IDEALS OF THE TELEPHONE SERVICE¹

A TRIBUTE TO THE MEMORY OF ALEXANDER GRAHAM BELL

THIS is the ninth annual meeting of the Telephone Pioneers of America, although our association is now entering upon its twelfth year. On account of the war, during three years no annual meetings were held. The pioneers were then engaged in the great struggle to save civilization.

The membership of our association is made up not only from those who took part in the first development of the telephone, but also from those who have been in the telephone service for a period of twenty-one years. We have in the service tens of thousands of zealous men and women doing pioneer work now, but because they lack in years, though not in achievement, they have not been enrolled. We and they are looking forward to the day of their formal admission. To these our fellow-workers we extend our greetings and our appreciations. In their hands lies not only the future of our society but the future of our art.

Our first meeting took place eleven years ago, at Boston, the birthplace of the telephone. At that meeting, the inventor of the telephone, Alexander Graham Bell, was present and delivered to us an address which must always be memorable in the history of our society. To-day, we recall with peculiar sadness these words which he then spoke to us:

"This is a great day for me, the first meeting of the Telephone Pioneers of America and of the world. It gives me great pleasure to meet with you all to-day, and yet there is a feeling of sadness about it. I am the first telephone pioneer and my memory goes back to the very beginning, and I miss the faces I remember so well, the faces of the old pioneers who I wish were here to-day. . . . I feel it a little presumptuous on my part to try to speak of the telephone

¹ Presidential address delivered at the ninth annual meeting of the Telephone Pioneers of America, at Cleveland, Ohio, September 29, 1922.

Cornell University Medical College

First Avenue and Twenty-eighth St.
NEW YORK CITY

The first year of the course is also
offered at Ithaca, N. Y., subsequent
years at New York City only.

For Information Address
THE SECRETARY

Johns Hopkins University Medical School

The Medical School is an Integral Part of the University
and is in the Closest Affiliation with the Johns Hopkins
Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with at least two years' instruction, including laboratory work in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to 75 students, men and women being admitted on the same terms. **Except in unusual circumstances, applications for admission will not be considered after July 1st.**

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill our requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition is \$300 per annum, payable in three installments. There are no extra fees except for rental of microscope, certain expensive supplies, and laboratory breakage.

The annual announcement and application blanks may be obtained by addressing the

Dean of the Johns Hopkins Medical School,
Washington and Monument Sts., Baltimore, Md.

SUMMER WORK FOR GRADUATES IN MEDICINE

Beginning Monday, June 4th, and ending Saturday, July 14th, a course in medical diagnosis, including laboratory exercises in clinical pathology and demonstrations in pathological anatomy, will be offered. The course will be limited to thirty students, fee \$100. Applications should be made to the Dean's Office.

SCHOOL OF MEDICINE Western Reserve University of Cleveland, Ohio

HIGH STANDARD OF ADMISSION*
RESTRICTED CLASSES
THOROUGH INSTRUCTION
LARGE CLINICAL FACILITIES
HIGH STANDARD OF SCHOLARSHIP

**Admission confined to students
having academic degrees and to
Seniors in Absentia.*

For information address:

THE REGISTRAR
1353 East 9th St., Cleveland, O.

YALE UNIVERSITY SCHOOL OF MEDICINE

Affiliated with the New Haven Hospital
and New Haven Dispensary

111TH SESSION

Reorganized on a full-time basis

Entrance Requirements: A minimum of three years (or its equivalent) of college including general biology, physics, general and organic chemistry, qualitative analysis, physical chemistry or laboratory physics, and either French or German.

**ALL THE GENERAL FACILITIES
OF THE UNIVERSITY ARE AVAIL-
ABLE TO MEDICAL STUDENTS**

As the number admitted to each class is limited, applications must be made before July 1.

Dean, Yale University School of
Medicine

NEW HAVEN, CONN.

Northwestern University

MEDICAL SCHOOL

Situated in Chicago in close proximity to important Hospitals with an abundance of clinical material.

ADMISSION REQUIREMENTS—Two years of College credit including a satisfactory course in Physics, Chemistry, Biology or Zoology, and French or German.

COURSE OF STUDY—leading to the degree of Doctor of Medicine—Four years in the Medical School and a fifth year either as Interne in an approved hospital or devoted to research in some branch of Medical Science.

GRADUATE INSTRUCTION—in courses leading to the degree of Master of Arts or Doctor of Philosophy.

RESEARCH FOUNDATION—The James A. Patten Endowment for Research affords unusual opportunities for advanced students of Medical Science to pursue special investigations.

RESEARCH FELLOWSHIPS—Four fellowships of the value of \$500 each are awarded annually to promote scholarly research.

Tuition fees of the first and second years, \$190.00 a year. The third and fourth years, \$200.00 a year.

C. W. PATTERSON, Registrar

2421 South Dearborn Street, Chicago, Illinois

RUSH MEDICAL COLLEGE

IN AFFILIATION WITH THE UNIVERSITY OF CHICAGO

Curriculum.—The fundamental branches (Anatomy, Physiology, Bacteriology, etc.) are taught in the Departments of Science at the Hull Biological and the Ricketts Laboratories, University of Chicago. The courses of the three clinical years are given in Rush Medical College and in the Presbyterian, the Cook County Hospital, the Home for Destitute Crippled Children, and other hospitals.

Requirements for Admission.—Three years of premedical college work.

Classes Limited.—The number of students admitted to each class is limited, selection of those to be admitted is made on the basis of merit in scholarship and other qualifications requisite for the study and practice of medicine.

Hospital Year.—The fifth year, consisting of service as an interne under supervision of the faculty in an approved hospital, or of advanced work in one of the departments is prerequisite for graduation.

Summer Quarter.—The college year is divided into four quarters, three of which constitute an annual session. The summer quarter in the climate of Chicago is advantageous for work. Students are admitted to begin the medical courses only in the Autumn and Spring quarters.

Elective System.—A considerable freedom of choice of courses and instructors is open to the student.

Graduate Courses.—Advanced and research courses are offered in all departments. Students by attending summer quarters and prolonging their residence at the University of Chicago in advanced work may secure the degree of A.M., S.M., or Ph.D., from the University.

Prize Scholarship.—Six prize scholarships—three in the first two years and three in the last two (clinical) years—are awarded to college graduates for theses embodying original research.

The Winter quarter commences January 2, 1923.

Tuition—\$75.00 per quarter, no laboratory fees.

Complete information may be secured by addressing:

THE MEDICAL DEAN

The University of Chicago Chicago, Illinois

Marine Biological Laboratory

Woods Hole, Mass.

INVESTIGATION Facilities for research in Zoology, Embryology, Physiology, and Botany. Eighty-four private laboratories \$100 each for not over three months. Thirty tables are available for beginners in research who desire to work under the direction of members of the staff. The fee for such a table is \$50.00.

Entire Year

INSTRUCTION Courses of laboratory instruction with lectures are offered in Invertebrate Zoology, Protozoology, Embryology, Physiology and Morphology and Taxonomy of the Algae. Each course requires the full time of the student. Fee, \$75.00.

July 3 to August 14, 1923

SUPPLY DEPARTMENT

Open the Entire Year

Animals and plants, preserved, living, and in embryonic stages. Preserved material of all types of animals and of Algae, Fungi, Liverworts and Mosses furnished for classwork, or for the museum. Living material furnished in season as ordered. Microscopic slides in Zoology, Botany, Histology, Bacteriology. Catalogues of Zoological and Botanical material and Microscopic Slides sent on application. State which is desired. For catalogues and all information regarding material, address:

GEO. M. GRAY,
Curator, Woods Hole, Mass.

The annual announcement will be sent on application to The Director, Marine Biological Laboratory, Woods Hole, Mass.

WILL INDUSTRIAL ANALYTICAL BALANCE

**For High Grade Educational Work
and Routine Analysis**

This balance is specially made to meet conditions in laboratories where precision coupled with rugged construction and excellent workmanship is required at a comparatively moderate cost.

The balance is specially priced but compares favorably with those listed at appreciably higher figures.

It has a capacity of 200 grams in each pan. Is sensitive to one-tenth of a mg. under full load. The pan is a new design of hammered aluminum, providing a maximum rigidity under full load. Graduated to 100 divisions each side of zero, with the graduation in white on black background.

The case is of French polished mahogany with counter poised front door.

All other parts are made with the high quality characteristic of Will products.

*Illustrated literature will be sent immediately upon
receipt of your request.*

JAGABI LABORATORY RHEOSTATS

We offer a considerable variety of Sliding-Contact Rheostats—wound on stone, or on tubes as illustrated above.

These rheostats permit of gradual resistance variations within wide limits, and will be found reliable in service as well as moderate in price.

The Tube Rheostats are made in three different sizes, with lengths of 8", 16" and 20" respectively; and are supplied in "single," "vertical," "double," "universal" and "Dodge" types. The Stone Rheostats are 8" long, and are available in "single," "double" and "universal" types.

For Single Tube Rheostats the resistance values may be as high as 14000 ohms, with current capacity of 0.2 ampere; or as low as 0.34 ohm with current capacity of 25 amperes.
