

the current openings exist in the fields of meteorology and glaciology, although the other fields still require a limited number of specialists.

Research stations have been established at Little America in Marie Byrd Land (Byrd Station), at the South Geographic Pole (Amundsen-Scott South Pole Station), on the Knox Coast (Wilkes Station), and along the Weddell Sea (Ellsworth Station).

The first group of scientists and technicians are now on-station and geophysical observations and studies are underway. The program of observations will continue until April 1959. A second group will leave the United States on about 1 Nov. 1957. Prior to departure, approximately 2 months of advanced training will be provided in problems of research, instrumentation, and operations in polar regions.

Interested candidates are invited to address inquiries to the following Antarctic Project Leaders: aurora and airglow—Mr. Norman J. Oliver, A. F. Cambridge Research Center, Laurence G. Hanscom Field, Bedford, Mass.; glaciology, gravity, and seismology—Miss Diana Fisher, Glaciological Headquarters Office, USNC-IGY, 1145 19th St., NW, Washington 6, D.C.; ionospheric physics—Mr. Harry G. Sellery, Central Radio Propagation Laboratory, National Bureau of Standards, Boulder, Colo.; meteorology—Mr. Ervin A. Volbrecht, U.S. Weather Bureau, 24th and M Sts., NW, Washington 25, D.C.

Reactor for Greece

A site on the slopes of Mount Hymettus, 10 miles from the center of Athens, has been selected for the construction of Greece's first nuclear research reactor. The new facility will be known as the Democritus Nuclear Research Laboratory in honor of the Greek physicist of 470 B.C. The pool-type reactor now is being built in the United States and is due for delivery in February 1958.

News Briefs

The Atomic Energy Commission recently allowed unclassified tours for all news media at its two large Pacific Northwest installations, the Hanford works at Richland, Wash., and the National Reactor Testing Station at Idaho Falls, Idaho. This was the first time news representatives had had access to the Hanford facilities. The tour did not include plutonium production facilities there, but was limited to laboratory and test units.

The department of bacteriology of the University of Nebraska will offer the doctorate beginning in the fall of 1957.

* * *

The name of the Colorado Agricultural and Mechanical College, Fort Collins, Colo., was changed to Colorado State University on 1 May.

* * *

The University of Missouri School of Medicine will bestow M.D. degrees on 23 graduating students at the annual commencement exercises. Not since 1908 has the university offered a 4-year curriculum.

Proposed Legislation

Of the many bills introduced in Congress, some have a special relevance to science and education. A list of such bills introduced recently follows:

S 1298. Assist states in providing needed vocational education of less than college grade in essential occupations, including retraining made necessary by scientific and technological developments, through establishment and maintenance of area vocational school programs providing vocational training and retraining for persons residing in state or area, including related instruction for apprentices. Hill (D Ala.)

S 1229. Reduce loss of life, personal injuries, and property damage resulting from automobile accidents by establishing an automobile and highway safety division within Department of Health, Education, and Welfare to work in cooperation with public and private agencies for such purposes. Johnson (D Tex.) Senate Labor and Public Welfare.

HR 5252. Provide loans to enable needy and scholastically qualified students to continue post-high-school education. Teller (D N.Y.) House Education and Labor.

S 1326. Establish a system for classification and compensation of scientific and professional positions in Federal Government. Johnston (D S.C.) Senate Post Office and Civil Service.

H J Res 250. Establish a Joint Committee on Scientific Research. Judd (R Minn.) House Rules.

S J Res 68. Provide for construction and operation of an atomic power prototype reactor demonstration facility in state of Vermont. Aiken (R Vt.) Joint Atomic Energy.

HR 5646. Prohibit experiments upon living dogs in District of Columbia and provide a penalty for violation thereof. Burdick (R N.D.) House District of Columbia.

HR 5238. Establish a National Outdoor Recreation Resources Review Commission to study outdoor recreation resources of the public lands and other land and water areas of the U.S. Hagen (D Calif.) House Interior and Insular Affairs.

Scientists in the News

The Albert and Mary Lasker Foundation in New York has announced the eighth annual selections in the nationwide medical journalism competition covering newspapers, magazines, and radio-television broadcasts. Winners of the \$2000 awards are as follows:

ROBERT S. BIRD, staff writer, *New York Herald Tribune*, for his series of six articles published in July 1956 on rising trends of venereal disease rates among teen-agers and adults in the United States.

ROLAND H. BERG, medical and science editor, *Look Magazine*, for his article, "The state of the nation's health," published in April 1956.

Public Affairs Department, Columbia Broadcasting System and Station WCBS-TV, New York, jointly, for the documentary television productions, "Out of Darkness" and "The Wassaic Story," dealing with mental illness and mental retardation, respectively, and presented over the CBS network in 1956. "Out of Darkness" was produced, written, and directed by ALBERT WASSERMAN, with IRVING GITLIN serving as executive producer. Gitlin is also director of the public affairs department. "The Wassaic Story" was written by BILL LEONARD and ARTHUR ZEGART, directed by Zegart and produced by Leonard.

JOHN F. FULTON, Sterling professor of the history of medicine at Yale University, will receive an honorary doctor of letters degree from Oxford University in England this June, as will the actor Sir Laurence Olivier. Both will be cited for distinguished contributions to English letters. Fulton is well known for his biography of Harvey Cushing and for pioneer research in neurophysiology and physiologic problems of aviation medicine.

BERNARD D. DAVIS, professor of pharmacology and chairman of that department at the New York University College of Medicine, has been appointed professor of bacteriology and immunology at Harvard University and head of
