# Don't be limited by *Taq* DNA Polymerase!

## **TaqPlus<sup>®</sup> Precision** PCR System<sup>†</sup>

Higher yields and lower error rates

- Highest accuracy of any PCR polymerase mixture
- Optimized blend of *Pfu* and *Taq2000*<sup>™</sup> DNA polymerases
- 2.7 times more accurate than *Taq* DNA polymerase
- Amplifies templates up to 15 kb

## **TaqPlus<sup>®</sup> Long** PCR System<sup>†</sup>

Higher yields of long PCR fragments

- Amplifies templates up to 35 kb
- Optimized blend of *Pfu* and *Taq2000*<sup>™</sup> DNA polymerases
- More reliable than *Taq* DNA polymerase
- Extension times as short as 30 seconds

Move up to Stratagene's  
*TaqPlus<sup>®</sup> Precision* and *TaqPlus<sup>®</sup> Long*  
PCR systems. Both deliver high yields of PCR  
product. Choose *TaqPlus<sup>®</sup> Long* PCR system<sup>††</sup> for  
rapid synthesis of long PCR fragments. Use new  
*TaqPlus<sup>®</sup> Precision* PCR system<sup>†</sup> instead of *Taq* DNA  
polymerase for improved accuracy.

PRECISION

PERFECT BALANCE

FIDELITY  
LENGTH  
ROBUST  
PCR

HIGH YIELD

Put the balance back  
in your favor with  
*TaqPlus Precision*  
and *TaqPlus Long*  
PCR systems

# What's NXT In Microplate Analysis?

Look at this!

- ✓ Accuracy
- ✓ Ease of Use
- ✓ Versatility
- ✓ High Throughput

## Introducing TopCount NXT

The new TopCount® NXT meets the increasing demands of microsample analysis with easy setup and data management, plus improved sensitivity and accuracy.

- New Windows® NT-based software with a built-in database breaks the information bottleneck.
- New High Efficiency Count Mode (HECM) and flotation assay methods handle your most difficult SPA and FlashPlate® assays.

For unprecedented speed, TopCount NXT measures up to 12 samples simultaneously and features a 40 plate capacity stacker. The result? TopCount NXT processes 50,000 samples per day with LucLite™, Packard's luminescence assay for reporter gene expression.

### Over 500,000,000 Samples... And Counting!

Proven for over six years and in over 1,000 installations, TopCount processes scintillation and luminescence samples faster and more accurately than any other microplate system. Why?

- Only TopCount, with its unique temperature controlled counting chamber, actually delivers consistent results from sample to sample, assay to assay.
- Only TopCount, with its patented crosstalk-free measurement design, delivers high sensitivity for both scintillation assays and Packard's unique Constant-Quanta™ glow luminescence chemistries.

Contact Packard today for more information on the TopCount NXT!

# CFI60.<sup>TM</sup> The number one objective for every objective.

The Nikon Eclipse E800<sup>TM</sup> is America's number one selling research microscope in its class.\*  
What's the secret of our success?

## Our CFI60 Technology.

The CFI60 chromatic aberration-free objectives have overcome the limitations of conventional infinity systems — with the longest working distances, highest numerical apertures, and the widest magnification range and documentation field sizes ever. Nikon's advanced technology in glass formulation, lens manufacture and coating processes have redefined infinity optics. With this technology, we have achieved higher performance levels by incorporating a 60mm objective parfocal distance, a 25mm objective thread size and a standard 25mm field of view.

## Enjoy the widest range in objectives for the most diverse observation requirements.

With over 80 Nikon CFI60 objectives, including our exclusive 0.5X and the high UV transmission universal Plan Fluor series, you'll find we have the lens for you. Also available are several objectives for techniques such as confocal, microinjection and detection of GFP expression that can be utilized for phase contrast, DIC, fluorescence and brightfield. Call 1-800-52-NIKON, ext 331 today for a demonstration of our CFI60 objectives, and you'll soon find the best objective to meet your objective.

## The New GeneAmp® PCR System 9700

Until now, deciding on the best thermal cycler for your lab often meant choosing between superior performance and affordability.

Not any more.

Because now, there's an entirely new thermal cycler that gives you more of what you're looking for.

That thermal cycler is the GeneAmp® PCR System 9700.

The GeneAmp PCR System 9700 combines the proven quality and reliability of the GeneAmp PCR System 9600 with unprecedented performance, the versatility of interchangeable sample blocks and a graphical user interface that streamlines operation.

But perhaps the most attractive feature of the GeneAmp PCR System 9700 is that it packs all of this into one compact instrument that fits easily on your lab bench—and into your budget.

Find out how the GeneAmp PCR System 9700 makes choosing the right thermal cycler easier than ever. In the U.S., call PE Applied Biosystems at 1-800-345-5224. Outside the U.S., contact your local sales representative. Or visit us on the Internet at [www.thermalcycler.com](http://www.thermalcycler.com).

# THIS WEEK IN SCIENCE

edited by PHIL SZUROMI

## Recovering from disaster

After the Cretaceous-Tertiary extinction of the dinosaurs and many other species, marine and terrestrial communities recovered rapidly on a global scale. Jablonski (p. 1327; see the commentary by Erwin, p. 1324) examined the evolutionary diversity of the marine molluscan faunas just before and after the extinction event in four provinces, the Gulf Coast of North America, northern Europe, northern Africa, and Pakistan-northern India. He found that the mollusks rapidly recovered in North America compared to the other three provinces. He then hypothesizes that this extraordinary recovery is directly related to the Gulf Coast region being the closest to the purported asteroid impact into the Yucatan Peninsula at Chicxulub that caused the mass extinction. Not only do these results support the Chicxulub impact event, but they also suggest that the relation of biodiversity to biogeography can be complicated by random events.

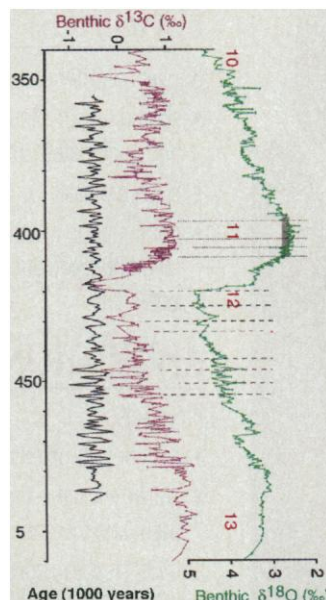

## Abrupt shifts whatever the climate

Recent detailed studies of ice cores and deep sea cores has shown that abrupt changes in temperature and climate occurred every few thousand years or so during the last 50,000 to 100,000 years. Because the patterns persist through the most recent deglaciation and into the Holocene, the climatic patterns seem to be independent of the presence of large ice sheets. Whether these climatic patterns characterized earlier parts of the Pleistocene or developed just during the last glaciation has not been clear. Oppo *et al.* (p. 1335; see the news story by Kerr, p. 1304) show that such millennial-scale climate cycles are recorded in a core from the North Atlantic dating from 300,000 to 540,000 years ago and that the cycles affected sea surface temper-

## Night light

Circadian rhythms maintain vertebrate day-night cycles and are reflected by a large nocturnal increase in circulating levels of melatonin. Gastel *et al.* (p. 1358) now show that brief exposure to light in the middle of the night causes a dramatic reduction in the activity of one of the enzymes needed to produce melatonin, pineal serotonin *N*-acetyltransferase. This regulation occurs through proteasomal degradation, which destroy the enzyme very rapidly.

ature and deep ocean circulation. This record spans an extreme glaciation and a warm inter-

glacial. Thus, millennial-scale climate variability persisted during the past 500,000 years at least, regardless of the global climate, and seems to have involved ocean circulation.

## A perturbed budget

Nitrous oxide ( $N_2O$ ) is one of the most important greenhouse gases. Natural and anthropogenic sources contribute to its atmospheric budget, and identifying their contributions to the global  $N_2O$  concentrations is necessary if we are to understand this century's increase in  $N_2O$  concentrations and attempt to control the emissions. Chemical models are used to infer anthropogenic and natural sources, because  $N_2O$

emissions are difficult to quantify in observations. Prather (p. 1339) shows how the photochemical coupling between  $N_2O$  and stratospheric ozone can be used to identify the atmospheric perturbation due to anthropogenic  $N_2O$  sources in a one-dimensional (vertical diffusion) model that couples the stratosphere, troposphere, and the ocean boundary layer. This perturbation decays 10 to 15 percent more rapidly than the overall  $N_2O$  atmospheric lifetime. Such a faster decay may affect the inference of anthropogenic sources from chemical models.

## Ice core isotopes and geomagnetism

The geomagnetic field shields the Earth from cosmic rays. One detailed record of the past variation of Earth's geomagnetic field may thus be provided by the abundance of cosmogenic isotopes in ice cores. Baumgartner *et al.* (p. 1330) show that the chlorine-36 record from the GRIP ice core in Greenland, which extends back to about 100,000 years ago, fits well with production rates inferred from a reconstruction of Earth magnetic field based on paleomagnetic data from marine sediments. The data support the inference that the magnetic field was particularly weak about 38,000 years ago.

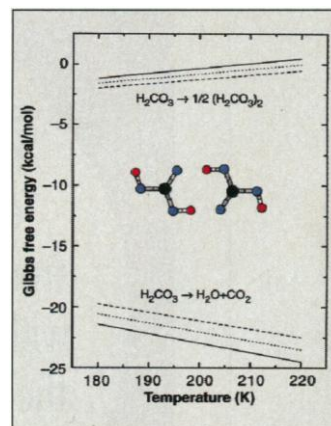

## Cool tropics

During the last glacial maximum, about 21,000 years before present, temperatures across the globe

were lower than they are now, but the exact magnitude of the cooling in the tropics is still subject to debate, especially over the tropical oceans. Climate models have in the past generally only shown a moderate cooling of the tropical sea surface temperatures. Bush and Philander (p. 1341) now show that with a more realistic coupled atmosphere-ocean model that includes important feedbacks between the oceans and the atmosphere, a significant cooling is obtained for the last glacial maximum. This analysis lends support to the interpretation of some paleoclimate data that have indicated sea surface temperature coolings of similar magnitude.

## Carbonic acid chemistry

Carbonic acid,  $H_2CO_3$ , is a key intermediate species in many reactions involving carbon dioxide, water, and bicarbonate and carbonate ions. In most astrophysical and planetary settings, it has been thought to decay too rapidly to carbon dioxide and

water to be present in sufficient amounts for detection. Hage *et al.* (p. 1332) report results of laboratory experiments and thermodynamic calculations that imply that carbonic acid can sublime and recondense without decom-

# **Eradicate pathogens in human plasma**

**...a universal  
approach to inactivate  
or remove pathogens  
from human blood plasma  
without adversely affecting  
the functionality of plasma  
or its derivatives**

## **REQUEST FOR PROPOSALS**

Funding available for innovative methods that:

- eradicate non-enveloped viruses in whole human plasma
- range from initial technology assessment to advanced methods development
- are safe, effective and practical.

It is essential the applicant be in a position to convey to the Consortium the rights in resulting research.

## **FUNDING**

Budget considerations:

- should reflect intensity of research and anticipated outcomes
- one-year basis
- continuation of funding possible upon favorable evaluation of progress and potential.

## **APPLICATION PROCESS**

Proposals:

- may be submitted any time
- will be evaluated promptly on both technical merit and the business case.

The first step is to communicate with the Consortium Executive Director about non-confidential aspects of the proposal.

**Consortium for  
Plasma Science, LLC**

The Consortium for Plasma Science, LLC, is a collaborative effort of five major blood fractionation companies: Alpha Therapeutic Corporation; Baxter Healthcare Corporation; Bayer Corporation; Centeon, LLC; and NABI.

(Continued from page 1277)

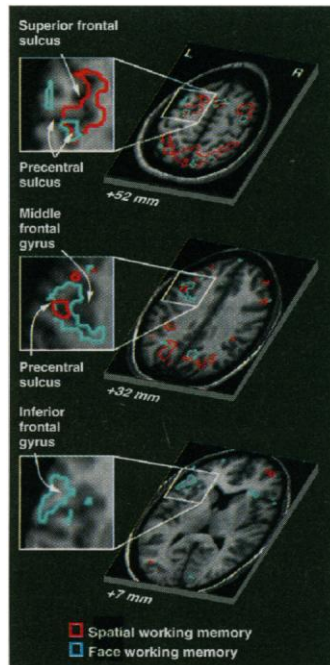

position. Carbonic acid may thus be present in and account for some of the spectral features that have been observed from comets, Mars' ice caps, Earth's upper atmosphere, and the icy planets. In some of these settings, high-energy irradiation of water and carbon dioxide ices may lead directly to the formation of amorphous carbonic acid.

### Molecular mimicry and autoimmune disease

A major cause of human blindness in the United States is herpes stromal keratitis, which is thought to have autoimmune components. Zhao *et al.* (p. 1344; see the news story by Dickman, p. 1305) have shown in a mouse model that the T cells that mediate destruction of the corneal tissue also recognize an epitope of the coat protein of herpes simplex virus–type 1 (HSV-1). When viruses were constructed that did not express this epitope, the virus could no longer induce herpes stromal keratitis. Thus, investigations into a mouse model of blindness led to insights into the pathogenesis of the disease and provide evidence that molecular mimicry is important in a virally induced autoimmune disease.

### A place for working memory

Although there is general agreement on the existence and location of a monkey brain area that mediates working memory—the storage of information for immediate use—the situation in humans has been debated. Through the use of functional imaging, Courtney *et al.* (p. 1347) provide evidence for the existence of such a region and for its unexpected location. An area in the superior frontal sulcus was found to be specialized for working

memory of spatial locations, as compared to working memory of faces, and to be distinct from a neighboring brain area (the frontal eye field) that subserves eye movements. Although the relation of the human working memory domain to the frontal eye field is similar to that in monkeys, this domain is located more superior and posterior with respect to the whole brain than the working memory domain in monkeys.

### Modeling brain waves

The connectivity of excitatory neurons can, in response to a discrete stimulus, yield waves of depolarization that travel quickly across a network of cells. Recent results from electrophysiological studies of brain slices indicate that inhibitory neurons can trigger such synchronous activity as well. Rinzel *et al.* (p. 1351) construct a model of such a network and reproduce the wave-like recruitment of neurons. They go on to explore the influence of cellular properties, such as the reversal potential, on the propagation speed, frequency, and spatial patterning.

### A time for flowers

Plants make the transition from vegetative growth to production of flowers in response to developmental cues and seasonal changes in the length of the day. Guo *et al.* (p. 1360; see the commentary by Suárez-López, p. 1323) have found that blue- and red-light photoreceptors work together to regulate the time of flowering. In *Arabidopsis*, the *CRY2* gene, which encodes a blue-light photoreceptor, is the same gene as affected in the late-flowering mutant *fla*. The photoreceptors together work through regulation of the gene *CONSTANS* to determine the shift to the reproductive phase.

### Synaptic specialization

Can the same nerve form different types of synapses with different targets? At the anatomical level, the answer is a clear yes. Maccaferri *et al.* (p. 1368) now show that, in the hippocampus mossy fiber, synapses with pyramidal cells have distinct biochemical and electrophysiological characteristics from the synapses formed with interneurons. Thus targets of the same neuron will respond differentially to the same stimulus, which will then influence the computational properties of the hippocampus.

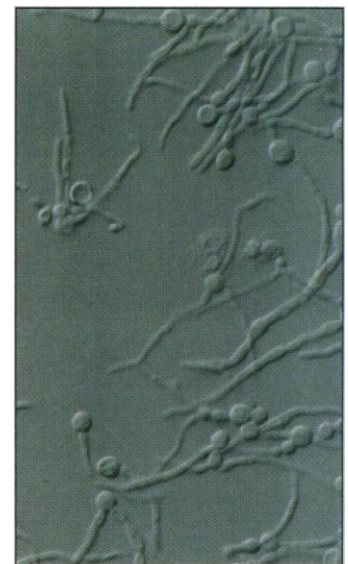

### Inside the auxin pathways

Auxin, a plant hormone, is vital to the regulation of plant growth and development. Several genes are important in the response to auxin, and biochemical studies have identified certain nuclear proteins that change their expression with auxin treatment. However, linkage between these two experimental approaches has been elusive. Rouse *et al.* (p. 1371) have now cloned one of the genes that regulates the auxin response and show that the encoded protein resembles those that are induced in response to

auxin. The gene, *IAA17/AXR3*, thus forms a link in the early parts of the auxin signaling pathway.

### Critical *Candida* gene

Infection with the fungus *Candida albicans* can be fatal in premature infants, diabetics, surgical patients, and immunocompromised individuals. The ability of *C. albicans* to adhere to cells and its ability to change to a filamentous form are linked to its pathogenicity. Gale *et al.* (p. 1355) deter-

mined that one gene, *INT1*, is necessary for both processes and the ability of *C. albicans* to kill mice. Disruption of the activity of this gene may be important in the design of therapeutics.

### Src and long-term potentiation

The role of tyrosine phosphorylation in the induction of the cellular correlate of learning, long-term potentiation or LTP, has been established for some time. Lu *et al.* (p. 1363) now clarify which kinase is likely to be responsible, and identify the nonreceptor protein tyrosine kinase, Src, as necessary and sufficient for the induction of hippocampal LTP.

## Now see faint light images with high sensitivity and high resolution.

### Convenient operation and high-quality images for heretofore unavailable benefits:

- Optimized exposure time is easily fixed by checking the monitor image using one-by-one exposure mode.
- The captured image is promptly displayed while using the automatic range scope.
- Capture of a faint light image even in an ordinary room using the LAS-1000 "intelligent Dark Box."

### Now a Single System captures chemiluminescent, fluorescent and chemifluorescent images.

When a fluorescent or chemifluorescent image is captured with this system, a blue-LED epi-illuminator can be used to excite the related dyes. This optional epi-illuminator operates at a wavelength of 470nm.

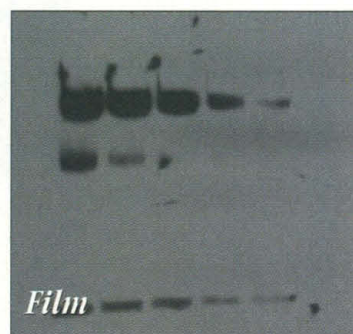

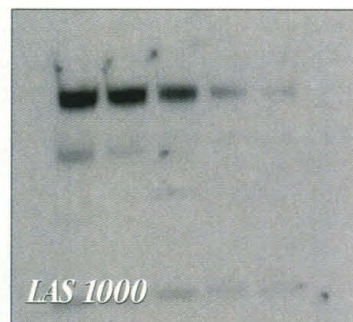

The Fujifilm LAS-1000 accepts Membrane or Gel samples up to 25x25cm size and allows use of a variety of reagents:

- Chemiluminescence — Use CDP-Star<sup>®</sup>, ECL<sup>™</sup>
- Fluorescence — Use EtBr, SYBR<sup>®</sup> Green I and II, FITC
- Chemifluorescence — Use AttoPhos<sup>™</sup>

### New cooled 1.3M pixel CCD camera acquires images with high sensitivity and high resolution.

This revolutionary new camera can handle continuous exposure up to a full hour. Other new features include:

- One inch CCD chip (each pixel is covered with a micro lens)
- Installed electronic cooling device (Peltier element)
- Highest quantitation performance — 4 orders of magnitude linearity and 16,384 gradations (14 bits)
- The industry's brightest lens (F:0.85, optional installation)

### Comparison of LAS-1000 and X-ray film sensitivities.

*ECL<sup>™</sup> chemiluminescence.*

*Western blotting of the protein from a rat brain, 4-minute exposure.*

*Data Courtesy Mitsubishi Kasei Institute of Life Sciences.*

# Do you want your DNA sequence in 30 minutes?

Time is on your side with the **OpenGene™** Automated DNA Sequencing System by Visible Genetics.

The MicroGene Blaster™ automated DNA sequencer is a compact, fluorescence-based DNA sequencer designed for rapid electrophoresis – 300 bases in 30 minutes.

The Gel Toaster™ photo-polymerizes the MicroCel in 3 minutes. Polymerization is consistent and uniform.

CALL

# Performance measured in Breakthrough Discoveries.

## THE POWER TO EXPLORE, DISCOVER AND SIMULATE THE POSSIBILITIES.

Transforming data into powerful information is the key to success for every discovery research organization. Silicon Graphics® workstations are the most powerful means of doing just that through visualization. Our systems combine outstanding performance, industry-leading graphics and the broadest range of applications for today's leading pharmaceutical, chemical and biotech companies.

Silicon Graphics O2™, OCTANE™ and Onyx2™ workstations comprise the broadest range of scalable high-performance platforms. Enhanced CPUs offer greater applications performance so you can tackle more complex designs and analyses, handle bigger data sets, create powerful models and generate remarkable images. Focus more clearly on any problem. Turn data into understanding, turn understanding into insight. Reach the breakthroughs that only Silicon Graphics workstations can help you discover.

### Desktop Performers.

## Coming in 1998! The 150<sup>th</sup> Anniversary AAAS Membership Directory

The American Association for the Advancement of Science 150<sup>th</sup> Anniversary Membership Directory, scheduled for release in September 1998, will be the most up-to-date and complete reference ever compiled of the more than 140,000 AAAS members.

Members will be listed in the directory alphabetically by last name, with separate listings of members organized by sectional affiliation, geographical location and e-mail address. A separate section will highlight the names of more than 9,000 Fellows of AAAS.

AAAS has contracted with the Bernard C. Harris Publishing Company to produce the directory. In the fall of 1997, questionnaires were mailed to all AAAS members. Starting in February 1998, Harris representatives will begin contacting members by telephone to verify their listings in the directory and to offer them an opportunity to order their personal copy.

**ORDER YOUR COPY OF THE  
DIRECTORY TODAY.**

Published by the American Association for the Advancement of Science (AAAS), Science serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in Science—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

# BEEGGXACT.

THE MOST COMPLETE LINE OF NON-TOXIC MOUSE EMBRYO TRANSFER PRODUCTS.

Sigma offers more than 20 products — enzymes, hormones, media and medium supplements — pre-screened for use in the *in vitro* manipulation and maintenance of preimplantation mouse embryos. This broadly-based product line features M2 and M16 media in liquid and powdered form, plus embryo-tested water, mineral oil and other reagents — all created to the highest standards.

Because these products are screened for toxicity in a working

mouse embryo system, you are spared the time and expense of reagent testing. Our product screening requires that at least 80% of the embryos reach blastocyst stage. Not only do our Mouse Embryo Transfer products save time and money, they protect your valuable transgenic embryos and experimental results.

The quality you expect from Sigma. The assurance you require. You could say we've been very *eggxacting* with our Mouse Embryo Transfer products. And, you'd be right.

For more information, speak to one of our Technical Service representatives. Call toll free at 800-848-7791, or collect at 314-771-5765, Ext. 3950. E-mail: [sigma-techserv@sial.com](mailto:sigma-techserv@sial.com)

# RetroNectin™ Dish

**Retrovirus-Mediated Gene Transfer  
Becomes Routine With Pre-Coated Dish!  
Easy, Quick and Highly Efficient!**

Recombinant Human Fibronectin  
Fragment CH-296 Significantly  
Enhances Retrovirus Mediated Gene  
Transfer into Mammalian Cells  
Including Established Cell Lines.

## RetroNectin™ Dish

CH-296 Pre-coated Dish (35 mm  $\phi$ ) for Greater Convenience.

\* Code # T110A: 10 dishes/package

## RetroNectin™

Lyophilized CH-296 for Greater Versatility.

\* Code # T100A: 0.5 mg/vial, & Code # T100B: 2.5 mg/vial

### Notes:

Any commercialization of products resulting from the use of material and/or technology requires a license from Takara Shuzo Co., Ltd.  
#1 RetroNectin™ is covered by Patents issued to Takara Shuzo Co., Ltd. (US Patent No. 5,198,423 and equivalents in other countries)  
#2 A method to increase the efficiency of retrovirus mediated gene transfer (WO 95/26200) is licensed to Takara exclusively and worldwide.

RetroNectin™ IS INTENDED FOR RESEARCH USE  
ONLY. NOT FOR USE IN DIAGNOSTIC OR  
THERAPEUTIC PROCEDURES.

# no one is immune to being first.

## Ask Christine Jacobs.

As the 1997 prize winner, she discovered that being published in *Science*, winning US\$20,000, a free trip to Stockholm and appearing in this ad can be quite a shot in the arm.

If you are a recent Ph.D. graduate in the field of molecular biology, you are eligible to enter the 1998 Amersham Pharmacia Biotech & *Science* Prize for Young Scientists. Just send us an essay based on your graduate thesis, and we'll take it from there.

## What's in it for you.

The grand prize is US\$20,000 with an additional seven runners-up winning US\$5,000 and being announced in *Science*. The winning essay will be published in full. The award ceremony will be held in Sweden in early December. The Grand Prize winner will feature in next year's Amersham Pharmacia Biotech & *Science* Prize for Young Scientists advertisement. As an additional bonus, all winners and finalists receive a free subscription to *Science*.

## Call for entries.

To be eligible, you must have received your Ph.D. between January 1 and December 31, 1997. Your thesis has to be in the field of molecular biology and submitted to us in the form of a 1,000-word essay which describes your work and places it in perspective with regard to the field of molecular biology. The essay can be written in English, French, German, Spanish, Japanese or Chinese (Mandarin).

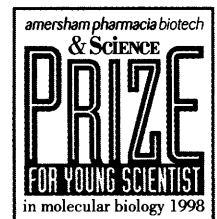

MVC Stockholm

*Christine Jacobs discovered the mechanism  
that bacteria use to defend themselves  
against antibiotics.*

The closing date is May 31, 1998. All prizes will be presented in Sweden in December 1998. Full details, and the required entry form can be collected from:

- \* the administrator of the award committee at the address below
- \* from the *Science* homepage at <http://www.aaas.org/science/prize.htm>
- \* from the Amersham Pharmacia Biotech homepage at <http://www.apbiotech.com>

## Academic Grant Program

Molecular Devices Corporation is pleased once again to offer a limited number of equipment grants to both U.S. and International academic institutions performing basic research in the fields of pharmacology, cell physiology, and clinical research. The purpose of this program is to provide academic research scientists access to the Cytosensor® Microphysiometer System, at a substantially reduced cost, thereby enabling them to have the opportunity to make novel discoveries, with the ultimate goal of publication.

Briefly, the Cytosensor System is a powerful tool for studying the physiological consequences of receptor activation; it has been shown to be particularly useful for drug discovery and signal transduction research. The System can monitor receptor-mediated responses from living cells in minutes, providing functional dose responses in just a few hours. Receptor activation can be studied even without previous knowledge of the signal transduction pathway.

For a comprehensive information package including guidelines for grant submittal, scientific publications, Application Notes, Technical Bulletins and a Reference Guide please contact:

## THE CANON NATIONAL PARKS SCIENCE SCHOLARS PROGRAM

*"Creating the next generation  
of environmental scientists"*

A collaboration among

Canon U.S.A., Inc.

National Park Service

National Park Foundation

American Association for the  
Advancement of Science

The Canon National Parks Science Scholars Program will award scholarships to four graduate students in 1998. Students selected will receive \$25,000 per year for up to three years to conduct research in the national parks across a variety of disciplines within the physical, biological, social and cultural sciences.

The 1998 competition will focus on four research topics of critical importance to the management of the National Park System and selected by the National Park Service. Students applying for the 1998 scholarships must submit dissertation proposals that address these topics.

For an application and guidelines, contact Dr. Gary Machlis, Program Coordinator, Canon National Parks Science Scholars Program, U.S. Department of the Interior, National Park Service, 1849 C Street, NW (MIB 3127), Washington, D.C. 20240 or e-mail [gmachlis@uidaho.edu](mailto:gmachlis@uidaho.edu).

Applications are due June 15, 1998. Winners will be announced August 15, 1998.

# To be perfectly blunt...

## **New** Our Blunt Vector Kits work better. Faster.

Now go from PCR insert to plating recombinants in less than 1 hour!

### PCR\* Reaction

"Soup" of PCR Products with Heterogeneous Termini

Typical PCR conditions<sup>†</sup> generate a mixture of products with heterogeneous termini<sup>1,2</sup>. This heterogeneity results in difficulty ligating PCR products to either blunt or dT-tailed vectors<sup>3</sup> for cloning purposes. Novagen's **new Perfectly Blunt™ Cloning Kits** simplify cloning of any DNA fragment regardless of composition or condition of 3' termini; blunt ends, 3' overhangs, or ragged ends ligate with equal ease and greater cloning efficiency (3-fold to 24-fold higher). The kits contain everything needed for end conversion, ligation, and transformation.

### End Conversion Reaction

### Advantages of using our Perfectly Blunt Cloning Kits

- New configuration includes NovaBlue Singles™ Competent Cells (single-use aliquots)
- Superior PCR product cloning efficiencies
- NEW!** • Streamlined procedure: Less than 1 hour *including transformation*
- Compatible with PCR products generated by proofreading polymerases (e.g., *Pfu*)
- Independent of 3'-dA addition
- No addition of exogenous sequences to PCR primers
- No restriction enzyme digestion

# GeneQuest™

**The new standard in DNA analysis software.  
On Windows 95, NT and Macintosh.**

Reveal the meaning of your DNA sequence with **GeneQuest™**, the newest addition to the renowned Lasergene suite. This easy to use analysis tool builds on the key items that make Lasergene the world's leading sequence analysis software — Speed, Accuracy and Depth.

## Check out these GeneQuest features:

- coding prediction using Borodovsky's Markov method
- huge sequence capacity
- integrated BLAST search tool
- agarose gel simulation
- complex DNA pattern searching
- RNA folding

**Ask for your brochure and free demo now!**

**DNASTAR**

There's a good measure  
of art in the science  
of custom peptides.

Peptides aren't always so pretty. In fact, some sequences can be downright adventuresome. The art is knowing which ones.

Your project may depend on our peptide. So before we put your sequence together, let us quote on your peptide, and we'll send you a free micrograph T-shirt. **1-800-498-2098**  
<http://www.genosys.com>

we'll take it apart — with a thorough analysis, just to make sure there won't be any surprises later. And if we see a potential problem, we'll tell you. That way, we can talk it over, and offer

suggestions to improve your odds of success. Then, because every Genosys custom peptide comes with a 100% satisfaction guarantee, we'll do our best to get it right.

Of course, you'll get proof of performance: mass spectral analysis for composition, and HPLC for purity. Antisera service and a wide variety of modifications are also available.

Want a closer look? Let us quote on your peptide, and we'll send you a free micrograph T-shirt. To see something really beautiful, place an order.

JUNE 14 - 19, 1998

Donald Hilvert &amp; Kevin Judice, Co-Chairs

Steven Rokita &amp; Thomas von Geldern, Co-Vice-Chairs

- Nuclear Receptors
- Catalysis
- Molecular Recognition
- Protein Design
- Glycobiology
- Membrane Biology / Fusion
- Combinatorial Biology
- Bioinformatics
- Signal Transduction

**BIOPOLYMERS**

SALVE REGINA UNIVERSITY

NEWPORT, RI

JUNE 14 - 19, 1998

Michael Brenowitz &amp; Stephen Harvey, Co-Chairs

- Proteins That Bind Nucleic Acids
- Macromolecular Folding, Proteins
- Macromolecular Folding, RNA
- Water And Macromolecular Interactions
- Single Molecule Measurements
- Nucleic Acid Structure And Ligand Binding
- Modeling Macromolecules
- Multi-Component Protein-Nucleic Acid Complexes
- Keynote Address: Energetics of Folding RNA Tertiary Structures

**CANCER**

SALVE REGINA UNIVERSITY

NEWPORT, RI

AUG. 2 - 7, 1998

Saraswati Sukumar, Chair

Tyler Jacks, Vice-Chair

- Cell Cycle Checkpoints And Death Signals
- Signalling Pathways
- Cancer Susceptibility Genes
- *In Vivo* Model Systems
- DNA Methylation And Loss Of Imprinting
- Telomeres And Telomerase
- Cellular Crosstalk And Cell-Matrix Interactions
- Targeting Angiogenic Pathways
- Cancer Vaccines And Gene Therapy
- Translational Applications Of Molecular Probes
- Cancer Molecular Biology: Achievements Of The Past And The Vision Ahead

**CARDIAC REGULATORY MECHANISMS**

COLBY-SAWYER COLLEGE

NEW LONDON, NH

JULY 19 - 24, 1998

Eduardo Marban, Chair

Donald Bers, Vice-Chair

- Receptors / Signal Transduction
- Ion Channels I, II
- Control Of Cardiac Excitability And Contractility By Energy Metabolism
- Cell-Cell Communication
- Calcium Cycling Proteins
- Excitation-Contraction Coupling
- Links Between Calcium And Force Generation
- Controversies In Excitation-Contraction Coupling
- Pathophysiology Of Hypertrophy And Heart Failure

**CATALYSIS**

COLBY-SAWYER COLLEGE

NEW LONDON, NH

JUNE 21 - 26, 1998

Raymond Gorte, Chair

Wm. Curtis Conner, Vice-Chair

- Oxidation Reactions
- Acid-Base Catalysis
- Automotive Issues
- Polymer Catalysis
- Fine Chemicals
- Other
- Young Faculty Forum

**CELL BIOLOGY OF THE NEURON**

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JUNE 14 - 19, 1998

Susan Amara &amp; Reinhard Jahn, Co-Chairs

Thomas Martin &amp; Peter Seeburg, Co-Vice-Chairs

- Exocytosis
- Physiology Of Neurotransmitter Release
- Synaptic And Developmental Plasticity
- Endocytosis And Membrane Dynamics
- Receptors And Transporters
- Channel Structure And Function
- Molecular Dynamics In Axons And Dendrites
- Protein Clustering And Anchoring Domains In Signal Transduction
- Sensory Systems

**CELLULAR & MOLECULAR MYCOLOGY**

HOLDERNESSE SCHOOL

PLYMOUTH, NH

JULY 19 - 24, 1998

Jay Dunlap &amp; Gillian Turgeon, Co-Chairs

Beth Didomenico &amp; Tom Adams, Co-Vice-Chairs

- Signal Transduction
- Morphogenesis
- Genomics
- Evolution
- Plant Pathogenesis
- Animal Pathogenesis
- Sexual Development
- Regulation
- Mycology, Molecules And Money

**CERAMICS, SOLID STATE STUDIES IN**

KIMBALL UNION ACADEMY

MERIDEN, NH

AUG. 2 - 7, 1998

Gary Messing, Chair

Dawn Bonnell &amp; W. Craig Carter, Co-Vice-Chairs

- How Well Do Microstructure-Property Relations Guide Tailoring Of Ceramics?
- New Perspectives On Processing-Microstructure Relations
- Structure Development By Manipulation Of Colloid Surfaces
- Thin Films - Phase, Orientation And Microstructure Regulation
- Property Control By Tailoring Active Interfaces

(cont. on next page)

- Structurally Superior Ceramics Via Microstructure Control
- Novel Approaches To Tailored Ceramics
- Complex Ceramic Structures

#### **CHEMICAL SENSES: TASTE & SMELL**

SALVE REGINA UNIVERSITY  
NEWPORT, RI

JULY 12 - 17, 1998

John Kauer & Marion Frank, Co-Chairs

- Overall Title: Structure/Function Relationships in Taste and Smell
- Beyond cAMP vs. InsP3: Transduction Diversity in Olfaction
- Sweet Taste - Reconciling Genetics and Receptor Models
- Bitter Taste: The Role of the Glossopharyngeal Nerve
- Expression Systems in Olfactory - What Do We expect?
- The Beginning or End - What is the Role of Maps?
- Transduction of Developmental Signals
- Inhibitory Systems in Taste Processing: What is the Role in Coding?
- Specialist vs. Generalist Systems in Vertebrates vs. Invertebrates

#### **CHEMICAL SENSORS & INTERFACIAL DESIGN**

NEW ENGLAND COLLEGE  
HENNIKER, NH

JULY 12 - 17, 1998

Jiri (Art) Janata, Chair  
Thomas Mallouk, Vice-Chair

- Sensing Systems For Assays
- New Materials
- DNA And Chemical Sensors
- Mechanisms And Interactions In Sensing Layers
- Industrial Sensing Systems
- Solid State Gas Sensors
- Design, Fabrication And Packaging Of Sensors And Arrays
- Virtual Sensors And Conversion Of Data To Information

#### **CHEMOTACTIC CYTOKINES**

NEW ENGLAND COLLEGE  
HENNIKER, NH

JUNE 21 - 26, 1998

Thomas Schall, Chair  
Steve Kunkel, Vice-Chair

- The Chemokine System In Scope And Scale: Molecular Diversity And Functional Understanding.
- The Chemokine System In Hematopoietic Development,

- Leukocyte Trafficking And Regulation - I, II
- Chemokines In Dendritic Cell Biology, Transplantation, And Immunotherapy
- Chemokines In The Biology Of The Nervous Systems
- Chemokines And Infectious Disease (I): Recent Advances In HIV/SIV Research
- Chemokines And Infectious Disease (II): Herpesvirus, Pox Virus And Bacterial Pathogenesis
- Advances In Genetic And Animal Models Of Chemokine Function In Disease And Development
- Technology Advances In Chemokine Function Assessment And Therapeutic Developments In Chemokine Biology

#### **CHEMOTHERAPY OF EXPERIMENTAL & CLINICAL CANCER**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

JULY 26 - 31, 1998

Patrick O'Connor, Chair  
Neil Gibson, Vice-Chair

- Functional Genomics
- Computer Workshop I: Molecular Biology Databases
- Combinatorial Chemistry
- The p53 Tumor Suppressor Pathway
- Computer Workshop II: Molecular Pharmacology Databases
- The Ras Oncogene and Protein Farnesylation
- Signal Transduction
- NIH Grant Workshop
- Clinical Trials
- Cell Cycle Control
- Apoptosis

#### **CHROMATIN STRUCTURE & FUNCTION**

TILTON SCHOOL  
TILTON, NH

JULY 12 - 17, 1998

Carl Wu, Chair  
Susan Gasser, Vice-Chair

- Histone Modification
- Mechanisms Of Silencing
- Replication And Chromatin Assembly
- Chromosome Organization And Condensation
- Imprinting, X-Inactivation, Dosage Compensation
- Heterochromatin And Centromeres
- Transcriptional Insulators And Chromatin Regulators

- Nucleosome Structure And Transcription
- Chromatin And Transcription

\*\* Application deadline voted for conference is May 1, 1998

#### **COMPUTATIONAL CHEMISTRY**

TILTON SCHOOL  
TILTON, NH

JUNE 28 - JULY 3, 1998

Jeffrey Madura, Chair  
Terry R. Stouch, Vice-Chair

- Advances in Quantum Mechanics (Methods and Applications)
- Advances in Computer Simulations (Methods and Applications)
- Advances in QM/MM (Methods and Applications)
- Interfacial Simulations
- Free Energy Perturbation (Methods and Applications)
- Receptor-Substrate Interactions
- Advances in Force-Fields (Methods and Applications)

#### **CORRELATED ELECTRON SYSTEMS**

PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH

JULY 19 - 24, 1998

Laura Greene & Subir Sachdev, Co-Chairs  
Andrew Millis, Vice-Chair

- Spin Chains and Ladders
- Mesoscopic Superconductivity
- Broken Time-Reversal Symmetry
- Heavy Fermions
- Two-Dimensional Electron Gasses

#### **CORROSION, AQUEOUS**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

JULY 5 - 10, 1998

Douglas Sinclair, Chair  
Gerald Frankel, Vice-Chair

- Corrosion Research Applied to Power Generation
- Fundamental Processes on Surfaces
- Corrosion/Reliability Prediction
- Integrity / Structure of Passive Films
- Corrosion Mechanisms and Prevention in Fluid Delivery Systems
- Localized Corrosion
- Reliability of Coatings / Protective Films for Corrosion Prevention

- Corrosion Mechanisms and Prevention with Infrastructure Materials
- Corrosion Research Beyond the Year 2000

#### **DEVELOPMENTAL PHYSIOLOGY (NEW)**

PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH

AUG. 2 - 7, 1998

Lionel Jaffe & Larry Etkin, Co-Chairs

- Oxygen Gradients
- Developmental Waves
- Calcium Gradients
- Cell Tip Growth
- Symmetry Breaking & Polar Transport - I, II, III
- Endogenous Electrical Controls
- Endogenous Mechanical Controls

#### **DIAMOND SYNTHESIS**

QUEEN'S COLLEGE  
OXFORD, UK

AUG. 23 - 28, 1998

Karen Gleason, Chair  
Tom Owano, Vice-Chair

- Gas-Phase Chemistry and Diagnostics
- Surface Chemistry and Mechanisms
- Doping and Defects
- Texture Evolution
- Field Emission
- Negative Electron Affinity
- Optoelectronic Properties
- Mechanical Properties

#### **DISORDER IN MATERIALS**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

JULY 19 - 24, 1998

Sherwin J. Singer, Chair  
Dan A. Neumann, Vice-Chair

- Ionic Solids and Ferroelectrics
- Highly Quantum Behavior in Materials
- Biomaterials and Macromolecular Materials
- Surfaces
- Dynamics in Solids
- Glasses
- Smart Materials

#### **DNA ALTERATION IN TRANSFORMED CELLS**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

AUG. 9 - 14, 1998

Melanie Ehrlich, Chair  
William Bennett, Vice-Chair

- Inherited Mutations Contributing to Oncogenesis
- DNA Methylation and Cancer
- Imprinting and Cancer

(cont. on next page)

- DNA Repair and Oncogenesis
- Late-Breaking Topics
- The Contribution of Karyotypic Instability to Cancer Formation and Tumor Progression
- Inherited Mutations Contributing to Breast Cancer
- Cancer: Endogenous and Hormonal Mechanisms of Mutagenesis
- Cancer Therapy: New Strategies Targeting DNA Damage, DNA Repair, and Apoptosis

#### DRUG METABOLISM

HOLDERNESS SCHOOL

PLYMOUTH, NH

JULY 5 - 10, 1998

Henry Strobel, Chair

Steve Wrighton, Vice-Chair

- Investigations Into The Binding Of And Catalytic Mechanism Of The Cytochromes P450
- The Role Of Phase I And Phase II Enzymes In Estrogen Metabolism / Carcinogenesis
- Prodrug Design, Activation And Targeted Drug Delivery
- Recent Developments In Enzymes Of Phase II Drug Metabolism
- Activities Of "New" Forms Of Cytochrome P450 And The Arachidonate Cascade: A Functional Role For The Hemoprotein In The Oxidative Bioactivation Of Arachidonic Acid
- Transporters And Their Involvement In Drug Bioavailability
- Pharmacogenetic Influences On Drug Metabolism And Availability
- Advances In Bioanalytical Techniques

#### EDUCATION IN MATERIALS SCIENCE (3 DAY)

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JULY 26 - 29, 1998

Thomas G. Stoebe & Thomas P.

Pearsall, Co-Chairs

- The Challenge: Improving and Broadening Introductory Courses in Materials Science and Engineering at the Introductory Level
- Innovations In Materials Education I: New Course Formats, Demonstrations and Classroom Activities That Enhance Learning
- Innovations in Materials Education II: Ideas From Those Who Do It
- Solutions And Approaches: Multimedia, Web-Based

Instruction, Hands-on

Approaches

- Inspiration From Those Who Have Been Thinking About This Problem
- Next Steps for a National Strategy

#### ELECTRODEPOSITION

COLBY-SAWYER COLLEGE

NEW LONDON, NH

AUG. 9 - 14, 1998

Gery R. Stafford, Chair

John L. Stickney, Vice-Chair

- UPD / Electrocrystallization
- Morphology
- Additives
- Deposition Involving Semiconductors
- Nanostructures
- Alloy Deposition
- Novel Materials / Technology
- Electroless Deposition

#### ELECTRON DISTRIBUTION & CHEMICAL BONDING

QUEEN'S COLLEGE

OXFORD, UK

AUG. 30 - SEPT. 4, 1998

Karlheinz Schwarz, Chair

Claude Lecomte, Vice-Chair

- Radiation Sources: Synchrotron, (Polarized) Neutrons, X-Rays, Gamma-Rays, Electron Diffraction
- Instrumentation: Area Vs. 1-D Detectors
- Modeling And Analysis: Maximum Entropy Method, Refinements
- Theory: Density Functional, Order N, Electrostatics
- New Directions: Time-Resolved Phenomena, High Pressure, Electric Field, Excited States
- Biochemistry, Proteins
- Applications: Material Sciences, Molecules And Complexes, Inorganic Solids

#### ELECTRON DONOR / ACCEPTOR INTERACTIONS

SALVE REGINA UNIVERSITY

NEWPORT, RI

AUG. 9 - 14, 1998

Marshall Newton, Chair

Jan Verhoeven, Vice-Chair

- Intra- And Intermolecular Electron, Hole, And Energy Transfer, Including Processes In Polyradical Systems And Duplex DNA
- Novel Spectroscopic Features And Consequences Of Electron Spin In Charge Transfer Systems

- Electron And Energy Transfer And Conductance In Single Atom And Single Molecule Systems
- Interfacial Electron Transfer Involving Film-Modified Metal And Semiconductor Electrodes And Metal Clusters
- Theoretical And Computational Modeling Of Homogeneous And Interfacial Electron Transfer Kinetics And STM Imaging
- Coupling Of Electron Transfer And Energy Transduction
- Formulation And Implementation Of Design Principles For Molecular Electronics, Optoelectronics, Photonics, And Photovoltaics

#### ELECTRON SPECTROSCOPY

NEW ENGLAND COLLEGE

HENNIKER, NH

JULY 26 - 31, 1998

C. Denise Caldwell, Chair

Peter Johnson, Vice-Chair

- Applications Of Electron Spectroscopy In Industry And Medicine
- Photoelectron Spectrometry On A Femtosecond Timescale
- CMR And Other Oxides
- Spectroscopy And The STM
- Probing Nuclear Motion In Atoms And Molecules
- Photoelectron Spectroscopy Of Molecular Clusters
- Soft X-Ray Emission
- New Ideas And Hot Topics From The Posters
- A View Into The Future

#### ELECTRONIC PROCESSES IN ORGANIC MATERIALS

SALVE REGINA UNIVERSITY

NEWPORT, RI

JULY 26 - 31, 1998

Shaul Mukamel, Chair

Dietrich Haarer, Vice-Chair

- Conjugated Polymers
- Excitons In Confined Spaces; Molecular Superlattices
- Single Molecule Optical Spectroscopy
- Charge Transport
- J-Aggregates, Biological Complexes, Dendrimers
- Carbon Nanotubes
- Recent Device Applications, Organic Light Emitting Diodes
- Holographic And Photorefractive Materials
- Semiconductor Nanostructures

#### ENERGETIC MATERIALS

HOLDERNESS SCHOOL

PLYMOUTH, NH

JUNE 14 - 19, 1998

Steve Coffey & Anatoly N. Dremin,

Co-Chairs

Peter J. Haskins, Vice-Chair

- Directions For Energetic Materials Research
- Crystal Morphology And Deformation Effects On Initiation
- Initiation Processes
- New Synthesis
- Combustion
- Localization, Initiation And Modeling
- Fast Spectroscopy
- The Big Picture

#### ENVIRONMENTAL ENDOCRINE DISRUPTORS

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JULY 12 - 17, 1998

Harriette L. Phelps, Chair

Brent D. Palmer, Vice-Chair

- State Of The Art Presentations
- Novel Mechanisms Of Estrogen Toxicity
- Mechanisms Of Endocrine Disruption
- Reproductive Impairments In Non-mammalian Vertebrates
- Reproductive And Developmental Impairments In Mammals
- Developmental Disruption In Non-mammalian Vertebrates
- Impairment Of Neurological Development In Mammals
- Thyroid Disruption And Developmental Effects
- Wildlife Reproduction And Population Impairments

#### ENVIRONMENTAL SCIENCES: WATER

NEW ENGLAND COLLEGE

HENNIKER, NH

JUNE 14 - 19, 1998

Philip Gschwend, Chair

- Anticipating Adverse Effects From Chemicals In The Environment
- Anticipating The Behaviors And Effects Of Metals
- Anticipating The Behaviors And Effects Of Organic Compounds
- Anticipating Photochemical Processes
- Anticipating Biological Processes
- Anticipating Chemical Fates Using Models?
- What Does It Cost Not To Anticipate Environmental Problems?

## ENZYMES, CO-ENZYMES & METABOLIC PATHWAYS

KIMBALL UNION ACADEMY

MERIDEN, NH

JULY 12 - 17, 1998

Donald Hupe & John Blanchard, Co-Chairs

Dan Herschlag & Charles B. Grissom, Co-Vice-Chairs

- Bacterial Lipid and Lipopolysaccharide Biosynthesis
- Protein Prenylation
- The Many Faces of Flavins
- Enzymes: Structure, Mechanism & Mutagenesis I, II
- Bacterial and Fungal Antibiotic Synthesis
- Matrix Metalloproteinases
- Rose Symposium

## GRAVITATIONAL EFFECTS ON LIVING SYSTEMS

COLBY-SAWYER COLLEGE

NEW LONDON, NH

JULY 12 - 17, 1998

Michael L. Evans, Chair

Ruth Anne Eatock, Vice-Chair

- Limits of Gravisensing
- Evolution of Gravisensing / Response Systems
- Cytoskeleton / Extracellular Matrix Interaction
- Evolution & Transduction Mechanisms in Load Bearing Systems
- Evolution / Genetics of Gravitropism and Mechanosensing
- Primitive Gravisensing Systems
- Specialized Mechanosensors
- Cellular Level Systems
- Mechanosensitivity / Development
- Genetics and Sensory Systems
- Astrobiology -- Gravity and Evolution, the Big Picture

## GREEN CHEMISTRY

KIMBALL UNION ACADEMY

MERIDEN, NH

AUG. 16 - 21, 1998

William Tumas, Chair

Roger A. Sheldon & James Clark, Co-Vice-Chairs

- Innovations In Heterogeneous Catalysis
- Advances In Homogeneous Catalysis And Chiral Synthesis
- Green Chemistry In Biocatalysis And Bioprocessing
- Environmentally Benign Solvents
- Environmentally Benign Chemical Processing And Applications
- Special Topics: Industrial Ecology And Global Climate Change

- Environmentally Benign Synthesis
- Heterogenization For Enhanced Catalysis And Separations

## HEMOSTASIS

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JUNE 28 - JULY 3, 1998

J. Evan Sadler, Chair

Lawrence Brass, Vice-Chair

- Toward An Integrated Model Of Hemostasis
- Platelet Signaling Pathways
- Novel Gene And Protein Therapies For Hemostatic And Vascular Disorders
- Integrins And Platelet Communications
- Genes, Development, And Hemostasis
- Cell Surfaces And Cell-Cell Interactions
- Structure And Function Of Protein Domains
- Megakaryocytes And The Birth Of Platelets

## HETEROCYCLIC COMPOUNDS

SALVE REGINA UNIVERSITY

NEWPORT, RI

JUNE 28 - JULY 3, 1998

Paul Ornstein, Chair

Joe Kopopelski, Vice-Chair

- Discovery and Synthesis of Heterocycle-Based Drugs
- Methodology for the Synthesis of Heterocyclic Compounds
- Heterocyclic Natural Products Synthesis
- Biologically Interesting Heterocycles

## HIGH PRESSURE, RESEARCH AT

KIMBALL UNION ACADEMY

MERIDEN, NH

JUNE 21 - 26, 1998

James Schilling, Chair

Isaac Silvera, Vice-Chair

- Life under Extreme Conditions (special session)
- Properties of Hydrogen and Other Molecular Solids at Extreme Densities
- Superconductivity under High and Ultrahigh Pressures
- Materials Science at High Pressure: from Superhard Fullerenes to Novel High-Tc Superconductors
- Unsolved Questions in the Material Properties of Planetary Interiors

- Pressure Effects in Colossal Magnetoresistance Compounds
- Recent Advances in High Pressure Techniques
- Phase Diagrams of Ice, Iron and C60
- Recent Shock-Wave Studies
- Some Recent Developments in Geochemistry and Geophysics
- Neutron Diffraction Studies under Pressure on Exotic Materials
- Synthetic Diamond Films and Crystals
- Effect of Pressure on the Properties of Strongly Correlated Electron Systems
- High-Resolution Thermal Expansion Studies of Matter
- Magnetism at Extreme Densities

## HIGH TEMPERATURE MATERIALS: PROCESSING & DIAGNOSTICS

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JULY 19 - 24, 1998

James Gole, Chair

Nathan Jacobson, Vice-Chair

- Vapor Phase Chemistry
- Vapor Phase Chemistry at the Interface - High Temperature Diagnostics
- Modeling of High Temperature Systems
- Chemical Vapor Deposition and Plasma Diagnostics; Experiments and Modeling
- Interface Reactions / Displacement Reactions
- Fundamental Gas / Solid Reactions at High Temperatures
- High Performance Coatings - Nanostructures, Tribological Coatings, Thermal Barrier Coatings
- High Temperature Nanostructured Materials - From Nanostructures to Nanowires

## HORMONAL & NEURAL PEPTIDE BIOSYNTHESIS

NEW ENGLAND COLLEGE

HENNIKER, NH

AUG. 9 - 14, 1998

Betty Eipper, Chair

Robert S. Fuller, Vice-Chair

- Genetic Models For Understanding Processing Enzyme Function In Vivo
- The TGN: Models For Membrane Protein Localization And Sorting
- Biochemistry And Structural Analysis Of Processing Enzymes

- Sorting Of Luminal Proteins
- Processing Enzymes That Function Outside Of The Secretory Pathway
- Sorting Of Essential Membrane Proteins
- Developmental And Physiological Regulation Of The Synthesis And Processing Of Hormonal And Neural Peptides
- Formation And Maturation Of Secretory Vesicles
- Release Of Bioactive Peptides: The Process Of Exocytosis

## HORMONE ACTION

KIMBALL UNION ACADEMY

MERIDEN, NH

JULY 26 - 31, 1998

David Moore, Chair

Holly Ingraham, Vice-Chair

- Cell Signaling In Development
- Cell Signaling In Apoptosis
- Specificity And Cross-Talk In Kinase Pathways
- Endocrine Regulation Of The Cell Cycle
- Animal Models Of Obesity
- Hormone Activation And Metabolism
- Transcriptional Coactivators
- Metabolic Regulation Of Gene Expression

## ILLICIT SUBSTANCE DETECTION: CHEMICAL AND BIOLOGICAL

SALVE REGINA UNIVERSITY

NEWPORT, RI

AUG. 9 - 14, 1998

David Boyd & Keith Ward, Co-Chairs

Raymond D. Mintz, Vice-Chair

- Policy Overview and Problem Definition
- First Responders
- Continuous Detection
- Medical Aspects of Detection
- Forensic Detection
- Improvised Chemical and Biological Devices
- Government R & D Programs
- Panel Discussion: Policy Considerations and Detection Science

## INDUSTRIAL ECOLOGY (NEW)

COLBY-SAWYER COLLEGE

NEW LONDON, NH

JUNE 7 - 12, 1998

Thomas Graedel, Chair

- Anthropogenic Perturbations of Natural Materials Cycles
- Flows of Materials in the Technological Society - I, II
- Materials Use Applications - I, II
- Assessing Resource Limits - I, II
- Industrial Ecology Futures - I, II

**INORGANIC CHEMISTRY**  
SALVE REGINA UNIVERSITY  
NEWPORT, RI  
JULY 19 - 24, 1998  
Dennis Riley, Chair  
Kim Dunbar, Vice-Chair

- Main Group / Boron Chemistry
- Electronic Aspects of Inorganic Chemistry
- Oxidation Catalysis and Oxygen Binding
- Structure and Bonding
- Mechanistic
- Solid State and Materials Chemistry
- Organometallic Chemistry
- Metals in Biology

**INTERFACES, CHEMISTRY AT**  
KIMBALL UNION ACADEMY  
MERIDEN, NH  
JULY 19 - 24, 1998  
Kyle Vanderlick, Chair  
Leonid Turkevich, Vice-Chair

- Theory and Modeling of Interfaces and Fluid Microstructures
- Small, Medium, and Large Self-Assembling Systems
- Reaction Chemistry at External and Internal Interfaces
- Interface Induced Molecular Assemblies
- Structured Colloidal Assemblies
- Adsorption at Fluid-Fluid Interfaces
- Thin Organic Films and Sensors
- Surface Forces and Colloidal Interactions
- Dynamics at Solid-Fluid Interfaces

**INTERIOR OF THE EARTH**  
NEW ENGLAND COLLEGE  
HENNIKER, NH  
JUNE 28 - JULY 3, 1998  
Michael Gurnis, Chair  
John Vidale, Vice-Chair

- Mapping The Upper Mantle, Lithosphere, And Crust
- Magmatism And The Upper Mantle
- Long Term Tectonic Cycles
- The Continental Lithosphere And Tectosphere
- Rheology Of Lithosphere And Upper Mantle
- Plate Tectonics And Mantle Convection
- Unresolved Problems And Future Directions

**INTERMEDIATE FILAMENTS**  
HOLDERNESS SCHOOL  
PLYMOUTH, NH  
JULY 12 - 17, 1998  
Jean-Pierre Julien, Chair  
E. Birgit Lane, Vice-Chair

- Evolution and Structure of IF Proteins
- Neuronal IFs: Assembly, Transport and Phosphorylation
- Regulation and Function Of IFs
- Regulation and Functions Of IFs: Mouse Models
- Keratins in Skin Disorders and in Cancer
- Neurofilaments in Neurodegenerative Diseases
- Intermediate Filament Linker Proteins
- Emerging Areas and Poster Discussion
- IF-Membrane Interactions

**ION CHANNELS**  
TILTON SCHOOL  
TILTON, NH  
JULY 5 - 10, 1998  
David Clapham, Chair  
Chris Miller, Vice-Chair

- Ion Channels and Control of Transcription
- Ion Channel Structure
- Permeation of Ion Channels
- Ion Channel Gating
- New Channels
- Ion Channel Modulation
- Ion Channel Localization
- Transporters as Ion Channels

**LASER INTERACTIONS WITH MATERIALS**  
PROCTOR ACADEMY  
ANDOVER, NH  
JUNE 7 - 12, 1998  
Richard Haglund, Chair  
David Geohagan, Vice-Chair

- Frontiers In Laser-Materials Interactions: Ultrafast And Ultrasmall
- Electronic Excitations In Laser-Materials Interactions
- Vibrational Excitations In Laser-Materials Interactions
- Quantum-Confined Systems: Fabrication And Applications
- Laser-Liquid Interactions In Thin Films And Biological Systems
- Laser-Based Materials Synthesis And Processing
- Laser-Based Materials Analysis And Applications
- Laser-Generated Plumes And Plasmas: Physics And Applications

- Laser-Fabricated Materials: The Next Generation

**LASERS IN MEDICINE & BIOLOGY**  
KIMBALL UNION ACADEMY  
MERIDEN, NH  
JUNE 14 - 19, 1998  
Joseph Izatt & Willem Star, Co-Chairs

- Optical Spectroscopy For Detection And Monitoring Neoplasia
- Frontiers In Microscopy
- Biomedical Optics And Laser Treatment Of Human Skin
- Photon Migration For Tissue Diagnostics And Imaging
- Optical Coherence Tomography
- Photodynamic Therapy
- Origins Of Tissue Optical Properties And Their Role In Light Transport
- Photothermal And Photomechanical Microeffects
- Therapeutic Laser Applications In Medicine And Dentistry

**LIPOPROTEIN METABOLISM**  
KIMBALL UNION ACADEMY  
MERIDEN, NH  
JUNE 28 - JULY 3, 1998  
David Williams, Chair  
Henry Ginsberg, Vice-Chair

- Membrane-Bound Transcription Factors That Control Lipid Synthesis
- Intracellular Cholesterol Transport: Genetics, Membrane Domains, And Caveolae
- Function And Regulation Of Scavenger Receptor BI
- ACAT: Functional Studies And New Genes
- Metabolism Of Atherogenic Lipoproteins In Humans And Animal Models
- New Lipoprotein Receptors And Receptor Gene Therapy
- Molecular Mechanisms Of VLDL Assembly And Secretion
- Neurobiology Of ApoE And Its Receptors
- Bile Acid Metabolism: Novel Pathways, Orphan Receptors, And Genes That Cause Gallstones

**LYSOSOMES**  
PROCTOR ACADEMY  
ANDOVER, NH  
JUNE 28 - JULY 3, 1998  
Sandra Schmid & Hans Geuze, Co-Chairs  
Juan Bonifacino, Vice-Chair

- Endocytosis At The Synapse

- Mechanisms Of Vesicle Formation
- Molecular Interactions At The Endosomal Surface
- Endocytic Transport And Protein Sorting
- Alternate Pathways To And From The Lysosome
- Lipids And Lipid Trafficking In The Endocytic Pathway
- Endocytosis And Signal Transduction
- Cellular And Viral Virulence Factors

**MACROMOLECULAR ORGANIZATION & CELL FUNCTION**

QUEEN'S COLLEGE  
OXFORD, UK  
SEPT. 13 - 18, 1998  
John E. Wilson & Douglas Kell, Co-Chairs  
Natalie Cohen & Hans Westerhoff, Co-Vice-Chairs

- Cell Structure And Microenvironments
- Cellular Compartmentation And Translocation
- Molecular Basis For Channeled Metabolism
- Non-Invasive Approaches For Exploring Macromolecular And Cellular Organization
- Enzyme Organization And Channeled Metabolism
- Organization Of Gene Expression
- Organization And Compartmentation Of Glycolysis And Glycogen Metabolism
- Integrative Biology
- Cellular Mobility And Intracellular Transport

**MALARIA (NEW)**  
SOMERVILLE COLLEGE  
OXFORD, UK  
JULY 26 - 31, 1998  
Dyann Wirth, Chair

- Malaria Epidemiology: Where Are The Gaps In Our Knowledge?
- Where Do We Stand With Vaccines: Opportunities And Challenges
- Management Of Malaria: What Can We Expect For The 21<sup>st</sup> Century
- Pathology: Do We Know Why Children Die?
- Bednets: Current Status And Prospects For The Future.
- Vector Biology: New Strategies For Vector And Transmission Control?
- The Malaria Genome: What Does It Promise And What Are The Limitations?

(cont. on next page)

- Drugs And Drug Resistance: Challenges From Discovery To The Pharmacy?
- The Human Immune Response: Where Do With Stand With Current Knowledge?
- Cell Biology Of Malaria: What Do We Know About Host-Parasite Interactions?
- Lessons And Insights From Other Diseases

#### **MAMMALIAN GAMETOGENESIS & EMBRYOGENESIS**

PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH  
JULY 5 - 10, 1998  
John J. Eppig, Chair  
Gerald M. Kidder, Vice-Chair

- Physiology Of Gametes And Preimplantation Embryos
- Cell-Cell Communication Regulating Gamete And Preimplantation Embryo Development
- Genomic Modification In Gametes And Preimplantation Embryos
- Gene Expression In Gametes And Preimplantation Embryos
- Regulation Of Meiosis
- Development Of Human Gametes And Preimplantation Embryos
- Chromatin Structure-Function Relationships In Gametes And Preimplantation Embryos
- Translational And Post-Translational Control Mechanisms In Germ Cells And Early Embryos

#### **MECHANISMS OF TOXICITY**

NEW ENGLAND COLLEGE  
HENNIKER, NH  
JULY 26 - 31, 1998  
Cheryl Walker, Chair  
James L. Stevens, Vice-Chair

- Oxidants, Cytokines And Tissue Injury
- Toxicant-Induced Alterations In Gene Transcription
- Receptor-Mediated Toxicity
- Endocrine Disruptors
- Late Breaking Research
- Genetic Susceptibility
- Novel Technologies And Predictive Assays
- Cell Signaling And Apoptosis

#### **MEDICINAL CHEMISTRY**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH  
AUG. 2 - 7, 1998  
James McCarthy, Chair  
William Michne, Vice-Chair

- Targeted Bioavailability
- Gender Based Drug Discovery

- Advances In Membrane And Ion Channel Protein Structure
- New Methods In Pain Control
- Purinoceptors as Targets for Novel Therapeutics
- Screening Technologies for the 21<sup>st</sup> Century
- Implications Of Cloning to the Future of Medicine
- Special Topics in Medicinal Chemistry

#### **MEIOSIS**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH  
JUNE 14 - 19, 1998  
Terry Orr-Weaver, Chair  
Michael Lichten, Vice-Chair

- Chromosome Structure And Nuclear Architecture In Meiosis
- Chromosome Condensation, Alignment, And Synapsis
- Recombination Nodules And Position Of Recombination
- Initiation Of Meiotic Recombination
- Biochemistry Of Recombination And Mismatch Correction
- Homolog And Sister-Chromatid Segregation
- Checkpoints And Feedback Controls
- Control Of The Meiotic Cell Cycle
- Germ Cells And Gametogenesis

#### **MEMBRANE TRANSPORT PROTEINS, PHYSIOLOGICAL & PATHOLOGICAL IMPLICATIONS OF (NEW)**

TILTON SCHOOL  
TILTON, NH  
JULY 19 - 24, 1998  
Matthias Hediger, Chair  
Michael Kavanaugh, Vice-Chair

- Neurotransmitter Transporters - I, II
- Epithelial Absorption Of Amino Acids And Peptides
- Metal Ion Transporters
- Glucose Transport And Pathophysiology
- ABC Transporters And Cystic Fibrosis
- Roundtable Discussion
- Cation And Anion Transporters
- Water And Urea Transport

#### **MICROBIAL STRESS RESPONSE**

NEW ENGLAND COLLEGE  
HENNIKER, NH  
AUG. 2 - 7, 1998  
Bruce Dimple, Chair  
Mary Lidstrom, Vice-Chair

- Starvation
- Responses To DNA Damage
- Pathogen Responses
- Oxidative Stress
- Global Analysis Of Stress Responses
- Regulation Of Antibiotic Resistance
- Ion and pH Stress
- Metal Stress
- Complex Sensing Systems For Physiological Regulation

#### **MICROBIAL TOXINS & PATHOGENICITY**

PROCTOR ACADEMY  
ANDOVER, NH  
JULY 12 - 17, 1998  
Erik L. Hewlett, Chair  
James Kaper, Vice-Chair

- *In Vivo* Apoptosis
- Recent Advances In Technology Applicable To Toxin / Pathogenesis Research
- Regulation Of Gene Expression
- Microbe-Host Signaling
- New Toxins / Mechanisms
- Genomics
- Structural Biology Of Toxins / Virulence Factors
- Secretion Of Toxins / Virulence Factors
- Plant Pathogens And Shared Virulence Factors

#### **MITOCHONDRIA & CHLOROPLASTS**

LES DIABLERETS  
SWITZERLAND  
SEPT. 13 - 18, 1998  
Gottfried Schatz, Chair  
David Stern, Vice-Chair

- Structure And Transmission Of Organelle Genomes
- Evolution And Transmission Of Organelles
- Role In Development And Aging
- Apoptosis And Disease - I, II
- Novel Aspects Of Mitochondrial Cell Biology
- Interactions Between Mitochondria And Chloroplasts
- Nucleo-Organelle Interactions
- Import Of Proteins Into Mitochondria - I, II
- Novel Functional Aspects

#### **MODELING OF FLOW IN PERMEABLE MEDIA**

PROCTOR ACADEMY  
ANDOVER, NH  
AUG. 2 - 7, 1998  
Thomas Hewett, Chair  
Linda M. Abriola, Vice-Chair

- New Technologies And Emerging Applications
- Pore-Scale Phenomena
- Quantitative Geological Descriptions
- Heterogeneity And Upscaling
- Fractured Systems
- Characterization, Parameter Estimation And Uncertainty
- Microbial And Chemical Transport
- Unsaturated Zone Processes And Multiphase Flow
- Remediation And Recovery / Field-Scale Flows

#### **MOLECULAR AND CELLULAR NEUROBIOLOGY (NEW)**

BEIJING, CHINA  
SEPT. 6-11, 1998  
Bai Lu & Chien-ping Wu, Co-Chairs  
Yi Rao, Vice-Chair  
Co-sponsored by the Xiang Shan Science Conferences

- Neural Patterning
- Cell Fate Determination and Differentiation
- Cell Death and Neuronal Degeneration
- Trophic Factors
- Synaptic Development
- Synaptic Plasticity
- Signaling In The Nervous System
- Neurotransmitter Receptors and Ion Channels

#### **MOLECULAR BASIS OF ONE-CARBON METABOLISM (NEW)**

NEW ENGLAND COLLEGE  
HENNIKER, NH  
JUNE 28 - JULY 3, 1998  
F. Robert Tabita, Chair

- Molecular Physiology And Biochemistry: Pathways And Enzymes - I, II
- Molecular Regulation And Genetics - I, II
- Enzyme Structure And Function - I, II
- Molecular Biology-Biochemistry Interface / Genomics And Evolution
- Natural Systems
- Basic Studies With Applied Ramifications

**MOLECULAR BIOLOGY,  
DIFFRACTION METHODS IN  
PROCTOR ACADEMY**  
ANDOVER, NH  
JUNE 21 - 26, 1998  
Randy Read, Chair  
Andy Howard, Vice-Chair

- Crystals
- Pushing The Limits Of Data Collection
- Adventures In Phasing
- New Tools For Fitting And Refinement
- Extreme Crystallography
- Complementary Techniques
- Modeling And Analysis
- Crystallography And Genomics
- Late-Breaking Developments

**MOLECULAR BIOLOGY OF THE  
EGG (NEW)**  
PROCTOR ACADEMY  
ANDOVER, NH  
AUG. 16 - 21, 1998  
Henry Hagedorn & Lynn Manseau,  
Co-Chairs  
S. Y. Takahashi, Vice-Chair

- Oocyte Coverings - The Chorion, Zona Pellucida And Cortical Granules
- The Germ Line In Insects And The Mouse
- The Cytoskeleton - Actin, Microtubules And The Formation Of Ring Canals
- Receptors For Vitellogenin And Sperm, And 'Giant' Receptors
- Vitellogenins - Protein Structure, Regulation Of Gene Expression, And The Effects Of Environmental Contaminants On Reproductive Biology
- Patternning - The Establishment Of Polarity
- RNA Localization And Translational Control

**MOLECULAR CYTOGENETICS**  
PROCTOR ACADEMY  
ANDOVER, NH  
JULY 19 - 24, 1998  
Thomas Cremer & Peter Lichter, Co-Chairs  
Daniel Pinkel & Barbara Trask, Co-Vice-Chairs

- Advances In Microscopy
- Molecular Cytogenetic Methods - I, II
- Genome Scanning
- Chromosomes In Meiosis
- Metaphase And Interphase Chromosomes
- Chromosome And Nuclear Architecture - I, II
- Chromosome Evolution

**MOLECULAR GENETICS**  
SALVE REGINA UNIVERSITY  
NEWPORT, RI  
JULY 19 - 24, 1998  
Patrick O'Farrell, Chair  
Robert Kingston, Vice-Chair

- Developmental Transitions In The Cell Cycle
- Meiosis
- The G1 To S Transition
- Growth Control
- Moving Chromosomes In Mitosis
- Asymmetric Division
- Gene Expression And Cell Cycle Progress
- Heritable Changes In Gene Expression
- Chromatin Structure And Late Replication

**MOTILE & CONTRACTILE  
SYSTEMS**  
COLBY-SAWYER COLLEGE  
NEW LONDON, NH  
JUNE 7 - 12, 1998  
Mary Beckerle, Chair  
Gary Borisy, Vice-Chair

- Keynote Address: Myosin Structure, Function and Regulation
- Motor Mechanics And Molecular Structure Of Cytoskeletal Molecules
- Motors, Membrane Traffic, And Cell Organization
- Regulation Of Actin Assembly And Organization
- Microtubule Assembly And Organization
- Cell Locomotion
- Cell Division
- Signal Transduction And Cytoskeletal Function
- Cytoskeleton, Positional Information And Development

**MULTIPHOTON PROCESSES**  
TILTON SCHOOL  
TILTON, NH  
JUNE 14 - 19, 1998  
Kenneth C. Kulander, Chair  
John Hepburn, Vice-Chair

- Coherent Control Of Quantum Dynamics
- Above Threshold Ionization
- Rydberg Dynamics
- Molecules And Clusters In Strong Laser Fields
- Molecular Structure And Dynamics
- Fragmentation
- Ultrashort Pulses And Ultrashort Wavelengths

**MUTAGENESIS**  
PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH  
JUNE 21 - 26, 1998  
Susan Wallace, Chair  
Josof Jiricny, Vice-Chair

- DNA Polymerase Structure / Function
- DNA Polymerase Fidelity / Lesion Bypass
- Mismatch Repair
- Endogenous Damage: Repair
- Endogenous Damage: Global Responses and Mutagenesis
- Homologous Recombination
- Non-homologous Recombination and Double Strand Break Repair
- Interrelationships Among Repair Pathways and Cell Cycle
- At Risk Sequences in the Human Genome

**MYOGENESIS**  
TILTON SCHOOL  
TILTON, NH  
AUG. 16 - 21, 1998  
Charles Ordahl, Chair  
Barbara Wold, Vice-Chair

- Cardiac Myogenesis
- Skeletal Muscle Patterning
- Molecular Regulation Of Myogenesis
- Specification And Proliferation Of Myogenic Precursor Cells
- Adult Muscle Degeneration And Repair
- Perspectives On Regeneration And Determination
- Smooth Muscle And Vascular Development
- Signalling And Cell-Cell Interactions In Myogenesis
- Myogenic Determination

**NANOSTRUCTURE  
FABRICATION**  
TILTON SCHOOL  
TILTON, NH  
JUNE 21 - 26, 1998  
John N. Randall, Chair  
Christie Marrian, Vice-Chair

- Atom Lithography - Putting Atoms Where You Want Them
- Messing With Molecules - Identification And Construction
- Making Micro Lithography Systems
- Next Generation Lithography With Electrons, Ions, And X Rays
- Next Generation Lithography With DUV And EUV
- Dna Computing Technology
- Nano Electronics
- Micro Electro Mechanical Systems - New Applications

- Artificial Life In A Computer System

**NATURAL PRODUCTS**  
NEW ENGLAND COLLEGE  
HENNIKER, NH  
JULY 5 - 10, 1998  
Steven Davidsen, Chair  
George F. Majetich, Vice-Chair

- Synthetic Methods And Natural Products Total Synthesis
- Chemical Biology Of Natural Products
- Genetic Control Of Natural Product Biosynthesis
- Natural Product Isolation, Diversity And Function
- Pharmaceutical Agents From Natural Products

**NEURAL DEVELOPMENT**  
SALVE REGINA UNIVERSITY  
NEWPORT, RI  
JULY 5 - 10, 1998  
Susan McConnell, Chair  
David Anderson, Vice-Chair

- Neural Induction And Pattern Formation
- Regionalization Of The Neuraxis
- Stem Cells And Fate In Forebrain
- Fate Determination Of Neurons And Glia
- Cell Migration And Axon Outgrowth
- Axon Guidance
- Synaptic And Glial Differentiation
- Plasticity, Systems, And Behavior

**NITROGEN FIXATION**  
COLBY-SAWYER COLLEGE  
NEW LONDON, NH  
JUNE 28 - JULY 3, 1998  
Dennis Dean, Chair  
Lance Seefeldt, Vice-Chair

- Fixing Nitrogen-Overviews of the Genetic-Biochemical-Chemical Systems
- Mechanisms of Gene Regulation
- Related Systems
- Biochemical Mechanism - I, II
- Metallocenter Assembly
- Chemistry of Nitrogen Fixation
- Nitrogen Cycle

**NUCLEAR CHEMISTRY**  
COLBY-SAWYER COLLEGE  
NEW LONDON, NH  
JUNE 14 - 19, 1998  
Lee Sobotka, Chair  
I. Yang Lee, Vice-Chair

- Fusion and Fission Dynamics
- Excitation Energy Generation

(cont. on next page)

- Isospin In Intermediate Energy Reactions
- Time Dependence Of Multifragmentation
- Significance of the Reducibility of Fragmentation Data
- In-Medium Effects(I): Cross Sections And Clustering
- Flow And HBT Results
- In-Medium Effects(II): Mesons Masses And Spectral Functions
- J/Psi Suppression
- Disoriented Chiral Condensate
- Recent PET Results And Hadrontherapy Update
- Poster Session

**NUCLEAR WASTE & ENERGY**  
SALVE REGINA UNIVERSITY  
NEWPORT, RI  
AUG. 2 - 7, 1998  
Alan Waltar, Chair  
Henri Metivier, Vice-Chair

- Energy Overview
- Civilian Nuclear Fuel Cycle
- Military Nuclear Waste
- Nuclear Waste Treatment
- Nuclear Proliferation
- Health Effects of Radiation
- Beneficial Uses of Nuclear Waste
- Environmental Protection
- R&D Futures / Policy Implications

**NUCLEIC ACIDS**  
SALVE REGINA UNIVERSITY  
NEWPORT, RI  
JUNE 21 - 26, 1998  
Alan Lambowitz & Carol Greider, Co-Chairs  
Jim Maher & James R. Williamson, Co-Vice-Chairs

- Genome And Protein Evolution
- RNA Structure and Function
- Transcription
- RNA Splicing And Processing
- DNA Replication
- Chromosome Structure / Chromatin
- DNA Recombination And Repair
- mRNA Translation And Stability
- RNA Transport And Localization

**ORGANIC GEOCHEMISTRY**  
HOLDERNESS SCHOOL  
PLYMOUTH, NH  
AUG. 9 - 14, 1998  
Kenneth E. Peters, Chair  
John I. Hedges, Vice-Chair

- Geochemical Evidence For Past Life On Mars
- Organic Matter Preservation In Sediments
- Geochemistry Of Hydrothermal Ecosystems & Deep-Earth Microbes

- Chemostratigraphy & The Geochemistry Of Major Time Boundaries
- Computational Organic Geochemistry
- Thermochemical Sulfate Reduction
- Generation & Prediction Of Hydrocarbon Gases, CO<sub>2</sub>, And Nitrogen
- Generation & Expulsion Of Hydrocarbons
- Reservoir Fluids, Seals & Dynamic Processes

**ORGANIC REACTIONS & PROCESSES**  
NEW ENGLAND COLLEGE  
HENNIKER, NH  
JULY 12 - 17, 1998  
William Bailey, Chair  
Terry Rathman, Vice-Chair

- Advances in the Synthesis of Complex Organic Molecules and Natural Products
- Developments in Synthetic Methodology
- New Catalytic Bond-Forming Reactions
- Diastereoselective and Enantioselective Reactions
- Bioorganic Transformations
- The Role of Modern Theory in the Development of Organic Reactions and Processes
- Organometallic Reactions
- Pharmaceutical Process Development
- The Human Side of Organic Chemistry: A Photographic Tour

**ORGANIC STRUCTURES AND PROPERTIES**  
UMINONAKAMICHI HOTEL  
FUKUOKA, JAPAN  
SEPT. 6 - 11, 1998  
Yasuhiro Aoyama, Chair

- Supramolecules
- Molecular Alignment
- Molecular Devices
- Fullerenes and Organic New Materials
- Dendrimers and Hyperbranched Polymers
- Nanostructure Control in Organic Crystals

**ORGANOMETALLIC CHEMISTRY**  
SALVE REGINA UNIVERSITY  
NEWPORT, RI  
JULY 26 - 31, 1998  
Richard Schrock, Chair  
Gary Silverman & Richard Fisher, Co-Vice-Chairs

- Chemistry on Surfaces
- Theory and Spectroscopy

- Advances in Olefin Polymerization Catalysis
- New Ligands and Functions
- Fundamental Studies and New Reactions
- Applications to Organic Chemistry and Catalysis
- Chemistry Involving Main Group Elements

**PATTERN FORMATION IN THE EARTH SCIENCES**  
NEW ENGLAND COLLEGE  
HENNIKER, NH  
JULY 5 - 10, 1998  
Ivan L'Heureux & Anthony Fowler, Co-Chairs

- Fundamental Concepts of Pattern Formation in Earth Sciences
- Patterns in Mineral Growth - Observations and Experiments
- Geomorphological Patterns
- Patterns and Fluid Geodynamics
- Temporal Patterns: Earthquakes, Sedimentation
- Patterns in Rocks
- Kinetic Models of Patterns in Earth Sciences
- Geopatterns: New Directions

**PEPTIDE GROWTH FACTORS**  
KIMBALL UNION ACADEMY  
MERIDEN, NH  
AUG. 9 - 14, 1998  
Joan Massague, Chair  
Carl Henrik Heldin, Vice-Chair

- Mitogens And Cytokines - I, II, III
- Hedgehog
- TGF- $\beta$  And BMP - I, II
- Wnt Signaling
- Contact Signaling
- Ephrins And Neurotrophins

**PHOTONUCLEAR REACTIONS**  
TILTON SCHOOL  
TILTON, NH  
JULY 26 - 31, 1998  
William Bertozzi, Chair  
Cornelius Bennhold, Vice-Chair  
Nicole d'Hose, European Coordinator

- The Structure of the Deuteron; Experiment and Theory
- Deep Inelastic Structure of the Nucleon: Spin, Flavor, and Gluons
- Electromagnetic Reactions with Few Nucleon Systems
- Structure Functions and Nucleon-Nucleon Correlations
- Nuclear Electromagnetic Structure Functions from (e,e'x) Reactions
- The Physics of Nucleon Resonances

- Pion and Eta, Photoproduction and Electroproduction
- Electromagnetic Sum Rules and Compton Scattering
- Reactions with Strangeness and Heavy Mesons from the Nucleon

**PHYSICAL METALLURGY**  
HOLDERNESS SCHOOL  
PLYMOUTH, NH  
JUNE 21 - 26, 1998  
Ronald Gibala & Samuel M. Allen, Co-Chairs  
Rusty Gray & John Lewandowski, Co-Vice-Chairs

- Microstructure: New Scientific And Engineering Directions
- Modeling And Simulation Of Microstructures
- Microstructural Analyses Of Solidification And Melting
- Coarsening And Related Microstructural Instabilities
- Advances In Microstructural Characterization
- Novel Microstructures And Their Properties
- Microstructural Control For Money: Some Practical Problems
- New Horizons In Processing Of Microstructures
- What Have We Learned And Where Are We Going?

**PLANT & FUNGAL CYTOSKELETON (3 DAY)**  
PROCTOR ACADEMY  
ANDOVER, NH  
AUG. 9 - 12, 1998  
David G. Drubin, Chair  
Zach Cande, Vice-Chair

- Motile Mechanisms
- Microtubules And Mitotic Regulation
- Strategies For Cell Division And Determination Of Division Planes
- Tip Growth / Polarity And Morphogenesis
- Real Time Analysis Of Cytoskeletal Dynamics
- Cell-Cell Interactions
- Mechanisms Of Actin Cytoskeleton Regulation

**PLANT MOLECULAR BIOLOGY**  
NEW ENGLAND COLLEGE  
HENNIKER, NH  
JULY 19 - 24, 1998  
Pamela Green, Chair  
Robert Last, Vice-Chair

- Nuclear Regulation Of Gene Expression
- Cytoplasmic Control Of Gene Expression
- Gene Silencing
- Plant-Microbe Interactions

(cont. on next page)

- Metabolic Regulation
- Molecular Genetics Of Reproductive Development
- Keynote Lecture: Light, Brassinosteroids, And Arabidopsis Development
- Plant Responses To Environmental Signals
- Hormonal Control

#### PLASMA PROCESSING SCIENCE

TILTON SCHOOL  
TILTON, NH

AUG. 9 - 14, 1998

Gerrit Kroesen, Chair

David B. Graves, Vice-Chair

- New applications of plasma surface processing
- Environmental engineering using plasma technology
- Real-time, on-line plasma diagnostics which can be made robust for industrial application
- Plasma-surface interaction mechanisms governing HDP etching of SiO<sub>2</sub>
- Data needs (modeller's needs for experimental data and input parameters; industry and experimentalist's needs for modelling)
- LTE/PLTE modelling concepts (Saha equation formulation when Te not = Ti, energy balance)
- True 3-D modelling
- Status quo and perspectives - technical and fundamental - of beam experiments for simulation of plasma surface interaction
- Particles in plasmas (nucleation and growth, particle surface engineering)
- Physics of plasma display panels (PDP) and plasma activated LCD (PALC)

#### POINT & LINE DEFECTS IN SEMICONDUCTORS

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

JULY 12 - 17, 1998

Chris G. van de Walle, Chair

T. Kennedy, Vice-Chair

- Hydrogen Implantation In Silicon: Point Defects, Platelets, And Exfoliation
- Diffusion In Silicon; Interactions Of Point Defects With Dopants
- Point Defects And Dopant Impurities In GaN
- Extended Defects In GaN
- H<sub>2</sub> Molecules In Semiconductors
- Interactions Of Hydrogen With Deep Impurities In Silicon
- Defect Reactions During Processing

- Defects And Doping In Diamond
- Dislocations In Epitaxial Strained Layers
- Advances In Microscopic Techniques
- Isotopically Controlled Semiconductors
- Defect Complexes In III-V Compounds

#### POLYMER PHYSICS

SALVE REGINA UNIVERSITY  
NEWPORT, RI

AUG. 16 - 21, 1998

Edwin L. Thomas, Chair

Tim Lodge, Vice-Chair

- Polymer Properties
- Organizing Forces In Block Copolymers
- Structure Formation In Solution
- Dynamics And Interactions In Polymer Solutions
- Branched Polymers
- Polymers In Advanced Technologies
- Electro-Optical Properties
- Polymer Crystallization
- Polymer Surfaces And Adhesion

#### POLYMERS (EAST)

NEW ENGLAND COLLEGE  
HENNIKER, NH

JUNE 14 - 19, 1998

Virgil Percec, Chair

Mark Green & Gerhard Wegner, Co-Vice-Chairs

- Will Synthetic Methods Approach Biological Precision?
- Biological Synthetic Methods. How Far Can They Go?
- Early Versus Late Transition Metal Catalysts In Olefin Polymerizations
- Dendrimers. From Science Fiction To New Technology
- Precise Control Of Nonconventional Copolymer Microstructure By Catalysis
- Nitroxide Versus Metal Mediated Living Radical Polymerizations. Similarities And Differences
- Polymer Complexes And Bottlebrushes
- Controlled Architecture And Shape By Combinations Of Synthetic Methods And Molecular Interactions
- Scope And Limitations Of Living Radical Polymerization
- Round Table Discussion: What Industry, Academia And Government Desire From Each Other

#### POSTHARVEST PHYSIOLOGY

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JULY 12 - 17, 1998

Donald Grierson, Chair

Michael S. Reid, Vice-Chair

- Biochemistry And Molecular Biology Of Ripening
- Flavour, Texture And Phytonutrients In Fruits And Vegetables
- Flower Development and Senescence
- Regulation of Ripening And Senescence In Fruits, Vegetables, And Flowers
- Wounding, Chilling And Physiological Disorders
- Defence Responses And Resistance To Pathogens
- Preservation, Quality And Safety Of Fresh And Lightly Processed Products
- New Technologies and Challenges for the Developed and Developing Worlds

#### PROTEOGLYCANS

PROCTOR ACADEMY  
ANDOVER, NH

JULY 5 - 10, 1998

Jeffrey Esko, Chair

Renato Iozzo, Vice-Chair

- Fast Breaking Developments
- Proteoglycan Structure And Assembly
- Protein-Carbohydrate Interactions
- Signaling And Cytoskeletal Interactions
- Cell Adhesion And Migration
- Microbial Adhesion And Model Organisms
- Proteoglycans In Skeletal Development
- Proteoglycans In Neurobiology
- Proteoglycans In Cardiovascular Biology
- Gene Disruptions And Pathophysiology
- Therapeutic Strategies Based On Proteoglycans And Glycosaminoglycans

#### PROTEOLYTIC ENZYMES & THEIR INHIBITORS

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

JULY 5 - 10, 1998

Charles Craik, Chair

Wolfram Bode, Vice-Chair

- Infectious Disease - Viral, Bacterial & Parasitic
- Cell Death
- Extracellular Signaling And Degradation
- Intracellular Signaling And Degradation

- Tissue Remodeling And Cell Proliferation
- Blood Processes
- Factors That Determine Substrate And Inhibitor Recognition
- Gene Regulation By Proteolysis
- Cell Cycle Regulation And Proteolysis
- Special Lecture: Proteolysis, Yesterday, Today And Tomorrow

#### RADIATION CHEMISTRY

SALVE REGINA UNIVERSITY  
NEWPORT, RI

JULY 5 - 10, 1998

Michael D. Sevilla, Chair

K. D. Asmus, Vice-Chair

- Radiation Chemistry of Novel Substances
- New Techniques in Understanding Radiation Processes
- Young Investigators Symposium
- Low Energy Electrons in Polar Media and Molecules
- Radiation Chemistry in Ion Beams
- The Radiation Chemistry of Solutions
- Applied Radiation Chemistry
- Radiation Damage to Biological Molecules
- Electron Transfer in Biomolecules and DNA

#### REPRODUCTIVE TRACT BIOLOGY

PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH

JULY 5 - 10, 1998

Kenneth Korach, Chair

- Ovarian Responsiveness
- Developmental Influences On The Reproductive Tract
- Environmental Effects On Reproduction
- Implantation And Placental Function
- Clinical Reproductive Tract Biology
- Male Reproductive Tract Function
- Hormone Action And Responsiveness
- Reproductive Effects In Knockout Mice
- Signaling Pathways In Reproductive Tract Tissues

## **SALT & WATER STRESS IN PLANTS**

QUEEN'S COLLEGE  
OXFORD, UK

AUG. 16 - 21, 1998

J. Andrew C. Smith, Chair  
Elizabeth A. Bray, Vice-Chair

- Physiological Ecology Of Stress Adaptation
- Growth Responses And Cell Water Relations
- Membrane Transport And Ionic Relations
- Regulation Of Gene Expression
- Stress-Induced Signaling Mechanisms
- Metabolic Responses To Stress
- Genetic Engineering Of Stress Tolerance

## **SCIENCE EDUCATION: EUROPE**

QUEEN'S COLLEGE  
OXFORD, UK

SEPT. 20 - 25, 1998

Louis Pignolet & Bolko Flintjer, Co-Chairs  
Glenn A. Crosby & Hans Bouma, Co-Vice-Chairs

- International Perspectives On Science Education And Teacher Training
- International Perspectives On Pre-College Learning And Teaching
- New Programs And Strategies In Science Education
- Research In Teaching Methods And Learning
- The Role Of Research And Evaluation In The Reform Of Science Education
- Reform In Science Education In The US
- Frontier Science
- Representing Science To The Masses - Science Education In The News Media And Museums
- Multimedia And Visualization In Chemistry And Science Teaching
- Interdisciplinary Approach In Teaching Introductory Chemistry
- Demonstrations - An Alternative To Virtual Reality

## **SECOND MESSENGERS & PROTEIN PHOSPHORYLATION**

KIMBALL UNION ACADEMY  
MERIDEN, NH

JUNE 7 - 12, 1998

Joseph Beavo, Chair  
Jeremy W. Thorner, Vice-Chair

- Regulation And Function Of Cyclic Nucleotides - I, II
- 2<sup>nd</sup> Messenger Regulation Of Immune Function
- Macromolecular Signaling Units

- Reversal Of Protein Phosphorylation
- Phospholipid Regulated Signaling
- Localization Of Signaling Pathways
- Protein Kinase Linked Pathways

\*\* Please note there will also be a GRC satellite meeting on "Cyclic Nucleotide Phosphodiesterases" to be held in conjunction with this conference immediately following this meeting. It will be held on June 12-14 at the Colby-Sawyer College, New London, NH. Please refer to the GRC Web site for more details.

## **SEPARATION & PURIFICATION**

COLBY-SAWYER COLLEGE  
NEW LONDON, NH

AUG. 2 - 7, 1998

Michael F. Doherty, Chair

- Separation With Chemical Reaction: Membranes And Adsorption
- Crystallization Of Organic Materials
- Separation With Chemical Reaction: Distillation And Extraction
- Adsorption Materials And Processes
- Green Chemistry And Separation
- Membrane Separations - I, II
- Chiral Separations

## **SERUM AMYLOID A: AMYLOIDOSIS TO ATHEROSCLEROSIS (3 DAY)**

NEW ENGLAND COLLEGE  
HENNIKER, NH

JUNE 26 - 28, 1998

Mohamad Navab, Chair  
Patricia Woo, Vice-Chair

- SAA Genes: Comparative Biology, Development And Evolution
- SAA Genes: Polymorphisms And Regulation
- SAA Function: (I) Immunological (II) Lipid Metabolism
- SAA, Inflammatory Reaction Atherogenesis
- SAA And Amyloidosis.
- Degradation And Metabolism Of SAA
- Animal Models

## **SOLAR RADIATION & CLIMATE (NEW)**

PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH

JUNE 14 - 19, 1998

Warren Wiscombe, Chair

- Enhanced Absorption - I, II

- Shortwave Calibration
- Broadband Measurements & Models
- Spectrally Detailed Measurements & Models - I, II
- 3D Cloud Radiation
- Cloud Remote Sensing
- Shortwave in GCMs
- Single Scattering (Ice Crystals & More)

## **SOLID STATE CHEMISTRY**

COLBY-SAWYER COLLEGE

NEW LONDON, NH

JULY 26 - 31, 1998

Jack W. Johnson, Chair

Robert Cava, Vice-Chair

- New Routes And Improved Properties
- Materials From Solution Phase Synthesis
- New Materials / New Methods
- Emerging Applications Of Solid Oxides
- Electronic Oxides
- Structure And Bonding - Main Group Compounds
- Different Perspectives On Solid State Chemistry
- Synthesis At High Pressure
- Structure / Property Relationships In Oxides

## **STATISTICS IN CHEMISTRY & CHEMICAL ENGINEERING**

SALVE REGINA UNIVERSITY  
NEWPORT, RI

JUNE 28 - JULY 3, 1998

Sijmen de Jong, Chair

Anthony C. Atkinson, Vice-Chair

- Feedback Control for Statistical Process Control
- Interactive Data Visualization
- Experimental Designs For Chemical Kinetics Models
- Recent Applications Of Robust Methods
- Project Planning And Prioritization Under Uncertainty
- Feature Selection In Multivariate Regression
- Multi-Way Component And Regression Models In Chemistry
- Controller Performance Monitoring And Diagnosis
- Generalized Linear Regression On Sampled Signals: P-Spline Approach

## **STEREOCHEMISTRY**

SALVE REGINA UNIVERSITY  
NEWPORT, RI

JUNE 7 - 12, 1998

Franklin Davis, Chair  
Frank Fang, Vice-Chair

- Asymmetric Catalysis

- Asymmetric Synthesis Of Amino Acids And Peptides
- Asymmetric Synthesis Of Natural Products
- Chemoenzymatic Synthesis
- Heteroatom Mediated Enantioselective Transformations
- History And Development Of Stereochemistry
- Mechanistic Aspects Of Stereochemistry
- Stereochemical Aspects Of Biosynthesis

## **SUPERCONDUCTIVITY**

QUEEN'S COLLEGE  
OXFORD, UK

SEPT. 6 - 11, 1998

Colin Gough & Bertram Batlogg, Co-Chairs

M. Brian Maple, Vice-Chair

- Recent Theoretical Developments
- Influence Of Pairing Symmetry On Properties
- Normal State and Pseudo-Gap
- New Materials
- Surface, Boundary and Proximity Effects

## **SYNAPTIC TRANSMISSION (NEW)**

PLYMOUTH STATE COLLEGE  
PLYMOUTH, NH

AUG. 2 - 7, 1998

Meyer Jackson, Chair  
Larry Trussell, Vice-Chair

- Quantal Analysis And Miniature Synaptic Currents
- Time Course Of Synaptic Currents
- Dendritic Integration
- Transporters And Synaptic Transmission
- Calcium Dynamics And Synaptic Transmission
- Control Of Neurotransmitter Release
- Molecular Biology Of Transmitter Release
- Kinetics Of Exocytosis And Endocytosis

## **TETRAPYRROLES, BIOLOGY & CHEMISTRY OF**

SALVE REGINA UNIVERSITY  
NEWPORT, RI

JULY 12 - 17, 1998

J. Clark Lagarias & Peter M. Jordan, Co-Chairs  
Paul Ortiz de Montellano, Vice-Chair

- New Developments From Young Investigators
- Enzymology Of Tetrapyrrole Biosynthesis: Structure-Function Studies
- Tetrapyrrole Chemistry

(cont. on next page)

- Tetrapyrrole - Protein Regulators Of Gene Expression
- Tetrapyrroles As Signaling Molecules
- Structure - Function Of Chlorophyll - Protein Complexes
- Structure And Mechanism Of Metallotetrapyrrole Enzymes
- Biotechnological Applications Of Tetrapyrroles
- Tetrapyrrole Metabolism And Human Diseases

---

#### **THEORETICAL BIOLOGY & BIOMATHEMATICS**

TILTON SCHOOL

TILTON, NH

JUNE 7 - 12, 1998

Mark Lewis & John Milton, Co-Chairs

- Modeling Visual Cortex
- Behavioral & Evolutionary Ecology
- Motor Control
- Morphogenesis
- Cytoskeleton Structure
- Plant Spatial Competition
- Controlling Physiological Systems
- Noise-Sustained Wave Phenomena
- Pattern Recognition: Faces

---

#### **THEORETICAL FOUNDATIONS FOR PRODUCT DESIGN & MANUFACTURABILITY (NEW)**

NEW ENGLAND COLLEGE

HENNIKER, NH

JUNE 7 - 12, 1998

George Hazelrigg & Robert Schafrik, Co-Chairs

- Current Approaches To Design And Integration Engineering
- A Theory Of Design
- Implementation Of Design Theory And Design Tools
- Issues Of Distributed Design
- Integration Engineering

- Producibility
- Management Of Dispersed Design And Manufacture Teams
- Synthesis Of Discussions Regarding Design Theory - I, II

---

#### **THIN FILM MECHANICAL BEHAVIOR (NEW)**

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JUNE 21 - 26, 1998

Michael Drory, Chair

- Non-Destructive Mechanical Properties Measurements
- Delamination Processes
- Deformation
- Mechanical Testing Of Films And Interfaces
- Film Stress Evolution
- Mechanical Properties Of Multilayer Structures
- Microstructure Evolution And Fracture
- Tribology And Erosion

---

#### **TRIBOLOGY**

HOLDERNESS SCHOOL

PLYMOUTH, NH

JUNE 28 - JULY 3, 1998

Said Jahanmir, Chair

David Rigney, Vice-Chair

- Application of Science to Engineering Practice
- Atomic / Molecular Scale Processes
- Application of AFM / STM
- Indentation and Machining
- Wear of Prosthetic Devices
- Contact Damage
- Wear Sensing and Control
- Interfacial Films and Coatings

#### **VASCULAR CELL BIOLOGY**

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JUNE 28 - JULY 3, 1998

Denisa Wagner & Mark Majesky, Co-Chairs

- Vascular Development
- Angiogenesis
- Vascular Cell Death And Remodeling
- Receptors And Cytokines
- Leukocyte - Endothelial Interactions
- Cell:Cell And Cell:Matrix Adhesion
- Proteases, Signaling
- Genetic Approaches

---

#### **VIBRATIONAL SPECTROSCOPY & MOLECULAR DYNAMICS**

PLYMOUTH STATE COLLEGE

PLYMOUTH, NH

JULY 26 - 31, 1998

Bruce Hudson & Alex Harris, Co-Chairs

Edwin Heilweil, Vice-Chair

- Coherent Vibrational Spectroscopy & Control
- Time-Resolved Vibrational Spectroscopy
- Near Field Surface IR Spectroscopy
- Inelastic Neutron Scattering Spectroscopy
- Quantum Chemistry In Vibrational Spectroscopy
- Vibrational Spectroscopy At Surfaces
- Applications Of Vibrational Spectroscopy

#### **WATER & AQUEOUS SOLUTIONS**

HOLDERNESS SCHOOL

PLYMOUTH, NH

AUG. 2 - 7, 1998

H. Eugene Stanley, Chair

Marie Claire Bellissent-Funel & Jose Teixeira, Co-Vice Chairs

- Pure Water: Hydrogen Bonds Structure & Dynamics
- Wetting, Clusters, And Nanodroplets
- Strange Properties Of Pure Water
- Water Under Extreme Conditions
- Water Perturbed By: Ions, Apolar Solutes, Polar Solutes, Clathrates
- Solvation Dynamics & Reaction Dynamics In Water
- Water Perturbed By Macromolecules
- Water In Molecular Recognition: Hydration Forces
- Effect Of Water Research On Other Fields: Geochemistry, Geophysics, Glaciology, Astrophysics

---

### **ALEXANDER M. CRUICKSHANK LECTURERS - 1998**

- **Professor Daniel Chemla** (University of California, Berkeley) - *Electronic Processes in Organic Materials*
  - **Professor Alice Gast** (Stanford University) - *Colloidal, Macromolecular, and Polyelectrolyte Solutions*
  - **Professor Lily Jan** (University of California, San Francisco) - *Cardiac Regulatory Mechanisms*
-

PLEASE DO NOT SEND PAYMENT WITH THIS APPLICATION

# application *mail early*

GORDON RESEARCH CONFERENCES *frontiers of science*

DEADLINE FOR RECEIPT OF APPLICATION IS SIX WEEKS PRIOR TO THE CONFERENCE

Please return to :

**PLEASE  
PRINT  
OR TYPE**

Conference Application, Gordon Research Conferences,  
University of Rhode Island, P. O. Box 984, West Kingston, RI 02892-0984 USA (mail)  
or: Conference Application, Gordon Research Center, 3071 Route 138,

Name of Conference:

Date of Conference:

Please check:

☐ Academic

☐ Academic at predominantly undergraduate

☐ Government Agency

☐ Industrial Corporation

Previous Conferences Attended:

☐ None

☐ 1-5

☐ 6-10

☐ 11+

Your Position?

☐ Graduate Student

☐ Postdoc

☐ Research Scientist

☐ Professor

☐ Research Director

☐ Program Manager

☐ Other

Please check one:

☐ Chair

☐ Vice Chair

☐ Discussion Leader

☐ Speaker

☐ Poster Presenter

☐ Attendee:

Are you personally involved in research activities in the subject area of the conference? Yes ☐ No ☐

How many papers have you published during the past three years in the subject area of the conference? \_\_\_\_\_

You are invited to submit an abstract for a poster presentation at the Conference. Many Chairs find abstracts very useful in making decisions concerning admissions to their Conferences. Applications are referred to the Conference Chair in accordance with the established regulations. Following the Chair's acceptance, the registration form will be sent to you. Please complete the registration form and return it immediately with payment of the Fixed Fee.

INDICATE YOUR PARTICULAR ACTIVITIES WHICH JUSTIFY FAVORABLE CONSIDERATION OF YOU AS A PARTICIPANT AND CONTRIBUTOR TO THIS CONFERENCE (REQUIRED FOR POSTER PRESENTERS AND ATTENDEES). USE ADDITIONAL PAGE FOR POSTER ABSTRACT, IF NECESSARY.

GORDON RESEARCH CONFERENCES ADMITS SCIENTIFICALLY-QUALIFIED CONFEREES OF ANY SEX, RACE, RELIGION, AGE, COLOR, AND NATIONAL ORIGIN.

I certify that I have read the restrictions and disclaimer in the Gordon Research Conference Brochure or on the web site concerning publication and use of material presented at a Gordon Conference and the duties assumed by those presenting such material. I hereby consent to and agree to be bound by such restrictions and disclaimer.
