

only work devoted wholly to primary batteries available to English-speaking electricians and students, we believe, having been an unsatisfactory treatise translated from the French. In preparing this book the author has evidently had in mind the needs of the student of electricity as well as of those whose occupation requires some degree of familiarity with primary batteries for practical purposes, as the work is admirably adapted to the wants of both classes. The divisions of the subject appear to be as logical as the nature of the material permits, each being fully illustrated by the most useful types of cells. Prominence has been given to standards of electromotive force, and a chapter is devoted to testing, which will prove both interesting to the student and useful as a laboratory guide.

— Professor Tyndall's health is improving to such an extent that he is preparing for the press a volume of essays, addresses, and reviews, to be issued under the title "Fragments of Science."

— Ginn & Co., publishers, announce for immediate publication "The Story of Our Continent," a reading book in the geography of North America, by professor N. S. Shaler of Harvard University, illustrated. The object of this book is to set before the student a simple explanation of the way in which the continent of North America has come to its present physical state, and at the same time to show how this physical state affects the life of the people. In other words, it seeks to secure a clear conception of

the geography of the continent by showing in a very simple manner the geological evolution of its features. It is adapted to the needs of grammar schools, and may advantageously be used as a reader in connection with a regular text-book in geography. As an introduction, by the way of our own continent, to the study of geology and physical geography, it will be found to possess a peculiar value.

— *The Climatologist* is the title of a new monthly journal of medicine announced by W. B. Saunders, 713 Walnut Street, Philadelphia. The object of this journal will be to promote original investigation, to publish papers containing the observations and experience of physicians in this country and Europe on all matters relating to climatology, mineral springs, diet, preventive medicine, race, occupation, life insurance, and sanitary science, and in that way to supply the means by which the general practitioner and the public at large will become better acquainted with the diseases of this country and Europe, and better armed to meet the requirements of their prevention or cure. The editors are Drs. John M. Keating, F. A. Packard, and Charles P. Gardiner, who will have the co-operation of about thirty associate editors. The first issue, dated August, will be ready about the 10th.

— According to the *Publishers' Weekly*, Professor Lester F. Ward has received the distinction of having his book, "Dynamic Sociology," burned by order of a council of ministers of Russia.

"The Week, one of the ablest papers on the continent."—*Descriptive America*.

THE WEEK,

A Canadian Journal of Politics, Literature, Science and Art.

PUBLISHED EVERY FRIDAY.

\$3.00 per Year. \$1.00 for Four Months.

THE WEEK has entered on its EIGHTH year of publication, greatly improved in every respect, rendering it more worthy the cordial support of every one interested in the maintenance of a first-class literary journal.

The independence in politics and criticism which has characterized THE WEEK ever since its first issue will be rigidly maintained; and unceasing efforts will be made to improve its literary character and increase its attractiveness as a journal for the cultured home. Many new and able writers are now, or have promised to become, contributors to its columns, and the constant aim of the Publisher will be to make THE WEEK fully equal to the best literary journals in Britain and the United States.

As heretofore, PROF. GOLDWIN SMITH will, from time to time, contribute articles. London, Paris, Washington and Montreal letters from accomplished correspondents will appear at regular intervals. Special Ottawa Letters will appear during the sessions of Parliament.

THE WEEK being the same size as "Harper's Weekly," is the largest paper of its class on the continent.

BOOKS: How to get them. If there is any book or pamphlet that you want, write to the Science Book Agency, 47 Lafayette Place, New York.

A Russian writer, Nicholacy, had obtained permission to translate the work, and the publisher Soldatenkoo had printed and published 1,200 copies of the first volume when the order for its confiscation and *auto-da-fé* was given. The publisher's loss will be over 3,000 roubles. Of course he will not attempt to publish the second volume, and it is more than likely that the manuscript will be seized and destroyed. Professor Ward thinks that the chapter advocating universal education may have been the cause of the Russian censor's objection to the book.

— The *Home Journal* of last week contained a four-column article which expounds and explains the important question of international copyright. It shows how the new law affects authors, publishers, printers, and readers on both sides of the Atlantic.

— There is in the London *Journal* of January, 1891, this reference to the establishing of the university extension movement in Austria: "A beginning has recently been made in connection

with the Vienna universities and the 'Volksbildungs' (Society for Popular Instruction) to introduce the university extension system to the Austrian capital. Dr. Bauer, who visited this country in the summer, writes that a society has been formed, under the auspices of which courses of lectures have already been arranged in science, history, and economics, in various parts of the city, and on the eve of the coming census a series of lectures will be given on the 'Statistics of Population.' Lecturers have also been asked to give courses to the soldiers and officers in barracks. The majority of teachers are graduates of the university, or men of acknowledged literary or scientific training, and the work is thus of university stamp." The financial difficulty has quickly asserted itself, and it is proposed to apply for aid to the "Lantag" (provincial parliament), and any grant that may be forthcoming will be controlled by a "curatorium," consisting of certain members of parliament, professors of the university, and members of the society.

Exhaustion

Horsford's Acid Phosphate.

The phosphates of the system are consumed with every effort, and exhaustion usually indicates a lack of supply. The Acid Phosphate supplies the phosphates, thereby relieving exhaustion, and increasing the capacity for labor. Pleasant to the taste.

Dr. A. N. KROUT, Van Wert, O., says: "Decidedly beneficial in nervous exhaustion."

Dr. S. T. NEWMAN, St. Louis, Mo., says: "A remedy of great service in many forms of exhaustion."

THE MODERN MALADY; or, Suf- ferers from 'Nerves.'

An introduction to public consideration,
from a non-medical point of view, of a con-
dition of ill-health which is increasingly
prevalent in all ranks of society. In the
first part of this work the author dwells on
the errors in our mode of treating Neuras-
thenia, consequent on the wide ignorance of
the subject which still prevails; in the sec-
ond part, attention is drawn to the principal
causes of the malady. The allegory forming
the Introduction to Part I. gives a brief his-
tory of nervous exhaustion and the modes of
treatment which have at various times been
thought suitable to this most painful and try-
ing disease.

IV. THE CHEROKEES IN PRE-CO- LUMBIAN TIMES. By CYRUS THOMAS, 12°. \$1.

Dr. Thomas has already presented to the public
some reasons for believing the Cherokees were
mound-builders, but additional evidence bearing
on the subject has been obtained. A more careful
study of the Delaware tradition respecting the Tal-
leguy satisfies him that we have in the Bark Record
(Walam Olum) itself proof that they were Chero-
kees. He thinks the mounds enable us to trace back
their line of migration even beyond their residence
in Ohio to the western bank of the Mississippi. The
object is therefore threefold: 1. An illustration of
the reverse method of dealing with prehistoric sub-
jects; 2. Incidental proof that some of the Indians
were mound-builders; 3. A study of a single tribe in
the light of the mound testimony. This work will be
an important contribution to the literature of the
Columbian discovery which will doubtless appear
during the coming two years.

"A valuable contribution to the question, 'Who
were the mound-builders?'"—*New York Times*.

"Professor Cyrus Thomas undertakes to trace
back the evidences of a single Indian tribe into the
prehistoric or mound-building age."—*N. Y. Sun*.

"An interesting paper."—*Christian Union*.

V. THE TORNADO. By H. A. HAZEN. 12°. \$1.

"The little book is extremely interesting."—*Bos-
ton Transcript*.

"A book which will find many readers. The
chapter on 'Tornado Insurance' is of interest to
all property-holders in the tornado States."—*Boston
Herald*.

"The Tornado' is a popular treatise on an impor-
tant province of meteorology, in which science, the
author, Professor Hazen of the United States Signal
Service, may be regarded as an expert."—*Philadel-
phia Ledger*.

VI. TIME-RELATIONS OF MENTAL PHENOMENA. By JOSEPH JASTROW. 12°. 50c.

"All students of psychology will find the book full
of interesting facts. Professor Jastrow's good qual-
ities as a thinker and as a writer are too well and
too widely known to require comment."—*Public
Opinion*.

"A useful work for psychologists—as well as the
general reader—by setting forth in brief and easily
intelligible form the present state of knowledge in
regard to the time required for the performance of
mental acts."—*The Critic*.
