

Which of these MIND OPENERS

solves your teaching problem?

BAUSCH & LOMB "FL" MICROSCOPE

Reveals finest detail in bright, clear, easy-to-see images. Color-corrected 10X and 43X objectives; flat fields minimize distortion. Saves time *now* with pre-focusing gage. Saves time *later* because it's standard size, standard operation . . . nothing to unlearn. More teaching advantages than any other student microscope, at any price.

BAUSCH & LOMB MODEL LRM BALOPTICON PROJECTOR

Opens students' minds to quick comprehension . . . with vivid screen-size images of slides *and* opaque objects. Photographs, specimens, even chemical reactions! (Optional film strip and single frame attachment.) "Individualizes" instruction, even in largest classes.

BAUSCH & LOMB TRIPLE-PURPOSE MICRO-PROJECTOR

Unlocks the micro-world for observation by your entire class at once! Projects detailed full-screen images of (1) permanently mounted specimens and (2) live specimens in liquid. Also (3) projects on sketch pad for drawing or tracing. Indispensable for crowded science classes.
