registration: \$175 (includes Banquet only). Must be verified in writing by Department Head.**

Attendance will be limited. Make checks payable to: Scherago Associates, Inc. - Hybridoma.

- ☐ Please reserve \_\_\_\_\_ space(s): Registration fee must be included.
- ☐ Please send a Registration Application.
- ☐ Please send Exhibit Information.

Name \_\_\_\_\_

## COVER

St. John's "Church of the Presidents," Washington, D.C. See page 532. AAAS Annual Meeting, 3-8 January 1982. [Original oil painting by James F. B. O'Brien, Federal Graphics Co., Washington, D.C.]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

## AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

*Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

## U.S. Space Science and Technology

At present, space science is one of the most vital and productive fields in the United States. There is a brisk flow of fresh data into research laboratories throughout the nation, and our current journals of geophysics, solar physics, planetary science, and astronomy are bulging with reports of discoveries and new insights gained by space techniques. Simultaneously, the high technology of the space industry is being used in a rich variety of utilitarian applications of global scope. The most important of these is rapid worldwide radio communication by satellite relay stations, now flourishing as a commercial enterprise. Others, still primarily in the form of government services, are weather observation and forecasting, military reconnaissance and surveillance, navigation, geodesy, and the survey of earth resources on land and at sea. All of these applications are of pervasive civil and military importance, and many evolutionary improvements in the technology are under development.

Despite all of this, a deep distress is spreading through the community of scientists and engineers who are engaged in space work. This distress is not alone a matter of narrow special interest. Rather it portends a grave slippage in our international stature in yet another area of science and technology. The most immediate concern is with the paucity of opportunities for new initiatives. During 1980, the United States placed only 13 satellites into earth orbit and launched no spacecraft into deep space.\* Of the 13 satellites, 8 were primarily for military purposes, 4 were primarily for civil applications, and only 1 was for scientific purposes (the Solar Maximum Mission for refined study of the sun). The corresponding figures for the Soviet Union were 83, 18, and 2, respectively, plus 6 manned flights, for a total of 109. By contrast, in 1966 the United States made 96 launches, including 18 scientific flights and 5 manned missions. As of 1981, it is almost impossible to obtain a go-ahead for a new scientific mission or for an advanced application mission in space. Even previously authorized missions are being terminated or, what may be worse, placed in a status of indefinite postponement on a starvation budget.

It is easy to blame this bleak outlook on shortsighted policy of the Reagan Administration, as many of my colleagues are inclined to do. But I find it difficult to argue that an annual federal expenditure of \$6 billion for the National Aeronautics and Space Administration plus an estimated \$3 billion for space activities of the Department of Defense is not adequate for a vigorous program of new achievements by the immensely capable cadre of space scientists and engineers using the superb instrumentation and technology that exist in the United States. It is time to recognize that the dominant element of our predicament is the massive national commitment of the past decade to development of the space shuttle and the continuation of manned flight. This commitment has diverse bases but arises largely from a (possibly false) analogy with the history of aeronautics and from vaguely perceived future benefits of vast enterprises, such as manufacturing in space, solar power satellites, human colonies in space, and mining of the moon and asteroids. It may well turn out that the space shuttle is a technical success but a financial monstrosity, as on a smaller scale has proved to be the case with the Concorde supersonic transport. Stated otherwise, the shuttle may be ahead of its time, by perhaps 20 to 50 years. Meanwhile, clearly realizable and important objectives in space are languishing.

I consider that our national policy in space is in desperate need of critical and dispassionate reappraisal. A refreshing start has been made by the Corson committee of the National Research Council in its report on *Electric Power from Orbit: A Critique of a Satellite Power System*.†—JAMES A. VAN ALLEN, University of Iowa, Iowa City 52242

\*TRW Space Log, TRW Defense and Space Systems Group (TRW Inc., Redondo Beach, Calif., 1980). †Committee on Satellite Power Systems, Dale R. Corson, chairman (National Academy Press, Washington, D.C., 1981).

# 6-Keto-Prostaglandin F<sub>1α</sub> Thromboxane B<sub>2</sub> [<sup>3</sup>H] RIA Kits

These kits are the first of their kind, and they have outstanding features not easily duplicated in the laboratory.

In each, the antibody demonstrates high affinity and specificity with low cross reactivity. The tracer has high specific activity and purity. The kit as a whole allows you to perform sensitive and reproducible assays without all the time and trouble of preparing your own components.

To reassure you of all of the above, we conduct complete assays with every lot prior to shipment. The resulting standard curves and detailed instructions are included with the kits. Ask us to send you the technical brochure.
