Nutritional Biochemicals Corporation

Finest Japanese Optics and Workmanship

Built to our specifications. Priced far below comparable values. Be assured of a lifetime of excellent performance. Equal to the World's finest optical instruments.

struments.
Laboratory Microscope
(Model UMC-4)
Ideal for technicians, doctors, and general laboratory work where optics of high quality are required.
Four nosepiece: Achromatic. 4X, 10X, 40X, 100X.
Three Eyepieces: Huygenian. 5X, 10X, 15X.
Magnification: 20X to 1500X.
Wt. in carrying case: 23 lbs.
Special Introductory offer

Special Introductory offer

\$212.50

Binocular Microscope (Model E 3 N)
Used by research laboratory, research technicians, physicians and search technicians, physicians and scientists. Instrument complete for visual and photomicrography. Calibrated mechanical stage. Calibrated condenser diaphragm. Includes monocular tube for photo-

micrography.

Four nosepieces: Achromatic. 5X, 10X, 40X 100X.

Three evepieces: Huygenian. 5X, 10X, 15X.

Magnification: 25X to 1500X with monocular tube, increased 50% with binocular.

Special Introductory offer

\$374.95

LaMOTTE COMBINATION SWIMMING POOL SET

for small pools and those who do not care to install separate units for chlorine and alkalinity.

This unit is applicable to the ranges of chlorine and alkalinity actually required for swimming pool water, and will enable the operator to keep his alkalinity and chlorine values between the limits required by State Health Department specifications.

They are complete with 3 color standards for each test representing the upper and lower limits of chlorine (0.2, 0.5, 0.7) and alkalinity (pH 7.2, 7.6, & 8.0) together with reagents and necessary glassware.

These units are contained in a plastic comparator block, the top of which serves for making tests. The plastic blocks are moisture resistant and ideal for use around pools.

LaMotte Chemical Products Company

Towson, Baltimore 4, Md.
