THE BLOOD SUPPLY AND ANATOMY OF THE UPPER ABDOMINAL ORGANS

A Descriptive Atlas

By Nicholas A. Michels, M.A.,
D.Sc. (Louvain), Professor of
Anatomy, Daniel Baugh Institute,
Jefferson Medical College,
Philadelphia

The multiplex anomalies and variations in the blood supply to the upper abdomen—graphically delineated in colored drawings with explicit descriptive text. Twenty years in the making—the only atlas of its kind in the world! *A good portion of your life might be spent in learning what this unique book has to teach.*

one 19" x 19" Lab-aid unit section
holds up to 6500 1" microslides

other bulky files need this much
more space to hold as many slides

because every inside inch is a filing inch
a Lab-aid cabinet **files 45% more**

There's no waste space in a Lab-aid cabinet . . . no thick bulkheads,
no massive tracking guides. Thanks to patented Lab-aid construc-
tion, they are built of heavy steel, strongly welded, true-tracking,
beautifully finished, and . . . drawers are freely interchangeable, too
. . . you can file 1" and 2" microslides, even 4" lantern slides or
index cards, in the same section if need be. All are 19" x 19"
square, so they stack rigidly to any height.

TECHNICON

Lab-aid[®]

laboratory filing systems

drawers for microslides
drawers for 2" x 2" transparencies
drawers for lantern slides and cards
sections for flat-filing
slides or transparencies
combination filing-viewing sections
illuminated viewing drawer
sections for paraffin block filing

MAGNETIC STIRRERS

For variable speed stirring action within either closed or open vessels

- ▶ Swivel joint clamp provides convenience in mounting assemblies
- ▶ With stirring bars sealed in Pyrex brand glass, Kel-F, or Teflon

MAGNETIC STIRRING APPARATUS, Thomas. A compact, quiet-running apparatus which utilizes a rotating field of magnetic force to induce variable speed stirring action within either closed or open vessels. Now offered in two executions, i.e. with either enclosed rheostat, which will facilitate manipulation in some assemblies; or with separate rheostat for control of speed at a distance of approximately 30 inches from stirrer.

Stirring is accomplished by means of a small magnetized bar, sealed in heavy wall

Pyrex brand glass, Kel-F or Teflon plastic, which is placed in the liquid to be stirred and which is rotated by magnetic force applied beneath the container. This force consists of a permanent bar magnet attached to the shaft of an electric motor and mounted in an aluminum housing with flat top $4\frac{3}{8}$ inches diameter and $4\frac{1}{2}$ inches high, on cast metal base. Can be used either on the table or on a support rod, attached by means of a clamp with swivel joints.

Suitable for any stirring operation which involves 1 ml to 1 liter of liquids with viscosities up to that of a 50% glycerol solution. Particularly convenient for use in closed systems. Any type of vessel of glass, porcelain or non-magnetic metal can be used.

- 9235-C.** Stirring Apparatus, Magnetic, with enclosed rheostat, Thomas, as above described. Rheostat, with graduated dial, is mounted in stirrer housing. Complete with two magnetized Stirring Bars A and B, i.e. one Kel-F coated, $\frac{7}{8}$ -inch long \times $\frac{1}{4}$ -inch diameter; the other Pyrex brand glass coated, $1\frac{3}{4}$ inches long by $\frac{1}{16}$ -inch diameter; also 5 ft. 3-wire connecting cord and conventional 2-prong plug cap and directions for use. Power consumption 7 watts; for 115 volts, 60 cycles, a.c. only. Without glass vessel. **34.25**
- 9235-G.** Ditto, but without Stirring Bars. **31.00**
- 9235-R.** Stirring Apparatus, Magnetic, Original Model, Thomas, similar to 9235-C but with separate rheostat for control of speed at a distance of approx. 30 inches. Complete with two Stirring Bars A and B. **38.20**
- 9235-S.** Ditto, but without Stirring Bars. **34.95**

MAGNETIZED STIRRING BARS

9235-T5. Stirring Bars, Magnetized, Glass Coated.

Consisting of a cylindrical permanent magnet sealed in heavy wall Pyrex brand glass.

Overall length, approx. inches. $\frac{7}{8}$ 1 $\frac{3}{4}$

Diameter, approx. inches. $\frac{1}{32}$ $\frac{7}{16}$

Each. **1.80 1.95**

9235-U7. Stirring Bars, Magnetized, Kel-F Coated, Vacuum Tested, Thomas.

Consisting of a cylindrical permanent magnet sealed in a transparent, durable shell of Kel-F.

Overall length, approx. inches. $\frac{7}{8}$ 1 $\frac{1}{2}$ 2

Diameter, approx. inches. $\frac{1}{4}$ $\frac{5}{16}$ $\frac{3}{8}$

Each. **1.30 1.70 1.84**

9235-U8. Stirring Bars, Magnetized, Teflon Coated, Vacuum Tested, Thomas.

Consisting of a cylindrical permanent magnet sealed in a durable shell of Teflon, a tough, opaque white plastic.

Overall length, approx. inches. 1 1 $\frac{5}{8}$ 2 $\frac{1}{2}$

Diameter, approx. inches. $\frac{3}{16}$ $\frac{3}{8}$ $\frac{3}{8}$

Each. **1.88 2.26 3.39**

10% discount in lots of 12, 15% discount in lots of 72
