# Creating Health Care Solutions for the 21st Century

The dynamic nature of biomedicine requires technically innovative individuals who thrive in a demanding and ever-changing environment. In anticipation of the needs of the next century, our staff is entrusted with creating a working environment where diversity and initiative are encouraged and supported. When it comes to developing solutions for the 21st century and beyond, the sky is the limit.

Providing the highest quality products and services that ensure long-term growth within the evolving health care environment is a commitment shared by all at Hoffmann-La Roche. Our success in the development of breakthrough drugs and therapeutic agents that significantly alleviate human suffering is a direct result of the exceptional talent of our team. With industry leading R&D, state-of-the-art facilities and scientists of the highest caliber, we are acknowledged worldwide for excellence in biomedical science.

To ensure our continued success in this era of rapid change, we are continually seeking talented professionals with the ability and drive to pursue ambitious objectives and aggressive development. If you share in our vision, we can offer you the resources, technical challenges and growth opportunities that you desire. Please send cover letter and resume to: Stella Strazdas, Staffing Department SOR, Hoffmann-La Roche Inc., Nutley, New Jersey 07110-1199. We are an equal opportunity employer.

**Hoffmann-La Roche**

A Member of the Roche Group

## MEHARRY MEDICAL COLLEGE

### Research Centers in Minority Institutions (RCMI)

Applications are invited for **FACULTY POSITIONS** at the **Assistant Professor, Associate Professor** and **Professor** levels in the following areas targeted for expansion in the Schools of Medicine, Dentistry, and Graduate Studies at Meharry Medical College.

**Cell Signaling** - Recruitment of four individuals is expected to sustain the continuing development of a critical mass of investigators studying cell signaling at the institution. Scientists who merit primary appointments in any of the basic science departments (anatomy and cell biology, biochemistry, biomedical sciences, microbiology, pharmacology, and physiology) who are studying biophysical and cell biological approaches to unravel molecular interactions in major cellular signaling pathways are particularly encouraged to apply. Selected candidates will be expected to participate in the further development of molecular neuroscience at the College.

**Human Genetics** - Three molecular geneticists with research interests in developmental genetics, DNA diagnosis and human disease gene mapping/positional cloning are being recruited to enhance human genome research at the College. Candidates are sought who can interact with a wide range of researchers in clinical and basic sciences and who can contribute to the development of a Ph.D. program in genetics.

**Oral Biology** - Recruitment of two clinical and two basic scientists is aimed at further development of a Regional Research Center for Minority Oral Health (RRCMOH) at Meharry Medical College. Preference will be given to clinical scientists with training and research experience in periodontics, endodontics, and prosthodontics. Candidates using current cell and molecular biology approaches to elucidate underlying mechanisms of dental caries, periodontal disease, and tissue development and repair are of particular interest, although individuals whose research interests are in other areas of oral biology, including pain and dental biomaterials will also be considered.

**Environmental Health and Toxicology** - Two toxicologists and one environmental health scientist are being recruited to complement existing expertise at the College. Individuals are sought with research interest in reproductive and/or developmental, immunological, neurological/behavioral toxicology, general toxicology of specific agents, environmental exposure, risk assessment or environmental epidemiology .

**HIV and HIV-Associated Infections** - Two individuals are being recruited to expand a cadre of individuals at Meharry with expertise and commitment to HIV/AIDS research. Recruitment of a virologist studying the molecular biology of HIV or HIV-related viruses and a microbiologist studying the pathogenesis of mycobacteria are of particular interest. However, applications from individuals studying DNA or RNA viruses whose pathogenic mechanisms may help elucidate the progression of HIV infection or HIV-associated opportunistic organisms other than mycobacteria will also be considered.

For all of the positions, individuals are sought who can interact with a wide range of researchers in both clinical and basic sciences. Candidates must have a Ph.D. and/or M.D. or D.D.S. degree(s) and postdoctoral experience in one of the areas targeted for expansion. Candidates for senior faculty positions must have a record of excellence in research and teaching. Applicants for junior faculty positions must demonstrate evidence of their ability to conduct independent research and show potential for excellence in teaching. Appointments, start-up funds, and laboratory space in appropriate basic and/or clinical science departments are available for establishing a vigorous research program. All appointees will be expected to develop and sustain productive extramurally funded research programs and to participate in the professional and graduate teaching programs of the College. These positions are expected to be filled during the 1996-97 and 1997-98 academic years.

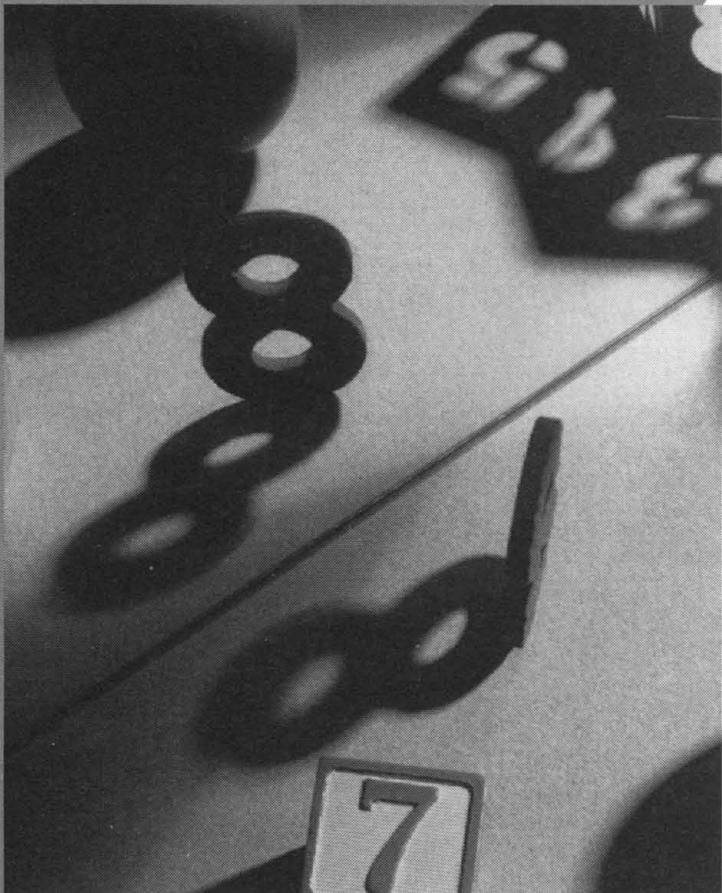

Meharry Medical College, founded in Nashville, Tennessee in 1876, is a historically black health sciences center that enrolls approximately 800 students in programs leading to the M.D., D.D.S., M.S., and Ph.D. degrees. Meharry's commitment to students from underrepresented groups is expressed in its mission statement. In light of its special concern for the health of minorities and the disadvantaged, Meharry emphasizes diseases and health conditions that disproportionately affect ethnic minority populations in its programs of basic, clinical and applied research.

A curriculum vitae, description of research interests, and three letters of reference should be sent by May 31, 1996 to: **Fred Jones, Ph.D., RCMI Program Director, and Vice President for Research, Meharry Medical College, 1005 D.B. Todd Blvd., Nashville, TN 37208.** Applications will be evaluated by the search committee appropriate to specific targeted areas. *Meharry Medical College is an Equal Opportunity/Affirmative Action Employer. Women and members of underrepresented minority groups are especially encouraged to apply.*

## **STRENGTH IN NUMBERS**

Increasingly, the frontiers of science are marked by the limits of computing.

At Oak Ridge National Laboratory, we're pushing those limits. Our 2,048-processor Paragon simulates car crashes for Detroit's automakers. Our PVM software turns multiple workstations into a supercomputer. And our GRAIL program helps biotech labs locate genes with 95% accuracy.

If you'd like to harness the power of high-performance computing to make real advances in real time for the real world, send a resume to ORNL Staffing Office, P.O. Box 2008, Oak Ridge, Tennessee 37831-6216 or e-mail us at [jko@ornl.gov](mailto:jko@ornl.gov). ORNL is an equal opportunity employer committed to building and maintaining a diverse work force.

# *An Expanded Commitment to Worldwide Leadership in Health Care*

**W**yeth-Ayerst is a major division of American Home Products Corporation, a Fortune 150 pharmaceutical research and development company, and a global pharmaceutical leader with expanded products, markets and research.

As we move into the twenty-first century, Wyeth-Ayerst Research is positioned to explore new technologies, innovative molecular approaches and evolving formulations that will give women and mankind a wide range of state-of-the-art pharmaceuticals and products to maximize efficacy, minimize side effect profiles and enhance ease of use.

At Wyeth-Ayerst Research, discovery efforts are focused in the following therapeutic areas:

***Women's Health Care***

***Cardiovascular/Metabolic Diseases***

***CNS Disorders***

***Immunology/Oncology***

***Infectious Diseases***

We encourage inquiries from Scientists interested in opportunities in any of our therapeutic areas at our three Discovery Research Centers of excellence in Radnor, Pennsylvania, Princeton, New Jersey, or Pearl River, New York.

Please forward resumes to our global headquarters: Wyeth-Ayerst Research, Human Resources, P.O. Box 8299, Philadelphia, PA 19101. Or you may fax your resume directly into our centralized research resume database at (610) 989-4854. Principals only. Equal Opportunity Employer, M/F/D/V.

**Radnor, Pennsylvania ■ Princeton, New Jersey ■ Pearl River, New York**

Years from now, people will read about breakthroughs in recycling,  
the solution to ozone depletion, the discovery  
of revolutionary alternative fuels and manufacturing advances.

Who knows?  
They could be reading about you.

At Argonne National Laboratory, we're pursuing the most pressing scientific issues of our time. Issues that affect our nation, and the world itself.

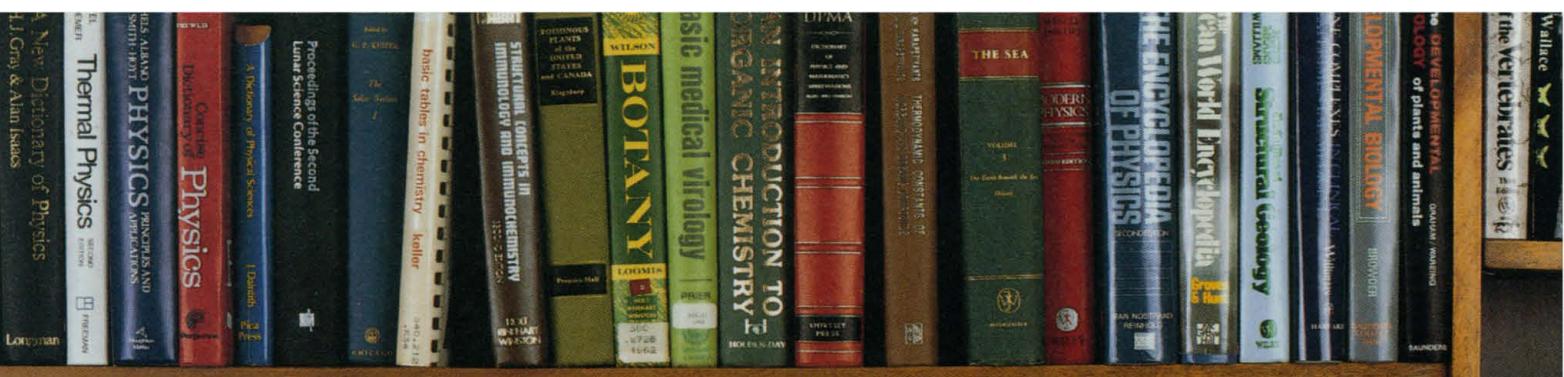

No corporate or academic setting can offer you a greater opportunity to make a more profound and lasting impact.

At Argonne National Laboratory, you can make a breakthrough that makes history. To learn more, send your resume to: Walter D. McFall, Box

SCI-96, Employment and Placement, Argonne National Laboratory, 9700 S. Cass Avenue, Argonne, IL 60439. Telecommunications Device for the Deaf 708/252-7722. Argonne is an equal opportunity/affirmative action employer.

For additional information please refer to Argonne's Home Page on the Internet—<http://www.anl.gov/welcome.html>.

A Great Discovery Awaits You.

## Howard Hughes Medical Institute

# Fellowships for Biological and Biomedical Sciences

The Howard Hughes Medical Institute announces the 1997 competitions for fellowship programs that support training in fundamental biological and biomedical research. Awards, based on international competitions, focus on research directed to understanding basic biological processes and disease mechanisms. Fellowships may be held at academic or nonprofit research institutions.

### Predoctoral Fellowships in Biological Sciences

Up to five years of support for full-time graduate study toward a Ph.D. degree in the areas of biostatistics, cell biology, epidemiology, genetics, immunology, neuroscience, or structural biology. Applicants must not have completed the first year of postbaccalaureate graduate study in biology. *Application deadline: early November.*

### Postdoctoral Research Fellowships for Physicians

Three years of support for training in fundamental research subsequent to at least two years of postgraduate clinical training and no more than two years of postdoctoral research training. *Application deadline: mid-December.*

### Research Training Fellowships for Medical Students

An opportunity for medical students in the United States to explore a burgeoning interest in fundamental research. Support is awarded for one year of full-time fundamental research in a laboratory at the student's medical school or another institution (except NIH in Bethesda, Maryland). *Application deadline: early December.*

### Research Scholars at the National Institutes of Health

Under this joint HHMI-NIH program, medical students in the United States spend an intensive year in research in the intramural program at the NIH in Bethesda, Maryland. Residence is provided at the Cloister on the NIH campus. *Application deadline: early January.*
