

RICHARD M. FOOSE, formerly chairman of the geology department at Franklin and Marshall College, has been appointed to head the newly formed earth sciences department of Stanford Research Institute's Physical Sciences Division.

RICHARD H. KOSTERLITZ, who has served on the staffs of Cook County and Mt. Sinai hospitals in Chicago, Ill., has been named director of medical education for the new 800-bed Washington Hospital Center soon to be completed on a 47-acre tract in Washington, D.C. Funds for the appointment were made available by the Ford Foundation's Hospital Program.

Kosterlitz, a specialist in internal medicine, will not engage in any private practice. He will devote his time to teaching and developing and coordinating training programs. The position of director of medical education is new to most cities and rare in nonprofit, voluntary hospitals. Kosterlitz will foster research, medical school cooperation, and grant procurement. He will keep the staff informed of new drugs, techniques, and services and, in general, promote a high calibre of medical standards.

W. PAUL BRIGGS of Washington, D.C., secretary and executive director of the American Foundation for Pharmaceutical Education since 1951, has been selected by the past-presidents of the American Pharmaceutical Association to receive the 1957 Remington honor medal, pharmacy's highest recognition of service to the profession.

ARTHUR LOVERIDGE has retired from his post as curator of reptiles and amphibians at the Museum of Comparative Zoology at Harvard University. He and his wife plan to live on the island of St. Helena in the South Atlantic, 1200 miles from Angola—the island where Napoleon spent his last days. Loveridge is known to the lay public for a series of popular books on his East African expeditions and to scientists for the collection of 8469 specimens of reptiles and 11,597 amphibians as well as 3436 mammal skins and skulls.

Before he joined Harvard, Loveridge served in the botanical department of Manchester University (England) and in the department of zoology at the National Museum in Wales. In 1911, he left Wales to become curator of the Natural History Museum in Nairobi, Kenya Colony, until 1920, when he took the post of assistant game warden in Tanganyika Territory. He left Africa in 1923 and joined the staff of the Museum of Comparative Zoology the following year. In 1935 he became curator of reptiles and amphibians at the museum.

O. H. SMITH, emeritus head of the physics department at DePauw University, has been named visiting professor at Kalamazoo College (Mich.) under a grant from the John Hay Whitney Foundation. He will fill a vacancy created when RALPH O. KERMAN was granted a 2-year leave of absence to teach at the American University in Beirut, Lebanon.

JOHN L. ENYART has been appointed administrator of the Institute of Physical Medicine and Rehabilitation of New York University-Bellevue Medical Center. Enyart retired recently as naval surgeon in the Medical Branch of the Supreme Headquarters, Allied Powers Europe (SHAPE) in Paris.

J. G. VAN BUSSCHBACH, superintendent of schools in Amsterdam, the Netherlands, has received the \$1000 William McDougall award for distinguished work in parapsychology. He was selected on the basis of his investigation of extra-sensory perception between teacher and pupils in American schools. The award, which has been established by the Duke University Parapsychology Laboratory, will be given annually "to encourage and facilitate further research by the winner." The late William McDougall, for whom the award is named, headed the Duke psychology faculty from 1927 until his death in 1938 and was a pioneer in establishing parapsychology as a branch of university research.

MARIAN BALICKI, former head of the metallurgical engineering division at the Polytechnic Institute of Brooklyn, has assumed full-time duties as an engineering specialist in the department of physical metallurgy and ceramics at the Pennsylvania-Corning Nuclear Corporation, Bayside, N.Y. In his new post, he will be concerned with basic metallurgical and engineering research of background importance to reactor components technology.

JAMES E. BOYD, associate director of the Engineering Experiment Station at Georgia Institute of Technology, has been named director of the station. He replaces PAUL K. CALAWAY, who is returning to teaching as professor of chemistry at the institute.

HAROLD ST. JOHN, botanist at the University of Hawaii since 1929, has been appointed to the Wilder chair of botany, the first appointee since the chair was endowed in 1949. St. John has also been designated to direct the Harold L. Lyon Arboretum. Other recent changes in the botany department include the appointment of ALBERT J. BERNATOWICZ as department chairman.

Organizational changes involving E. D. SHIPLEY, A. H. SNELL, and J. L. FOWLER were announced recently at Oak Ridge National Laboratory, which is operated by the Union Carbide Nuclear Company for the Atomic Energy Commission. Shipley was appointed director of the newly formed Thermonuclear Experimental Division. He was succeeded as assistant director of ORNL by Snell, formerly director of the Physics Division. Fowler moved up from his former post as associate director of the Physics Division to succeed Snell as director.

FREDERICK A. COLLIER has retired as chairman of the department of surgery at the University of Michigan, a position he has held since his appointment in 1930. He will continue on the medical faculty as a teacher, practitioner, and consultant. He will conduct a special course in the history of medicine that he originated a number of years ago.

## Recent Deaths

EDITH ABBOTT, Grand Island, Neb.; 80; dean emeritus of the School of Social Service Administration at the University of Chicago; 28 July.

CHARLES E. BOLSER, Hanover, N.H.; 82; professor emeritus of chemistry at Dartmouth College; 29 July.

ORIS P. DELLINGER, Pittsburgh, Kans.; 79; emeritus dean and retired professor and head of biological sciences department at Kansas State Teachers College; 22 June.

EDWARD E. HITSCHMANN, Cambridge, Mass.; 86; founder and head of the Psychoanalytic Clinic of Vienna from 1922-38; member of the faculty and training psychoanalyst of Boston Psychoanalytic Institute; 31 July.

WILLIAM L. JENKINS, Bethlehem, Pa.; 59; head of the department of psychology at Lehigh University; 25 July.

JOSEPH M. PESTARINI, Rome, Italy; 70; consulting electrical engineer; taught in the United States at Manhattan College, Massachusetts Institute of Technology, Columbia University, and the University of Minnesota; also taught in Rome; inventor who designed metadynes, rotating amplifiers, and other machinery; 14 July.

WILLIAM ROWAN, Edmonton, Alberta, Canada; 65; professor of zoology at the University of Alberta; 30 June.

ALEXANDER SHAYNE, New York, N.Y.; 75; vice president and director of Bulova Research and Development Laboratories, Inc.; 26 July.

HAROLD R. SNOW, Bronxville, N.Y.; 62; research chemist; vice president and director of the American Oil Company; 31 July.
