## REHABILITATION OF THE MENTALLY ILL

### Social and Economic Aspects

*A symposium of the American Psychiatric Association, cosponsored by the AAAS Section on Social and Economic Sciences and the American Sociological Society.*

**Edited by Milton Greenblatt and Benjamin Simon**

This volume presents an up-to-date picture of rehabilitation in its broadest sense. The contributions are from outstanding researchers and practitioners in the field. The process of rehabilitation is examined from the standpoint of (a) hospital, (b) transitional aspects, and (c) community. The rehabilitation of the individual in the total sense is seen as a continuum starting from the moment of admission to his final resettlement in the community and many techniques and recommendations for improved patient care and treatment are contained in the book.

## Here's why AO Phasestar offers you more!

**New Bertrand Lens** Built-in Bertrand lens is now supplied as standard on all binocular and trinocular Phasestars to provide new convenience. You slide lens into position in eyepiece tube and raise or lower to focus quickly on diffraction plate at back aperture of objective.

**Interchangeable, Rotatable Bodies** Your choice of interchangeable, rotatable, monocular, binocular or trinocular bodies. Simply loosen thumb screw to rotate (full 360°) or interchange. Special inclined monocular body with vertical photographic tube also available.

**Interchangeable Stages** You loosen single set screw to remove and interchange stages... your choice of graduated or ungraduated mechanical or MICRO-GLIDE stages.

The AO Spencer Phasestar is the most versatile phase microscope ever developed. Beginning with a basic Phasestar stand, you can select from a wide choice of interchangeable bodies, stages, optics and phase accessories to make up the specific model that meets your exact needs...all in all, more than 50 possible combinations or models to choose from. And whatever the model you choose, you're assured of superior AO Spencer quality *plus* matchless convenience, comfort and versatility.

Often particular phase applications require specific equipment and phase contrast objectives. Before you select your phase microscope and accessories consult your AO Sales Representative. He's qualified to help

you select the microscope and equipment you need to do the job. There's no obligation, of course.

### AO SPENCER PHASE ACCESSORIES FOR PLATELET COUNTS

The use of phase contrast for blood platelet counts is increasing in acceptance and application. The longer working distance required with the phase hemacytometer can be obtained with special AO

Spencer long working distance accessories that provide up to 7mm working distance in air or 10½mm in glass.
