clinical orthopedic surgery at Washington University School of Medicine, 6 Aug.

CARL D. LA RUE, Ann Arbor, Mich., 67, botanist and researcher at the University of Michigan, 19 Aug.

EDUARD PERNKOPF, Baltimore, Md., 67, anatomist, professor emeritus of the University of Vienna and director of the Institute of Systematic Anatomy, 17 Apr.

Education

■ The University of Pennsylvania has announced that its Edgar Fahs Smith Memorial Collection in the History of Chemistry has been reopened for service in new quarters in the Hare Building, 36 and Spruce Sts., Philadelphia. Originally consisting of some 7000 items, the collection has grown to include more than 9000 books and pamphlets, nearly 1400 manuscripts, 3400 portrait prints and medals of chemists, and various items of chemical apparatus. Acting curator of this collection, which is one of the largest of its kind in the United States, is Claude K. Deischer, assistant director of the university's Harrison Laboratory of Chemistry.

■ Plans for the establishment of a pilot Cardiovascular Training Center for Nurses have been announced by the U.S. Public Health Service. The first of its kind, the center will be located at the University of Minnesota School of Public Health, starting 1 Jan. 1956. Cooperating with the Public Health Service in the project are the Minnesota Department of Health and other agencies in Minneapolis and St. Paul.

Nurses for the first group to train at the center will be drawn chiefly from consultant, supervisory, and instructor positions. Candidates will represent the various fields of nursing—hospital, industrial, education, and public health. Applications for the training center are being received at the University of Minnesota School of Public Health. Early applications are urged since the first group will be limited; studies are scheduled for one quarter.

Grants, Fellowships, and Awards

■ Two Frank L. Chance research fellowships, one in hematology and one in medical oncology, are to be awarded by the City of Hope Medical Center. Inquiries should be directed to Dr. Howard Bierman, City of Hope Medical Center, Duarte, Calif. *The deadline date is 1 Oct.* These fellowships were established by the late Mrs. Frank L. Chance in honor of her husband, the Chicago Cubs baseball player who was a member of

the double-play team, Tinker-to-Evers-to-Chance.

Five fellowships are available each year for periods of from 1 to 3 years. Fellows selected hold an appointment in the center's Medical Research Institute, with a dual title in one of the center's hospitals if the research to be conducted is of a clinical nature. The annual stipend varies from \$3000 to \$5000, depending upon the previous training of the candidate.

The fellowships were designed to afford special training in the fields in which the City of Hope Medical Center is engaged. These are (i) tumors and allied diseases; (ii) hematology; (iii) cardiac disease amenable to surgery; and (iv) cardiorespiratory diseases.

■ American Cancer Society clinical fellowships in radiation therapy are offered in 1956–57 to properly qualified graduates in medicine who have already received thorough basic training in the principles and practice of radiation therapy, and who desire to spend additional periods of training in that specialty at certain clinics in the United Kingdom, the Scandinavian countries, and France. Fellowships are available to citizens of the United States who are graduates of recognized medical schools in the United States, who have previously received training in the therapeutic radiology acceptable to the American Board of Radiology as credit toward certification, and who are under 40 years of age. In the selection of applicants, priority will be given to physicians who are already certified by the American Board of Radiology, and who have completed the required training in preparation for board examinations but who have not yet taken the examinations, and those who are still in the training period but who intend to complete board requirements and take the examinations.

The annual stipend is \$4500 per year, including travel. When a fellowship is awarded, an initial travel fund of \$900 will be paid to the recipient. The remainder of the stipend will be paid in advance in monthly installments of \$300, beginning with the fellowship period.

The fellowship period shall be 1 year, although in exceptional circumstances, and when there is no competition with new applications, renewal for a year or less will be considered. Fellowships may commence at any time mutually agreeable to the institution and the fellow.

Fellows may choose to spend the entire fellowship year in one institution or to divide the time between two or more; in the latter case, however, at least 8 months must be served in a single institution in order that a reasonable measure of practical experience, rather than observation only, may be assured.
