

estimated living expenses); and (iii) a short statement (250 to 300 words) describing the focus of current research, career plans, how training is expected to be applied on return to home country, and interest in attending the Annual Meeting. Material should be sent to Denise Weiner, Office of International Science, at the AAAS address. The deadline for receipt of applications is 1 April 1984.

## Calendar of Major Scientific Meetings

The Office of Communications has prepared a calendar of major scientific meetings for 1984. Copies of the listing are available free of charge from the Office of Communications at the AAAS address.

## Guide to Research Activities Available

The 1984 *Reporters' Guide to Key Research Activities in Science and Engineering* is now available. This *Guide*, which is prepared annually by the AAAS Office of Communications, includes descriptions of five major research projects currently under way at some 150 key research institutions across the country. Copies are for sale at \$5 each (prepaid only) through the Office of Communications at the AAAS address.

## Networking Projects Involving Native American Scientists and Engineers

The Office of Opportunities in Science (OOS) is collaborating with the American Indian Science and Engineering Society (AISES) in an effort to identify and involve a greater number of Native American scientists and engineers in the networking projects of OOS—MESHwork and MWIS—and the programs of AISES.

MESHwork, Mathematics, Engineering, Science, and Health—A Network of Minority Professional Associations, is an effort to increase communication and cooperation among minority scientific societies and between such groups and other associations. MWIS, the National Network of Minority Women in Science, reports national data, advocates for greater participation in science, and pro-

motes local and regional science education and career awareness activities for youth, and professional development programs for minority women in science, mathematics, engineering, and health professions. AISES' purposes are to foster communication and information exchange among Indian scientists, engineers, educators, and students; to increase the number of Indian scientists and engineers; to develop the leadership potential of the Indian science and engineering students and professionals; and to facilitate the application of science and technology to the needs and benefit of the Indian reservations and communities.

AISES and OOS will be working together to create a manpower data base and to bring the educational programs of AISES, particularly the high school and college student chapters, to more Indian students.

For information about this effort, contact Paula Quick Hall, Office of Opportunities in Science at the AAAS address, or Norbert S. Hill, Jr., executive director, AISES, 1310 College Avenue, Suite 1220, Boulder, Colorado 80302.
