

Paper Partition
CHROMATOGRAPHY EQUIPMENT

A new and more complete line of paper chromatographic equipment, carefully engineered for use in this new field of analysis.

CHROMATOGRAPHY DRYING OVEN

Also Available:
New Chromatocab Models
Strip Suspension Racks (stainless steel or glass)
Electronic densitometers
Ultraviolet Lamps (long and short wave-length)
Indicator Sprays
Disc Chambers
Solvent Troughs & Assemblies
Micro Pipets
Clips

Drying Problem Solved by New Method

New, Niagara "Controlled Humidity" Method provides air at precise conditions of temperature and humidity and permits accurate variations of such conditions at will, in the range of 34°F. to 140°F.; also below 32° if required.

This Method uses "Hygrol" liquid absorbent to remove moisture from the air directly, saving the cost of refrigeration for dehumidification. Operation is completely and reliably automatic; the absorbent is re-concentrated as fast as it is used.

It is used successfully in drying processes, control of hygroscopic materials, preventing moisture damage to materials or instruments, providing controlled atmosphere for tests and experiments.

Units provide capacity ranges from 1000 c. f. m. to 20,000 c. f. m.

Have You Investigated **GLUCURONOLACTONE?**

now available in commercial quantities

Glucuronic Acid is an important structural constituent of essentially all fibrous and connective tissues in animals, and is present in low concentrations in normal blood and urine. It is therefore of vital interest to investigators of body processes, diseases and treatments.

Appearance White, crystalline powder
Odor None
Melting point, °C. 172
Specific rotation, (α)_D²⁰ +20° (in H₂O)
Specific gravity, 30.4°C. 1.76
pH, initial 3.5 (10% aq. soln.)
Particle size 99% finer than 100 mesh

We can supply commercial quantities of Glucuronolactone produced synthetically from D-glucose, in 5 lb. and 50 lb. containers.

Send for this Booklet which reviews recent literature pertaining to the uses for Glucuronolactone
