

DIVERSITY COUNTS

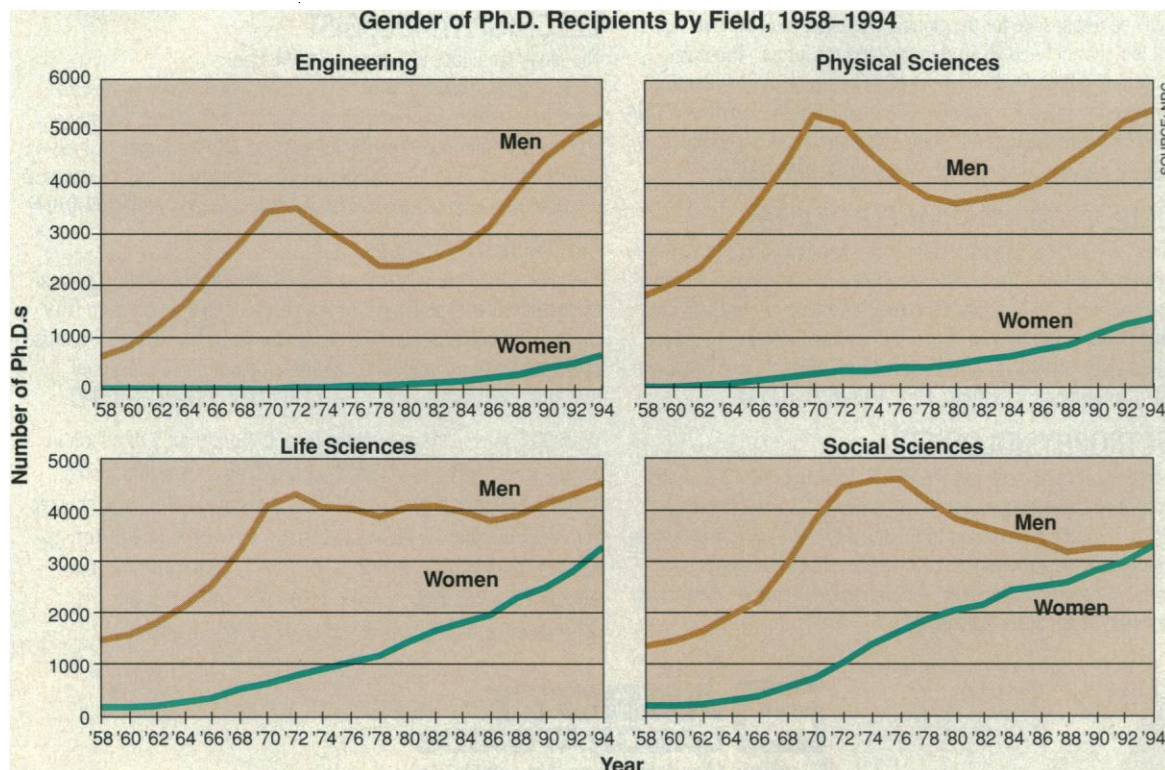

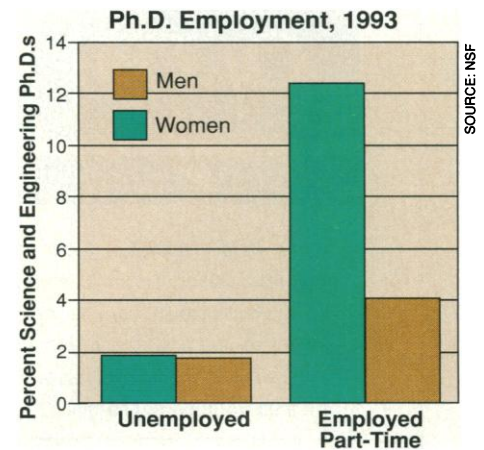

Recent Data on Women and Minorities

Multiple choices. Minority numbers are small in all disciplines, but different groups choose different fields.

Imported talent. Numbers of women Ph.D.s are up, but degrees to noncitizens show the biggest increase.

Partial equality. Men and women have similar unemployment rates, but many more women work part-time.

Waves of women. Men still predominate in physical sciences and engineering, but women have surged ahead in life and social sciences.
