INDEX ISSUE

Twice every minute the TECHNICON Pipette Washer completes its syphon-cycle . . . seven surging gallons of water to loosen and dislodge clinging residues. Wastes are then literally swept out of the pipettes by the violent suction set up during the brisk ten-second emptying phase.

Only the Technicon washer offers such rapidity and thoroughness, delivering in six cycles a full basket-load of immaculate pipettes (capacity 200 of 1 ml in 100th's, up to 18" long). The stainless steel

basket, proof against corrosive reagents, carries its load of pipettes undisturbed through every stage: cleansing, washing and drying. Requires no individual handling, no shifting from container to container, practically eliminates breakage and chippage. A must for the busy laboratory: let us send you Bulletin # 6150 giving particulars.

THE TECHNICON COMPANY
215 E. 149 St., New York 51, N. Y.

No fuss or muss . . .
pipette washing can
be as easy as this
