sentatives of various scientific disciplines. Another interesting topical symposium dealt with the effects of radiation on humans and animals.

The Lister lecture was delivered by T. P. Morris on "Science and morals in the treatment of deviant behaviour." J. N. Murrell gave the Kelvin lecture on color and chemical constitution, while the Darwin lecture was presented by L. Wolpert on "Growing in a definite shape."

A special program was arranged for young people. This included the York lecture by Sir Raymond Priestly on "Antarctic exploration yesterday and today," public forums, and a science fair. A feature of the meeting was a series of special scientific films and various visual presentations of scientific developments.

Representatives from the American Association for the Advancement of Science, who extended greetings to the British Association on its 125th birthday, were President and Mrs. Alan T. Waterman, Mr. and Mrs. Edward E. Sherburne, Jr., and the undersigned. Sherburne is AAAS Director of Studies on the Public Understanding of Science. I extended belated thanks to the British Association for having given the first grant-in-aid, of which I can find record, in 1840 to James Blake (1851–93) who later became California's first great scientist. The grant, amounting to about $300 a year for 5 years, was offered to help Blake in his studies on biological action of inorganic compounds. From his research he was able to induce what we call the Periodic Table.

Forthcoming Events

November

18–20. **Engineering in Medicine and Biology**, 16th annual conf. and exhibit, Baltimore, Md. (H. Gilmer, 933 Ridge Ave., Pittsburgh 12, Pa.)

18–21. **Atomic Industrial Forum** and American Nuclear Soc., winter meeting, New York, N.Y. (O. J. Du Temple, ANS, 86 E. Randolph St., Chicago 1, Ill.)

18. **Industrial Pharmacy** Section, American Pharmaceutical Assoc., 3rd annual eastern regional meeting, New York, N.Y. (H. Lieberman, Warner-Lambert Pharmaceutical Co., 170 Tabor Rd., Morris Plains, N.J.)

18–22. **Plastics**, 10th natl. exposition, Chicago, Ill. (J. Paluszek, G. M. Basford Co., 60 E. 42 St., New York 17)

19–21 American **Physical** Soc., Norman Okla. (K. K. Darrow, 538 W. 120th St., New York 27)

A $50,000 POLICY FOR $105?

Using **PLAN Your Life Insurance,** this professor estimated that to meet the needs of his family he should have $50,000 of additional life insurance. And he found he could get it in a TIAA 20-Year Home Protection policy for a net premium of only $105.

At his age of 30, this $50,000 decreasing Term policy calls for a level annual premium of $193. The cash dividend of $88, payable at the end of the first policy year on TIAA's current dividend scale, reduces his first-year net cost to $105. Dividends cannot, of course, be guaranteed.

This level premium Term plan provides its largest amount of protection initially and reduces by schedule each year to recognize decreasing insurance needs. Insurance periods of 15, 20, 25 or 30 years are available.

Teachers Insurance and Annuity Association (TIAA) is a unique, nonprofit life insurance company established by educational and philanthropic organizations in 1918 to serve higher education.

Staff members of colleges, universities, nonprofit private schools and certain other nonprofit educational or scientific institutions are eligible to apply for TIAA individual life insurance—regardless of whether the institution has a TIAA retirement plan. Do you qualify? If so, send for your copy of the booklet *Plan Your Life Insurance* and your personal illustration of low-cost TIAA insurance.

TIAA employs no agents—no one will call on you.

TIAA

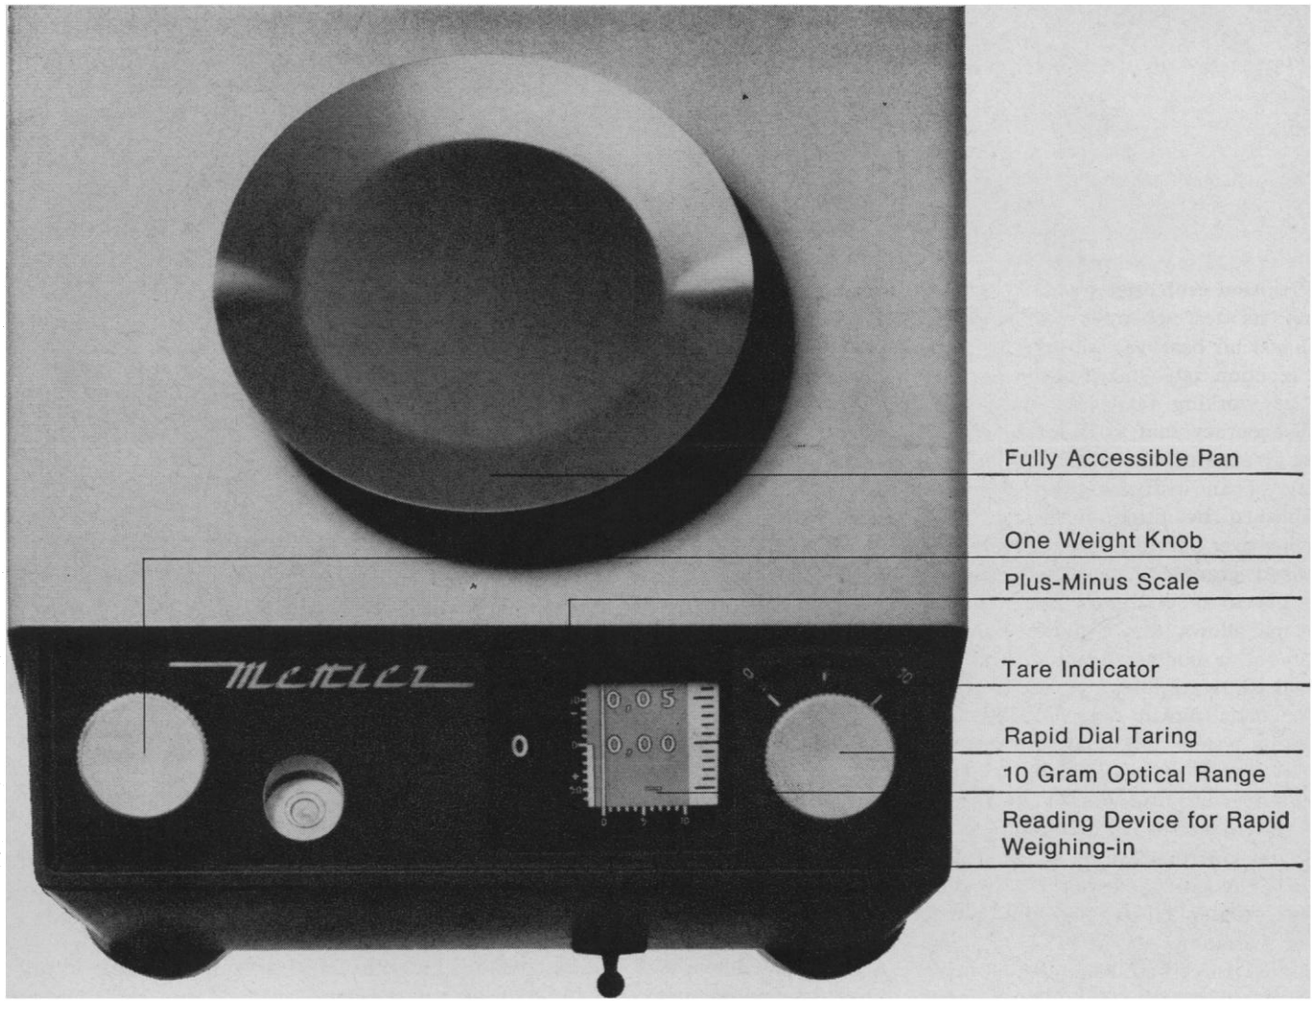

TIAA • 730 Third Avenue, New York N. Y. 10017 i

P120

A new top-loading balance with ± 3 mg precision

For the first time a balance offers the ruggedness and easy accessibility of a top-loading pan, the fast readability of a 10 gram optical scale and precision of ± 3 mg, capacity 120 g.

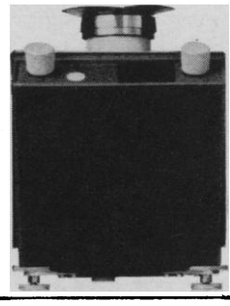

It is ideally suited for technical analyses, preparatory chemistry, weighing-in, serial checkweighing, batching and weighing-out.

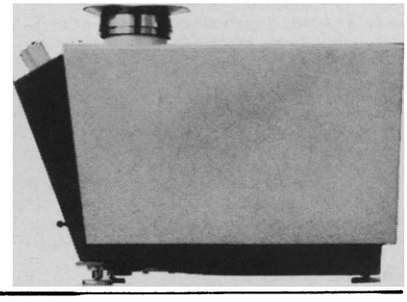

If you would like to try this new balance, or want more detailed information, contact your Mettler dealer now, he will be glad to arrange a demonstration or trial.

Mettler®

Mettler Instrument Corporation

20 Nassau Street Princeton, New Jersey

New Products

Precision centrifuge (model 144) supports its test chamber on a large-diameter air bearing and is driven by an air reaction jet. Instruments mounted on its working plane are accelerated with accuracy said to be 1 part in 10^5 over a range of 1 to 30*g*. The rotating plane of an instrument under test is established by three air-bearing pads moving over a fixed reference surface of polished granite, accurately horizontal and flat to 0.0002 inch. A radial air bearing allows the mounting pad to rotate at a constant radius. Speed is measured by timing the rotation with a magnetic pickup and a 5-Mcy/sec counting system. Measurement to about 3 parts in 10^6 is achieved by counting the number of pulses during one revolution. Arm radius is measured in the order of microinches by a servo-positioned capacitive pickup. The high inertia/friction ratio achieved is said to make variation of the already small frictional forces an inappreciable contributor to error.—J.S. (J. W. Fecker Div., American Optical Co., 4709 Baum Blvd., Pittsburgh 13, Pa.)

Circle 1 on Readers' Service Card

Substrate coater for thin layer chromatography applies an absolutely uniform layer of adsorbent onto the glass chromatography plates regardless of variations in glass thickness. It consists of a long channel containing a number of rollers. Underneath the rollers is an air bag which is filled by squeezing a rubber bulb. The glass plates are placed between the rollers and the machined underside of a set of guide rails. When the air bag is inflated, the rollers force the glass plates against the flat surface of the rails, assuring that all the surfaces are aligned exactly in the same plane. An adjustable spreader is used to coat the plates with a uniform layer of substrate. Five 20- by 20-cm, ten 20- by 10-cm, or twenty 20- by-cm chromatographic plates can be coated at once with this device.—D.J.P. (Colab Laboratories, Inc., Chicago Heights, Ill.)

Circle 2 on Readers' Service Card

Capacitance manometer is an electromechanical pressure comparator that permits the comparison of the pressure in a clean or ultraclean system with that in another system containing a mercury or oil manometer without exposing the clean system to manometer fluids. The instrument consists of a bakeable sensing head, a balance unit that is removed during bakeout, and a remote indicator. The sensing head consists of two chambers separated by a thin metal diaphragm whose movements change the capacitance between itself and a fixed probe. The resulting unbalance of a capacitance bridge in the balance unit results in an output signal that is displayed by the indicator. In use, the thin diaphragm separates the two systems in which pressures are to be compared. A pressure difference of less than 5×10^{-3} torr is said to produce a visible deflection of the indicator at maximum sensitivity for any pressure from zero to 1 atm. Hysteresis errors during cyclic differential pressure changes of up to 10 torr are said to be undetectable. The sensing head is designed to withstand pressure differential overloads of 1 atm without damage. Differential pressure ranges give full-scale meter deflections at 0.1, 1, and 10 torr. Ranges up to 200 torr can be provided. Accuracy is said to be better than ± 2 percent of full scale on all ranges.—J.S. (Granville-Phillips Co., Box 1290, Boulder, Colo.)

Circle 3 on Readers' Service Card

Wideband amplifier (model 104) provides response from 15 cy to 180 Mcy/sec with usable gain up to 300 Mcy/sec. Response is constant within ±0.5 db from 25 cy to 150 Mcy/sec. The instrument consists of three separate amplifiers that can be used individually or in cascade for an over-all gain of 100. Two of the amplifiers are identical, with gain of 10, 50-ohm input impedance, and maximum output 1.4 volts peak-to-peak into a 50-ohm load. The third is a unity-gain impedance matching amplifier with 1-megohm, 10-pf input impedance. It has a maximum output of 900 mv into a 50-ohm load and can be coupled directly to the gain amplifier. The instruments can be cascaded for gains up to 10,000. Rise time is less than 3 nsec and delay time is less than 5 nsec per amplifier. Maximum noise for the gain amplifiers is said to be less than 35 μv r.m.s. referred to the input. The gain amplifiers will withstand 10 volts r.m.s. surge overloads and 2.5 volts d-c. The unity-gain amplifier will withstand overloads up to 30 volts r.m.s. and 400 volts d-c. There is no discernable variation in performance for line changes from 105 to 125 volts according to the manufacturer.—J.S. (Keithley Instruments, Inc., 12415 Euclid Ave., Cleveland 6. Ohio)

Circle 4 on Readers' Service Card

Annealing furnace for laser crystals is a high-frequency induction furnace operating at 20 Mcy/sec. At this frequency, the zirconia or thoria tubes into which the crystals are loaded for annealing are conductive and heat by induction. Under the conditions used, zirconia is said to reach about 4900°F and thoria about 6300°F. The standard furnace will accommodate laser rods up to 1 inch in diameter; larger capacity may be had on special order. Units are available with power up to 100 kw. Output of the rf oscillator is controlled through powerstats, thyratrons, or saturable reactors, and monitoring devices are provided to customer specifications. —J.S. (RFC, Inc., Box 348-z, Medfield, Mass.)

Circle 5 on Reareds' Service Card

Particle size analyzer (model TGZ) permits analysis of all particles in a mixture, including those that overlap or are irregularly shaped. The instrument is basically a combination of projector and electrical counting device. A photomicrograph or electron-micrograph of the mixture is placed on the glass stage of the instrument and the

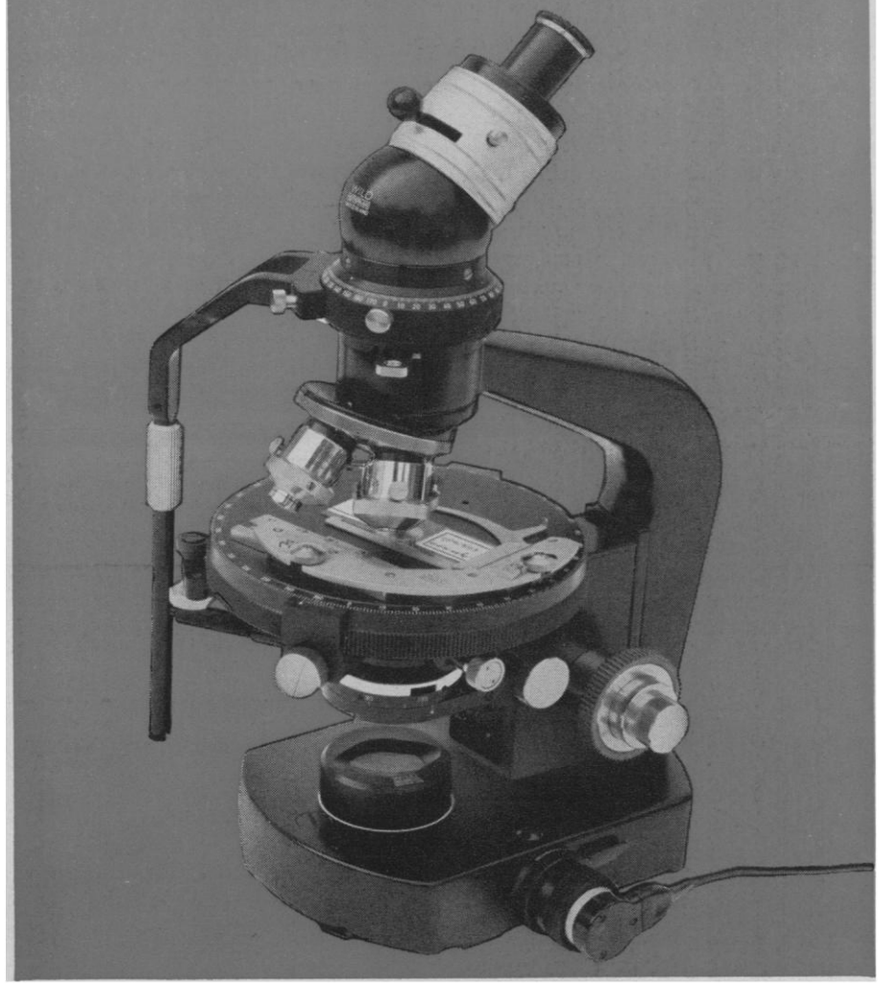

The material in this section is prepared by the following contributing writers:

Robert L. Bowman (R.L.B.), with the assistance of Denis J. Prager (D.J.P.), Laboratory of Technical Development, National Heart Institute, Bethesda 14, Md. (medical electronics and biomedical laboratory equipment).

Joshua Stern (J.S.), Basic Instrumentation Section, National Bureau of Standards, Washington 25, D.C. (physics, computing, electronics, and nuclear equipment).

Circle the department number of the items in which you are interested on this card.

This is the Wild* M 21 Polarizing Microscope

Developed from the basic design of the well-known Wild M 20 Research Microscope, the M 21 incorporates important features which contribute to increased precision, versatility and ease of use. **Stand:** Accommodates every useful accessory for research, including Wild phase contrast and photo attachments. **Optics:** Analyzer is above tube support, eliminating depolarizing effect of inclined tubes. Bertrand lenses in monoculars for conoscopic observation. Polarizing filters have excellent extinction properties. **Light Source:** Illuminator "S", 6V/20W is built in, centerable and powerful. Facilitates Koehler illumination. **Stage:** Pre-centered, rotatable, and graduated 360° with vernier reading to 0.1°.

Features a dustproof guiding slot for quartz wedges and compensators. An optional synchronizing bracket couples polarizer and analyzer.

Write for booklet M 21.

image of an adjustable diaphragm is projected on the stage. By means of a hand wheel, the size of the image is varied to coincide with the area of the particle being counted. When the operator presses a pedal, the particle is recorded in the appropriate size category. Simultaneously the particle image in the photograph is punched automatically to prevent inadvertent repeated counting. Total counts for each category and grand total are displayed above the stage. The distribution of particles can be recorded with constant or exponentially increasing step widths as either a distribution or a summation curve. Two particle-image measuring ranges are offered: from 1.2 to 9.2 mm, and from 1.2 to 27.7 mm. Particles are analyzed into 48 categories.—J.S. (Carl Zeiss, Inc., 444 Fifth Ave., New York 18)

Circle 6 on Readers' Service Card

Temperature-controlled refrigerated chamber for photomultiplier tube operation uses thermo electric cooling. Operating temperature of the tube photocathode can be selected in the range 20° to −10°C and stabilized to ±0.25°C for extended periods. A thermally insulated window prevents condensation of dew on the tube face and a cylindrical mu-metal shield that surrounds the tube envelope is arranged for operation at tube cathode potential. Total power consumption of the thermoelectric refrigerator is 100 watts.—J.S. (Technical Operations Research, Burlington, Mass.)

Circle 7 on Readers' Service Card

Conductivity, temperature, depth indicator (model RS-6) will display continuously on a four-digit, drum-type counter any one of the three parameters. Conductivity is indicated in the range 0 to 60 mmho/cm with accuracy ±0.3; temperature, 0° to 30°C ± 0.2°C; depth 0 to 400 ft ±8 ft. No manual balancing is required. The operator sets the function selector switch and a reading is taken after the counter has come to rest. It is said that the three measurements can be logged in less than 1 min. The case of the instrument and all controls are sealed against entrance of water. The three transducers are mounted in a glass-reinforced-epoxy housing at the end of a single heavy-duty cable that can be provided in lengths up to 400 ft.—J.S. (Industrial Instruments Inc., 89 Commerce Rd., Cedar Grove, N.J.)

(h) **Chemist,** doctorate preferred; small central college. (i) **Mathematician,** M.S. minimum; teach beginning mathematics primarily; midwestern state college. Many other opportunities available for both junior and senior scientists. Please write to Science Division, **The Medical Bureau, Inc.,** *Burneice Larson, Chairman,* 900 North Michigan Avenue, Chicago 11, Illinois. X

PHARMACEUTICAL R and D

SECTION CHIEF-HUMAN MICROBIOLOGY

Ph.D. in Microbiology with up to 10 years laboratory and supervisory experience to direct Human Microbiology Section comprised of about 20 people, all levels. Emphasis on development of antibacterial/antifungul agents. Will report to head of Biological Research.

UNIT LEADER-BACTERIOLOGY

Ph.D. or equivalent with 2-3 years experience in experimental chemotherapy to head Bacteriology unit.

RESEARCH BACTERIOLOGIST

M.S. in Bacteriology or equivalent training to conduct chemotherapy studies.

SENIOR RESEARCH BIOLOGIST

Special Biology section of Pharmaceutical Research Department has opening for a Ph.D. in Biochemistry or Physiology with 2 or more years experience in renal physiology or chemical biochemistry to conduct independent research.

New research laboratories located in semi-rural setting of Central New York State community.
Please forward letter & résumé to John E. Wedge, Professional Employment Mgr.

THE NORWICH PHARMACAL COMPANY
Norwich New York

MELPAR, INC.

Now Has Additional Key Positions Available for Applicants with Post Doctoral Experience to Work in the Areas of:

- BIOCHEMISTRY
- VIROLOGY
- IMMUNOCHEMISTRY
- PHARMACOLOGY
- BIOPHYSICS

Some positions available for recent graduates

ALSO A NEED EXISTS FOR CHEMISTS

with training and experience in biochemistry, microbiology, immunochemistry, or biophysics. To conduct research in space biology, bioelectricity mechanism of enzyme action, biological detection and bioinstrumentation. Requirements include a B.S. Degree.

3425 Arlington Boulevard, Falls Church, Virginia
(a suburb of Washington, D.C.)
an equal opportunity employer

POSITIONS OPEN

'Bacteriologist' The National Research Council of Canada, Saskatoon, Sask. requires a Bacteriologist, Ph.D. to study the metabolism of microorganisms. Applicant should be proficient in the techniques of isolation and identification of bacteria and have a knowledge of genetics, or should be well acquainted with biochemical methods and enzymes.

The salary will be commensurate with qualifications. Address enquiries to Dr. H. R. Sallans, Director, Prairie Regional Laboratory, National Research Council, Saskatoon, Saskatchewan.

BIOCHEMISTS

We are seeking a scholarly and reliable **postgraduate fellow** and a **Ph.D. candidate** to assist full professor in research study of lipocarbohydrate chemistry as related to immunochemistry of blood group substances. Progressive hospital affiliated with major mid-western university. Excellent salary commensurate with experience and training. Direct résumé to Box 245, SCIENCE.

CHEMIST - Ph.D. - ORGANIC

Excellent opportunity for a Ph.D. in Organic (Medicinal) Chemistry in a unique scientific post which includes responsibilities for evaluation of laboratory data and scientific literature, the analysis of research potential of outside research organizations (domestic and foreign) and the initiation of research ideas. Will work closely with fellow chemists in several research areas, and will travel overseas occasionally. Candidates should have working knowledge of Italian (preferably) and/or French. Supplementary linguistic training is available.

Send resume including salary requirements to Cyrus M. Greenberg, Ph.D., Director of Scientific Employment. **SMITH KLINE & FRENCH LABORATORIES,** 1522 Spring Garden Street, Philadelphia 1, Pa. An equal opportunity employer

CIVIL SERVICE OF CANADA
POSITIONS IN THE CHEMICAL AND BIOLOGICAL SCIENCES

Various Departments at Ottawa and Other Centres in Canada

Up to $10,300, per annum

Opportunities for Research, Analytical, Inspection and Diagnostic studies in the fields of analytical, organic, physical and bio-chemistry, bacteriology, fisheries biology, veterinary science, plant pathology and nematology, blood group serology and other fields of biology.

Write for details and application forms to the **CIVIL SERVICE COMMISSION OF CANADA,** Ottawa 4, Ontario, quoting Competition 63-1402.

MICROBIOLOGIST

Ph.D., research and development on yeast and bakery products, commercial or postdoctorate experience preferred but not necessary; salary dependent on training; send your résumé to:

Employment Manager
Industrial Relations Department
Anheuser-Busch, Inc.
St. Louis 18, Missouri

SCIENTIFIC WRITER. Must be able to interpret a new concept in work-view-recording optical systems into language meaningful to a broad spectrum of research scientists. Must be well-grounded in basics of laboratory research in medicine, biochemistry, marine biology, botany, entomology. Must understand principles in electrophoresis, darkfield culture and similar fields of research. Must be able to write serious technical articles and applications techniques. Send résumé, samples and salary range to: Alex J. Weinstein, President, Ednalite Research Corporation, 210 North Water Street, Peekskill, N.Y.

POSITIONS OPEN

ELECTRON MICROSCOPIST, Ph.D., M.S. or equivalent, to supervise Electron Microscope Laboratory and Participate in investigating Project, in Hospital connected Research Institute located in New York Area, Opportunity Available to Start Own Research Project. Salary Open. **Box 243, SCIENCE.**

INFORMATION SCIENTIST

To assist in preparation, editing, and review of pharmaceutical product information and write preclinical and clinical brochures on new drugs. Requirements include a B.S. or advanced degree with experience in writing technical documents and interpreting data. Send résumé to Personnel Director, Vick Chemical Company, 1 Bradford Road, Mount Vernon, New York.

Microbiologist: Ph.D. or M.S., interested in diagnosis and chemotherapy of tuberculosis. To assist in routine clinical laboratory and to teach physicians, nurses, and bacteriologists in USPH sponsored training course at large chest disease hospital. Opportunity for research in this field. Salary depending upon qualifications and experience. Write Dr. Gardner Middlebrook, National Jewish Hospital, Denver, Colorado, 80206.

PROTEIN CHEMIST (Ph.D.) To collaborate in physiochemical research on proteins in relation to chronic diseases.

Starting Salary—$10,000

Send complete résumé to:—**A. Saifer, Ph.D. Chief, Dept. of Biochemistry, Isaac Albert Research Institute, 86 E. 49 St., Bklyn 3, N.Y.**

PHARMACOLOGISTS

for new research programs with

I I T RESEARCH INSTITUTE

The increasing number of investigations in the Life Sciences Division has created select opportunities for pharmacologists at the Ph.D. level. Desired qualifications for these appointments are a background and/or experience in the effects of new drugs on physiological systems and on behavior response.

The advantages of a research career at IITRI are many, including the use of advanced facilities and equipment, opportunity to pursue investigations of personal interest, salaries in competition with industry and opportunities for personal and professional growth.

Your inquiries are invited. Please send complete résumé in confidence to Mr. George Zima. U. S. citizenship required.

AAAS Symposium Volume No. 57

SYSTEMS OF UNITS— NATIONAL AND INTERNATIONAL ASPECTS

Editor: Carl F. Kayan
6 x 9 inches, 308 pages, Index
Presented by 33 American and European authors at the Washington Meeting, AAAS, December 1958
Price $6.75. AAAS members' cash order price $5.75
Published November 1959

The purpose of the volume is primarily to focus attention on the growing problems of international usages and goals in terms of the different systems employed, as contrasted to those of our own national operations tied to established practices. The purpose of this volume is to alert the technologists on the general confused situation, the clamors, the needs, and the proposals to ameliorate the confusion.

YOUR LABORATORY APPARATUS DEALER A GREAT GUY TO HAVE ON YOUR TEAM!

Consider the Laboratory Apparatus Dealer — the man who brings to you the best facilities and resources of scores of manufacturers — thousands of products.

He's just a local phone call away. A few minutes drive from your office. He takes many a problem and headache on himself to save you the trouble. He spends his time and money evaluating scores of products to bring you the best the market offers. He keeps you up to date on new developments and new products. He is the man who stocks a huge inventory and puts it at your beck and call. Because of him you don't have to tie up extra funds in supplies and parts. His service men keep your equipment running. Because of him, his warehouse and his comprehensive catalog your buying is enormously simplified. You deal with a single lab apparatus consultant.

Yes, your laboratory apparatus dealer, serves an important consulting function that helps you select the best equipment for your needs. He serves you and us well. And he merits your business.

We believe in him, too. We sell exclusively through Laboratory Apparatus Dealers, and have done so for sixty years.

Your IEC authorized laboratory apparatus dealer has what you need . . . when you need it.

INTERNATIONAL (IEC) EQUIPMENT CO.

300 Second Avenue, Needham Heights, Massachusetts

GUIDE TO SCIENTIFIC INSTRUMENTS

Compiled by Earl J. Scherago

This *Guide to Scientific Instruments* has been compiled to meet a need of the scientific community for information on scientific instruments and their manufacturers. It organizes instrument information in a coded pattern that will permit changes and revisions without destroying the usefulness of information published in the preceding guide.

Machine techniques for handling and retrieving information have been used in assembling this guide. These techniques will permit the distribution, between issues of the guide, of current information in machine language (magnetic tape, punched cards) and possibly on microfilm. Such a system could replace existing literature files and eliminate maintenance.

The rapidly expanding instrument business changes drastically from day to day. Many new companies are entering the field and the established ones are continually broadening their existing lines. With the new documenting techniques employed by the guide, the researcher will be able to obtain the names of the manufacturers of any specific kind of instrument.

Scientists now should have a better way of documenting instrumental techniques in scientific papers. The guide provides a common standard for describing instrumentation in the scientific literature. Instruments can be cited by reference number, for the numbers will not change with each new catalog. We hope this guide will encourage scientists to be more explicit in their literature references to instrumentation.

Others who will benefit are personnel in purchasing, in inventory control, and in property management. They now have available to them in machine language those codes necessary to establish electronic files for management planning and control. New tape reels or punch cards may be substituted for old because the searching codes will remain the same year after year. In effect, this could be file maintenance on a national scale.

Nationally maintained standard listings of this type become more useful and more complete with each revision. The guide's suggested uses are by no means exhaustive. Many ancillary uses suggest themselves when one provides a base for effective mechanization and automation development. At the least, this guide will relieve the user of the need to search obsolete catalogs and will insure a common understanding on specific items and manufacturers; at best, this guide could provide a nationally accepted scientific instrument nomenclature and lead to the establishment of a national scientific coding system. Those responsible for the development of the guide would be greatly interested in users' reactions to it.

ARTHUR L. KENNEY
Data Processing and Statistics, Office of Resource Development, U.S. Public Health Service

How To Use This Guide

1. Index

Each instrument category in this index has been assigned a classification number for machine coding. The index also gives the page number in the guide where all the manufacturers of a specific instrument can be found. For example:

Category No.	Title of category	Page in guide
210.	**Autoclaves, Biological,**	**p. 707**

2. The Guide

The guide starts on page 705. Under each category appear the names of all the manufacturers who make that item. Find the item first in the index (page 699) and then turn to the page indicated.

3. List of Manufacturers

A complete list of all manufacturers appearing in the guide starts on page 761. Each manufacturer has been assigned a standard manufacturer's number which appears next to his name in every category where he is listed. Manufacturers are listed in chronological order according to the identification number.

4. Abbreviations

All references to items appearing in the guide should bear one of the following abbreviations: SCN (Standard Category Number) or SMN (Standard Manufacturer's Number).

5. Future Guides

Suggestions for the addition of new categories and corrections are welcome. Manufacturers not included in this year's guide should write immediately so that we can send them an application card and assign them a standard manufacturer's number.

from Nuclear Data:

ANNOUNCING: THE ENHANCETRON 1024

DIGITAL STORAGE OSCILLOSCOPE

a fascinating & important new measurement tool for the enhancement of the signal-to-noise ratio of repeatable or naturally recurrent noisy signals, useful in many fields:

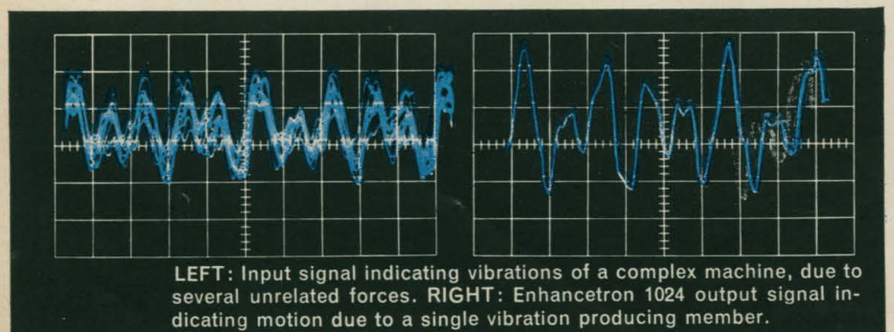

GEOPHYSICS, NUCLEAR MAGNETIC RESONANCE, RADAR ASTRONOMY, ELECTROPHYSIOLOGY, VIBRATION ANALYSIS, BIOCHEMISTRY, SONAR, & OTHERS

Why not use ordinary filtering to eliminate noise? Because noise sometimes has frequency components in the same range as the signal. For example, noise due to unrelated nerve activity in electrophysiological measurements has exactly the same general appearance as the signal of interest. In isolating the vibrations of a complex system, due to one cause such as a motor or engine, in the presence of numerous unrelated vibrations, filtering is usually impossible. In nuclear magnetic resonance measurements, high frequency noise may be filtered by decreasing the sweep rate of the magnetic field and using low amplifier upper passband frequency, but very low frequency noises, such as amplifier gain drifts, become increasingly important as sweep speeds decrease. Filtering therefore has definite limitations.

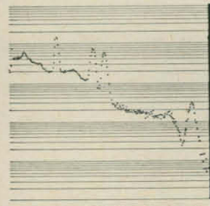

Here is how the Enhancetron 1024 works: Signals obscured by noise are digitized at 1024 time intervals, and the results recorded as 1024 numbers in a magnetic core memory. Positive numbers indicate positive input voltages, negative numbers negative input voltages. This is repeated for each signal recurrence, with the numbers for corresponding time intervals numerically added. Noise in general tends to average toward zero, since it is as likely to be positive as negative. THE SIGNAL OF INTEREST ADDS LINEARLY. The signal-to-noise ratio improves in proportion to the square root of the number of signal recurrences. This number is limited only by the length of each signal and the measurement time available.

Digitizing and storage occurs at a rate of 31.25 microseconds per point. The sweep speed range is operator-selected from 31.25 microseconds to 8 milliseconds per point. Bandwidth is about 10 kc/sec. Results are displayed on a standard oscilloscope, which is also used to view the input signal. If desired, data may be read out by typewriter, or on computer compatible punched paper tape.

Write or phone Nuclear Data for further information and literature.

LEFT: Input signal indicating vibrations of a complex machine, due to several unrelated forces. RIGHT: Enhancetron 1024 output signal indicating motion due to a single vibration producing member.

WARING COMMERCIAL BLENDORS® with

one-gallon stainless steel container will handle your materials more easily . . . perform processing functions more rapidly . . . produce the decided formulation more efficiently, more uniformly.

The container, blades and motor of the Waring Commercial Blendor provide the most advanced electro-mechanical means for the specialized mass processing of experimental materials.

WARING EXCLUSIVE VORTEX ACTION AND CLOVER-LEAF DESIGN BLEND UP TO 4 TIMES MORE EFFICIENTLY.

Ingredients are continuously *impelled* down, into and through the rotating blades, with every revolution. This assures that all ingredients will receive equal exposure to the action of the blades. "Blind" spots, blend-resisting eddies and stratification are eliminated.

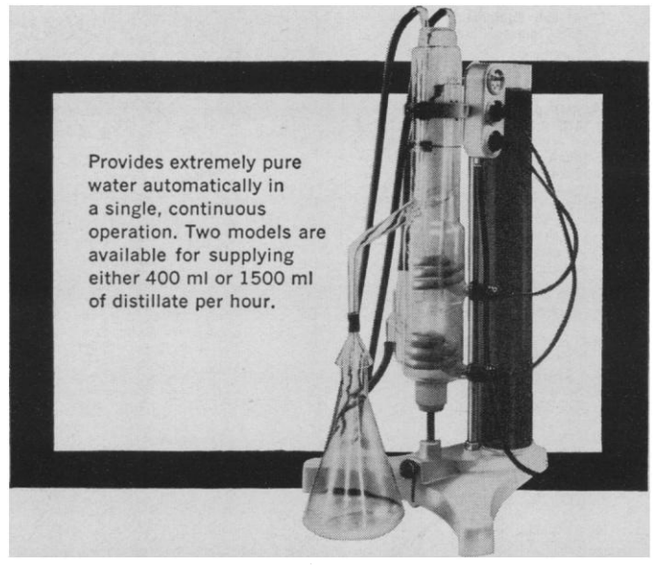

Powerful 15 amp. motor operates at three speeds with push-button settings. Container and lid are constructed of 302 stainless steel. Integral handle for easy pouring. Two-piece lid with molded vinyl gasket; positive acting clamps assure perfect seal.

OTHER WARING PRODUCTS:
MODEL DL-202: 2-SPEED BLENDOR; 510-watt motor.
MODEL 700: STANDARD BLENDOR; 480-watt motor.
Both available with 1000 ccm. Stainless Steel Container for heavy usage or 1000 ccm. heat-resistant glass container.
MODEL EP-1: EXPLOSION-PROOF BLENDOR BASE.
For use in Group 1, Class D hazardous locations.
MODEL AS-1: ASEPTIC DISPERSALL® CONTAINER.
For reduction and dispersal of infectious materials.

PRECALIBRATED GLASSWARE

...For All Makes of Warburg Apparatus

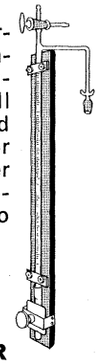

YES . . . you can get from Will *individually precalibrated* manometers and reaction vessels that can be used on your present Warburg. And all glassware is completely *interchangeable:* the volume of each vessel and manometer is permanently etched on it . . . add them together and you have the *total precalibrated volume* of each system to the 15 cm. mark.

Imagine the time you'll save . . . and the convenience, too . . . no individual calibrations to make, no matching of vessels to manometers. These patented, double-capillary Bronwill manometers are unique! Both capillaries are in one sturdy, borosilicate glass rod . . . less chance of breakage . . . and the single scale with opal background is much easier to read, even while shaking!

Will No. 4857 BRONWILL PRECALIBRATED MANOMETERS.
₮17/20, and with 75 mm neck length, each $23.50 **(Will No. 4867**—same, but with 110 mm neck for Precision and Aminco Warburg baths each $23.50)

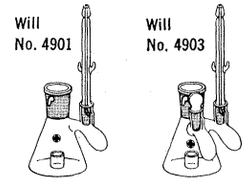

NOTE: Differential and Summerson Manometers, as well as uncalibrated manometers or ones with other standard tapers, are also available.

Will No. 4878 UNIVERSAL MANOMETER FASTENER.
A plastic clamp for attaching Bronwill Manometers to supports of other makes of Warburgs.....each 75c

Will No. 4901 BRONWILL PRECALIBRATED REACTION VESSELS.
₮17/20, 13 mm capacity, with center well and one side arm with venting tube.....each $10.75

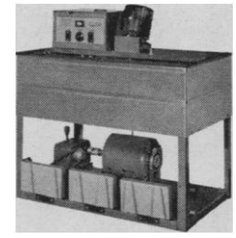

Will No. 4903 same, but with a second side arm, stoppered..each $13.15

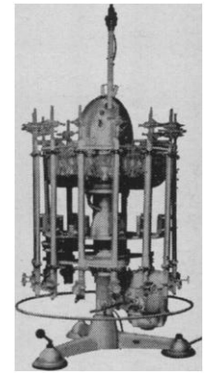

NOTE: Many other styles, and standard tapers available . . . even magnetic tilting vessels.

Want to know more? Ask for our new Warburg Glassware Folder.

YOUR CHOICE OF TWO NEW WARBURG APPARATUS . . . 14 or 7-UNIT

Precision 7-Unit . . . a new, compact bath with clear bottom for photosynthesis; variable shaking speed and amplitude; Microset temperature control from 5°C over ambient to 60°C (cooling coil optional). Complete with PRECALIBRATED Bronwill Manometers and Reaction Vessels, 7 of each (manometer supports with 14 fasteners included).
Total cost.....**$925.25**

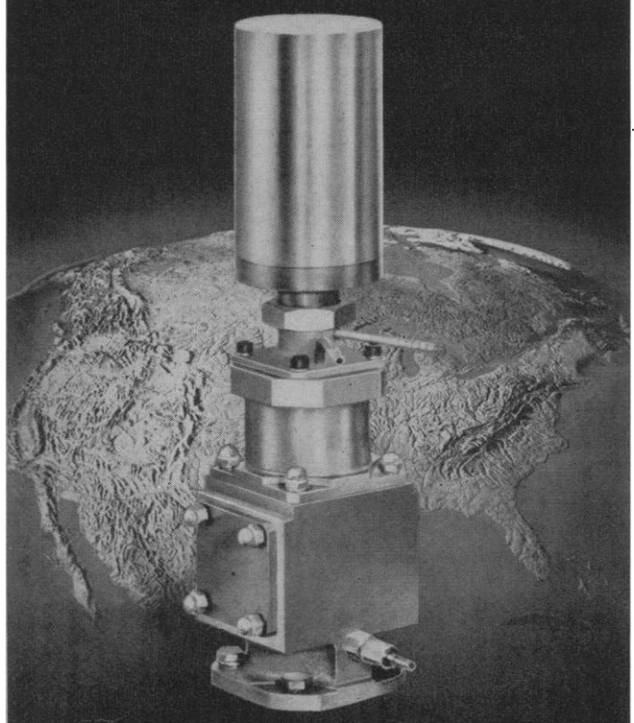

Bronwill 14-Unit . . . only 20½" in diameter, with clear Plexiglas bath; lagless intermolecular heating; instant response, easy to set, merc - to - wire thermoregulator, controlling to ±0.01°C; 6 shaking speeds, 3 amplitudes; built-in stirring. Complete with 14 Bronwill PRECALIBRATED Manometers, manometer supports and 14 single side-arm PRECALIBRATED vessels.
Total cost.....$1452.20

Complete specifications on request.

The Miniature Cryogenerator Opens New Frontiers

CRYOGEM

FOR RESEARCH, DEFENSE, AEROSPACE AND INDUSTRIAL APPLICATIONS

The world's first miniature, closed-cycle refrigerator achieving temperatures from ambient to below −415°F (25°K) in a single stage. Combining rapid cool-down (less than 10 min.) and rugged lightweight construction in a compact design (3″x3″x12″).

A proven versatile tool for low temperature applications. Performance in all "attitudes" is guaranteed.

Autoradiography can be . . .

Reproduction of a blood cell autoradiograph

the choice is now yours . . .

TRITIUM has the outstanding merits of high resolution in tissue section autoradiography (to one micron) and exceptionally high specific activities; the theoretical limit of 27 curies/milligram-atom is sometimes approached. It is one of the least toxic, cheapest and most versatile of tracer isotopes. Our list of over 150 tritium-labelled compounds continues to grow.

* *Our Carbon-14 and Tritium compounds are distributed in the U.S.A. by the Nuclear-Chicago Corporation, 333 East Howard Avenue, Des Plaines, Illinois.*

Positive stop readings in 1.13 seconds

SHADOGRAPH®

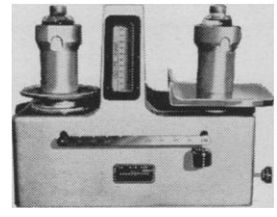

small animal balance provides visible accuracy to 350 milligrams

Model 4203B-TC-SA Shadograph is designed especially for high-speed, precision weighing of mice, chicks, frogs and small rats. It can reduce tedious weighing operations by hours . . . give you more time for other work. Light-projection indication is fast . . . provides sharp shadow-edge reading on frosted glass dial. Parallax reading eliminated. Capacity 1500 grams. Dial graduated in two columns: 0-30 grams and 15-45 grams. Shutter closes dial column not in use. Beam 100 grams in 1 gram graduations. Weighs accurately in out-of-level positions. Other models up to 3 kilos for rats, hamsters and guinea pigs.

TISSUE AND TUMOR BALANCE

Model 4142 recommended for fast, precision weighing of cancer tissue and tumors. Weighpan is shielded from air currents by clear plastic door . . . easily removed for sterilization. Rated capacity 15 grams; visible sensitivity to 5 milligrams. Movable viewer for 5-column dial, each column 3 grams with 5 milligram graduations. 5-notch beam corresponding to dial columns.

CENTRIFUGE BALANCE

Model 4206B-TC also for general laboratory use and small-animal weighing. Has tare control knob to zero the dial, or position for over-and-under reading. Capacity 3 kilos; sensitivity to 350 milligrams. Dial is graduated 0-100 grams in increments of 1 gram. Beam 500 grams by 5 grams.

This new book is a comprehensive reference on safety enclosures for handling a wide variety of hazardous substances. Profusely illustrated, it contains detailed descriptions of regular and vacuum dry boxes, biological safety cabinets, fume hoods, pressurized enclosures, controlled-atmosphere boxes, waste containers, laboratory furniture and sinks, process units and unitized dry box systems. You'll find an enclosure to meet almost any contamination or safety problem. Send for your copy now.

BEL-ART

A COMPLETE LINE OF filtering aids

BUECHNER FUNNELS

Seven sizes taking filter paper from 42.5 mm through 240 mm . . . molded in two parts of high temperature Polyethylene. The bowl and filter plate section has equal distribution of 1 mm holes in a circular pattern; smooth edges. The funnel and stem can be separated for easy cleaning. The two parts snap together for vacuum seal.

FIBERFILM FILTERS

A new approach to filtration, FIBERFILM.† Made of sub-micron glass fibers impregnated with TEFLON*; combines superior speed, clarity and tensile strength in a single filter material and adds filter features never before available. Extraordinary resistance to chemicals and heat; unprecedented rapidity of flow; dependable, specific pore size of 2-7 microns in diameter; no loss of strength when wet.

*DuPont's TFE Fluorocarbon Resin
†Reg. TM Amer. Machine and Foundry Co.

POROUS POLYETHYLENE SHEETS

High density Polyethylene with an average pore size of 50 microns. For filtration of corrosive solutions, air filtration and usage in chromatography, ion exchange columns, electrolysis, etc. Available in sheets 12″ x 12″ in various thicknesses or fabricated to order.

See your laboratory supply house.

MACRO-CRYSTALLOGRAPHY WITH

HONEYWELL

Expect outstanding macrophotography with your Honeywell equipment!

This specimen of an unusual Stibnite crystal has been lighted with Honeywell Strobonar electronic flash units and photographed with the Honeywell Pentax H3v 35mm single-lens reflex camera, appropriately outfitted with Bellows Unit.

The electronic flash unit shown in the foreground is the 65C Strobonar. It is fitted with a Neutral Density Lens from the accessory kit of four interchangeable lenses. The 65C is triggered by the camera shutter, and its light synchronously triggers the other light source, which is a model 52A Modeling Slave Strobonar.

The crystal photograph was made with the 55mm f/1.8 Super-Takumar lens, standard on the H3v. The bellows unit was set at 105mm, and the taking aperture was f/16. An important feature of the H3v which proves very useful in macrophotography is the integral self-timer. Its use precludes camera movement often caused by a cable release or manual operation of the shutter.

Here is a versatile laboratory photography setup consisting of highest quality components, yet the total price for the complete outfit is under $400, plus light stands.

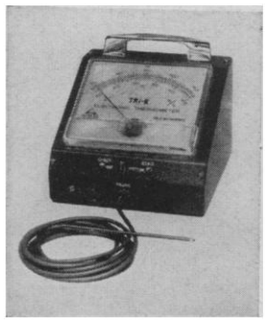

Write today for literature on this equipment to: David Moore, Mail Station 209, Honeywell, Denver, Colorado 80210.

TRI-R

VERSATILE LABORATORY INSTRUMENTS

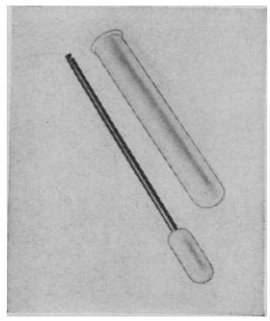

ELECTRONIC THERMOMETER

- Rapid, Accurate, Direct Reading
- Low Cost, Portable, Thermistor Type
- Many Ranges from —35 to +100° C.
- Interchangeable & Special Probes
- Controllers & Recorders Available

COMPACT MAGNETIC STIRRER

- Stir at Any Angle
- In Open or Closed Vessels
- Under Vacuum or Pressure
- With or without Hotplate

TEFLON TISSUE HOMOGENIZERS

- Interchangeable Teflon Pestles
- Precision Bore Pyrex Glass Tubes
- Notched for Quick Change Chuck
- Complete Apparatus Available

AUTOMATIC EGG-PUNCH

- For Opening Embryonated Eggs
- Open 60 Eggs Per Minute
- Clean 1″ Circular Fracture
- One Hand Efficient Operation

Eberbach

RESEARCH MODEL

Water Bath Shaker

The Eberbach Corporation Water Bath Shaker RESEARCH MODEL features greater capacity permitting you to agitate larger flasks and a greater quantity of smaller flasks. The Research Model incorporates the Eberbach variable speed reciprocating shaker in a controlled temperature bath. It is ideally suited for use in the fields of microbiology, biochemistry and chemistry, especially laboratories not equipped with constant temperature rooms. The stainless steel bath is 18″ x 10″ x 28″ long. The water can be heated to 75°C, controllable to ±0.5°C. Constant speed of 60 to 240 excursions per minute is provided by the variable speed reciprocating shaker. For 115 volt, 60 cycle AC. Cat. No. 6300 shown above $725.00

NOTE: *Accessory cover and auxiliary heaters available for wide range of elevated temperatures.*

Be prepared right

FOR THE "ARMY" OF STUDENTS ON THE WAY

BUY ONLY B & L MICROSCOPES TODAY Enrollment and science teaching are steadily expanding. In the next ten years your microscopes will get far more use . . . and abuse . . . than ever before.

That's why Bausch & Lomb *guaranteed protection* is one of the most decisive factors in buying microscopes today:

- *Bausch & Lomb guarantees* that replacement parts will be kept available for every B&L Standard Teaching Microscope . . . for at least ten years after you buy it.
- *Only B&L* builds in so many wear-proof, abuse-proof, student-proof features.
- *Only B&L* backs up its lifetime guarantee of materials and workmanship with a nation-wide network of qualified microscope dealer experts on call whenever you may need them.

Avoid costly premature replacement and repairs . . . stretch your budget over many extra years of microscope use . . . *buy only B&L Microscopes.*

ROYSON INTEGRATOR

An electronic integrator with special versatility

- **Follows rapidly changing input signal**
- **Follows a voltage signal or a slide wire position**
- **Provides excellent resolution because of high counting rates**
- **Requires no recorder**
- **Null balance principle assures stability**
- **Input signal is indicated continuously on panel meter**
- **Accuracy is within ½% of full scale**

Available (1) with dry contact closures for the output, enabling 2000 counts per minute at full scale and (2) with pulse type output for rates up to 10,000 counts per minute at full scale.

ROYSON PNEUMATIC INTEGRATOR
This Royson integrator converts the input of air pressure quickly and continuously into a proportionate electrical output of contact closures in either a linear or square root relationship. Output is up to 500 counts per minute. The heavy duty contacts can handle indicating and printing counters as well as pipping pens.

Write, wire or phone for full details. A Royson mechanical integrator is also available.

It's simple to place samples in this 103 mm long compartment.

Light sources are easily exchanged, self-aligning.

Reflectance sphere mounts quickly . . . provides accurate readings.

Here is a *fully automatic* precision instrument designed for fast, critical recording of transmittance, linear absorbance, reflectance and emission throughout the UV and visible ranges that costs *less* than half as much as similar types. It will analyze everything from ale to zinc with high accuracy, excellent repeatability, good resolution—and in record time! Even your most complex qualitative and quantitative analyses can be performed in minutes—instead of hours!

The "505" offers many unique features. Take chart speed for example. It automatically adjusts itself to the complexity of the curve being run. Also, there are six pre-selected scanning speeds to choose from—easily changed during the run by turning a knob on the control panel. And although the instrument is set for direct linear recording in transmittance, you can switch to linear absorbance by simply substituting a set of absorbance gears.

High dispersion *plus* a minimum of scattered light (less than 0.1% at 220 mμ) are other important advantages. There are four models, numerous accessories. For details, ask us for bulletin D-2009.

S-3850X Ultraviolet-Visible Range (200-650 mμ), Model 4, complete $4,880.00

SIMULTANEOUS

CONTRAST FLUORESCENCE MICROSCOPY

exclusively with the REICHERT

Zetopan

This unique new approach may very well become instrumental in solving some of your intricate microbiological research problems. It can be accomplished with the ingeniously designed Reichert "ZETOPAN" by simultaneous application of white light and ultraviolet illumination supplemented by a newly developed fluorescence contrast condenser.

The combined advantages of Phase or Anoptral Contrast and the fluorescent techniques now appear simultaneously in the microscopic image.

Our constant, self-regulating Power Supplies for operation of the fluorescent light source prolong the lifetime of the Osram burner and insure a steady arc and increased light.

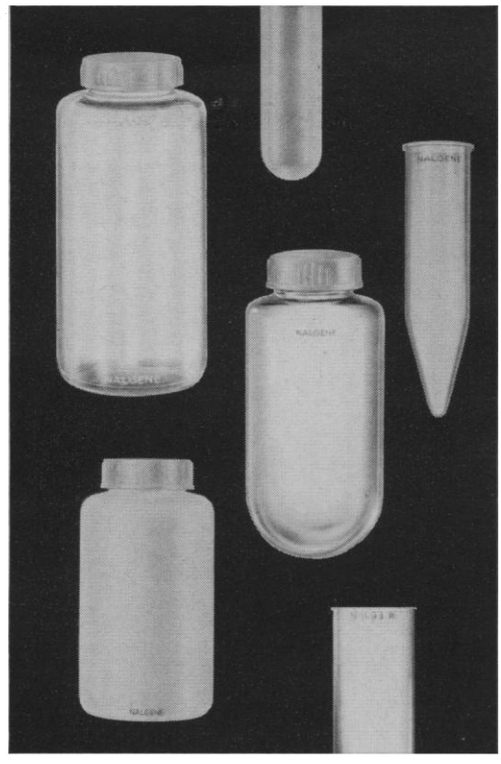

The "ZETOPAN" is a versatile instrument for all microscopic investigations of transmitted, reflected, and mixed illumination. It is a truly universal research microscope.

NOW, IN CLEAR AS GLASS, UNBREAKABLE POLYCARBONATE...

NALGENE® CENTRIFUGE WARE

. . . the most extensive line in plastic

■ Another NALGE advance . . . centrifuge ware made of newly improved polycarbonate resin . . . combines strength with transparency. So clear you see through it like a pane of glass. Yet, so rugged it approaches the strength of metal. Performance is outstanding, too. Spin at 20,000 RPM or more. Use at a chilly −100°C or heat up to +135°C . . . and fully autoclavable.

■ Drop the new centrifuge tube . . . it won't break . . . or crack . . . or chip . . . or even dent! It's nontoxic, non-contaminating and corrosion resistant. Completely transparent polycarbonate tubes are packed in convenient 36-unit packages . . . with either round or conical bottoms. We also have round and conical polypropylene tubes, as well as 50 ml round bottom centrifuge tubes of conventional polyethylene.

■ Take a centrifuge bottle . . . look in it . . . look through it. Crystal-clear, but tough, it's shatter-proof and just can't leak. A fill-line at the 250 ml point gives sufficient freeboard so that liquid won't reach the top in an angle-head centrifuge. Flat bottom or new spherical bottom bottles available in polycarbonate; flat bottom bottles also in polypropylene.

■ Nalgene centrifuge ware is today's most complete line with many sizes, shapes and varieties of resins. For information on the full line of Nalgene labware, see your lab supply dealer or write Dept. 2735, The Nalge Co., Inc., Rochester 2, New York.

Technical Breakthrough Results in 30% Price Reduction!

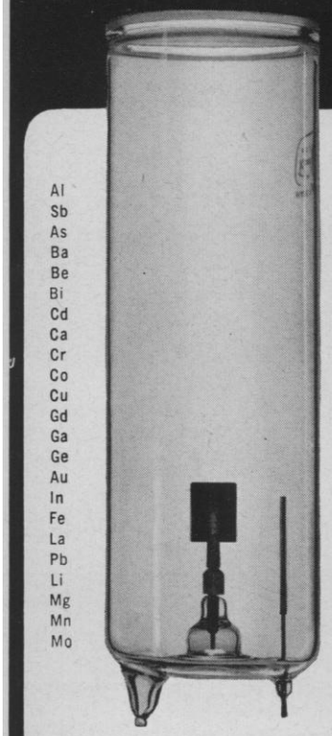

Improved production techniques have reduced the price of our polypropylene tubes (Cat. No. 3110) as much as 30% or more! So low, in fact, that it justifies using these high quality Nalgene tubes as disposables . . . even for one time applications. A large variety of sizes is available.

NALGENE LABWARE

Leader in quality plastic labware since 1949

ANNOUNCING

A NEW ELEMENT IN HOLLOW CATHODE LAMPS!

Al Sb As Ba Be Bi Cd Ca Cr Co Cu Gd Ga Ge Au In Fe La Pb Li Mg Mn Mo

Ni Nb Pd Pt K Sa Se Ag Na Sr Ta Te Tl Sn Ti W V Y Zn Zr

AZTEC Instruments, Inc. is a new "element" in the supply of quality Hollow Cathode Lamps for Atomic Absorption. Vastly superior in reliability and spectral intensity, the "AZTEC" also offers far more lamp elements than readily available heretofore. (See listing.) All lamps have quartz crystals. Test procedures and manufacturing quality are under the control of world-renowned scientists. Delivery is "off the shelf," and prices are lower than competitive products — a truly reliable new source of supply. Information and price list on request.

P.S. Also, ask us about our complete line of Osram Discharge Lamps.

check these features of the new DURRUM 12-CHANNEL LIQUID PUMP

- Compact — the Durrum Dial-A-Pump, Model 12AP, provides the versatility and capacity of 12 separate pumping channels in just 12" of bench space.
- Each channel is individually and continuously adjustable over a range of 0-4,000 ml/hour.
- Wide range of applications — ideal for feeding of multiple chromatography columns, mixing of liquids and slurries, perfusion studies, and proportioning chemical streams.
- Handles virtually all your liquid pumping requirements with one unit costing only $750.

For more information, contact your nearest representative of Van Waters & Rogers, Inc. or Fisher Scientific Company. Or write for Bulletin 12AP.

A Mousellany of Animal Care Developments

They Said It Couldn't Be Done

Econo-Cage #37, Lid #32G

The remarkable new Polycarbonate Econo-Cages (Series "20" and "30" for mice, "40" and "50" for rats and hamsters) are clear, autoclavable and unbreakable.

To operate most efficiently, animal colonies must use cages which withstand the rough and tumble of mechanized washing systems and the high temperatures at which these systems and autoclaves operate. Because colonies must be inspected quickly, cages should afford maximum visibility. Until now the cages were either transparent or durable, but none had both characteristics.

The new Polycarbonate resin combines the optical and thermal properties of glass with an impact resistance unmatched by any other clear material. A good example of the degree of impact resistance was furnished when a cage did not break when dropped out of a fourth floor window. Polycarbonate retains this remarkable strength from 275°F to −40°F. It is the first clear plastic which can be autoclaved repeatedly.

This new material, a linear aromatic polyester of carbonic acid, has a very low absorption level. Odor-producing gases are not absorbed; resistance to most acids and basics is very good.

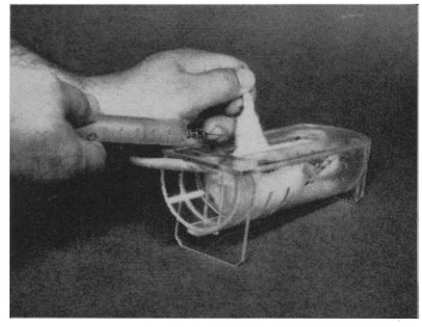

The cages are made to NIH and ILAR Standards. The cage illustrated above is one of the "30 Series" of Econo-Cages, which includes cages of fibre glass, acrylonitrile-styrene-copolymer, polypropylene and polycarbonate. There are three lid styles which are interchangeable on all "30 Series" cages.

CAGE DIMENSIONS

SERIES	LENGTH	WIDTH	DEPTH
"20"	11½"	7½"	5"
"30"	19"	10½"	5⅛"
"40"	19"	10½"	6⅛"
"50"	14⅞"	12⅞"	6⅝"

Working With Restraint

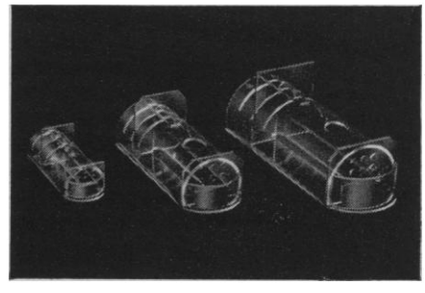

Econo-Cage Restraining Cages are clear acrylic plastic units that afford rapid and safe immobilization of animals, easy access and maximum visibility. There are 3 sizes to accommodate varying sized animals. They prevent unanesthetized animals from attacking tubes, cannulae, and other fixtures; provide extended housing during nutritional studies; restrain animals during intravenous, intraperitoneal, intramuscular, and subcutaneous injections; and are useful for administering intravenous fluid drips and anaesthetic.

#90 Restraining Cage being used for intramuscular injection

All restrainers have an adjustable tailgate which fits into any of three slots to vary cage length, confine the animal and serve as a cage door. Openings at top, bottom, and tail provide easy access to any part of the animal (the bottom slot also permits drainage of animal waste). A hopper permanently attached to the front of the unit includes a trough for granular feeds and a water tube inlet.

CAGE NO.	CAGE SIZE	ANIMAL WEIGHT
#88	2" to 3½" long; 1½" wide	Mice from 10 to 40 grams
#90	4¼" to 5½" long; 2½" wide	Rats/hamsters from 150 to 285 grams
#91	5" to 7" long; 3¼" wide	Rats/hamsters from 235 to 585 grams

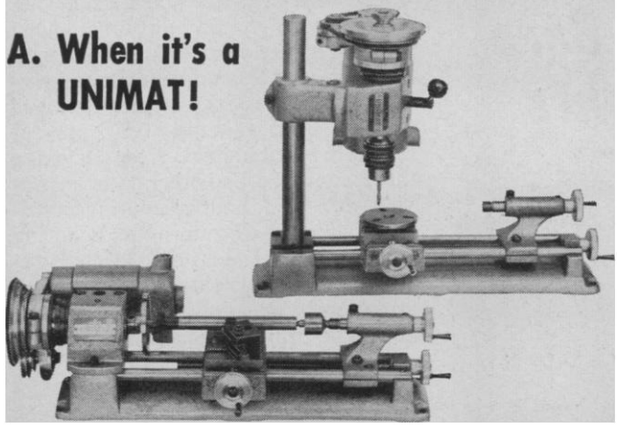

Econo-Cages #88, #90, #91

Q. When is a lathe *also* not a lathe?

A. When it's a UNIMAT!

Unimat is a precision lathe, but quite often does the job as a sensitive drill press. It also serves in a variety of such chores as surface grinding, milling, gear making, jig sawing, threading, buffing, index dividing, wood turning, and tool sharpening.

About 10,000 Unimats are earning their keep in plants and labs all over the U.S., turning out product prototypes in miniature, models, small parts and a lot of electronic fancy-work. Some Unimats are sentenced to the monotony of steady production work, drilling or turning metal. The basic outfit ready to go to work either as a lathe or a vertical drill press, complete with motor and a chest full of extras is only $139.50. Accessories are priced the same way — reasonable. Catalog is free. Or convince yourself with the 40 page illustrated manual, "Miniature Machining Techniques," $1.00.

AMERICAN EDELSTAAL, INC
Dept. B-K 350 Broadway
New York 13, New York

Buy a lathe and get a BONUS!

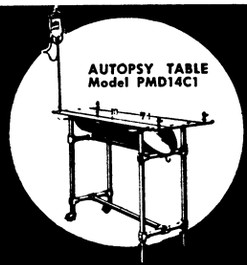

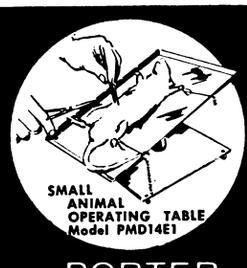

Model MQ-3100 with twin headstocks, motors, quick change gears

MAXIMAT is a mighty fine 10" lathe that beats ASA toolroom specs. Think about it *just* as a lathe and it's a good buy, priced between $857 and $1279 depending on which outfit you select. Where's the bonus? The machine has two beds instead of one. You have the usual ground and scraped-flat lathe bed, and another matching one mounted dead true vertically. Using the same motors, chucks, headstocks and work-holders, you gain the use of a complete vertical mill and boring machine. Use it for grinding too . . . for indexing . . . make gears, locate to tight tolerances all with one machine that fits in 20 x 40 inch floor space. In R & D, Maintenance and prototype design work, it's a time-and-money saving tool. Write for free catalog and Toolroom Timesaver Tips.

Nicholas Anton, President of EON CORPORATION, has expanded the company's "stock-plus-continuous-production" policy to accommodate users of

- Geiger Mueller Tubes
- Corona Discharge Voltage Regulator Tubes
- Neutron Proportional Counters and Ionization Chambers
- Portable Radiological Survey Meters

Other companies have drastically changed management and engineering staffs. They have dismantled and moved their facilities.

...BUT EON IS HERE TO STAY.

The key staff at EON, directed by Nicholas Anton, has been working together as a recognized team in the nuclear field since 1948. EON continues to produce standard items and develop new ones, unhampered by changes in staff and location.

IF OTHERS HAVE LET YOU DOWN — DON'T WAIT FOR DELIVERY.

Please feel free to send a copy of your "delayed" order or the specifications for your new order. You can be sure of immediate attention from EON. **We can ship from stock or continuous production.**

Send for your-FREE-complete catalog & valuable data book.

PARR *Automatic* Temperature Controller For Bomb Calorimeters

Both old and new Parr adiabatic calorimeters can now be equipped with an automatic controller which eliminates most of the time-consuming manual temperature adjustments in bomb calorimetry. This new thermistor-actuated system supplies hot and cold water to the calorimeter jacket as needed to maintain balanced jacket and bucket temperatures. Users report improved repeatability and up to twice their former output per operator.

STILL ON THE JOB even after the chemist has gone home. The new Fisher Titralyzer* will run up to 16 titrations and print out the results for him to pick up in the morning. The tape shows titrant volumes to the nearest 0.01 ml — higher precision than he can get manually with any but micro equipment. Any kind of repetitive potentiometric titration is handled with ease. Price: $2,750. Available under Fisher Financing Plan. **More details on Titralyzer** in Bulletin FS-245. Write Fisher Scientific Company, 139 Fisher Building, Pittsburgh 19, Pennsylvania.

A GUIDE TO THE SELECTION OF NUCLEAR INSTRUMENTS AND SYSTEMS 1964

NUCLEAR-CHICAGO CORPORATION

NUCLEAR-CHICAGO

RIDL

TEXAS NUCLEAR

NUCLEAR-CHICAGO EUROPA N. V.

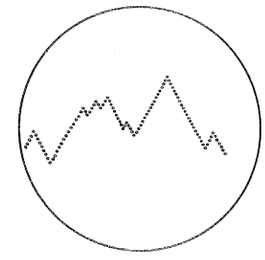

A PRESENTATION OF NUCLEAR INSTRUMENTS SERVING RESEARCH, INDUSTRY, MEDICINE, AND EDUCATION

Here is a selection of nuclear instruments and systems for investigators in the life sciences and physical sciences, for engineers and scientists in industry, for teachers, for physicians. The variety of equipment offers a wide selection of powerful tools for use wherever nuclear techniques are applicable.

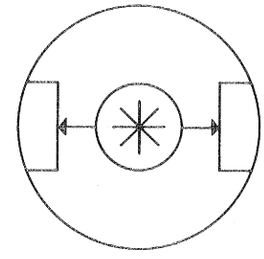

These products derive from the specialized capabilities of Nuclear-Chicago, Texas Nuclear, and Radiation Instrument Development Laboratory (RIDL). The shared strength of these affiliated companies is contributing to their combined growth and to the increasing acceptance of their products throughout the world.

Your careful review of these instruments and systems will, we believe, demonstrate that Nuclear-Chicago, Texas Nuclear, and RIDL products well satisfy the equipment needs of workers using nuclear techniques. If your work involves the ever-widening application of these techniques, we will welcome the opportunity to serve you.

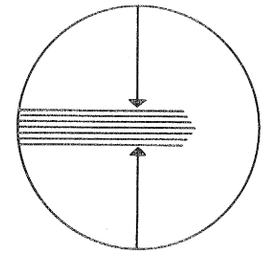

Please consult your Nuclear-Chicago sales office or RIDL sales representative listed on the back cover of this guide. The reply cards that form part of the back cover are a handy way for you to request more complete information on equipment in any of the product categories that make up this guide. Please use one and invite one of your colleagues to use the other.

INSTRUMENTS FOR CLINICAL INVESTIGATION

isotope scanning

Operating convenience and faithful reproduction of data are the demands set on today's instruments for clinical isotope scanning. Nuclear Chicago scanning systems meet these requirements, and more, by delivering a high order of fidelity and time-saving benefits.

MODEL 1735 PHO/DOT combines many significant advances, in both human engineering and electromechanical design, to take the guesswork out of clinical isotope scanning. PHO/DOT incorporates completely separate photo and dot recording systems that produce a superb display of the location and concentration of isotope-labelled compounds within selected organs of the human body.

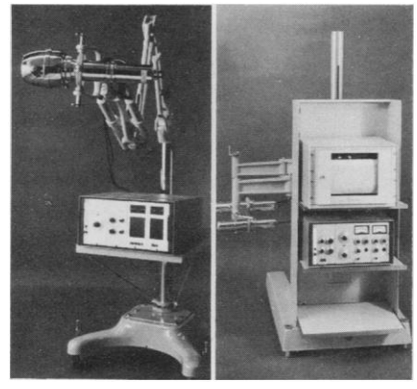

This is Nuclear-Chicago's new Multiple-Lens Scintillation Camera.

- Completed "pictures" of radioisotope distributions in body organs in one-tenth to one-twentieth of the time required by conventional isotope scanners.
- Stop-motion, rapid-sequence, and time-lapse pictures of dynamic processes such as a radioisotope flowing into and out of an organ.

Circle **1** on the Reply Card

in-vivo counting

Nuclear-Chicago's Thyrad and Renaltron Series are the most versatile instrument systems available for thyroid uptake and kidney function evaluations using radioactive isotopes. Each of these fine systems employs high-efficiency Na I (Tl) crystal detectors along with the latest in solid-state electronics to insure reliable long-term performance.

THYRAD SYSTEMS FOR THYROID UPTAKE

- MODEL 4401 THYRAD I—An economical basic system consisting of a mobile clinical stand, detector, and a combination scaler/timer/high voltage supply.
- MODEL 4402 THYRAD II—Includes a fully adjustable mobile clinical stand, detector, and a combination analyzer/scaler/timer/high voltage supply.
- MODEL 4403 THYRAD III—This elegant system offers a heavy duty, fully adjustable, mobile clinical stand with instrument rack, detector, and a combination analyzer/scaler/timer/high voltage supply.

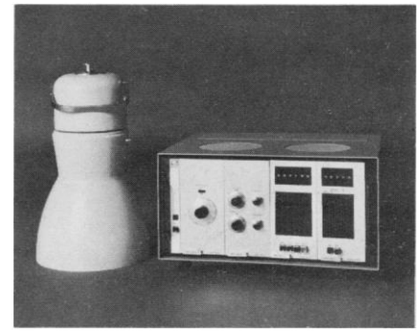

RENALTRON SYSTEMS FOR KIDNEY FUNCTION

- MODEL 4127 RENALTRON I—This economical basic system incorporates a mobile clinical stand, two detectors, two ratemeters, and two 5 in. graphic recorders.
- MODEL 4128 RENALTRON II—Consists of a fully adjustable mobile clinical stand, two detectors, two ratemeters, and a dual-channel 10 in. graphic recorder.
- MODEL 4129 RENALTRON III—A delux system including a heavy duty, fully adjustable, mobile clinical stand with instrument rack, two detectors, two ratemeters, and a dual-channel 10 in. graphic recorder.

Circle **2** on the Reply Card

in-vitro counting

Accurate blood volume, protein bound iodine, T-3, and similar determinations are routine performance for Nuclear-Chicago's well-detector counting systems. The high order of reliability of these systems is made possible by sensitive Na I (Tl) well-type crystals in combination with stable solid-state analyzers, scalers, and timers.

- MODEL 4452—This system offers excellent performance at modest cost. It includes a 2 in. detector and generous lead shielding.
- MODEL 4453—For optimum resolution and sensitivity along with lowest background this system consists of a 3 in. detector surrounded by 5 in. of lead.

Circle **3** on the Reply Card

components and accessories

The flexibility of Nuclear-Chicago's clinical systems affords a wide choice of options, up-gradings, and conversions. Plug-in modular construction of components such as scalers, ratemeters, and analyzers lets you start now with a basic system and progress to more advanced, versatile instrumentation as your needs expand. Components and accessories available separately include:

- A variety of mobile stands and racks for detectors and monitoring instruments.
- Scalers, timers, pulse-height analyzers, ratemeters, and high voltage supplies (See Pages 8 and 9).
- Scintillation detectors, collimators and lead shielding.
- Graphic recorders (See Page 6).
- Disposable sample bottles in various sizes.

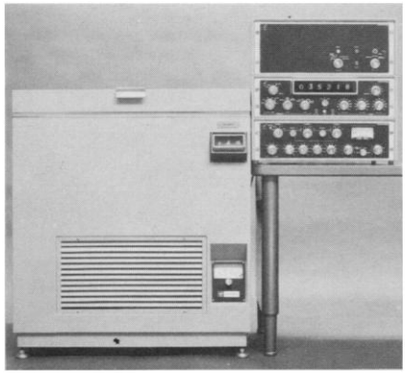

Circle **4** on the Reply Card

INSTRUMENTS FOR RESEARCH

liquid scintillation counting systems

Nuclear-Chicago offers complete Liquid Scintillation Systems for every individual requirement. Each of these important features are standard:

- A three channel analyzer.
- Reliable solid-state circuitry designed specifically for beta spectrometry.
- Well-shielded dual photomultiplier tube detector assembly with noise cancelling circuit.
- Very good detection efficiency with a high degree of reproducibility.
- A high voltage supply with excellent regulation characteristics and controls for independent gain adjustment of each photomultiplier tube.
- Minimum number of moving mechanical parts to insure long life under continuous operation.

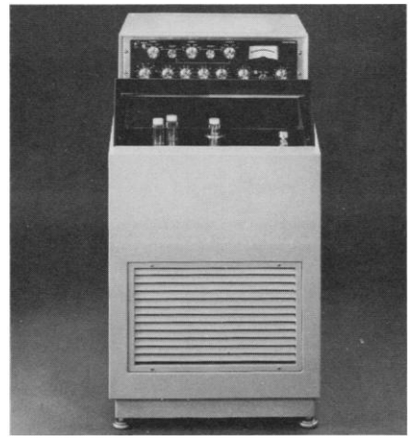

- MODEL 6725—Controlled-temperature automatic system with 150 sample capacity and three-scaler monitoring. Automatic calculator for sample number, time, counts, cpm, and channels ratios print-out.
- MODEL 6724—Same as Model 6725 except with automatic lister for sample number, time, and counts print-out.

- MODEL 6723—Room-temperature automatic system with 50 sample capacity and two-scaler monitoring. Automatic calculator for sample number, time, counts, cpm, and channels ratios print-out.
- MODEL 6722—Same as Model 6723 except with automatic lister for sample number, time, and counts print-out.

- MODEL 6746—Economical room-temperature automatic system with 50 sample capacity and single-scaler monitoring. Automatic lister for sample number, time, and count print-out.

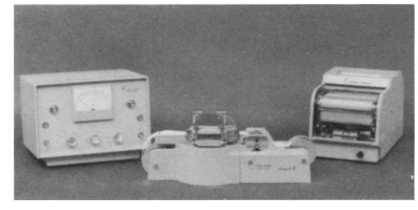

- MODEL 6754—Room-temperature semi-automatic system with single-scaler monitoring. Does not include print-out facilities.
- MODEL 6733—Room-temperature semi-automatic system. Does not include monitoring or print-out facilities.

Circle **5** on the Reply Card

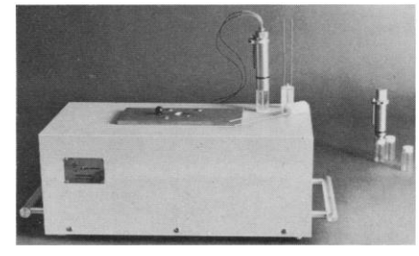

radiochromatography counting systems

The usefulness of analytical chromatography with radioisotopes can be greatly increased by Nuclear-Chicago's Radiochromatography counting systems. These versatile tools offer good sensitivity and resolution, and deliver accurate data in minimum time.

Actigraph is the only paper-strip chromatogram scanner that combines 4 pi detection geometry with a choice of windowed or windowless detector operation. Actigraph offers many time saving conveniences and features.

- MODEL 4502—Actigraph system with ratemeter and 5 in. graphic recorder.
- MODEL 1032—Actigraph strip scanner only.
- MODEL 1039—Adapter kit for thin-layer chromatography.

Chroma/Cell systems are designed to detect and record the radioactive components in dynamic liquid chromatography studies. They eliminate the need for collecting and assaying individual fractions of the effluent, while affording a consistently reliable method for both quantitative and qualitative determinations.

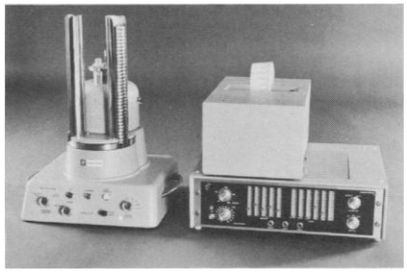

- MODEL 4526—Bench-top system with ratemeter and 5 in. graphic recorder.
- MODEL 4532—Bench-top system with two ratemeters and 10 in. dual channel graphic recorder.
- MODEL 6351—Bench-top system less monitoring instruments.
- MODEL 6770—Chroma/Cell detector only; for use with any Nuclear-Chicago Liquid Scintillation System.

Circle **6** on the Reply Card

INSTRUMENTS FOR RESEARCH

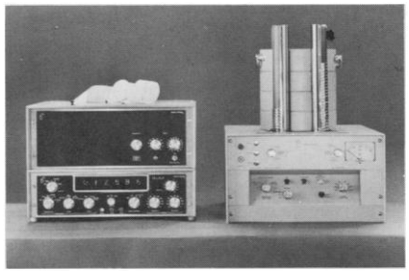

planchet counting systems

Precise geometric reproducibility and fast handling for your solid phase beta samples are assured with Nuclear-Chicago's planchet counting systems. Select from automatic, semi-automatic, manual, and automatic low background systems.

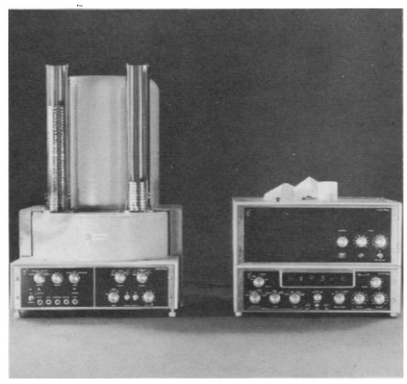

These reliable systems for 1¼ in. dia. planchets provide automatic programming for up to 100 samples. The efficient gas-flow detector included with each system can be operated windowless or with ultra-thin window.

- MODEL 4308—With automatic print-out of sample number and time.
- MODEL 4306—With automatic print-out of sample number, time, and count.
- MODEL 4304—With automatic print-out of sample number, time, count, cpm, and scaler ratio (Second scaler optional).

A net background of less than 2 cpm is routine with these automatic low background systems for 1¼ in. dia. planchets. An efficient gas-flow detector is standard; sealed detectors are optional.

- MODEL 4314—With automatic print-out of sample number and time.
  MODEL 4312—With automatic print-out of sample number, time, and count.
- MODEL 4310—With automatic print-out of sample number, time, count, cpm, and scaler ratio (Second scaler optional).

Spectro/Shield automatic low background systems are designed for 2 in. dia., or smaller, planchets. Net background is less than 1 cpm for excellent E^2/B. Control logic provides many useful counting programs.

- MODEL 4318—Single scaler system with automatic print-out of sample number, time, and count.
- MODEL 4316—Dual scaler system with automatic print-out of sample number, time, counts, cpm, and scaler ratio.

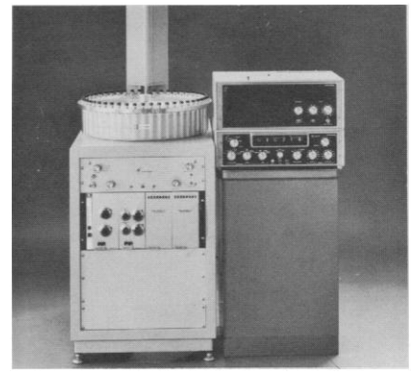

Semi-automatic and manual sample changers for 1¼ in. dia. planchets. Shielding is better than adequate.

- MODEL 1010—Semi-automatic changer for gas-flow detector.
- MODEL 1143—Manual changer for Geiger tube.
- MODEL 1127—Manual changer for Geiger tube or gas-flow detector.
- MODEL 1144—Manual changer for Geiger tube, gas-flow detector, or scintillation detector.
- MODEL 1001—Unshielded Geiger tube mount.

Circle 7 on the Reply Card

gamma counting systems

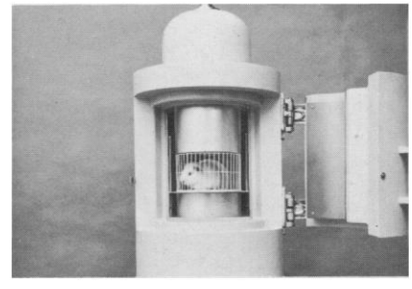

You can analyze gamma emitting isotopes, accurately and conveniently with Nuclear-Chicago's complete gamma counting systems. They feature highly efficient scintillation detectors with generous lead shielding for low background.

Spectromatic systems incorporate well-type Na I (Tl) detectors, and are designed for handling small-volume solid or liquid samples. Automatic changing programs are provided for up to 50 sample bottles or test tubes.

- MODEL 4204—2 in. single-channel system with sample number and time print-out.
- MODEL 4206—2 in. single-channel system with sample number, time, and count print-out.
- MODEL 4212—2 in. dual-channel system with sample number, time, and count print-out.

All systems above also available with 3 in. crystals.

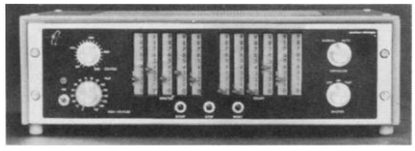

Tobor systems are primarily intended for counting large or variable volume gamma samples. Adjustable dual detectors deliver uniform counting efficiency over a wide range of sample volumes.

- MODEL 4350—3 in. Na I (Tl) crystals and analyzer/scaler.
- MODEL 4351—7 in. Pilot-B plastic crystals and analyzer/scaler.

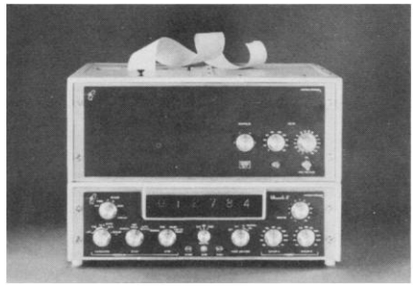

Circle 8 on the Reply Card

INSTRUMENTS FOR RESEARCH

SCALERS

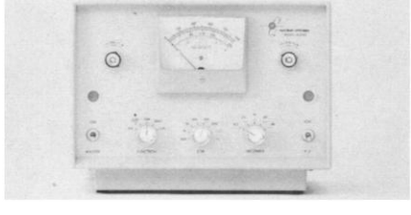

- SERIES 8700—Single-Scaler/timer with +2600 H.V. supply and 1μsec resolution. Available with or without an automatic data lister.

- SERIES 8270—Scaler/timer with +4000 H.V. supply and 1μsec resolution. Available in single or dual scaler versions, with either an automatic data lister or a lister/calculator.
- MODEL 8181—Low-cost decade scaler with +3000 H.V. supply and 1μsec resolution.
- MODEL 8151—Low-cost decade scaler with +2000 H.V. supply and 5μ sec resolution. Ideal for training and general monitoring.

Circle **9** on the Reply Card

RATEMETERS

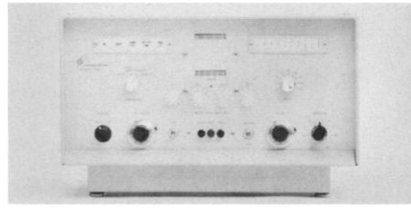

- MODEL 8623—Linear ratemeter with +2000 H.V. supply and selectable time constants. Drives 1 ma. or 10 mv. graphic recorders.
- MODEL 8619—Low-cost linear ratemeter with +2000 H.V. supply. Drives 1 ma. graphic recorder. Ideal for general monitoring.
- MODEL 8629—Linear ratemeter with low-level and high-level alarm system. +2000 H.V. supply.

Circle **10** on the Reply Card

GAMMA SPECTROMETERS

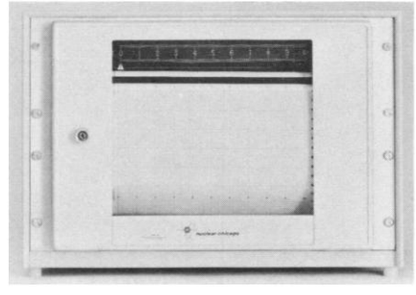

- MODEL 8822—Automatic recording spectrometer with motor-driven base level. +1500 H.V. supply and 1μ sec resolution.

- MODEL 8132—Combination single channel analyzer, binary scaler, percentage computer. 1μ sec resolution +1500 H.V. supply.
- MODEL 8110—Single channel analyzer with +1500 H.V. supply and 1μ sec resolution.

Circle **11** on the Reply Card

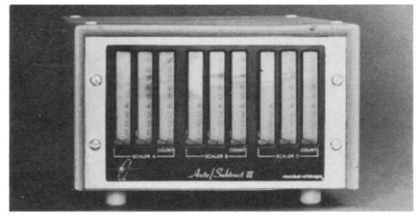

GRAPHIC RECORDERS

- MODEL 8416—Single channel, 1 ma galvanometric recorder with 5 in. chart.
- MODEL 8410—Single channel, 10 mv potentiometric recorder with 10 in. chart.
- MODEL 8411—Dual channel 10 mv potentiometric recorder with 10 in. chart.
- MODEL 8435—Dual channel, 1 ma galvanometric recorder with 10 in. chart.
- MODEL 8408—Single channel integrating recorder. 10 mv potentiometric, 10 in. chart.

Circle **12** on the Reply Card

BACKGROUND SUBTRACTION

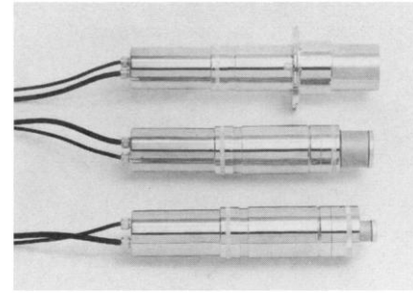

- MODEL 8721—Auto/Subtract I. Single channel, selectable subtraction rate from 1 to 499 cpm.
- MODEL 8723—Auto/Subtract III. Three channel, selectable subtraction rate from 1 to 499 cpm.

Circle **13** on the Reply Card

DETECTORS

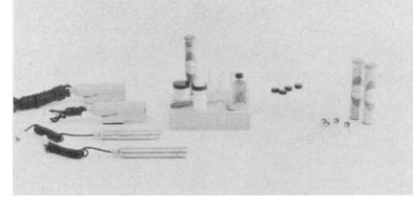

Nuclear-Chicago offers the most complete selection of radiation detectors.

- Na I (Tl) SCINTILLATION DETECTORS—1 in., 2 in., 3 in., dia., and miniature crystals; solid or well type; all with preamplifiers. Also available with shielding.
- GAS-FLOW DETECTORS—Ultra-thin window or windowless type, for 1¼ in. dia. or 2 in. dia. samples. Large-area model also available.
- GEIGER TUBE DETECTORS—End-window or side window tubes for virtually every application.
- NEUTRON DETECTORS—Large selection of He^3 and BF_3 filled tubes for wide variety of applications.

Circle **14** on the Reply Card

ACCESSORIES

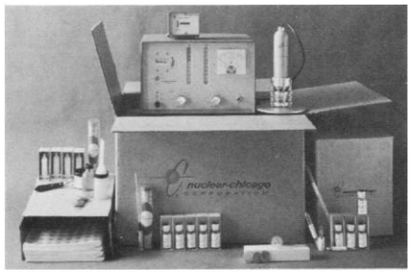

- Geiger tube probes, with or without preamplifiers.
- Sample pans for planchet counting.
- Test tubes and bottles for gamma and liquid scintillation counting.
- Elapsed and preset timers.
- Line noise filters.
- Geiger and proportional detecting gas and regulators.
- Lead bricks and carrying shields.
- Sample preparation kits.
- Radiation warning signs.
- Detector preamplifiers.
- Absorber kits.
- Instrument racks.
- Detector stands.
- Detector shielding.

Circle **15** on the Reply Card

INSTRUMENTS FOR EDUCATION

The application of nuclear measurement techniques in almost every field has greatly increased the demand for personnel who understand the nuclear method and who are trained in the use of associated instrumentation. Various agencies, such as the U.S. Atomic Energy Commission and the National Science Foundation, lend valuable assistance to educational programs in the form of grants, loans, institutes, and a wide variety of other activities. Nuclear-Chicago offers a full line of instruments, systems, and accessories specifically designed for demonstration and experimentation in nuclear science.

- MODEL 6320 CLASSMASTER—A Basic Radioactivity Training System. Includes count rate indicator, Geiger detector tube, calibrated experiment board, radiation sources, scatter cylinders, absorber sheets, and lecture-experiment manual.

- MODEL 4001 NUCLEAR TRAINING SYSTEM—Complete portable classroom laboratory consisting of scaler, timer, Geiger tube, sample mount, radionuclide set (including micropipettes, syringe, and 100 sample pans), solid radioactive sources, two sample preparation sets, certificate book for short-lived radionuclides, nine 187-page experiment manuals, and instructor's manual.
- MODEL 6310 CLOUDMASTER—Continuously sensitive cloud chamber for observing ionization tracks of alpha, beta, gamma, and meson radiation.
- MODEL 6250 NEUTRON HOWITZER—Compact, versatile device for study and experimentation with low-level neutron sources; production of low-intensity, short-lived radioisotopes; and activation analysis. Aluminum paraffin-moderated vessel (22½" diam., 35" high) with all accessories and 12 manuals containing detailed and carefully tested experiments.
- A complete line of short- and long-lived radionuclides, reference sources, and other necessary radiochemical products.

Circle **16** on the Reply Card

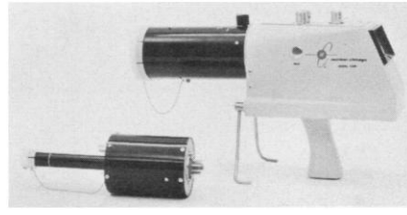

INSTRUMENTS FOR HEALTH PHYSICS

AREA MONITORS

- MODEL 9120 SPHERICAL NEUTRON DOSIMETER gives a close approximation of human body dose from neutrons of all energies below 15 Mev.
- MODEL 9160 TRITIUM MONITOR is an airborn-particle radiation detection unit which is used as a warning device for over-tolerance concentrations of tritium in the air.

Circle **17** on the Reply Card

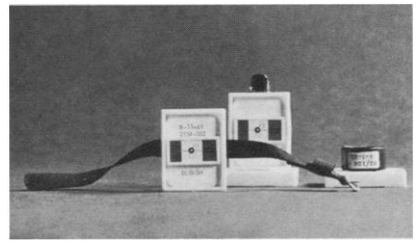

PORTABLE SURVEY METERS

- 2500 SERIES—Ion-Chamber Survey Meters for measuring alpha, beta, gamma, or x radiation.
- 2650 SERIES—Geiger-type Survey Meters for measuring alpha, beta, and gamma radiation.
- MODEL 2671—Neutron Survey Meter for measuring fast and thermal neutrons.
- MODEL 2672—Alpha Survey Meter.

Circle **18** on the Reply Card

PERSONNEL MONITORS

NUCLIBADGE Film Badge Service for measuring personnel exposure. Provides all of these important benefits:

- Ultra-sensitive film records doses as low as 1 mr. Permits use of "banking concept".
- Measures exposure of β, γ and x radiation. Optional neutron reporting.
- Films and exposure reports are preserved for future reference.
- IBM automation for rapid processing of reports.

400 SERIES POCKET DOSIMETERS AND CHARGERS. For measuring dose of thermal neutron, gamma, and x radiation. Direct or indirect reading models.

Circle **19** on the Reply Card

RADIOCHEMICALS

Nuclear-Chicago markets a complete line of radioisotopic products. These include a total of nearly 700 "Research Quality" labelled compounds of high purity. These compounds are always packaged in the form offering the greatest stability. Same-day shipment is made on 85% of all orders. Rapid stock turnover and careful inventory control insure that only fresh compounds are shipped.

The wide scope and expanding nature of this product line have far outrun the practicality of a single, all-inclusive catalog. Therefore, we provide these ten separate and distinct schedules:

- Carbon-14 Labelled Compounds.
- Tritium Labelled Compounds.
- Phosphorus-32, Sulfur-35, and Chlorine-36 Labelled Compounds.
- Primary Radioisotopes.
- Radioactive Standards.
- Liquid Scintillation Chemicals & Standards.
- Radionuclides.
- High Intensity Radiation Sources.
- Radioactive Reference Sources & Source Sets.
- Facilities and Services.

The last named schedule describes each of the product groupings and presents general information about the Radiochemical Division of Nuclear-Chicago. A series of Radiochemical Bulletins is also published to keep each individual product schedule up to date between revisions and to present other current data of interest to the researcher.

Custom preparation and tritium labelling services are offered and a staff of physicists and chemists is available for special consultation. Our staff has exceptional qualifications and experience in radioisotope applications and many research and development projects are performed on a contract basis.

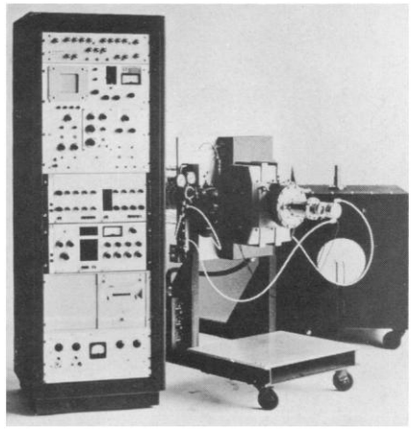

- (Note: All Nuclear-Chicago labelled compounds and primary radioisotopes are produced in the laboratories of the Radiochemical Centre, Amersham, England. We are the exclusive distributors of the Centre's Carbon-14 and Tritium labelled compounds within the U. S. A.)

Circle **20** on the Reply Card

INSTRUMENTS FOR ACTIVATION ANALYSIS

activation analysis laboratory

Nuclear-Chicago, along with its affiliates, Radiation Instrument Development Laboratory, and Texas Nuclear Corporation, is the only integrated manufacturer of a complete activation analysis laboratory. Approximately one hundred Texas Nuclear accelerators are in use in leading laboratories throughout the world. They are widely used for activation analysis studies, and also find application in the fields of basic research, applied physics, radiation damage studies, and various development projects.

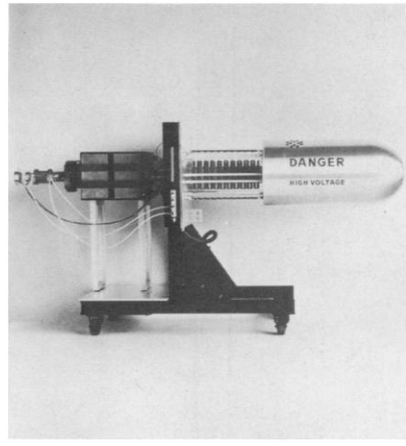

The Texas Nuclear Model 9601 is a complete data acquisition system for activation analysis studies and the reduction of complex gamma-ray spectra. The 9601 consists of a dual scintillation detector assembly, rapid transfer system, system programmer, 400 channel pulse height analyzer, multiscaler programmer, high voltage power supply, digital printer, and flux monitoring system. Flexible design permits solving a broad range of analytical problems.

Circle **21** on the Reply Card

neutron generators

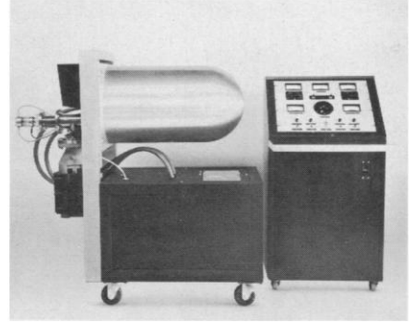

Texas Nuclear accelerators have become the most popular neutron generators because of their high T(d,n) yields, low cost, reliable performance, versatile design, simple operation, and inexpensive shielding and installation requirements.

- T(d,n) yields as high as 2.5 x 10^{11} n/sec.
- Fast neutron fluxes up to 5 x 10^{9} n cm^{-2} sec^{-1}.
- Thermal neutron fluxes up to 5 x 10^{8} n cm^{-2} sec^{-1}.

MODEL 9900

- Positive ion beam current up to 2.5 ma.
- Equipped with R-F ion source.
- Can be modified for production of protons or negative ions.
- Monoatomic yield greater than 90%.
- 100 kv or 150 kv continuously variable power supplies.
- Reliable electronic ion-type pump with extremely clean, static vacuum of 5 x 10^{7} mm Hg.
- Synchronous-motor control console for remote operation.
- Pre-acceleration pulsing, post acceleration pulsing, or dual pulsing.

MODEL 9700

The 9700 accelerator with its T(d,n) output of greater than 10^{10} n/sec is designed for educational institutions. It has a completely insulated terminal dome and automatic controls wherever possible.

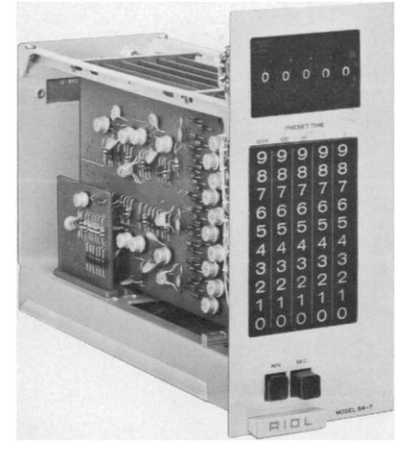

Circle **22** on the Reply Card

RIDL PRECISION COUNTING INSTRUMENTS

designer series

Designer Series instruments utilize a transistorized, plug-in modular concept which offers unique versatility in the design of quality counting systems. These systems meet every specific application where speed, accuracy and reliability are required. The exceptionally wide selection of Designer Series instrument modules allows the user to meet new requirements simply by changing a single module. The modules plug into an Instrument Case and Power Supply which provides all operating power. The following list of instruments describes many of the modules available. Select only what you need—no extras!

Model No.	Description
	DETECTORS
2-9	2 Pi Gas Flow Detector
2-10	Semiconductor Detector Vacuum Chamber

Single instrument module illustrating typical construction.

	LINEAR AMPLIFIER-DISCRIMINATORS
30-19	Amplifier-Discriminator, gain of 360
30-20	Amplifier-Discriminator, gain of 1000
30-21	Window Amplifier, gain of 128 x 16
30-23	Double Delay—Line Amplifier
	PREAMPLIFIERS
10-8	Scintillation Detector Probe
10-17	Scintillation Preamplifier
31-7	General Purpose Preamplifier —5KV
31-14	General Purpose Preamplifier —1.5KV
31-17	Preamplifier for Semiconductor Detectors

RIDL PRECISION COUNTING INSTRUMENTS

Model No.	Description
31-21	General Purpose Preamplifier
31-22	Fast Preamplifier for Semiconductor Detectors
31-24	Preamplifier for Gas Detectors
	COINCIDENCE ANALYZER
32-3	Slow/Fast, Coincidence/Anti-Coincidence Unit
	PULSE HEIGHT ANALYZERS
33-10B	Anti-Walk Single Channel Analyzer
33-13	Anti-Walk Amplifier/Single Channel Analyzer

Typical system designed for use with semiconductor detectors. It consists of a Bias Supply and Noise Meter, Window Amplifier, Vacuum Chamber, and a Precision Pulse Generator.

	COUNT RATE METERS
35-7	Linear/Log Count Rate Meter
35-9	Linear Count Rate Meter
	HIGH VOLTAGE POWER SUPPLIES
40-8B	High Voltage Power Supply, 500-1360V
40-9B	High Voltage Power Supply, 500-3KV
40-11	High Voltage Distribution Panel 3KV
	PULSE GENERATORS
47-2	Mercury Pulse Generator, 100 volt
47-3	Mercury Pulse Generator, 10 volt
47-6	Economy 10V Mercury Pulse Generator
47-7	Precision Pulse Generator for Semiconductor Application
	SCALERS
49-25	7 Decade Electro-Mechanical Scaler/Timer
49-26	6 Decade Preset Scaler
49-27	12 Decade Scaler
49-30	7 Decade Electro-Mechanical Scaler
49-43	6 Decade Printing Preset Scaler
49-44	6 Decade Printing Scaler
49-47	10 MC Prescaler/Discriminator 1 to 3 Decades

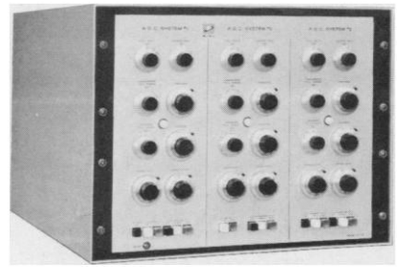

Model No.	Description
	PRINTER AND PRINTING PROGRAMMERS
44-21	H.P. Printer, 7 column 1,2,4,2′
52-44	Multiple Printing Scaler Programmer
52-46	Printing Scaler Programmer
	TIMERS
54-7	5 Decade Electronic Timer
54-8	5 Decade Printing Electronic Timer
70-10	Preset and Elapsed Mechanical Timer
	CASE, CABINETS AND MODULES
29-1	Instrument Case and Power Supply
29-2	Deluxe Cabinet
29-3	Single-Module Instrument Case AC

Also available, the all new Phase of the Moon serial read-out system.

Circle **23** on the Reply Card

multi-parameter analysis systems

RIDL MULTI-PARAMETER ANALYSIS SYSTEMS provide both sub-systems for conversion of experimental data to computer language as well as complete real time systems.

Internal pulse amplifiers and coincidence circuitry are included in the unit shown to encode up to 3 pulse height parameters (gamma detectors, fast time-to-height converters, etc.) to a parallel data format for direct entry to "on line" computers or tape storage media. General features of this system include: Three identical data channels that provide 3 pulse amplifiers, 3 Analog-to-Digital converters with triple 0.5μ sec coincidence shaping circuits, full parallel data format from all systems, optional scanner for serial data output in 4 bit BCD or binary, and provision for monitoring with scope, camera, or pulse height analyzer.

Circle **24** on the Reply Card

400 channel pulse height analyzer

MODEL 34-12B, 400 CHANNEL ANALYZER features the widest choice of inputs, outputs, accessories, and options available today. Constant improvements in design have resulted in the most reliable analyzer available. This analyzer also provides an economical means of meeting your requirements of today, yet it may be easily expanded in the future without a premium in cost. A few of the analyzer's many features are:

General:
Pulse Height Analyzer, Multi-Channel Scaler, Complete Automatic Programming.

Inputs:
Internal Amplifier, External Transistor Amplifier, External Vacuum Tube Amplifier, Sampling input for Mössbauer correlation studies etc.

Outputs:
Typewriter, IBM card punch, Parallel printer, Adding machine, Tape punch, Magnetic tape, Digital Meter, Strip Chart Recorders, X-Y Plotters, built-in CRT, etc.

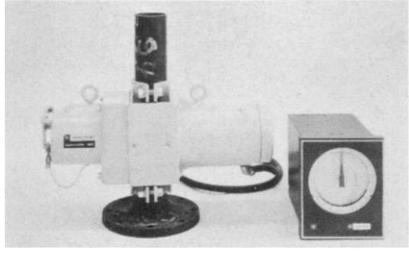

Accessories and Options:
Coherent Detection System, 2 to 8 Channel mixer systems, Channel/Multi-channel coincidence gating, Paper tape read-in, Complete time mode systems, Log display and analog output, Off-line typing, Magnetic tape read-in, Transfer indicator, 10^6 Counts/Channel, 8-50 Channel subgroups, Blinker, Temporary storage system, Random access to address register, etc.

A complete staff of field engineers is located at 14 domestic service offices plus domestic and overseas sales offices to assist customers with a minimum of delay.

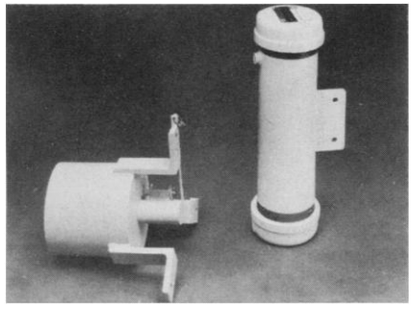

Circle **25** on the Reply Card

QUALICON GAUGE SYSTEMS

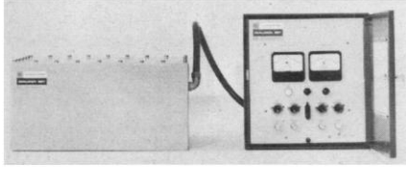

QUALICON GAUGES from Nuclear-Chicago permit economical, accurate analysis of the specific gravity, per cent solids, or component ratio in the food, petroleum, chemical, and mining and metals industries. These non-contacting gauges are temperature compensated, permanently calibrated, and have no moving parts. Operation is unaffected by changes of pressure, flow, viscosity, or turbulence. Read-out can be obtained in terms of per cent moisture, per cent solids, bulk density, dry weight, specific gravity, or other similar units.

QUALICON LIQUID DENSITY GAUGES continuously measure the specific gravity of liquids or the per cent of solids in all types of pumpable slurries. Accuracy is 0.0002 sgu.

QUALICON MAXIMUM/MINIMUM LEVEL CONTROLS continuously monitor the level of liquid or granular materials. Accuracy to ⅛ of an inch.

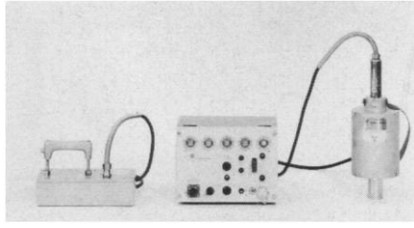

THE QUALICON BULK MOISTURE GAUGE continuously measures the moisture and density of process solids, producing a reading of "per cent moisture by weight." Automatic correction of the moisture reading is made according to variations in density. Installed accuracy is conservatively rated at 0.25 per cent moisture.

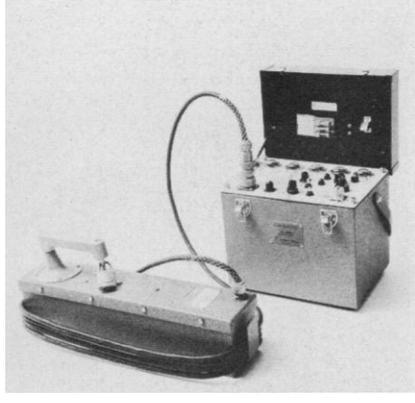

Circle **26** on the Reply Card

d/M-GAUGE SYSTEMS

THE d/M-GAUGE is a system of instruments for fast, accurate, in-place measurement of moisture and density of soil and related construction materials. The system consists of a scaler and four separate gauges that provide readings of *a.* surface moisture, *b.* surface density, *c.* depth moisture, and *d.* depth density.

These semi-automatic testing instruments permit field compaction tests to be completed in less than five minutes. The test is non-destructive and is completed at the job site. Results are highly reproducible. The test is applicable to all types of soil.

THE ASPHALT DENSITY GAUGE is the first instrument to be developed for testing compaction of hot asphaltic concrete. The test is made by placing the probe on hot (<300° F) pavement and taking a one minute reading. The gauge gives an accurate density measurement of the top two inches of material, but is ineffective for underlying layers. Because the test is non-destructive, repeated tests can be made on the same site between roller passes, and the progress of compaction can be followed. The range of the instrument extends from 100 to 160 lbs. per cubic foot.

Circle **27** on the Reply Card

SERVICE

Nuclear-Chicago maintains a nationwide network of company service offices and authorized service agents. The primary function of this organization is to service the instruments and systems of the parent company and its subsidiaries; service for other manufacturers' equipment is performed where time, parts, and information permit.

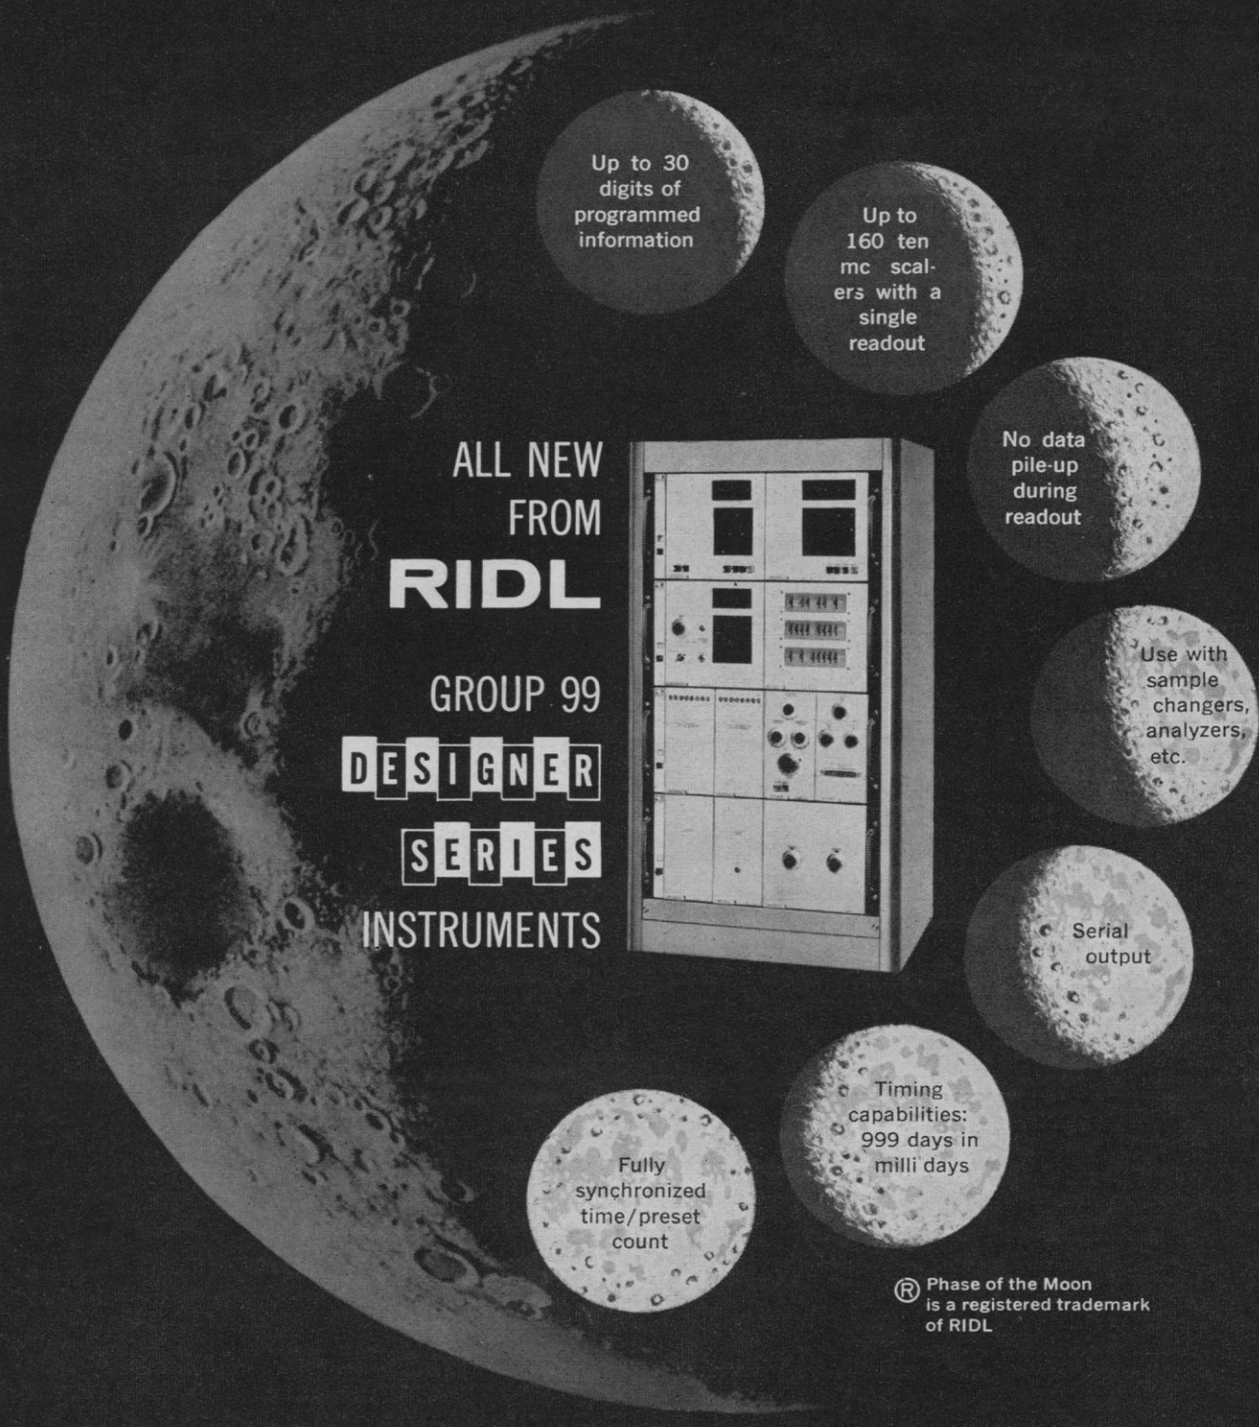

- Warranty Service. This type of service is routinely provided for the products manufactured by Nuclear-Chicago or its subsidiaries.
- Service Contracts. For convenience and economy in budgeting for instrument service, two types of Service Contracts are available in areas near company service offices. *A Full-Service Contract* covers all service costs, including emergency repair and all parts. *A Preventive Maintenance Contract* provides maintenance system assurance tests, and certain parts.
- Emergency Service. To obtain emergency service, call your nearest office shown at right. Twenty-four-hour service is provided in the metropolitan area of each Nuclear-Chicago service office by our own factory personnel.
- Overhaul and Calibration. Instruments brought in or picked up for overhaul will normally be returned within one week. Repair estimates may be provided before any work is done. Calibration certificates are issued to satisfy A.E.C. regulations on survey meters.
- Conversions and Modifications. Certain standard modifications to Nuclear-Chicago instruments are available to adapt them for special applications or to meet a new set of problems. Field conversions may be made to change existing systems to different forms of operation. In other special cases, we will advise on the feasibility and cost of such modifications and conversions.
- Parts and Accessories. Emergency supplies are available at each Nuclear-Chicago service office. Each office will accept orders and ship from its own stock or expedite shipments to you from our factory.

A brochure describes these services in greater detail.

Hyland

AGAMMA SERUMS
BOVINE SERUMS—from FETAL TO ADULT stage
SPECIAL ANTISERA and PLASMA FRACTIONS
ENZYMES
Serums and Serous Fluids—Balanced Salt Solutions—Serum Ultrafiltrates
Synthetic Media—Embryo Extracts and Ultrafiltrates—Special Formulations

Hyland Agamma Serums offer you greater control in tissue culture work. *Agamma Human Serum, Agamma Horse Serum, Newborn Agamma Calf Serum* and *Agamma Chicken Serum* provide increased concentrations of stimulatory protein fractions, and are electrophoretically free of gamma-globulin, which may inhibit cell growth and neutralize many viruses. They are offered in a variety of sizes.

Hyland Bovine Serums *(Fetal Calf Serum, Special Calf Serum W2, Special Calf Serum W4, Newborn Agamma Calf Serum, Newborn Calf Serum, Regular Calf Serum* and *Bovine Serum)* provide the widest available selection of serums for your tissue culture and virology research. *Special Calf Serum W2* is completely free of gamma-globulin by both electrophoretic and sensitive immunodiffusion technics, while *Fetal Calf Serum, Special Calf Serum W4* and *Newborn Agamma Calf Serum* are electrophoretically free of gamma-globulin, and show only trace amounts by the more sensitive technic.

Hyland Special Antisera and Plasma Fractions have been especially prepared by our Research Department with the thought that these products, many of them quite difficult to prepare, may be useful to other research workers. Allowing one to two weeks for conjugation, fluorescein labeling of antisera is available as a custom service.

Enzymes such as PROLASE® 300 (protease), MYLASE® 100 (amylase) and CELLASE 1000 (cellulase) are high potency enzymes most suitable for the hydrolysis of their respective substrates—protein, starch and cellulose. (PROLASE and MYLASE are trademarks of Wallerstein Company. They are available for laboratory use from Hyland Laboratories.)

THE 34-12B

RIDL Analyzers are used in every known analyzer application from Activation Analysis to Zoology.

Widest Range of Inputs

Internal Amplifier
External Transistor Amplifier
External Vacuum Tube Amplifier
Sampling Input for Mössbauer Correlation Studies, etc.

The RIDL Model 34-12B 400 Channel Analyzer has the widest selection of flexible features and options available. These features and options, some of which are listed here, provide the most *economical* means to meet your requirements of today and the future.

Widest Range of Accessories and Options

2 to 8 Channel Mixer Systems
Single Channel/Multi-Channel Coincidence Gating
Paper Tape Read-in
Complete Time Mode Systems
Time Base Generator for Time Mode
Log Display and Analog Output
Off-line Typing
Magnetic Tape Read-in
Transfer Indicator
10^6 Counts/Channel
Access to Parallel Data Transfer
8-50 Channel Subgroups
Blinker
Solid State Detector Preamplifiers
50 Cycle
Temporary Storage System
Analyzer Accessory Cart
Random Access to Address Register
Probes and Preamplifiers

Widest Range of Outputs

Typewriter
IBM Card Punch
Parallel Printer
Adding Machine
Tape Punch
Magnetic Tape
Digital Meter
Strip Chart Recorders
X-Y Recorders
Built-in 5" CRT

new advanced millimeter klystrons

Now available...improved and rugged...50 Gc to 101 Gc klystrons featuring uniform output power and exceptional frequency stability throughout 500-hour warranty life. Thermal stability is –4MC/°C. max. to 83 Gc (–6MC/°C. max. above 83 Gc). Compatible voltages including 6.3V heaters simplify power supply requirements. Actual power outputs are well above rated minimum.

TYPE	FREQUENCY	MINIMUM POWER
QKK1148	50-57 Gc	25 mW
QKK1149	56-65	25
QKK1150	64-74	25
QKK1151	73-83	25
QKK1152	82-92	25
QKK1153	91-101	10

$2490 each; available from stock. (Except QKK1153; $2950 each; approximately 90 days.) Call or write today for complete specs and test data: BRowning 2-9600, or Raytheon Company, Attn: Dick Knight, Spencer Laboratory, Wayside Avenue, Burlington, Massachusetts.

RAYTHEON

RAYTHEON LASER HEAD

WITH

250* JOULES OUTPUT!

Raytheon LHM6 Laser Head—one of a comprehensive line of laser devices—features high energy output to enhance your research capabilities and unique construction to preclude obsolescence. LHM6, as with all Raytheon Laser Heads, is supplied with a Ruby rod. All perform efficiently, too, with Neodymium-in-glass and other laser rods that can be pumped with Xenon lamps. In LHM6, both ends of the crystal are accessible to facilitate the use of Q-spoiling devices and external optics. LHM6 is designed for long-term use: when higher energy lamps and larger laser rods are available, they may be incorporated without modification. Your Raytheon Sales Engineer has a portfolio of Laser Data Sheets for you. Ask him for your set. Or, write Raytheon Company, Laser Advanced Development Center, Waltham 54, Mass.

RAYTHEON

*Ruby at liquid nitrogen temperature. With neodymium-doped glass, 175 joules have been obtained at room temperature.

INVESTIGATE TODAY—Write for Bulletin #1010-S for complete information on this versatile system for your lab.

There is a complete Electrophoresis system for every type of laboratory. Savant's precision engineered tanks are constructed of Lucite as the main structural material. It is inert to most chemicals used in Electrophoresis application and the Lucite tank has the distinct advantage of being transparent. The investigator sees at all times what is taking place.

• The **Flat Plate** system has the advantage of requiring no coolant. Paper sheets measuring 18¼" x 22½" or several narrow strips are cooled by direct contact with the plate. Flat Plate system comes complete with safety interlock box.

• Lucite tanks will accept paper sheets up to 20" wide, and 48" in length in order to achieve maximum resolution. Today, laboratories around the world are using Savant's Lucite Tank and Cooled Flat Plate with confidence.

NEW
FROM RAYTHEON

The new Raytheon Microwave Power Generators are designed for a wide variety of laboratory research applications including the production of free radicals, and the excitation of electrodeless discharge lamps in the fields of spectroscopy, raman spectroscopy and interferometry. A complete line of waveguide and coaxial accessories is available.

For further information and specifications, write or contact: *Raytheon Company, Production Equipment Department, Commercial Apparatus & Systems Division, Hooksett Plant, Manchester 26, New Hampshire.*

RAYTHEON

NOW.... INSTANT FLUORS!

LIQUIFLUOR*

(PPO-POPOP CONCENTRATE)

WILL SAVE YOU HOURS OF MIXING TIME!

New LIQUIFLUOR* is an exclusive development of Pilot Chemicals—a pre-mixed liquid concentrate of PPO and POPOP in specially purified toluene which will save you hours of mixing time in the laboratory . . . and greatly reduce the chance for error.

No more time-consuming laboratory weighing and stirring. No more waiting for ingredients to dissolve. All you do is pour LIQUIFLUOR* into the solvent.

Independent laboratory tests show counting efficiencies identical with old 'weigh and stir' method.

ADVANTAGES:

- Saves time — just mix — no waiting.
- Less chance for error in compounding.
- Flexible — can be used with any liquid scintillator system containing toluene.
- Contents: a 25x concentrate. 1 liter contains 100 grams PPO and 1.25 grams POPOP in specially purified toluene.
- Available in 1 liter and 500 milliliter bottles.

FOR COMPLETE INFORMATION, WRITE TODAY.
(A request on your letter-head will bring you a free sample.)

STOP ACTION FREEZING CONTROL

MODEL CY3

THERMOELECTRIC MICROSCOPE COLD STAGE

* Range −80°C to +80°C
* Precise Temperature Control
* No Compressed Gas Required
* Integral Thermistor Sensing Element
* Compact—Fast Set-Up
* Noiseless—Single Control

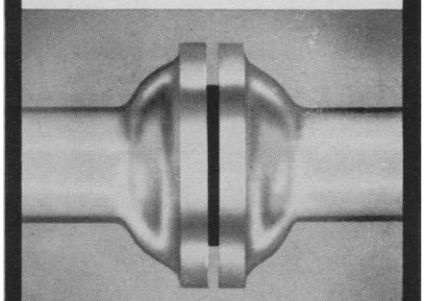

Compact controller with cooler in a 3″ x 3″ x 1½″ epoxy housing. Fits standard microscope. Cooling provided by thermoelectric elements which transfer heat from sample to integral heat exchanger. Temperature sensed by bead thermistor fixed to sample holder. Null indication audible through earphones for continuous sample observation.

Instrument permits control of crystal front as it moves across field of view. Progression of front can be slowed, halted or reversed. Melting and freezing rates controlled. Applications include detection of impurities, observation of profile and extinction angles, refractive indices and birefringence estimation, etc. Write for complete details . . .

GREASELESS HI-VACUUM GLASSWARE

Handiest O-Ring Joint available

The unique Delmar-Urry O-Ring Joint has three pressure ridges. These multiple pressure points within the O-Ring joint provide truly positive seals at pressures down to 10-⁶mm and at temperatures from −40°F to 500°F.

Greaseless Stopcock

A new grease free stopcock for pressures down to 10-⁶mm. Usable in the temperature range from −40° to +200°C. Available in sizes from 0 to 4mm and 0 to 10mm.

just 5 feet of floor space and a wall plug...

and you can take this new Sherer GRO-LAB anywhere!

SHERER GRO LAB

$1,660.00
F.O.B. Marshall, Michigan

Quality-built like larger Sherer growth rooms, the compact, portable, economy-priced CEL 25-7 features:

- **Temperatures and lights completely programmed.**
- **Light intensity 1700 foot-candles 18″ from lights.**
- **Temperature range 55-90° F. with full light load.**
- **± 2° F. temperature controls.**
- **No barrier between lamps and growing area.**
- **Self-contained—no drain connection needed.**
- **7 square foot plant bed adjustable from 12″ to 36″ from lamps.**
- **Limit safety control.**

If limited space or a limited budget has kept you from requisitioning a Growth Chamber, here's your chance to order the finest—the new Sherer Compact GRO-LAB CEL 25-7.

Send for literature and prices today!

BIOLUMINESCENCE

Sigma has certainly done a "Sigma-Grade" job on the preparation of Bioluminescence reagents. Laboratories that have already tried certain widely publicized reagents and demonstration kits, have been amazed to see the tremendous difference when they tested Sigma's Firefly Lanterns and ATP.

Firefly Lanterns as processed by Sigma are at least 20 times as active as another dealer's!
(Actual tests often show a 100-fold difference).

Adenosine Triphosphate, Crystalline, Disodium Salt, Sigma, is unquestionably the highest purity ATP the World has ever seen—ideal as a "Standard" for Bioluminescence Assay.

Even the Crystallization of ATP was first accomplished by Sigma.

Because of our much higher activity, you will need only 1% to 5% of the weight of Firefly Lanterns as compared with another commercial offering.

Available in many convenient forms—

Firefly Lanterns, Desiccated (Stock No. FFT)

1 gram	$ 9.85
250 mg	3.60

Preweighed Vials of Powdered Lanterns. 15 mg each for one demonstration (Stock No. FFT-15)

10 vials	$ 7.50
15 vials	11.25

Firefly Lantern Extract (Stock No. FLE-50)
Each vial contains the soluble activity from 50 mg of Lanterns. Also contains the Potassium Arsenate and $MgSO_4$ needed for use.

10 vials	$ 9.90
15 vials	14.85

Complete Kit for Bioluminescence Demonstration. All reagents needed, preweighed into sets of single demonstration vials. 3 Vials per set; simply mix contents . . . see dramatic Luminescence. Ideal for Science classes.

Kit No. FF-10	10 sets	$19.50
Kit No. FF-3	3 sets	5.85

We also offer—

Luciferase, Bacterial, Purified from Achromobacter Fischeri. Gives light response with B-DPNH, FMN, and a long chain aldehyde.

10 mg	$ 5.50
100 mg	35.00

(Illustrated: New Portable Speedservo. Flush Panelgraph with 8" x 8" front also available.)

New Portable Speedservo

(fast, sensitive, simple, versatile)

New, high-speed, high-capability Portable Speedservo—another new generation "Graphline" instrument from Esterline Angus—designed to handle *all* your recording needs, tomorrow's as well as today's.

High Speed: ⅛ second full scale response. Records 4 cycle signals without significant attenuation. **Sensitive:** 0-1 MV DC without jitter. Many higher ranges. Accuracy ½%. **Versatile:** Accommodates DC circuits with output impedance 100,000 ohms or less. Portable unit features sloped stainless steel writing surface. Chart tear-off bar. Full 6" wide 100' long chart. **Convenient:** Dial 14 chart speeds from ¾" per hour to 6" per second. Input terminals, multi-range and feed selectors mounted at front for convenience. Hinged doors provide easy access to writing system and re-roll mechanism. **Less Maintenance:** Simple linear motion pen motor (unique *shuttle* type, not rotary); no strings, no pulleys. Zener reference voltage. Infinite resolution potentiometer prevents hunting.

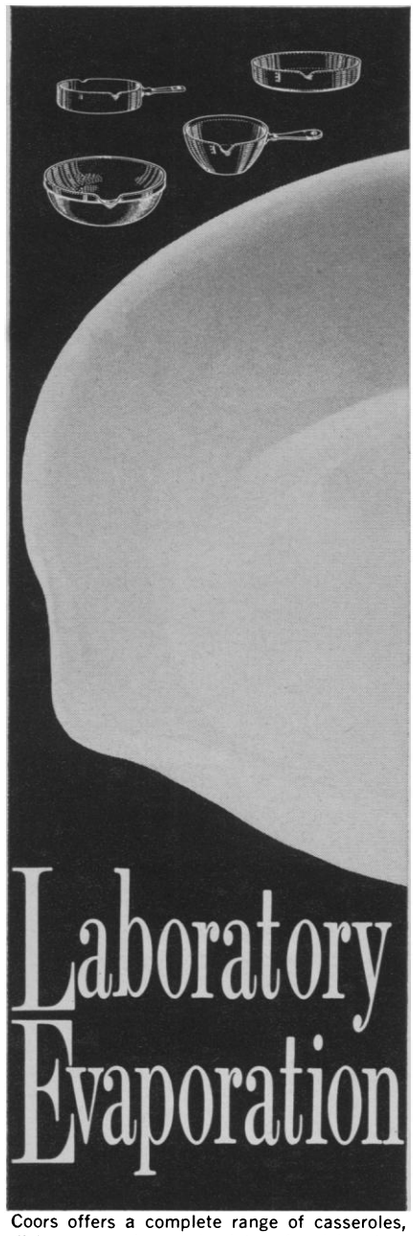

In addition to the new Speedservo, the radically new EA "Graphline" of rectilinear recorders includes both single and two-channel DC Microammeters, DC Milliammeters, AC or DC Ammeters or Voltmeters, plus inkless and ink-type event recorders. *Your inquiry is invited.* If desired, Esterline Angus will gladly adapt standard instruments to your needs, or develop new ones for you. *Write for new "Graphline" Brochure.*

Laboratory Evaporation

Coors offers a complete range of casseroles, dishes, capsules and plates for laboratory evaporation. These pieces have been created to match the exacting requirements of working chemists who require especially high quality, uniformity and reliability. Standard items include flat bottomed dishes, such as the #160 capsules, #182 casseroles, #431 and #470 dishes. A wide variety of shallow, curved bottom dishes are also available. These include the #430 regular evaporation dishes, #170 capsules, #180, #181, #190 casseroles, and the #440 and #450 dishes. For dry organic precipitates by evaporation and absorption, the #760 porous plate is offered. A complete selection of Coors laboratory evaporation equipment is immediately available through your laboratory dealer.

HANDLE WITH AMERAY TONGS

For radioactive, explosive, or toxic material

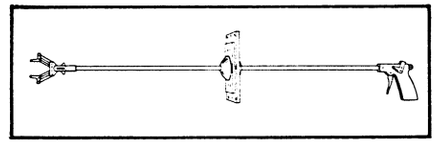

Don't take your life in your hands. AMERAY Tongs can do almost anything you can do — safely and surely.

Remarkable for their handling ease, AMERAY Tongs' exclusive positive-locking action with **flip-of-the-lever release** prevents hand fatigue. Unique parallel-motion jaw-heads insure a bulldog grip.

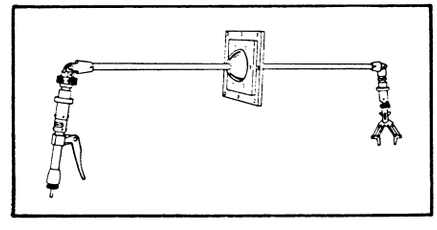

Expensive? Not a bit.

Catalog and complete technical data available on request.

Available in two models:

AM 251 Straight-line mechanical design which can be used either as simple hand tongs or, with a ball swivel joint, through walls and shields, and . . .

AM 252 Hydraulically operated Articulated Tongs. Extra-sensitive design for applying precise pressure.

BARNSTEAD "85" *DISTILLED WATER CENTER*

Here's a complete, totally enclosed Distilled Water Center. It is a complete, self-contained package producing higher purity distilled water for all laboratory and research needs. Requires no manual attention. Automatic controls produce and store distilled water around the clock, dispensing it at its own work counter. Maintenance is completely eliminated since the Still never needs cleaning. Needs only 3 feet of wall space. Designed to blend in with Laboratory counters and casework. Ideal for low ceilinged Research and Lab rooms, yet delivers distilled water at working height. No special mountings are needed and installation is easy and inexpensive. The Barnstead "85" has many exclusive operating features including automatic temperature controls and direct reading Purity Meter.

Specifications and information detailed in Bulletin #191. Write for your copy today. No obligation and it will be mailed promptly.

NOW FROM BRONWILL...THE RENOWNED BRAUN MODEL MSK, MECHANICAL CELL HOMOGENIZER

Offered for the first time in the U.S.A.... the outstanding Braun MSK cell homogenizer fully adapted for use in this country.

The superior Braun MSK prepares cell-free extracts for enzyme studies . . . homogenizes yeast, bacteria, tissue cultures or minced organs . . . pulverizes coarse particles (such as pigments or plastics) . . . and makes cell particles (for example yeast mitochondria) ready for study.

Biochemists, bacteriologists, cytologists or research scientists now have at their disposal this extremely efficient, highly effective and speedy tool for use with material either in the dry state or in suspension.

With yeast, 90% disruption of 10 grams is achieved after only 30 seconds at 4000 rpm . . . 99% after 60 seconds!

Bacterial cells show 70% to 90% breakdown after 1 or 2 minutes!

Intact yeast mitochondria are prepared in 20 to 30 seconds!

The remarkably short disruption time of the Braun MSK allows the processing of a series of batches, if necessary, in a relatively short period.

The Braun MSK features two-speed, elliptical shaking action. Cell walls are broken down by violent tumbling action of tiny glass beads. The sample may be cooled with CO_2 and kept below 5°C.

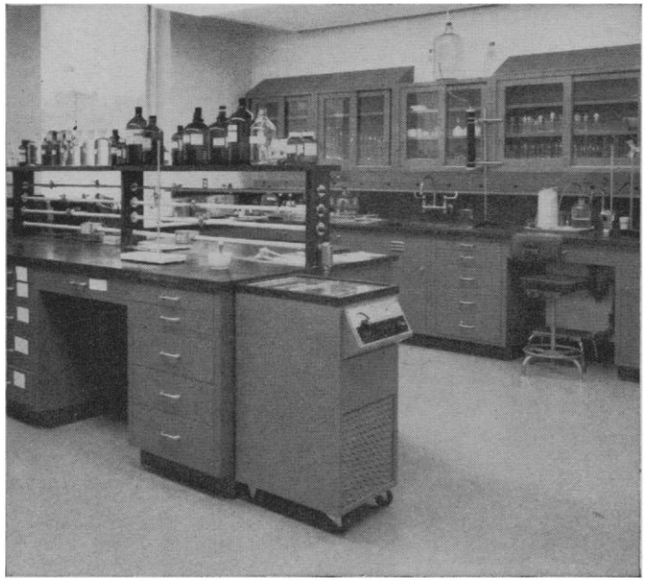

If the Braun MSK would be useful in your work, drop us a note and we'll send you all the details.

3094 NORTH BURDICK ST. amp® KALAMAZOO, MICHIGAN

HIGH IN PERFORMANCE LOW IN COST (As little as $405)

Varian was the first to bring you such a sensitive, low-cost potentiometer recorder. Thousands in use constantly prove the G-10's accuracy and reliability for every recording chore within its capability. This sensitive, rugged instrument features: 10 to 100 mv d.c. full scale; select one or two chart speeds from 1/2"/hr. to 16"/min.; 1% accuracy; pen speed 1 or 2½ seconds full scale. For full specifications and prices, write to RECORDER PRODUCTS.

DUAL CHANNEL RECORDER

(COMPACT, PORTABLE, TOO!)

Varian's G-22A is the least expensive servo-operated two channel recorder available—and the most compact. It puts two time-correlated variables onto one chart of 5-inch calibrated width. This versatile instrument features: 1% accuracy; spans from 5 mv to 500 v; 1 second full scale balance time; 2 or 4 chart speeds from 1/8"/hr. to 16"/min.; full scale zero adjust. Full accessory line. Portable and rack-mounted models available from $1195. For full information, write RECORDER PRODUCTS.

TRY THIS EXPERIMENT IN ECONOMY... TRY NEW, LOW-COST UNBREAKABLE PLASTIC LAB WARE BY econo-lab

Exclusive Slide Box . . . Another Econo-Lab First!

Slide selection at your fingertips at a price well within your reach! New, one-piece design in polypropylene outdates any other slide box ever made.

- Slides rest on raised ridges—each tips up easily for split-second removal.
- Slide dividers are staggered in short and tall sequence to give fast, easy alignment.
- Unbreakable—stands up to all kinds of rough treatment.
- Spring-back hinge guaranteed for 1,000,000 openings.
- Tight, dust-proof lip and positive latching lid.
- Numbering system and index printed on pressure-sensitive tape.
- Comes in 25 and 100 capacities and light-defying, solid color.
- For standard slides, 75mm x 25mm.

Available from your Local Laboratory Supply Dealer

Now! Completely Disposable Beakers...

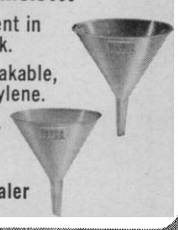

- Excellent for experiments involving viscous or radio-active materials.
- Special "dripless" lip.
- Exclusive ribs prevent binding—they stack but don't stick.
- Safe—made of unbreakable, translucent polypropylene.
- Sizes: 15ml, 30ml, 50ml, 100ml.

Available from your Local Laboratory Supply Dealer

Now! Completely Disposable Funnels...

- Exclusive—special vent in stem prevents air lock.
- Safe—made of unbreakable, translucent polypropylene.
- Sizes: 9cm and 11cm.

Available from your Local Laboratory Supply Dealer

NEW! Polyethylene Vial Holder...

- Accommodates vials, bottles, etc.
- Four compartments—each 17½mm square, 49mm deep.
- Overall size— 3" x ¾" x 2" high.

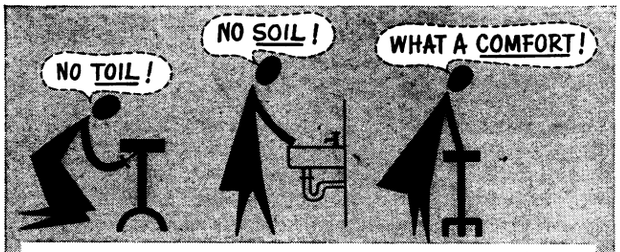

Available from your Local Laboratory Supply Dealer

Econo-Lab products are brought to you by the manufacturer of famous Econo-Cages—the leader in plastic laboratory animal housing.

TAKE THE CARE OUT OF LAB WARE WITH ECONO-LAB UNBREAKABLE PRODUCTS!

AJUSTRITE CHAIRS ... STOOLS

AJUSTO EQUIPMENT CO.
Bowling Green, Ohio

new from nester/faust

Rotary Spray Evaporator*

Here's a brand new laboratory model that can greatly speed up evaporations. For example: water can be evaporated at approximately 20 cc/min. and toluene at 108 cc/min. with other evaporations in comparably fast time!

OPERATION: Constant speed motor rotates stainless steel (or optional teflon coated) spray agitator which picks up solute and solvent and sprays mixture against flask walls. Droplets formed are flattened on large surface area — permitting high evaporation rate. Sample can be fed continuously and feed rate controlled with hose clamp.

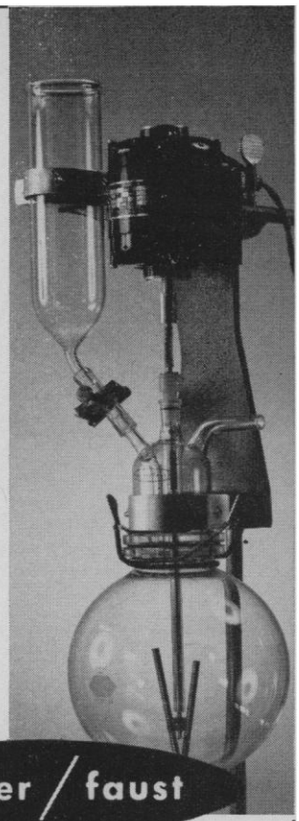

SPECIAL FEATURES: Vacuum tight to 10^{-5} mm Hg; foaming samples can be added easily. High evaporation rates cause significant temperature drop of solute — making evaporator ideal for heat sensitive compounds.

Evaporator comes assembled and ready to use with 2 liter borosilicate glass flask: $168

Micro Evaporator with maximum capacity of 100 cc: $166.80

*patent pending

For purchase or more information, call or write:

ACE AUTOMATIC PIPETTER

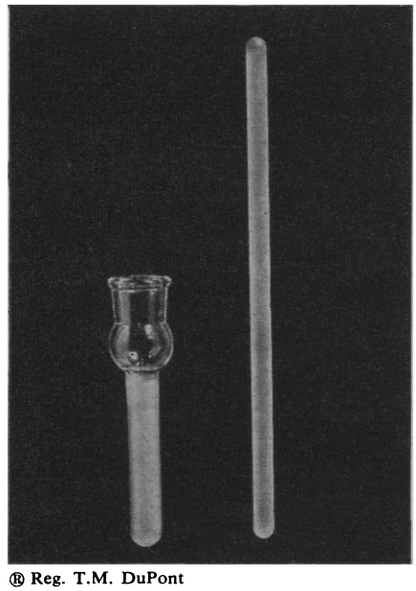

- **Fills and Pours Automatically, Rapidly.**
- **Interchangeable: One Head For All Capacities, All Volumes.**
- **Short Tipping Angle.**

Cat. No. 8004. Interchangeable volumetric bulbs give reproducible volumes within ±1% for capacities greater than 5 ml. Smaller capacities to within ±0.1 ml. reproducible. *Please specify volume of bulb and flask capacity when ordering.*

Specifications and prices: Erlenmeyer Flask T 29/42, 500 ml.: $2.60 each, 1000 ml.: $3.10 each. Flask Head T 29/42: $11.80 each. Interchangeable Volumetric Heads T 14/20, 1, 3, 5 ml.; $3.75 each; 10, 15 ml.: $3.85 each; 20, 25 ml.: $3.95 each.

Ace Interchangeable Tissue Grinder

Cat. No. 8345. A precision ground instrument for macerating tissue. Rod and barrel are interchangeable. Rod is ground its entire length and can be reversed for double life. Rod fits Ace Cat. No. 1200 B Flex-grip Chuck, forming a flexible coupling to the motor drive when mechanical operation is desired.

Price complete $6.75, Rod $3.00, Barrel $3.75.

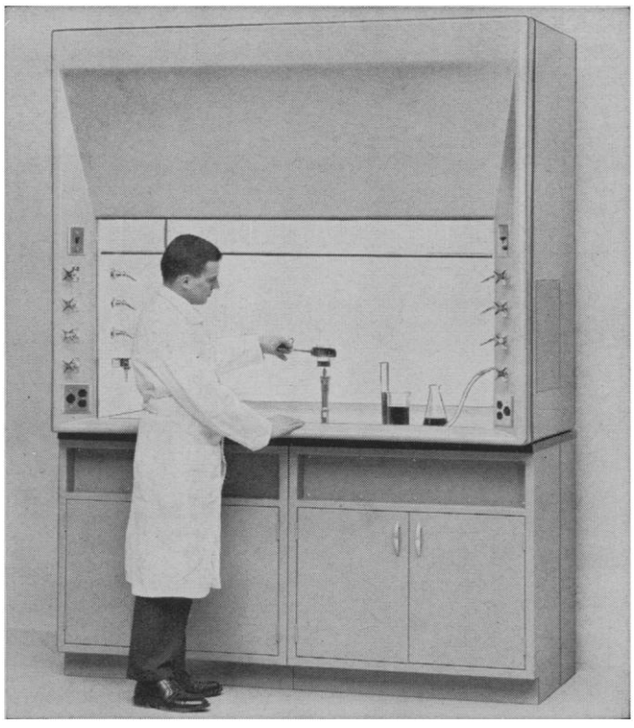

SPECIFICATIONS: Ground section of barrel 82 mm. Overall length of barrel 125 mm., length of ground rod 240 mm. Barrel clearance of .005 to .008" meets G.S.A. specs.

New Fiberglass Fume Hoods

Big news from Labconco! Two 70-inch fiberglass fume hoods have been added to the Labconco line.

Top of the line is the Advance-70 (shown here). This 70-inch double-wall hood has a smooth, one-piece inner shell which includes the work surface and cup sink. All corners are coved for easy wash-down. Sash opening is designed for constant face velocity and minimum turbulence. The Advance-70 sells for $1,185, less motor and blower.

The Fiberglass-70 is also 70 inches wide. Priced at $785, it features a built-in blower and vapor-proof worklight, smooth-finished interior on its single-wall construction.

The familiar 47-inch wide Labconco Fiberglass-47, introduced two years ago, completes the line. With built-in blower and light, it's priced at $495.

All Labconco hoods are fitted with Plexiglass sash, treated to resist chemical attack, fogging, and reduce static attraction.

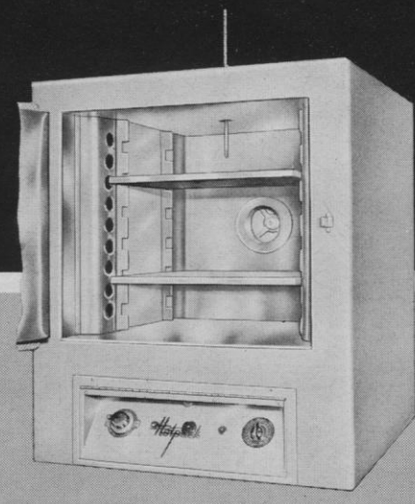

Send today for a new 32-page brochure. Write LABCONCO, 8805 S. Prospect, Kansas City, Mo.

LABORATORY CONSTRUCTION COMPANY

NEW high temperature forced draft ovens to 280°C

MODEL 1302

Lowest Cost Working Area per cu. ft.
With Highest Degree of Uniformity!

Through Hotpack's scientific horizontal convection system, heated air is ***gently*** and ***uniformly*** convected across all shelves (regardless of load) and throughout ***entire*** chamber area. Rear mounted blower motor and perforated side walls assure you absolute ***floor to ceiling*** circulation and ***rapid*** heating! Temperatures are uniform to within ± 1°C.

- 4 cubic feet of ***useable*** working space
- 3-heat selector switch . . . low, medium, high
- polished stainless steel chamber and shelving for lasting durability
- ball-bearing blower motor pre-lubricated for maintenance-free use
- optional Limitstat control automatically prevents excessive temperatures and damage

Ovens feature Hotpack's recessed, illuminated control panel with safety plexiglass cover!

$415.00

MASTERED WITHIN 1/2 HOUR!

NATELSON MICROGASOMETERS

for Gas Determinations of Ultra-Micro Samples

SIX SIMPLE STEPS

1 STEP 1: SYSTEM UNDER REDUCED PRESSURE TO REMOVE ALL AIR PRIOR TO SAMPLING.

2 STEP 2: CO_2 PROCEDURE: COMPLETE SAMPLING PROCEDURE SHOWN WITH REAGENTS AND MERCURY SEALS IN THE PIPETTE.

3 STEP 3: CO_2 RELEASED BY AGITATION ON THE STANDARD (model 600) NATELSON MICROGASOMETER.

4 STEP 4: CO_2 RELEASED BY AGITATION ON THE MOTORIZED (model 650) NATELSON MICROGASOMETER.

5 STEP 5: THE MOLECULES OF RELEASED CO_2 GAS COMPRESSED SHOWN EXERTING PRESSURE DOWNWARD ON THE MERCURY.

6 STEP 6: THE MANOMETRIC PRESSURE (P_1) AS A RESULT OF COMPRESSING THE LIBERATED CO_2 IN THE REACTION CHAMBER, THROUGH SELECTIVE ABSORPTION WITH 3N NaOH, P_2 IS OBTAINED.

$P_1 - P_2$ x Temperature Factor vol.% = CO_2 vol.%

... and you're 1 step from O_2
2 steps from CO

At Left: The New Natelson Microgasometer (Model #650). At Right: Standard Manual Natelson Microgasometer (Model #600). Above: The Gas Injector Attachment for either model Natelson Microgasometer. This is the system for direct injection of gases liberated in the Microgasometer. These gases are fed into a Gas Chromatograph. (Model #M-373-25).

LIMIT ACCESSORIES SHOW THEIR SUPERIORITY

A scientist need only pick up a Limit accessory to sense its precision quality. All types of UV and IR cells, including the revolutionary Throwaway Cell, are unsurpassed in accuracy and reliability. Similarly, Limit instruments such as laboratory grinders, presses, dies, ATR units and attenuators are unexcelled in performance and durability. You deserve the best accessories for your UV and IR research, so write or phone today for details and prices. Remember, same day shipment for most Limit products, and immediate help with your instrument problems.

GOOD SPECTROSCOPISTS DESERVE LIMIT ACCESSORIES

A PORTABLE VACUUM CARRIER

Just ONE of a COMPLETE LINE of PORTABLE SYSTEMS from PENN-CHEM including:

- Portable Vacuum Assembly Carriers
- Lab Carts
- All Purpose Carriers
- Portable Lab Racks
- Portable Towers
- Cantilever Carriers
- Glassware Carriers

These hardworking carriers put virtually every laboratory operation ON WHEELS

Vacuum Pumps & Accessories
Column Chromatographic Equipment
Filtration Equipment, etc.

Distillation Columns & Accessories
Gas Analysis Apparatus

GET INSTANT GOLD

WITH THE SCHUCO THERMOCOOL

Instantly converts any bath to a thermostatically controlled refrigerated unit with a range from +15° C to −20° C at an accuracy up to ±0.01° C. Eliminates need for refrigerated baths and preparation of freezing mixtures.

Two models available give an almost unlimited range of use with liquids, gases or soils. Converts any existing bath into a cold system at desired temperature.

The SCHUCO THERMOCOOL is completely self contained and portable-supplied for immediate use with compressor and refrigerant. Maintains temperature to an accuracy of ±0.1° C and with special to 0.01° C.

Weight 69 lbs—15¾" x 12¼" high. Operation 115V, AV, 550 watts. Compressor output ¼ h.p. air cooled; cooling rate 500 kcal./h.

Standard cooling head hose length—4 ft. Other lengths up to 16 feet on special order.

SCHUCO THERMOCOOL complete as described with corrosion proof aluminum head . . . $670.00

SCHUCO THERMOCOOL complete as described with stainless steel head for use with acid or base: . . . $695.00

Pat. No. 2,985,587

N.I.L.—HOCH
First Universal High-Precision Dialyzer

DIALYSTAT®

For the recovery of dialyzable salts, the removal or recovery of acids, and the separation of colloidal material from other solutes.

FEATURES

- Shearing motion agitates both sample and buffer to accelerate dialysis rate.
- Samples dialyzed against individual buffers or multiple samples against a single buffer.
- Portions of sample and buffer removable without disassembly of cell.
- Tap water or circulating cooler easily attached for constant temperature.
- Continuous dialysis carried out with temperature control and constant rates of flow of solutions and buffer.
- Rapid concentration of samples achieved by cryodialysis or heating.
- Cells may be autoclaved or chemically sterilized.
- Saves space, time, and drudgery.

APPLICATIONS OF THE DIALYSTAT ANALYTICAL CELL*

1. The measurement of small differences in size, shape, and charge of large molecular substances.
2. Makes possible the detection of interaction between proteins, or proteins and haptens, by escape rate measurement.
3. Microtechniques for work with volumes between 0.03 and 0.5 ml.
4. The detection of heterogeneity by dialysis.
5. The characterization of membranes by use of known mixtures.

PHRENICON SERIES

make continuous breath analysis possible!

+ $C^{14}O_2$ sensitivity as low as 1μc per injection
+ 99% accuracy
+ reproducibility within 0.5%

PHRENICON features and advantages:

- A complete system from patient—collection—analysis—readout flexibility
- Continuous and simultaneous measurement of respired CO_2, O_2 and $C^{14}O_2$ eliminates all sampling
- Automatic, continuous computation of specific activity (SA) and respiratory quotient (RQ)
- Automatic, internal calibration
- Pressure, flow, temperature and humidity accurately controlled
- A wide choice of readouts is available, from graphic recorder up to and including direct computer input

The PHRENICON series is comprised of a wide selection of models to meet any application. These models range from the most simple to the most complete and can be selected on an individual requirement basis. Prices range from below $10,000 to $30,000.

GARNERVILLE, NEW YORK

BAR-NUN
Rotary Flask Shakers

Uniform Agitating Action • Heavy Duty Service

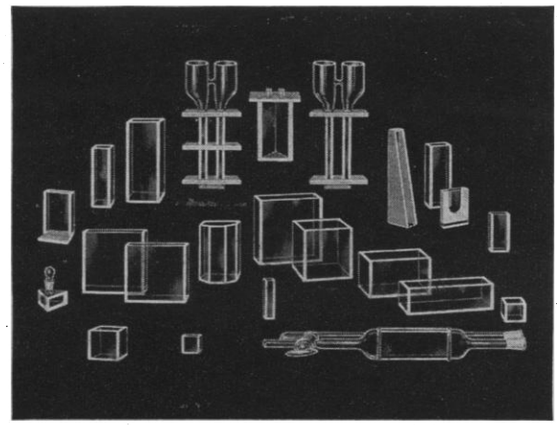

Exclusive four-point, combined rotary drive and supporting mechanism imparts true rotary, single plane motion to entire flask platform, regardless of how flasks or jars are loaded. Each container is moved in a complete circle and receives same agitation as every other container. Operation is smooth and vibrationless, even in 24-hour service. Maintenance is virtually nil. Various types of flask holders, and removable trays available. Variable speed drive. Sizes to handle from 49/500 ml. to 234/500 ml. flasks. Many "repeat order" users in U. S. and abroad.

To: ITT INDUSTRIAL LABORATORIES
Dept. 61200
3700 East Pontiac Street
Fort Wayne, Indiana

Please send me additional information on ☐ multiplier phototubes, ☐ biplanar photodiodes. The application I have in mind is:

_____

_____

NAME_____

TITLE_____

COMPANY_____

ADDRESS_____

CITY_____ ZONE____ STATE_____

This coupon will bring you data on

LASER DETECTORS

with single photoelectron sensitivity

Deflectable multiplier phototubes with single photoelectron sensitivity; diode phototubes with half nanosecond response and current-carrying capacities linear from one-billionth amp to 50 amps.

Characteristics like these—so vital in laser research—are available today in the new ITT line of multiplier phototubes and biplanar photodiodes. These devices, covering the entire spectrum from infrared to far ultraviolet, have pulse-counting characteristics and signal-to-noise ratios superior to any other tube or device now available.

ITT photomultipliers have a response range from dc to approximately 100 Mc, a sensitivity extending down to 10^{-17} watts, a capability of detecting single photoelectrons, and magnetic deflection for alignment and tracking purposes.

ITT biplanar photodiodes cover a tremendous dynamic range of currents from 10^{-9} amps to 50 amps. Their extremely short transit time of less than ½ nanosecond makes possible very high frequency response.

If you are working on the fundamental properties of laser radiation or investigating new laser applications, look into ITT's new line of photo detectors. Send in above for complete specifications. ITT Industrial Laboratories, a division of International Telephone and Telegraph Corporation, Dept. 61200, 3700 East Pontiac St., Fort Wayne, Ind.

ITT

PORTABLE

indicating pyrometer and millivoltmeter

FOR ACCURATE, CONVENIENT MEASUREMENT OF TEMPERATURE AND D-C MILLIVOLTS . . .

Handy, compact pyrometer for general use in laboratory or plant. Completely self-contained and weighs only three pounds . . . easily carried from place to place for making spot checks, or may be kept permanently in one location. Combined 8-foot length of thermocouple and extension wires makes it highly useful for taking temperature readings in hard-to-reach spots and permits the instrument to be kept at a safe distance from extreme conditions of heat and vibration. Guaranteed accurate well within 1% of full scale deflection. Automatic compensation for internal resistance changes due to ambient temperature variation. Easy-to-read 3¾" scale mirrored to eliminate parallax.

Choice of four scale ranges

500°F- 260°C-18MV
800°F- 430°C-17MV
1600°F- 870°C-36MV
2250°F-1230°C-50MV

Sturdy carrying case . . . 7" x 9" x 4½" . . . detachable cover. Price complete with case:

only $55

ALL
POLYOLEFIN
REAGENT DISPENSER

Permits Safe Handling of Reagents . . . Even Acids

Screws on any standard 5 pint acid bottle and regular half-gallon and gallon jugs. One hand operation delivers reagent at about 1000 ml per minute. Slight pressure on relief valve stops flow instantly. **Price — 3 for $11.25**

Pioneer Plastics, Inc., is the manufacturing leader in plastic laboratory apparatus, with proven product economy and practicability in the world's chemical laboratories for over 7 years.

PROFESSIONAL "CHEMICAL KITS"

Save thousands of dollars in chemical inventory costs, space and time. CHEM SERVICES provides "Lab Assist" CHEM SUPPLY units with that finger tip accessability to a wide variety of chemicals so necessary in research and analysis.

COMPACT	NEAT	STIMULATING
CONVENIENT	RAPID	VERSATILE
ECONOMICAL	SAFER	

ORGANIC CHEMICALS

Model 0-1000 ORGANIC CHEM SUPPLY places over 1000 organic chemicals at your finger tips. Chemicals arranged by FUNCTIONAL GROUPS.

SURFACTANTS

Model SU-500 SURFACTANT CHEM SUPPLY contains 500 surface-active agents to cover every screening problem. Compounds arranged by SURFACTANT TYPE and CHEMICAL STRUCTURE. Units are available in several sizes. We also specialize in custom-made units tailored to your specifications.

you're looking at the only

MECHANICALLY REFRIGERATED PORTABLE FREEZE-DRYER

on the market today...

it's also the lowest priced!

Just look at these startling features:

The condenser chamber is different

- It's easily accessible and visible during the entire process
- In just 5 minutes defrosting and cleaning can take place

The unit is complete

- Bulk chamber freeze drying and manifold freeze drying can be done at the same time
- Inside of drum can be fitted with removable tray rack with controlled heating

Write for further information and comprehensive specification sheet

A complete line of Mechanically Refrigerated Freeze Dryers from $550.

A COMPLETE LASER SYSTEM FOR BIOMEDICAL RESEARCH

Available with or without microscope

The TRG Model 503 Biolaser has been designed as a complete installation to fill a specific research role. It is a practical, working system that needs only to be plugged in. The 503 Biolaser's coherent light output is focussed through the microscope optics down to micron-size beam widths for such applications as: cell-wall microsurgery, irradiation, coagulation, and studies in electric field action, rheology, pathology, genetics, and other cellular level research. Photographic studies can be made during any phase of use. ■ The TRG 503 is a ruby laser emitting pulse energy outputs up to 100 millijoules at 6943 Å. It has already been utilized by several research teams for work in microsurgery and other applications. ■ Article reprints from Science magazine, describing the Biolaser's use, are available from TRG on request. ■ If you already possess the optic and photographic equipment needed, the TRG 503 laser system alone is available. This comprises laser head, power supply, and microscope adapter.

Price: Complete system, with camera and Leitz microscope—$4150.00; Laser system only, as described—$1800.00.

FRACTION COLLECTORS

for every program... for every budget!

CONTINUOUS . . .
for long-term or overnight use.

- 240 test tubes, 18 x 150 mm.
- Four rows of 60 each.
- Turntable, 24" diameter.
- Time drop and volume collection.

REFRIGERATED . . .
the mobile coldroom, refrigerated from column to collecting tubes.

- Fractions in the turntable temperature-controlled.
- Fraction collectors removable for all-purpose cold-room work.
- Mobile—on casters.

25 different models, including SECTIONAL (for processing during fraction collecting)

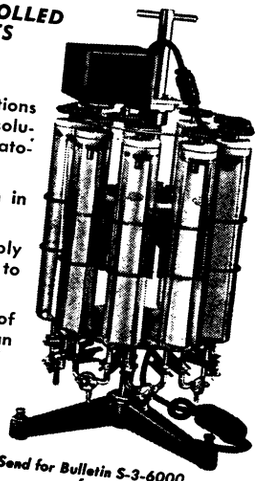

For complete description of all Fraction Collectors write for Bulletin S-3-4000

The VARIGRAD

VARIABLE GRADIENT MIXER FOR CHROMATOGRAPHY

A unique apparatus FOR PRODUCING PRECISELY-CONTROLLED AND REPRODUCIBLE GRADIENTS Developed at the National Institutes of Health

- Makes small changes in specific portions of an elution gradient to improve resolution in certain regions to chromatograms.
- Presents gradient data for duplication in any laboratory.
- Single apparatus can be used to supply identical gradients simultaneously to several columns.
- Any number of independent gradients of different molecular or ionic species can be produced simultaneously.

COLEMAN

Metrion® II.. versatile, low-cost pH measurement

All routine pH measurements—even those requiring temperature compensation—can now be performed with a simple, low-cost pH meter, the Coleman Metrion II.

This precision meter incorporates such premium features as temperature compensation control and automatic-titrator connections. The large selection of Coleman electrodes further extends the Metrion II's range to include unusual samples, sample sizes and temperatures.

Designed for accuracy and reliability —as well as for economy—Metrion II has simple controls and trouble-free printed circuitry. Priced at $160 (including electrodes and buffers), it features:

- **Accuracy—0.05 pH**
- **Range—0-14 ph**
- **Temperature Compensation— 0-100°C**
- **Stabilized Operation— 110-130V AC**

Cat. No. S-65429.....$160.00

Send for Bulletin describing the complete line of Coleman Electrodes for all instruments.

We'll be glad to see you at our Booth #39 at the EASTERN ANALYTICAL SHOW!

STAPH and HEPATITIS

THAT "LURK" EVERYWHERE

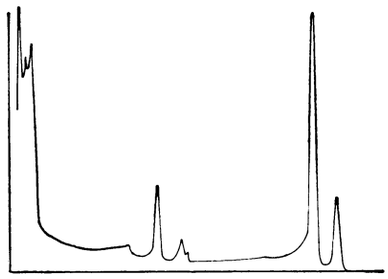

Control disease effectively with "no-lick" Time Tapes and Labels. Messy dressings, bacteria laden specimen collections, blood samples and sputum—all must be serviced by hand. Be safe! Be sure . . . one of the best ways to eliminate contact and stop infectious spreading is by using satin finish, vinyl coated Time Tapes or Labels. Labels will accept pen or pencil marking or may be pre-printed to your "customized" specifications.

Your request will bring complete details, samples and a demonstration. Write today!

IT'S AN OPEN... AND SHUT CASE!!!

Ohaus has the finest package of laboratory weights available today.

Polymer science has supplied Ohaus with a tough new thermo-plastic called Escon* polypropylene, which provides the beautiful but highly durable cases you see above. They will resist attack by most laboratory chemicals, end the shrinkage problem by picking up practically no moisture, withstand temperatures above 250°F and have high impact strength.

Our new Escon polypropylene cases have built-in "Living Hinges" which actually become stronger with use. Self-latching covers prevent accidental opening. Weights are arranged ramp-style at the same level for easy selection. Fractional weights come in individual covered compartments.

A wide selection of STO-A-WEIGH sets is available in both metric and avoirdupois standards, plus the new Class "P" stainless steel analytical shape.

School and industrial laboratories have depended on Ohaus for precision weighing products since 1907. Write today for our free 24-page illustrated catalog of balances and weights.

*Trademark of Enjay Chemical Company, a division of Humble Oil & Refining Company.

"when QUALITY is in the BALANCE"

OHAUS®

OHAUS SCALE CORPORATION

1052 COMMERCE AVENUE, UNION, NEW JERSEY; Dept. K.F.

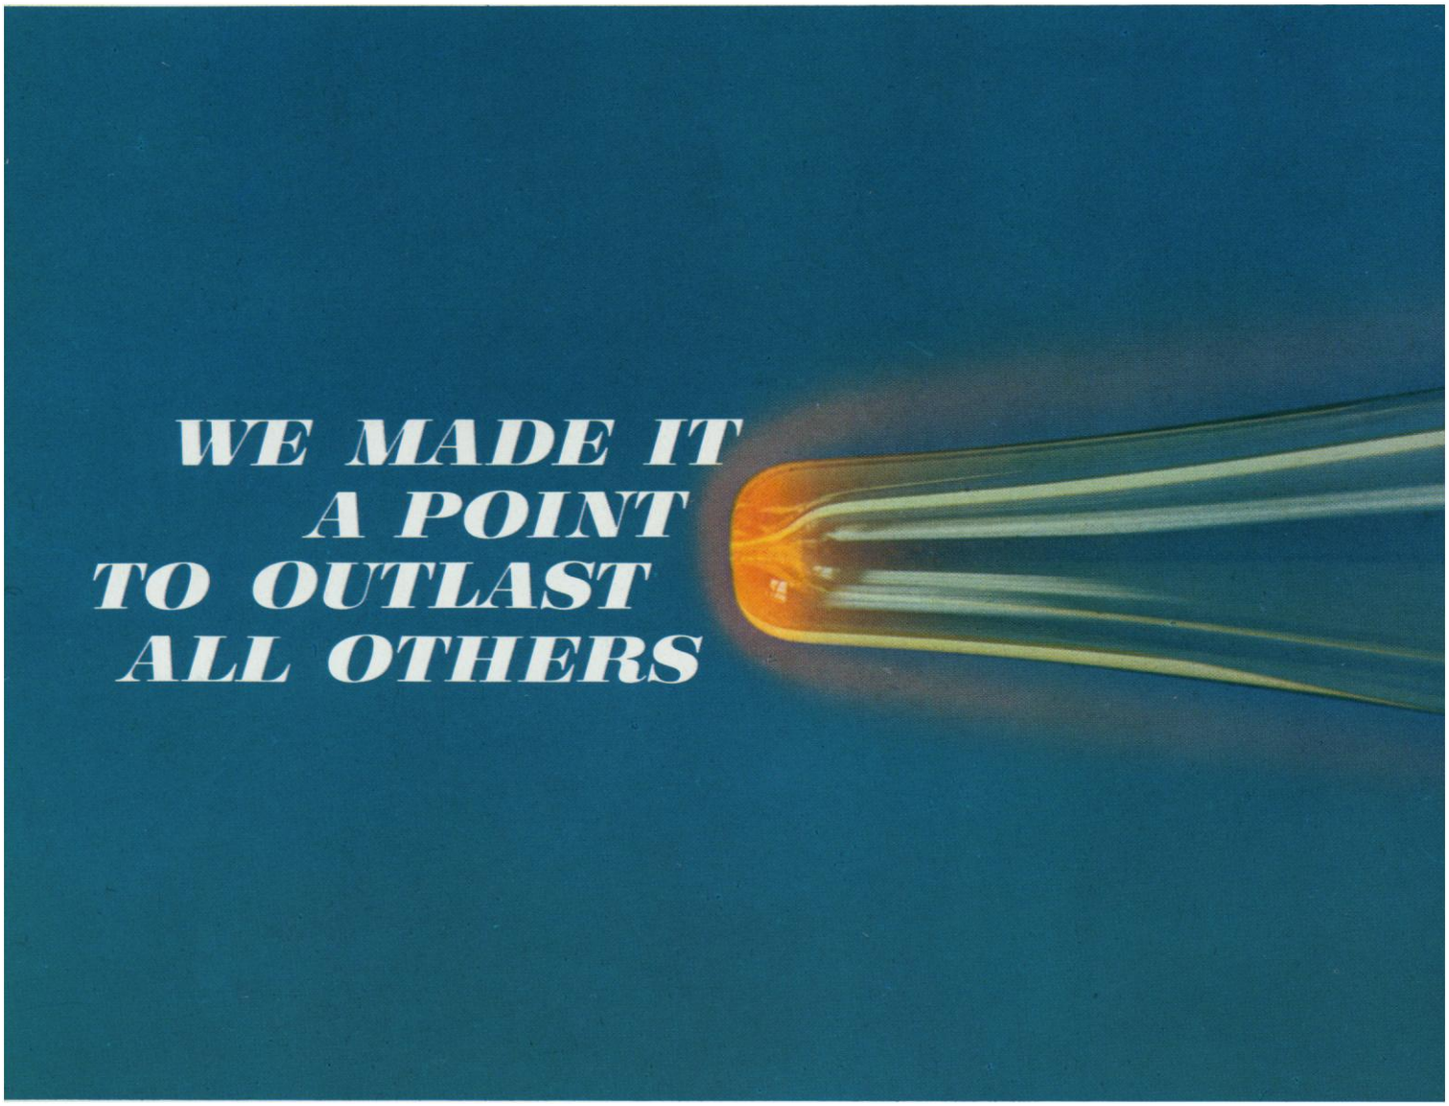

KIMAX® QUALITY FROM TOP TO TIP

Fire-Finished Top
Glazed to provide a smooth round edge for safe, comfortable use, precise delivery control, and rugged inherent strength.

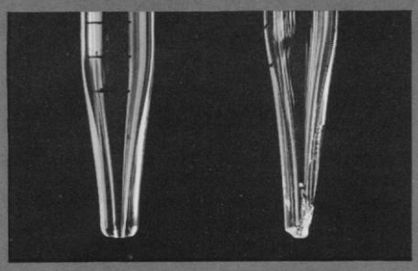

Color-Coding
Another Kimble innovation for rapid, positive identification. Color bands for size and style are fused on the surface to last the life of the pipet.

Stain-Fused Graduations
Permanent markings, without etching. Permits large bold numbers . . . no weakened surface or impurity-harboring crevices.

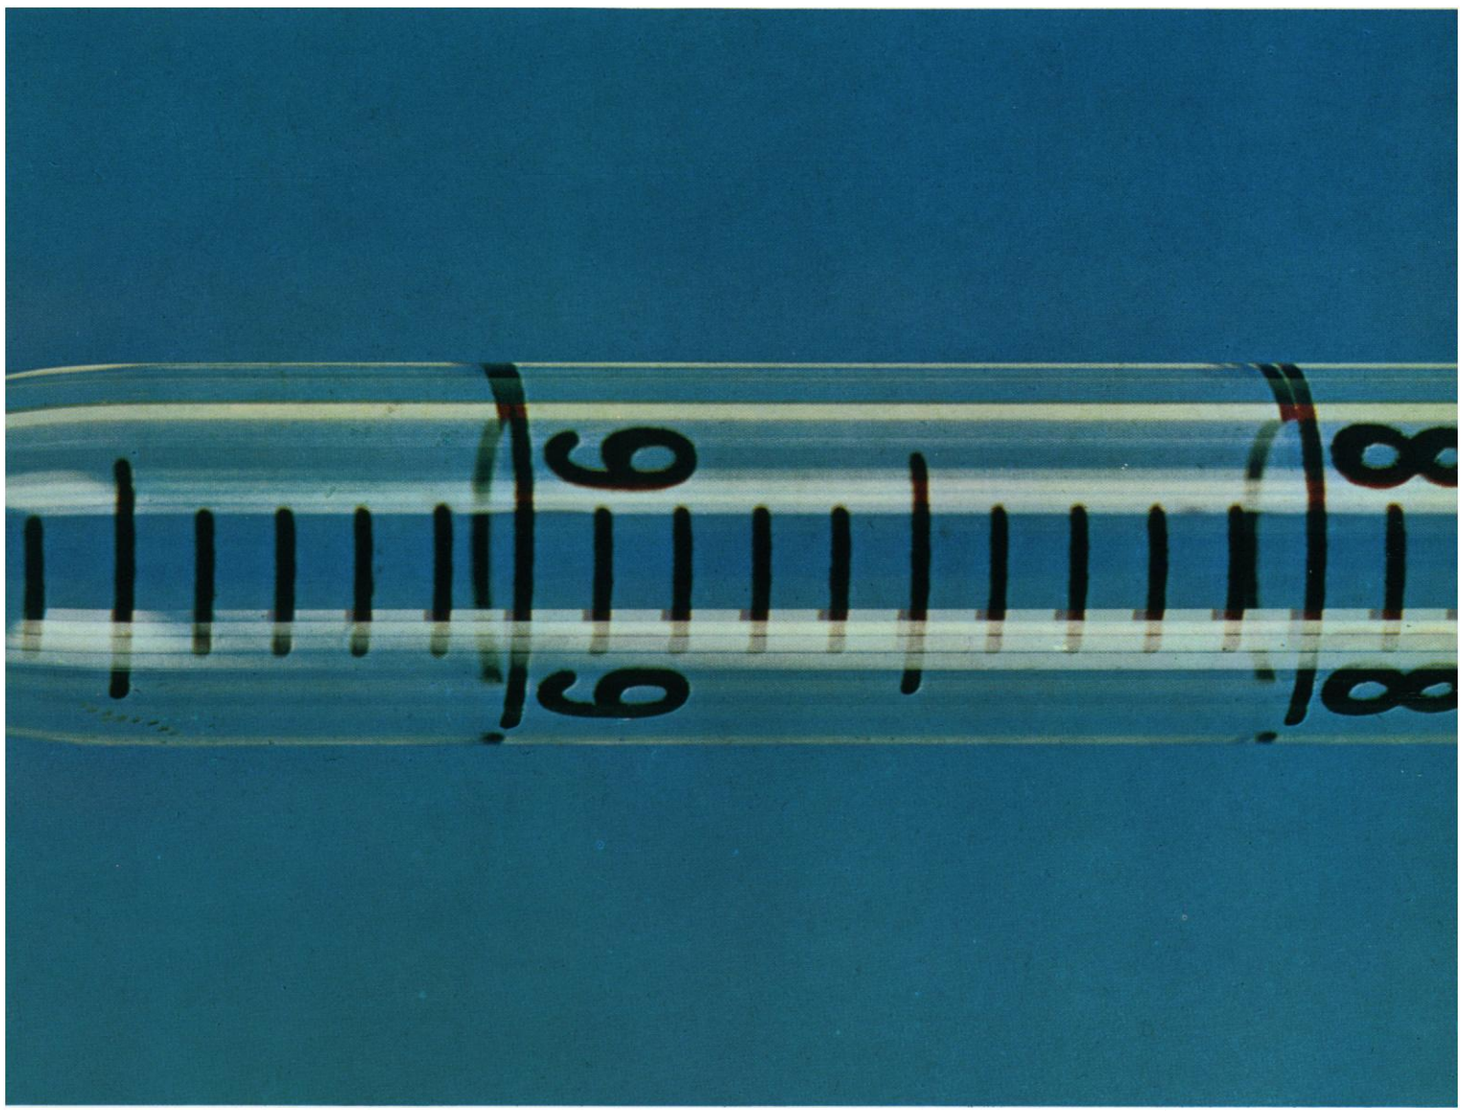

New SAFE-GARD® pipet with tempered tip for high impact strength

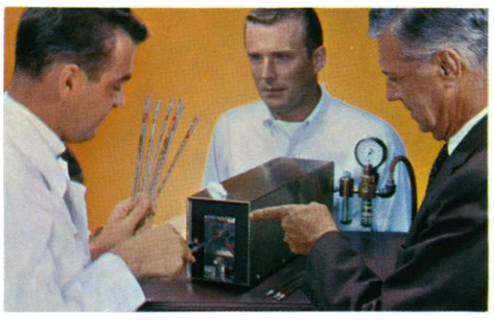

The problem: Many times, average pipets have to be discarded long before they shatter completely, because of chipped tips and marred and scarred surfaces. ■ The solution: A new Kimble serological pipet with a flame-polished *tempered tip.* This tempered tip stubbornly resists chipping and cracking while the rest of the pipet withstands the repeated abuse of washing, sterilizing, sorting and just plain using. This is the new SAFE-GARD pipet . . . *and it costs you no more.* ■ A special borosilicate glass—Kimax-51—provides SAFE-GARD pipets with their exceptional chemical durability and surface hardness. Their lab life has been substantially increased because of their resistance to clouding, to surface scratches and abrasion. ■ Additional strength characteristics in scientific products usually command premium prices. Kimble put designing improvements exactly where lab use dictates. You get this premium pipet at the same low price you pay for regular pipets.

DROP TESTS PROVE IT!

Time after time, in carefully controlled ascending drop test averages, the armored tip of this new SAFE-GARD pipet (shown at far left) outperformed pipets with regular ground tips ...survived falls from 80% to 200% higher onto a hard surface.

NEW AUTOMATIC PLUGGING MACHINE OFFERS SPEED, PRECISION

New from Kimble, this compact machine swiftly feeds, holds, cuts, and rams the cotton automatically. As fast as an operator can apply a pipet to the plugger, a precisely measured plug is mechanically inserted . . . at the rate of 40 or more per minute. Assures a ready supply of plugged pipets at all times. Eliminates the waste of costly technician's time.

EXPERIENCE and CRAFTSMANSHIP...
PUT QUALITY IN YOUR OHAUS BALANCE...

"when QUALITY is in the BALANCE"

OHAUS®

Years of experience have resulted in this superior OHAUS CENT-O-GRAM balance.

Capacities up to 311 grams are possible because of the inclusion of self-storing attachment weights.

Sensitive to .01 gram, this balance boasts built-in speed with its convenient rapid action balance arrest and recessed threaded zero adjustment.

Corrosion doesn't bother this balance either since stainless steel and epoxy enamel finishes are used throughout!

Tiered beams, relief etched graduations, spirit level, adjustable recessed leveling feet, true sliding type poise, and double hook for specific gravity determinations as shown above, are only a few of the features experience has taught us YOU DEMAND in a PRECISION LABORATORY INSTRUMENT.

To all this add the famous OHAUS self-aligning agate bearings and precision ground special steel knives and we are confident YOU WILL ALSO CHOOSE OHAUS . . .

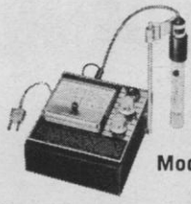

the LEADER who INVITES COMPARISON!

TISSUE CULTURE TUBE RACK WITH COVER

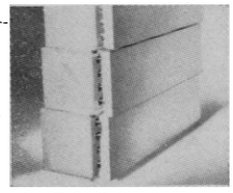

1. HANDLE AS A UNIT — TUBES CAN'T FALL OUT

- STAINLESS STEEL — STURDY CONSTRUCTION
- DESIGNED TO SAVE TIME IN:
  - — Washing
  - — Sterilization
  - — Filling
  - — Inspection

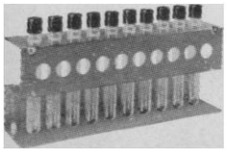

2. SEAL TUBES WITH BARRIER FILM—SNAP ON COVER.

Patented "Kahlenberg Spring" holds tubes securely, yet allows easy removal for inspection. / Handle the rack and tubes as a unit: dump contents; wash; cover with foil and sterilize — all without removing tubes. / After filling tubes with cell suspension, lay a nonporous baffle (like Saran Wrap) over them — snap on cover/ Holds 64 — 16mm. x 125mm. tubes; or built to your specifications.

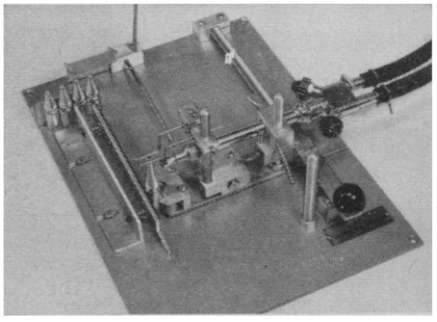

3. STACK RACKS WITH 5° AUTOMATIC TILT. SAVE STORAGE SPACE.

ALUMINUM 10-TUBE RACK

Lightweight yet sturdy. Holds 10 — 16mm. x 125mm. tubes. "Kahlenberg Spring." Perfect for packing, shipping, and handling tubes. Carried in stock — $2.50

KAHLENBERG-GLOBE AMPUL SEALER

•Automatic •Avoids Heat Damage •Low in Cost

BENCH MODEL 161: Simple, efficient, easy to operate. Perfect twisted or fused-tip seals, right from the start, for specimens, storage, control–production runs. Just place ampul in rollers — it's automatic from there on. Metal construction; exacting workmanship. Finest gas-oxygen burner. Base dimension only 9"x12". Carried in stock.—$140.00

3 TIME-SAVERS BY TROEMNER

1. Precision laboratory balance—Model 410—Sensitivity 2 mg. Capacity 120 g. No bands or wires to bend or lose "life." Handsome blue-gray heavy metal case. Weighs to full capacity with lid closed. **$165.**

2. Heavy-duty precision balances—Models 195-B and 2-89B—Capacities 3 or 6 kg. Sensitivity as fine as 100 mg. Locking tare weight. Beams graduated in mg., g., or oz. **From $95.**

3. Specific-gravity chain balance—Model S100—Ideally suited for S.G. determinations of liquids and solids to within 0.0001. Also operates as a sensitive chain analytical balance. **From $168.**

Write for complete information on these and the complete line of quality Troemner balances and weights.

STAGE

NEW! MALMSTADT-ENKE INSTRUMENTATION LAB...IDEAL FOR RESEARCH & EDUCATIONAL APPLICATIONS IN EVERY SCIENCE!

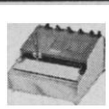

Specially developed to perform numerous tasks and experiments in both the physical and life sciences, this new highly accurate system was designed by the Heath Company in conjunction with Dr. H. V. Malmstadt of the University of Illinois and Dr. C. G. Enke of Princeton University. You'll find it the "long awaited" answer to securing a firm foundation in the principles, design and use of electronic instrumentation as well as a versatile lab station for daily use.

Included in this multi-purpose system are factory assembled and calibrated test equipment, special-design instruments, special experimental chassis and parts which feature "solderless" spring clip connectors, and the acclaimed Malmstadt-Enke text, "Electronics for Scientists".

All components may be purchased either as a complete lab station (at a special savings) or individually. Educational institutions qualify for an additional discount on the entire group as well as individual units. For a free 8-page brochure describing this system in detail, simply mail the coupon below.

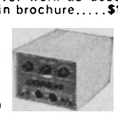

Servo-Pen Recorder
True potentiometric input; 5 adjustable ranges; plug-in connectors for special servo applications; pen lift; 10" chart; 1 second response.....**$195.00**

Operational Amplifier System
Performs many functions in measurement, computation and control work as described in brochure.....**$135.00**

Universal Regulated Lab Power Supply
Ideal for circuit design or teaching power supply design; provides many different types of power circuits...**$75.00**

Voltage Reference Source
Use for calibration, potentiometric measurements, or calibrated bucking voltages **$65.00**

HEATHKIT by Daystrom

FREE 8-PAGE BROCHURE!
Includes complete specifications, description, and prices of separate system components. Mail the coupon today!

HEATH COMPANY,
Benton Harbor 37, Michigan 49023

☐ Please send free brochure on the Malmstadt-Enke Instrumentation lab.

☐ Please send free copy of the new 100-page 1964 Heathkit Catalog.

THE COMPLETE PHYSIOLOGICAL RECORDING SYSTEM

TRANSDUCERS **RECORDERS** **ACCESSORIES**

E & M TRANSDUCERS FOR:

- respiration—rate, depth
- air flow
- impedance pneumography
- impedance plethysmography
- impedance rheography
- muscle pull—smooth, skeletal, cardiac
- gut motility
- pressure
- blood pressure—direct and indirect
- blood flow
- circulation times
- oxygen tension
- pulse—rate, contour, velocity
- electrocardiography
- heart rates
- heart sounds
- electroencephalography
- rheoencephalography
- glandular secretions
- galvanic skin response (GSR)—skin resistance, autonomic response
- temperature
- others

THE PHYSIOGRAPH

RECORDERS

Your choice of:

- One to six recording channels
- 12 fixed speed chart drive
- Continuously variable speed chart drive
- Rectilinear ink writing
- Curvilinear ink writing

OPERATIONAL SIMPLICITY of this precision equipment permits immediate use by personnel untrained in electronics

ACCESSORIES

PLUG IN MODULES and SPECIAL PRODUCTS

E & M manufactures a broad line of accessory products to provide a fully compatible recording system. Send for 32 page, fully-illustrated catalog, #105.

Instrumentation for Research and Education

CHARLESTON CHARCO RUBBER CO.

CHARCO

Presents

"DURA-SOL" PROCESS DRY-BOX GLOVES

A New Scientific Achievement By Charleston Rubber Company

EXTRA LONG LIFE AND POSITIVE PROTECTION

Under Unusually Severe Exposure Conditions

Gloves made by this exclusive Charco process, incorporating more than one polymer, are available in our Neo-Sol®, Buta-Sol® and Rad-Bar® type dry box gloves. "Dura-Sol" dry box gloves are remarkably resistant to damage from oxygen or ozone, offer improved resistance to abrasion or snag and are exceptionally flexible, even over a wide temperature range.

Write for "Dura-Sol" Process Data and Technical Reports

13" x 6" x 10". Wt.: 10 lbs. Supplied with protective carrying case and dust cover.

WHERE ELSE CAN YOU GET 1/10 OF 1% ACCURACY IN A PRECISION BALANCE FOR $468?

Only Roller-Smith has them: precision torsion-type micro and semimicro balances with a temperature-immune accuracy of 1/10 of 1% priced at $468 to $505. There are 8 models to choose from in the LH series, from 0-10 mg through 0 to 3000 mg. Also available; series LG balances (1/5 of 1% accuracy, priced as low as $290); surface tension balances; specific gravity balances; precision yarn balances; and custom-designed balances. FREE! Write for new 16-page full-line catalog.

Oxford University Press

Heredity and Development

By JOHN A. MOORE, Columbia University and Barnard College

Along with portions reprinted from Dr. Moore's distinguished text, *Principles of Zoology*, this book contains new chapters describing the latest developments in genetics and embryology. It is particularly valuable for use in the introductory biology course.

1963. 256 pp. 77 illus. paperbound $1.95

An Introduction to Human Physiology

By J. H. GREEN, University of London at the Middlesex Hospital Medical School

The basic concepts of human physiology are presented as a framework to which additional knowledge may be added by attendance at systematic lectures or through study of larger text books. Over 200 illustrations have been prepared especially for this book.

1963. 176 pp. $4.85 paper, $8.00 cloth

Garrod's Inborn Errors of Metabolism

By the late SIR ARCHIBALD GARROD, *with a Supplement by* HARRY HARRIS, King's College, University of London

The reprinted text of Garrod's classic is supplemented by a bibliography of the writings of Garrod and a reprint of key sections of his paper, "The Incidence of Alkaptonuria: A Study of Chemical Individuality." A new section, "The Inborn Errors Today," outlines the recent extensions of Garrod's original concepts.

1963. 220 pp. 16 illus. $9.75

Foundations of Thermodynamics

By PETER FONG, Utica College of Syracuse University

Departing from the approach used in conventional textbooks, Professor Fong expounds a new formulation that gives a physical insight to thermodynamics without the use of elaborate mathematics. Basic concepts are carefully defined, especially those which are pivotal in theory, such as the concept of reversible process.

HIGH RESOLVING POWER APPARATUS

New applications of the maser have substantially broadened the need for high resolving power apparatus. A comprehensive range of Hilger & Watts equipment now meets the increased requirements.

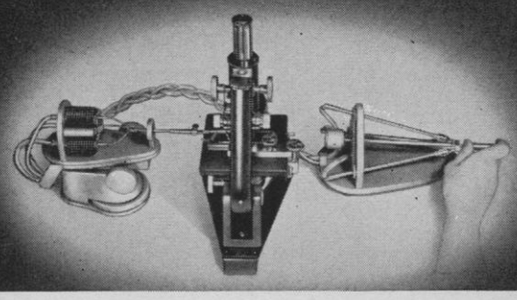

Etalon and interferometer plates are available with apertures from 20 mm. to 100 mm., and flatness to 1/200 wave length. Mounts for these plates, and spectrometers that accommodate etalons within the instrument, are standard stock items.

Other new developments include: motor driven F-P and Michelson interferometers with fringe counting and amplitude measuring; high reflectivity coatings available for all plates.

MICROMANIPULATOR "CAILLOUX"

Unmatched flexibility of movements in all directions in space are achieved by natural hand movements under magnifications of 100 X to 2000 X without adjustment. The "Cailloux" advanced design combines maximum speed, precise response and stability with unusual ease of operation. Back-lash, parasitic vibrations and lag are eliminated. Prolonged manipulations can be conducted without fatigue. Includes many additional exclusive features.

New Percival "Space Saver" **PLANT GROWTH LAB**

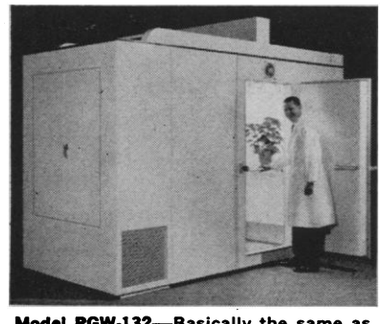

WITH REMOTE REFRIGERATION UNIT

Model PGW-108 — An advanced-design all-metal walk-in unit with 52" x 90" inside working area. Outside dimensions only 60" x 115". Coolant piped in from remote refrigeration. **Light intensities** from 200 to 5,000 ft. candles. **Temperatures** from 45° to 90° F. Any photo period desired. Low initial cost; low operating cost.

Model PGC-78—Compact, portable model with self-contained unit. Inside working area 30" x 52".

Model PGW-132—Basically the same as PGW-108 except refrigeration unit is self-contained.

Bonner St

the last time we saw Mr. LaPine he was in Köln

His destination—E. Leybold's Nachfolger, where a line of world-famous high vacuum pumps is being manufactured for distribution in the U. S. through LaPine Scientific Company.

As president of the LaPine Scientific Company, Mr. LaPine travels often to foreign lands, regularly visits American manufacturing plants, to examine and discuss at first hand the instruments, equipment and supplies you will find in LaPine catalogs and brochures.

And in the Chicago, New York and Berkeley, California offices and warehouses of the LaPine organization, a staff of equally dedicated men are also constantly on the lookout for the finest in scientific products to meet your needs.

LaPine is big—big enough to maintain its own specialty items manufacturing facilities, its own instrument testing and service department and an installation department ready at all times to install equipment in your laboratory or plant. Big enough to stock for your convenience a vast array of physics, chemistry and teaching apparatus in a wide choice of models and brands. Yet LaPine has never deviated from its basic concept of personal service to its customers.

For you, this means an always reliable source, whatever your requirements—an organization established in 1937 to bring to the scientific community, to schools and to industry, the most advanced, most sophisticated, yet most practical and economical equipment and supplies.

You are cordially invited to write for comprehensive catalogs or for detailed information on specific items.

LAPINE

producing microcircuits with kid gloves?

Our evaporators have been designed for today's production processes by people who use them. People who insist on reliability in the production of thin-film electronics . . . high selectivity anti-reflective mirrors for lasers . . . depositing gold and other rare metals on glass . . . or doing a myriad of other thin-film evaporations *in production.*

If *you* can choose the evaporator *you* need, you'll want to see the new Bendix-Balzers evaporators because . . .

- Electrodes, boats, coating materials, motor-driven rotaries, glow discharge, masking screens, and specimen holders are standard equipment.
- Accessories for thin-film thickness monitoring, electron beam evaporation, planetary drive, and servo-operated vacuum controlled coating are available.

There is another choice. You can buy a less expensive competitive model and build up the fixturing yourself. This will cost more and take time. But it won't do more. It won't do as much. Write for our catalog.

MODEL MIC

MODEL PH-BMIC

MODEL BU-13

INVERTED LABORATORY AND RESEARCH MODELS

Brightfield Laboratory Models:

MONOCULAR MODEL MIC. Four brightfield objectives 5X, 10X, 40X, 100X (oil); eyepieces 5X, 10X, 15X; ample height adjustment of condenser-illuminator for even large culture bottles; built-in base transformer. **$409.**

BINOCULAR MODEL BMIC. Binocular version of Model MIC, with camera mechanism. **$609.**

Brightfield Research Models:

MONOCULAR MODEL BR-MIC. Five brightfield objectives 5X, 10X, 20X, 40X, 100X (oil); eyepieces 5X, 10X, 15X; rack and pinion condenser mechanism with individual centering adjustments for condenser and illuminator; elevating compartment provides handy storage for accessories. **$545.**

BINOCULAR MODEL BR-BMIC. Binocular version of Model BR-MIC, with camera mechanism. **$745.**

Phase Research Models:

MONOCULAR MODEL PH-MIC. Eight phase objectives 10X, 20X, 40X, 100X (oil) in both bright and dark-medium contrast; eyepieces 5X, 10X, 15X; high intensity Koehler-type illuminator; five-choice intensity transformer; phase turret condenser with aperture for brightfield; elevating base. **$812.**

BINOCULAR MODEL PH-BMIC. Binocular version of Model PH-MIC plus built-in camera mechanism. **$1012.**

Prices include optics, cabinets, filters, special slides, petri dishes, and basic accessories. The built-in camera mechanism is standard with binocular models and available as an accessory for monoculars. Accommodates 35mm. camera back or Polaroid Land Camera Attachment. Both available at extra cost.

CAMERA-MICROSCOPES

The all-purpose microscope for visual examination, screen viewing and photomicrography. Built-in 3¼" X 4¼" camera with four flat field photo-eyepieces on revolving turret. Accessory attachments for 35mm., Polaroid, and movie cameras. Low-power (5X–40X) accessories available. Needs only 9" x 12" table space.

Brightfield Research Models:

MONOCULAR MODEL U-12. Same objectives and visual eyepieces as Model BR-MIC. **$1195.**

BINOCULAR MODEL BU-12. Binocular version of Model U-12. **$1379.**

Phase Research Models:

MONOCULAR MODEL U-13. Same phase objectives, turret condenser, and visual eyepieces as Model PH-MIC. **$1390.**

BINOCULAR MODEL BU-13. Binocular version of Model U-13. **$1580.**

Only UNITRON Inverted Microscopes Offer ALL These Advantages

accommodates slides, wet mounts, special glassware, warming chambers and micro-manipulators ● unobstructed stage for easy access ● built-in, correct intensity illumination ● glare-free coated optics ● special petri dishes for observation of cultures even by highest power oil immersion objective ● graduated mechanical stage ● accessory camera attachments ● long working distance 40X objective and other accessories also available

ASK FOR A FREE 10-DAY TRIAL. You be the judge in your own lab. Select the model you want. Then fill out and mail the coupon. Microscopes sent and returned at our expense. You assume no obligation. Or if you want more data on these and other UNITRON microscopes, use coupon to request our complete catalog.

HITACHI PERKIN-ELMER ULTRAVIOLET VISIBLE GRATING SPECTRO-PHOTOMETER

The Model 139 Grating Spectrophotometer, a compact, precise modern instrument, out performs similar spectrophotometers costing significantly more.

Check these features: High resolution grating Monochromator — gives exceptional radiation purity in transmittance / absorbance measurement from 205 to 800 millimicrons; Direct reading meter — presents measurements in both transmittance and absorbance quickly and accurately; Single wide-range phototube — covers the entire range from 205 to 800 millimicrons, eliminates need to change even at wavelength extremes; Dual Hydrogen/Tungsten lamp source assembly — has high energy output, gives instant switching from one source to the other; Direct line-operated power supply — is stable, fully transistorized, eliminating batteries and drift problems; Low cost — brings the advantages of modern instrumentation to any laboratory with unmatched economy and superior performance.

The five basic functional units, in combination, provide the analyst with a fully integrated instrument for the rapid and precise analysis of any sample by absorption measurement.

MIKROS EM-20

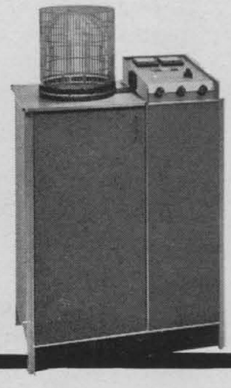

FOR TRAINING, PRELIMINARY INVESTIGATION, PRODUCTION RESEARCH

Probably the easiest to use, easiest to operate, easiest to maintain electron microscope on the market. Completely self-contained—no cooling water required—operates on conventional 117 volt, single phase, 15 ampere, 60 cps power. Compact, built-in, air-insulated high voltage power supply. Pressure-programmed, pushbutton-activated, automatic-valving system. Automatic built-in camera. Interchangeable lens system. American designed and manufactured — specifically engineered to implement the operating and maintenance advantages inherent in electrostatic electron optics. Send for descriptive literature.

RESOLVING POWER. Better than 35 Angstrom Units.

MAGNIFICATION — Continuously adjustable from 1000X to 20,000 X on the camera plate, from 500X to 10,000X on the viewing screen. Binocular magnification available.

ACCELERATING VOLTAGE — 10 to 40 KV, continuously variable. Useful for low voltage, high contrast work.

Model VE-10 Vacuum Evaporator

The vacuum evaporator that "thinks for itself" with fast, error-free automatic valving. 3-minute pumpdown to 1×10^{-4} Torr—operates in the 10^{-6} Torr range. Air-cooled diffusion pump. No air or water required. Price still $2,500, complete. Delivery 15 days.

$14,275 complete,

f.o.b. Portland, Oregon. Includes Automatic built-in camera for 2" x 10" cassettes or 35 mm roll film, binocular focusing microscope, warranty, installation and checkout by factory engineer. Availability 45 days.

Sephadex® Beads NEW

EXTEND THE USEFULNESS OF GEL FILTRATION IN ANALYTICAL AND PREPARATIVE OPERATIONS

Effluent delivery rates increased full order of magnitude

Improvements in the production of SEPHADEX now permit this useful cross-linked dextran material to be supplied in the form of spherical beads. Substitution of the new beads for the irregularly shaped particles in which SEPHADEX was heretofore available (see Figure 1) results in far more uniform hydrodynamic conditions within SEPHADEX columns. Tangible results? *Flow rates are greatly improved with remaining good resolution.*

One of the most significant results of the introduction of the new beads is the extension of SEPHADEX gel filtration to production-scale preparative operations. As can be calculated from the lowest curve in Figure 2, a 10 cm. diameter column of coarse grade SEPHADEX G-25 under a head of 60 cm. of water *can deliver almost 19 liters/hour of effluent.*

We strongly suggest that laboratory workers acquaint their colleagues in semiworks and production engineering with the new beads of SEPHADEX. The use of the spherical particles could open entirely new avenues in unit operations.

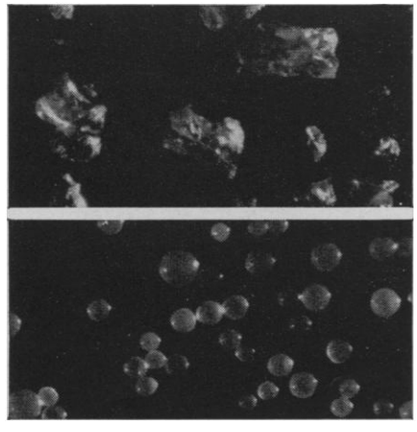

Figure 1. SEPHADEX was formerly supplied in the form of irregularly shaped particles as shown in top photograph. Now available in spherical beads as shown below, SEPHADEX facilitates packing of columns and greatly increases speed of operations.

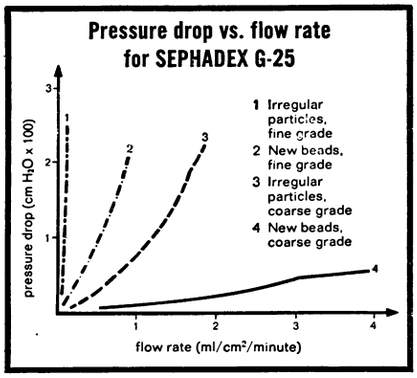

Figure 2. The curves above depict pressure-drop/flow-rate functions for columns using a 50 cm bed of SEPHADEX G-25. For given hydrostatic heads, note that the new spherical beads give up to tenfold greater effluent deliveries. Analytical procedures are hastened and preparative operations are put within economically practical engineering ranges.

Available forms of new SEPHADEX beads

SEPHADEX Type	Exclusion Limit (MW)	Grade	Size (microns)	Bed Volume ml/g
*G-25	5,000	coarse fine	100-300 20-80	5
G-50	10,000	coarse fine	100-300 20-80	10
*G-75	50,000	one grade	40-120	12-15
G-100	100,000	one grade	40-120	15-20
G-200	200,000	one grade	40-120	30-40

*SEPHADEX G-25 (fine) and G-75 will not be available before October, 1963.

CAVITY CELLS. Uniquely machined from a single crystal. No leakage or evaporation. Price $25.00.

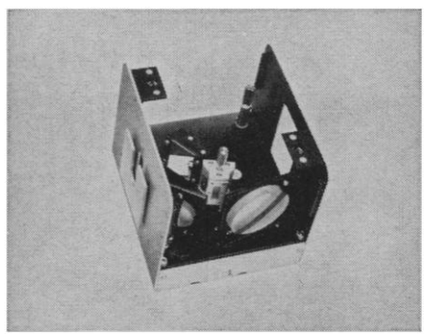

FIXED THICKNESS CELLS. Ruggedly constructed. Can be disassembled in the lab for easy cleaning. Price $55.00.

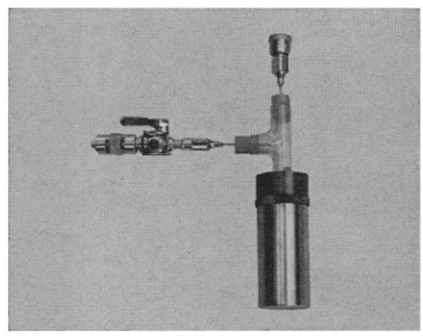

WEDGE CAVITY CELL. A variable space device for compensation studies. Price: $125.00 with holder.

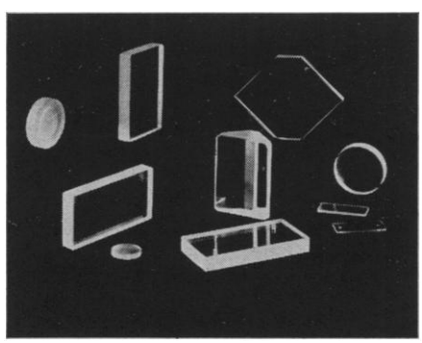

VARIABLE TEMPERATURE CHAMBER. Controlled infrared studies at temperatures from −35°C to +125°C.

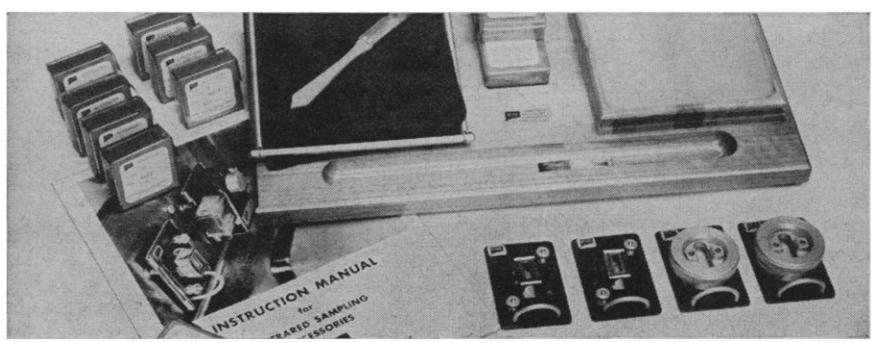

MICRO-ATR ACCESSORY. For obtaining absorption-type spectra of floor tile, surface coatings, plastics and the like.

FRACTION COLLECTOR. Traps chromatographic fractions directly into ultra-micro cavity cells for IR analysis.

CRYSTALS. Your entire supply of polished or unpolished crystals — from one source.

SK-2 STARTER KIT. Comprised of a salt-polishing kit and the most commonly used combination of accessories — offered as a "package" at considerable savings.

Now! Order your Infrared Accessories direct from Barnes Engineering Company!

New assurance of quality at money-saving prices, with fast delivery.

Here's news for the infrared spectroscopist. Barnes Engineering Company now makes and markets the products offered formerly by Connecticut Instrument Company—CIC. The same engineering talents previously available to you are now integrated, implemented and augmented by the parent company.

This will give you the full advantages of Barnes' corporate knowledge of infrared, more rigid quality control, and an increasing number of new, superior and low-priced products by a company specializing in infrared.

Expect announcements of new products designed to make jobs less time-consuming—and more exciting—in the handling of solids, gases, liquids. *Ask to be placed on our mailing list.* And—if you haven't tried any of the products shown above, we suggest that you do so. We invite your inquiries. How can we serve you?

New Torsion 1,000 gram balance speeds laboratory work

Only Torbal 1/10 gram PL-1 offers all these features

- *Fast, accurate readings optically projected to 1/10 gram*
- *No-knife edge construction eliminates friction and wear*
- *Greater taring range*
- *Remains unaffected by out-of-level conditions*
- *Oil dampened to speed weighings*

Price only $525.

To give you more convenient, accurate readings, Torsion has designed the PL-1 with a fine-reading vernier to 1/10 gram and a capacity of 1 kilogram. The balance has an optical range of −10 grams to +110 grams.

The heart of the mechanism in the new PL-1 is the Torsion no-knife edge construction. This eliminates friction and wear, insures lifetime accuracy and speeds weighing. The balance will operate accurately even in severely corrosive or dust-laden atmospheres.

Taring through a 125 gram range is accomplished with a built-in knob on the side of the balance. By using the second pan the balance can be made to tare up to 325 grams. Torsion's optical projection Model PL-1 offers a sharp image with a high degree of illumination for easy reading and an oil damper to speed up weighing.

NIKON model 6 OPTICAL COMPARATOR

for fast, accurate evaluation of ultracentrifuge photo plates

A major pharmaceutical manufacturer recently investigated the use of a Nikon 6 Optical Comparator for measuring and analyzing ultracentrifuge photo plates. The performance was so impressive, the unit was immediately purchased and added to the company's instrumentation facilities. The news travelled.

Within less than a month, a Nikon 6 Comparator was acquired by a large hospital, and shortly thereafter, by several other hospitals and by a food research laboratory. The Comparator, in each instance, demonstrated a marked superiority over equipment previously used—greater speed and convenience, and greater accuracy.

The Nikon 6 Optical Comparator is essentially a macro projector with a magnification range from 10x to 100x—extendable to 500x. Any object, thing, substance, specimen, photo plate or slide placed upon the stage, appears on its 12" screen as a sharp, bright, magnified image, which can be observed by many people simultaneously —studied, evaluated and precisely measured. And all of this can be done comfortably in a normally lit room. The Model 6 Comparator is provided with surface as well as sub-stage illumination.

New laboratory applications for the Nikon 6 Comparator are being constantly reported. In addition to the analysis of ultracentrifuge data, its use has been extended to many phases of chromatography, evaluating fringe patterns and reading electrophoresis photo plates and cells.

You may have an inspection or measurement problem which lends itself to the unique capabilities of the Nikon 6 Optical Comparator. Why not tell us about it. Write to Dept. S-11.

NUMBER 6 IN A SERIES

How can Electron Paramagnetic Resonance (EPR) provide a chemist with information about free radical reaction mechanisms?

First, he can detect transient free radicals in the course of a reaction. He can then identify the free radical by obtaining information concerning the molecular environment of the unpaired electron. In addition, he can make a quantitative measurement of the free radical concentration; and finally, measure this concentration as a function of time.

EPR IN THE WORLD OF CHEMISTRY

QUANTITATIVE MEASUREMENT OF FREE RADICALS

Numbers 1 through 5 of this series illustrated the effectiveness of EPR in detecting and identifying free radical intermediates in dynamic reactions. This example, No. 6, will illustrate an equally important aspect of EPR—quantitative measurements of free radical concentrations.

FIG. 1 NITROSYL DISULFONATE

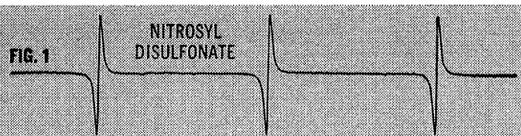

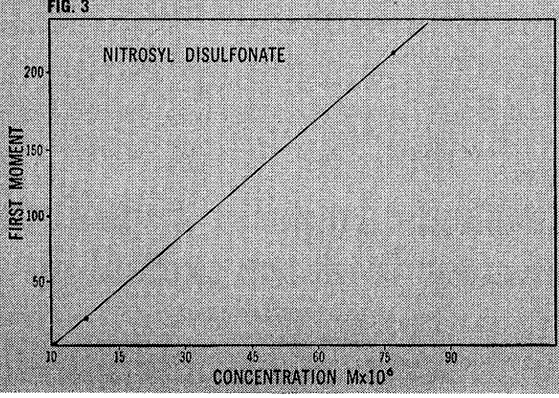

FIG. 2 CONCENTRATION OF NITROSYL DISULFONATE

Method of Determination	Sample #1	Sample #2	Sample #3
Weighing Pure Material	10^{-1}	5.0×10^{-2}	10^{-2}
Optical Absorption	7.8×10^{-2}	3.9×10^{-2}	7.7×10^{-3}
Iodometric Titration	7.3×10^{-2}	3.8×10^{-2}	7.6×10^{-3}

FIG. 3

The ability of EPR to measure free radical concentrations is inherent in the resonance phenomenon since the intensity of the absorption is directly proportional to the number of free radicals contributing to the absorption. Since most research EPR Spectrometers present the first derivative of the absorption, the intensity of the absorption must be determined by a double integration ($\int\int f(x)\,dx^2$) of the first derivative or by a first moment determination

$$\left(\int_{-\infty}^{+\infty} xf(x)\,dx\right).$$

Absolute concentration measurements of unknowns can be made by comparison of the intensity of a known free radical solution with the intensity of the unknown.

This example illustrates one common standard that is used for determination of aqueous solutions of free radicals. The potassium salt of nitrosyl disulfonate when dissolved in water at pH 8.0 yields a characteristic three line EPR spectrum as shown in Fig. 1. The concentration is verified in two ways; optically from the known extinction coefficient ($E_{545}=20.8$) and by an iodometric titration. Figure 2 tabulates the results of the standardizations while Figure 3 is a comparison of the first moment of the EPR signals to the known concentrations.

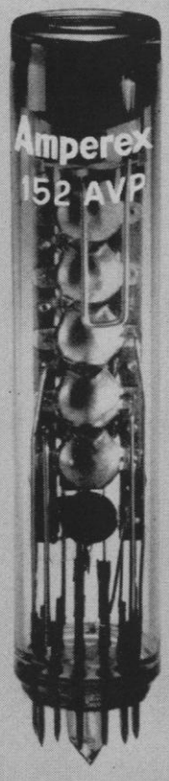

Detection, identification, and quantitative measurement of free radicals are not the only results obtainable from EPR spectra. It is also possible to measure the rate of free radical formation for studies of complete reaction kinetics.

Varian EPR Spectrometer systems and accessories are designed for a wide range of applications in the fields of chemistry, biology, medicine, and physics.

For additional information about the example above or other examples in this series, please write: Instrument Division. In Europe: Varian A. G., Zug, Switzerland.

Here's a small photomultiplier you'll NOT have trouble with!

...it's the ruggedized, 10-stage, 14 mm cathode Amperex Type 152AVP ...new in concept...new in design...new from the ground up

Knowing that small photomultipliers utilizing big tube construction are inherently trouble-prone, Amperex developed its new 152AVP from the ground up. The new concept: a revolutionary geometry of hemispherical dynodes mounted between rugged ceramic bars and supported by rigid leads. The all-important end result is a small tube offering truly exceptional ruggedness, efficiency and reliability for geophysical and missile applications where these qualities are mandatory. In addition, the small size of the 152AVP (19 mm at its broadest diameter and only 4" long) suits it perfectly for tight fit applications such as medical probes, bore-hole logging, microscope light transmission measurement, narrow-light-beam investigations, and high density punched tape or punched card readout. The 152AVP's photo cathode is Caeseum-Antimony. Its spectral response is mainly in the visible region peaking at 4200° and its sensitivity is approximately 40 μA per Lumen. The total gain of the new type 152AVP, at an overall voltage of 1800V is 5×10^6 and its dark current is less than 0.1 μA at an anode sensitivity of 300 μA per Lumen. For data and descriptive literature, write: Amperex Electronic Corporation, Nuclear Products Department, Hicksville, Long Island, New York.
In Canada: Philips Electron Devices, Ltd., 116 Vanderhoof Avenue, Toronto 17, Ontario.

PICOGRAM ?

Each of the peaks in this chromatogram represents less than 10 picograms (10 x 10^{-12} grams) of the identified pesticides, too little to weigh even on the most sensitive lab balance. Yet the F & M Series 810 Gas Chromatograph "saw" them with ease. Nor is this an exceptional case: with its multiple detector options, the Series 810 has a high sensitivity to an almost endless list of compounds. ▪ Its pulsed voltage electron capture detector is accurately sensitive to *picogram* quantities of halogenated compounds, organo-metallics and polycyclic hydrocarbons. ▪ Its dual flame ionization detector readily analyzes most organic and biological compounds to *nanogram* quantities. ▪ The long established dual thermal conductivity detector picks up almost any organic or inorganic substance, often at the *microgram* level. ▪ The new micro cross-section detector gives a calculable quantitative response to any material in the carrier gas. ▪ In addition, dual column operation of the Series 810 extends its ability to detect trace elements even in the face of column substrate bleeding at high temperatures. And its compatible electrometer, which has a full-scale sensitivity of 1.0 x 10^{-12} amps, greatly improves high-sensitivity operation. ▪ Write for full details. ADVANCES IN ELECTRON MICROSCOPY

This is an objective lens pole piece for the Hitachi Perkin-Elmer HU-11A Electron Microscope. It represents the culmination of one half million scientist and engineer hours of research and development. It is one element in the remarkable imaging system of the HU-11A. The electron optics of this instrument are unmatched in performance and versatility. Introduced one year ago, the enormous potential of the HU-11A as a fundamental research tool is now being realized in nearly 100 laboratories throughout the world. Its guaranteed resolution is 7A.

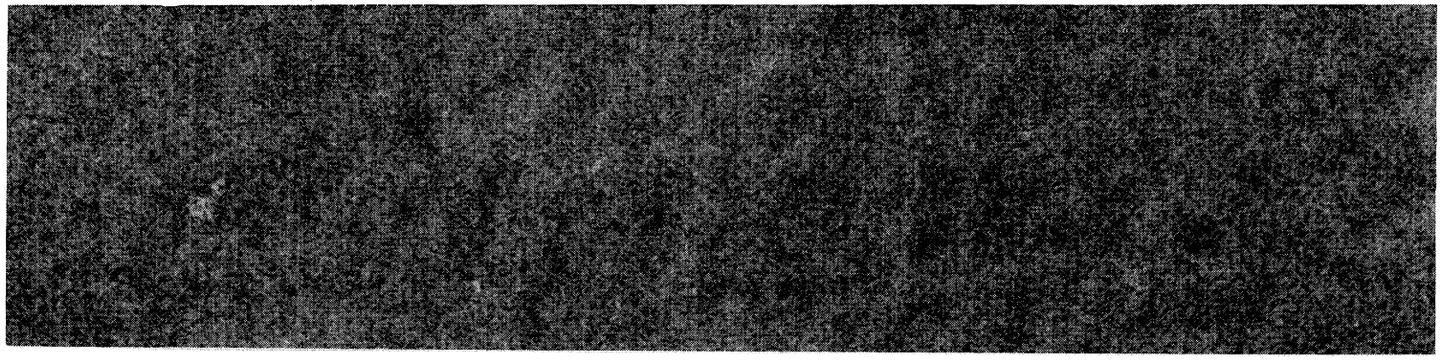

The background electron micrograph on this page shows the (111) orientation of single crystal gold. The spacing of the vertical lines is 2.35A. It was taken by the tilted illumination method. The total magnification is 6,700,000. This extraordinary micrograph was obtained with a standard Model HU-11A by an expert electron microscopist under controlled conditions at the Hitachi Central Research Laboratory in Kokubunji, Japan. It is by far the highest resolving power demonstrated to this time by any electron microscope.

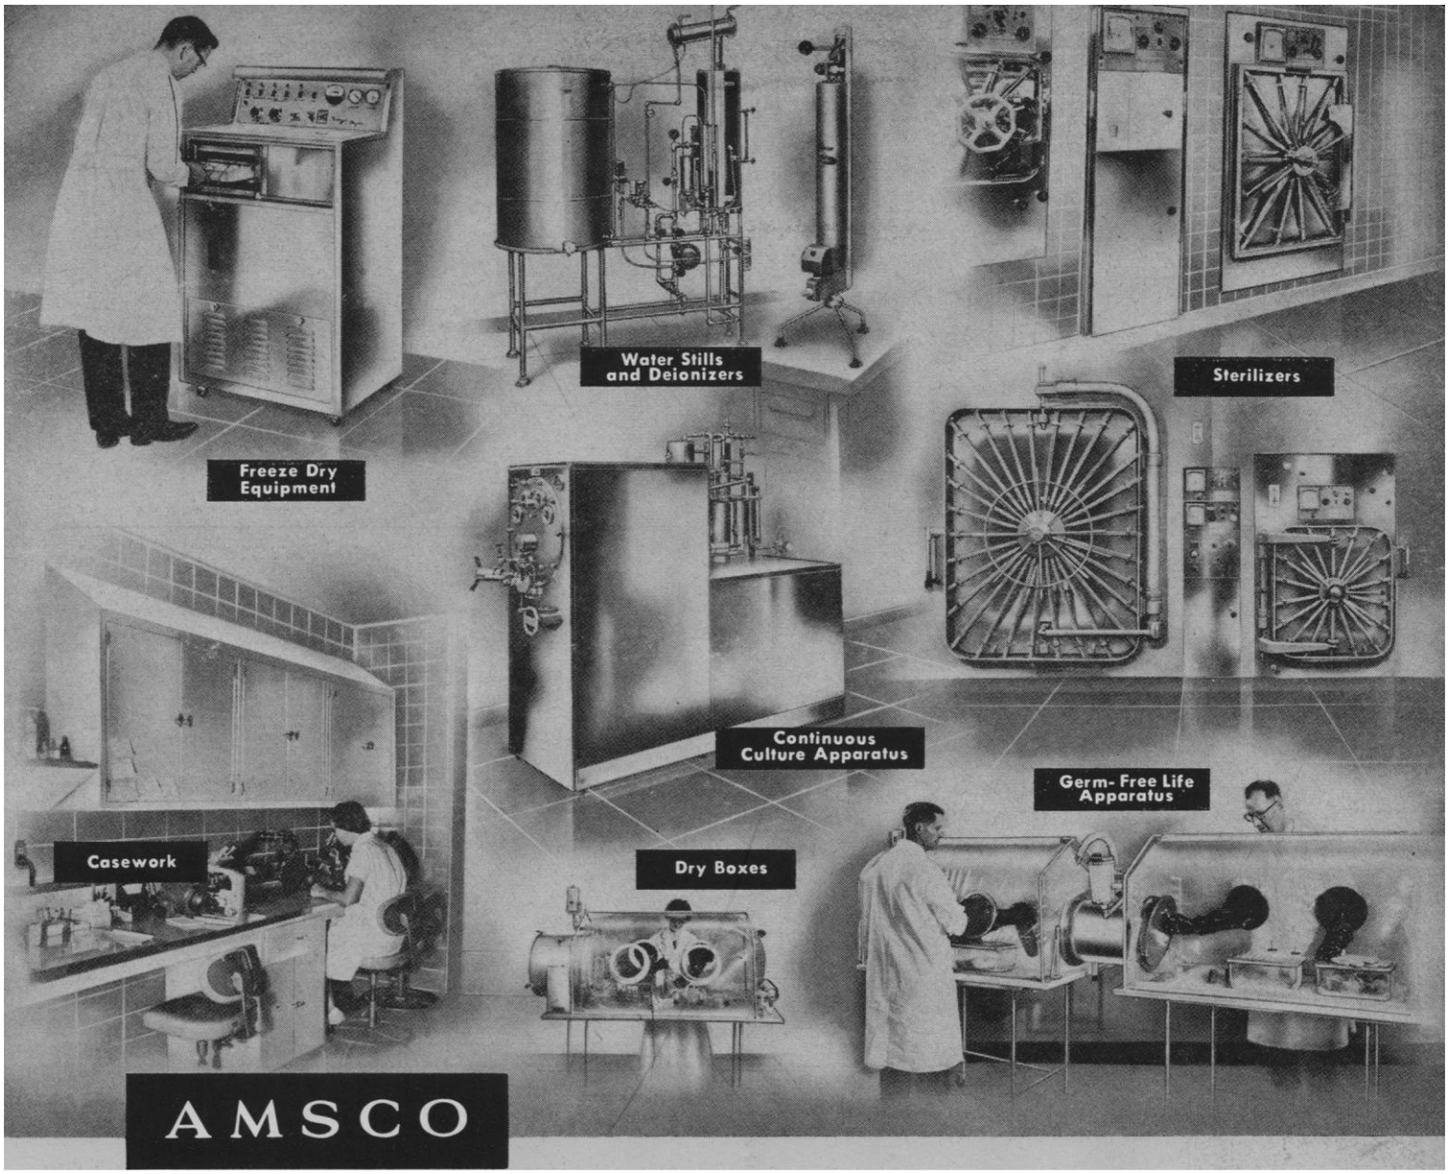

Perkin-Elmer, as exclusive U.S. distributor, is proud to be associated with this milestone achievement in Electron Microscopy.

A print of this electron micrograph and complete information on the HU-11A can be obtained by writing to: The Perkin-Elmer Corporation, Distributor Products Department, 910 Main Avenue, Norwalk, Connecticut.

Microbiological Equipment

An ever increasing number of universities, pharmaceutical and industrial plants depend upon Amsco for quality microbiological research and process equipment . . . and for sound reason.

Amsco is geared to research, design and manufacture virtually *any* technical equipment and systems ranging from sterilizers to water stills . . . to flexible film expansion chambers for sterilization of interplanetary craft components . . . to a full line of freeze drying apparatus.

For example, on special contract Amsco recently designed and produced what is believed to be the world's largest bulk sterilizing system . . . a 30′ long x 7′ wide x 9′ high giant, utilizing pure ethylene oxide at 100% concentration as the sterilant.

Let us share *your* confidential equipment and process problems. We welcome the challenge, for the resolution of microbiological problems has become our way of life. Of course, Amsco's varied line of standard equipment, as illustrated, is a ready source for precision-made apparatus.

Please write for literature of interest to you. If you have special needs, a letter to our Scientific and Industrial Department may lead to their economical resolution.

STERILIZERS

Pressure Steam, Ethylene Oxide and Combination Gas-Steam Systems. Chambers 16″ x 16″ x 24″ to 80″ x 108″ x 360″ and larger. **SC-318.**

FREEZE DRY EQUIPMENT

Models for laboratory, pilot plant and production. Amsco Freeze Dryers feature precision control throughout the cycle. **IC-611.**

WATER STILLS and Deionizers

Still capacities from 1 to 150 gal./hr. Steam or Electric heat. Automatic or Manual Controls. **IC-601.**
Deionizers . . . From 2 to 300 gal./hr. **MC-595.**

CONTINUOUS CULTURE APPARATUS

"Biogen" Continuous Culture Apparatus produces microbial cells and/or their byproducts on a continuous or batch basis with precise control of growth conditions. **IC-605.**

DRY BOXES

Flexible film chamber type. Economical, efficient and easy to use. For laboratory and production use. **IC-607.**

GERM-FREE LIFE APPARATUS

Flexible Film Isolators for sterile delivery, rearing and transfer of germ-free animals. **IC-600.**

CASEWORK

Complete casework needs. Planning, installing and maintenance. Base, wall, storage cabinets. Counters, work tables, carts. **MC-503.**

DIVISION OF AMERICAN STERILIZER COMPANY

Designers and developers of systems and equipment for Life Science and Industrial Technology

See the NEW B/A Flame Photometer

The new Baird Flame Photometer has an exclusive design which permits the *combined* versatility of either clinical or research analysis of Na and K. The Model KY-2 combines direct readout in the clinical range and a null-balance mode for research studies.

Improved electronic circuitry provides more stable operation. A new d.c. power supply increases efficiency and prolongs the useful life of the photomultiplier detectors. The KY-2 is easy to standardize, simple to operate. Determine Na and K from a single sample — thus save time, cut glassware costs, eliminate tedious handling.

- Direct meter readout in milliequivalents per liter for routine clinical analysis.
- Null-indicating mode for research studies of Na and K in a wide range of concentrations.
- Double beam principle — lithium internal standard.
- Simultaneous single sample determinations.
- Reproducibility: 0.5%.
- Choice of atomizer — gravity-feed or new aspirator type.

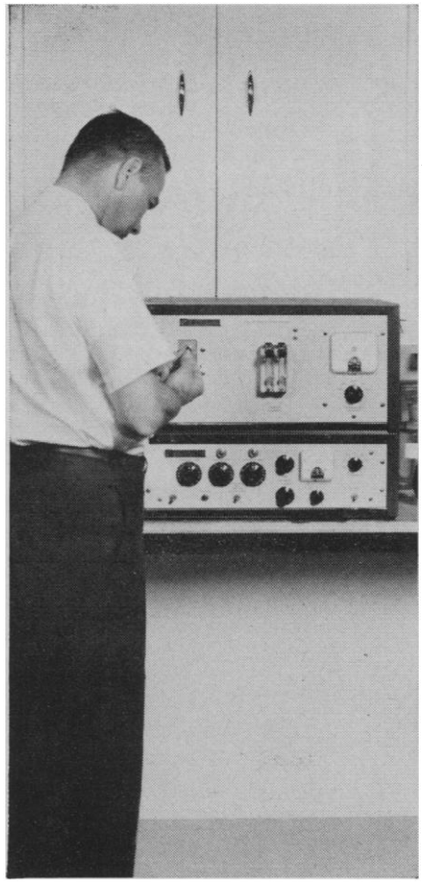

Price $985. Write today for new brochure.

Require practical programming and high temperature operation?

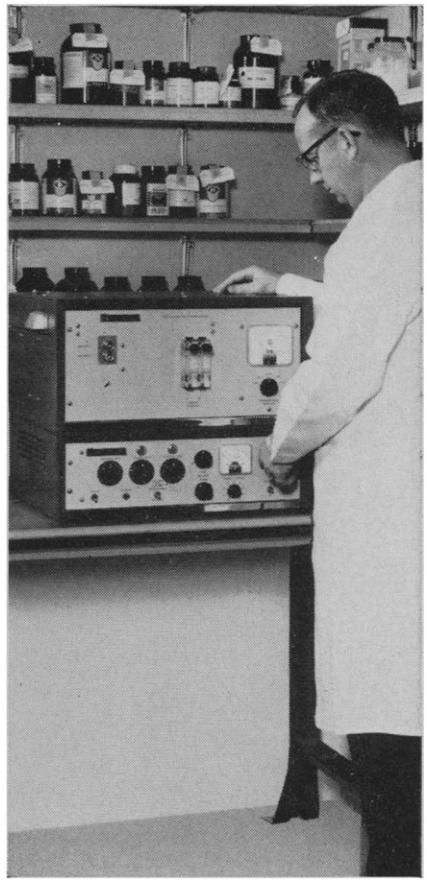

Dual columns minimize baseline drift.

Need quantitative response to all compounds?

Four-wire tungsten filament detector does the job.

Want to perform two quick "screening" runs without shut-down time?

Use either column for analysis.

☐ **RSCo's MODEL 60-31 DUAL COLUMN GAS CHROMATOGRAPH** is designed to give you low-cost, high-performance operation. It's a rugged benchtop unit with plenty of versatility, especially when used with our Multilinear Temperature Programmer accessory. The dual column operation minimizes baseline drift and either column may be used for analysis without shutting down to change columns. Additional applications versatility is provided by the Model 60-31's preparative capability and precise temperature control to 500°C. ☐ Our 60 Series of Compact Gas Chromatographs also includes the new Model 62, with single or dual flame ionization detector operation at an amazingly low cost. And for continuing research in a variety of applications, our 600 Series Modular Gas Chromatograph offers unlimited capability for adapting to new techniques as soon as they are developed. ☐ We'll be glad to send you further details. Just write or give us a call.

Model 566R five-inch oscilloscope with optional oscilloscope camera

Model 241 coincidence unit

Model 242 two-parameter unit

This photograph illustrates the system's mega-channel capabilities. It shows a 1024 x 1024 display of a mixed Na^{22}-Co^{60} spectrum with one Na^{22} and two Co^{60} photo-peaks (lower left and upper right quarters) and miscellaneous Compton & backscatter peaks.

A Photographic Two-Parameter Pulse Analyzer System . . . $9,320

(slightly higher overseas)

For monitoring multi-parameter nuclear experiments
For use with on-line stored-program computers
For use with multi-parameter pulse analyzers
For rapid amplitude-correlation of any two time-related events

For laboratories with a modest budget and a need for a two-parameter pulse analyzer, TMC offers the photographic system illustrated above.

This economical system — providing up to 1,048,576-channel resolution (1024 x 1024) — includes only those components required for point-by-point photographic rendition of the spectrum. However, its modular construction is such that additional elements can be added later to make a complete 1024-, 4096- or 16384-channel core memory, multi-parameter system.

Operating details of the components

The Model 242 two-parameter input unit is the basic component in the system. It contains two interchangeable, plug-in ADC's, two 10-bit address registers, and two digital-to-analog converters. The unit is compatible with many stored program computers and with all TMC multi-parameter analyzer equipment.

The Model 241 coincidence unit accepts two low-level detector signals and produces a coincidence gating pulse that alerts the two ADC's. After a small delay (approx. 2 μsec.) the two input pulses enter the ADC's for processing.

The Model 566R Tektronix oscilloscope can be equipped with any five-inch oscilloscope camera for photographing the spectrum display. The live mega-channel display, when integrated by the film, will result in a photograph similar to that shown above. This system, less camera, is priced at $9,320 f.o.b. North Haven (slightly higher overseas).

For detailed specifications on this product or the modules which can be added to it, contact your nearest TMC office, or write Technical Measurement Corporation, 441 Washington Avenue, North Haven, Connecticut. Tel. 203 239-2501.

Multi-parameter Analysis

16,384-channel system with modular assembly permits adaptation of this system to varied requirements including simultaneous analysis of two sets of input pulses. Plug-in input units are provided for selection of Pulse Height or Time-of-flight analysis in either of two parameters. Data are displayed on a CRT in "map", "isometric", or "slice" modes. Data may be stored in many sub-groups, either manually or by external routing signals.

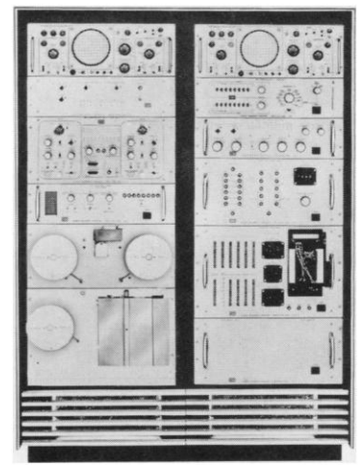

Basic Components: 2-parameter Input Unit with logic plug-ins for PHA or TOF; Coincidence Detection Unit; Memory Control Unit; 16,384-channel ferrite core Memory; Display Control; Automatic Programmer; Readout Equipment.

Multi-parameter Analysis

4096-channel system with modular construction includes the two-input unit with logic plug-ins for 2-parameter coincidence or singles studies — Pulse Height Analysis, Time-of-flight or both. Digital baseline and range switching permits up to 256X magnification of a selected area of the spectrum. For example, the experimenter can select various 4096-channel address configurations from a 1024 x 1024 (mega-channel) spectrum.

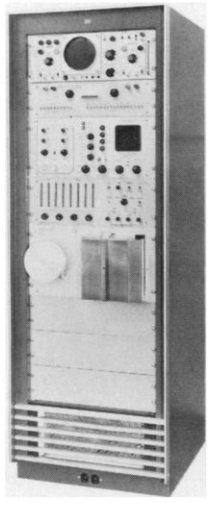

Basic Components: 2-parameter Input Unit with PHA or TOF plug-ins; Memory Control Unit; 4096-channel Memory; Coincidence Unit; Format Selector; Display Control; Automatic Programmer; Readout Equipment.

Multi-purpose Pulse Analysis

Model CN-1024, 1024-channel pulse analyzer provides a choice of interchangeable plug-in logic units for rapid conversion to different types of Pulse Height analysis; Time-of-flight studies; Pulsed Neutron studies; Mass Spectrometer analyses; Multiscaler operation; or Coincidence Pair Spectrometer operation. Display Control Unit, when used with Coincidence Pair Spectrometer plug-in, provides significant "map" display of data.

Basic Components: 1024-channel Memory; Logic Plug-ins; Display Control Unit; Data Output Unit; Readout equipment.

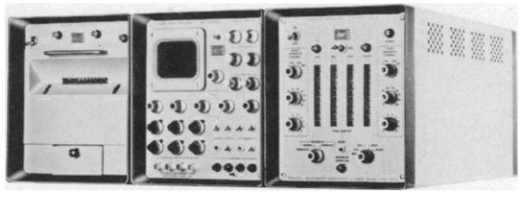

Multi-purpose Pulse Analysis

Model CN-110, 256-channel multi-purpose pulse analyzer employs interchangeable plug-in logic units identical to those used in the CN-1024 system: Pulse Height Analyzer; Time-of-flight; Pulsed Neutron; Multiscaler; Mass Spectrometer; Coincidence Pair Spectrometer. Provides for analog, digital, and binary readout with various accessory equipment. Totally transistorized circuitry on plug-in cards results in compact, bench-top size and 25-watt power requirements. Accessories include Data Output Unit, and numerous readout control devices.

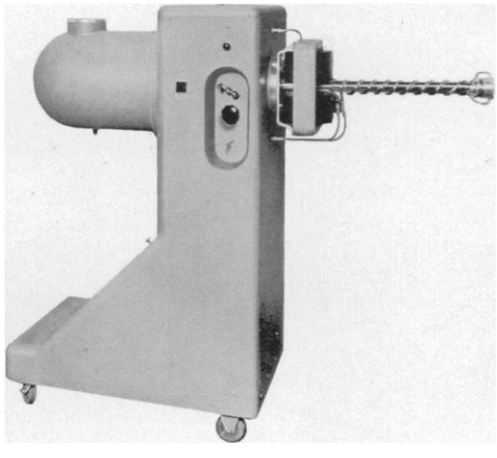

Portable Multi-channel Analysis

Model 404, 4-input, 400-channel pulse analyzer with accessory Resolver/Integrator and high speed printer. The versatile portable 400 Series analyzer is ideally suited for activation analysis and similar identification applications. It provides for data storage in memory groups of 1 of 400 channels, 2 of 200 channels or 4 of 100 channels . . . data transfer from half to half or quarter to quarter in the same half. 3″ CRT provides analog display. Analyzer is compatible with paper tape punch, reader, IBM typewriter and digital printer readout devices. **Resolver Integrator** has push-button operation, performs as resolver or integrator without need for intermediate tape equipment. As a resolver it makes data available from any analyzer memory quarter or half and adds to or subtracts from data in adjacent quarter or half. Permits removal of individual components of a spectrum. As an Integrator, it integrates memory data within any channel band from 0 to 399 in either of two modes. **Printer unit** prints out channel no. and data at high speed — 5 lines per second — on 3-inch paper tape. Built-in high voltage supply will power as many as four detectors.

Neutron Generator for Activation Analysis

Ellison Activatron-110A, 150 KV neutron generator is a simple, effective, low cost unit that will produce 14 MEV neutrons from a Deuteron-Tritium reaction. Neutron yield is greater than 10^{10}n/sec. Uses unique ion source derived from 150 KV accelerating voltage which permits entire ion source and accelerating tube to be immersed in an oil tank. Compatible with TMC 400 series pulse analyzer and accessory units.

Don't believe our new solid state detector brochures

(This curve is the latest word)

At least don't pay attention to the part that says resolution is "better than 20 KEV" for the new Lithium Ion Drift Detector (some even said 30 KEV). Instead look at the resolution shown in the curve above. It is 11.2 KEV (FWHM) — **at room temperature** — or what we should have called "better than 12 KEV". The rest of the information in the folder is correct. Window thicknesses from 25-50 microns and deep depletion regions combine to give linear response over a wide range of energies . . . leakage is less than 2 microamperes at 100 volts . . . prices are sensible . . . and the detectors are on the shelf.

The description of the new Double Diffused Planar Passivated Detectors for low energy charged particles was correct. They have dead layers of less than a micron. A new patented passivation technique gives them much higher resistance to fingerprints, moisture, gases and other environmental problems. It also gives them high resolution and low leakage current that is shown in a curve provided with each detector. Furthermore, the detectors are fully guaranteed for six months.

Passivated Detectors — Series, sizes and natural alpha resolution ranges:

Series A—5mm dia.: R-20 KEV (A-1), 20-50 KEV (A-2), 50-100 KEV (A-3)

Series B—10mm dia.: R-25 KEV (B-1), 25-50 KEV (B-2), 50-100 KEV (B-3)

A 10½ CU. FT. "SHAKER ROOM" RIGHT IN YOUR OWN LABORATORY

Agitates, incubates, refrigerates, and illuminates static and shake cultures

THE PSYCROTHERM® is a controlled-environment incubator-shaker that provides a wide range of temperature and agitation for the growth of aerobic and anaerobic organisms. This versatile apparatus occupies little floor space, yet provides 10½ cubic feet of usable work space where static and shake cultures can be propagated under the same environmental conditions.

Environmental Control

Temperatures can be regulated from 0°C to 60°C with a control tolerance and gradient both within ±0.5°C. Non-refrigerated units have a temperature range of ambient to 60°C. With integrated heating and refrigeration systems the unit is ideal for work with psychrophilic, mesophilic, and thermophilic systems.

Facilities are provided for circulation of gaseous atmospheres, and models are available with high-output illumination for photosynthesis studies.

Continuous-Duty Shaker Mechanisms

Models are equipped with Gyrotory® or reciprocating shakers, precision-built for smooth, quiet and reproducible agitation. Speeds are adjustable mechanically, and will not drift with changing workloads or voltages.

Interchangeable shaker platforms with large capacities for flasks, tubes and other containers are available in a wide selection.

how to filter out a variant...

use high quality S&S analytical filter papers

Are you in product applications research? With a number of variables to watch? Here's one way to simplify the problem:

Cut down filtering variables with S&S filter papers. From circle to circle, box to box, these highest quality analytical components provide virtually unvarying particle size retention and filtering speed for a given solution—plus outstandingly uniform ash and highest alpha cellulose content.

Such project-easing uniformity is never taken for granted by our technicians. It's checked—physically and chemically—on an individual basis, for every batch of every filter paper grade we produce.

In S&S quantitative grades, you get lowest ash (0.007%) and highest alpha cellulose (97-98%) of any filter paper you can buy... all without a price premium. We have built our reputation on these hallmarks of quality.

S&S produces a full line of qualitative and acid-washed filter papers. The latter includes quantitative grades containing an absolute minimum of such impurities as metal ions and fluorescent materials. Other special filtration media: filter pulp to speed gelatinous separations; penicillin discs for antibiotic potency determination; a complete line of chromatography filter media including papers and ion exchange celluloses to separate such organics as enzymes and proteins in chromatographic columns

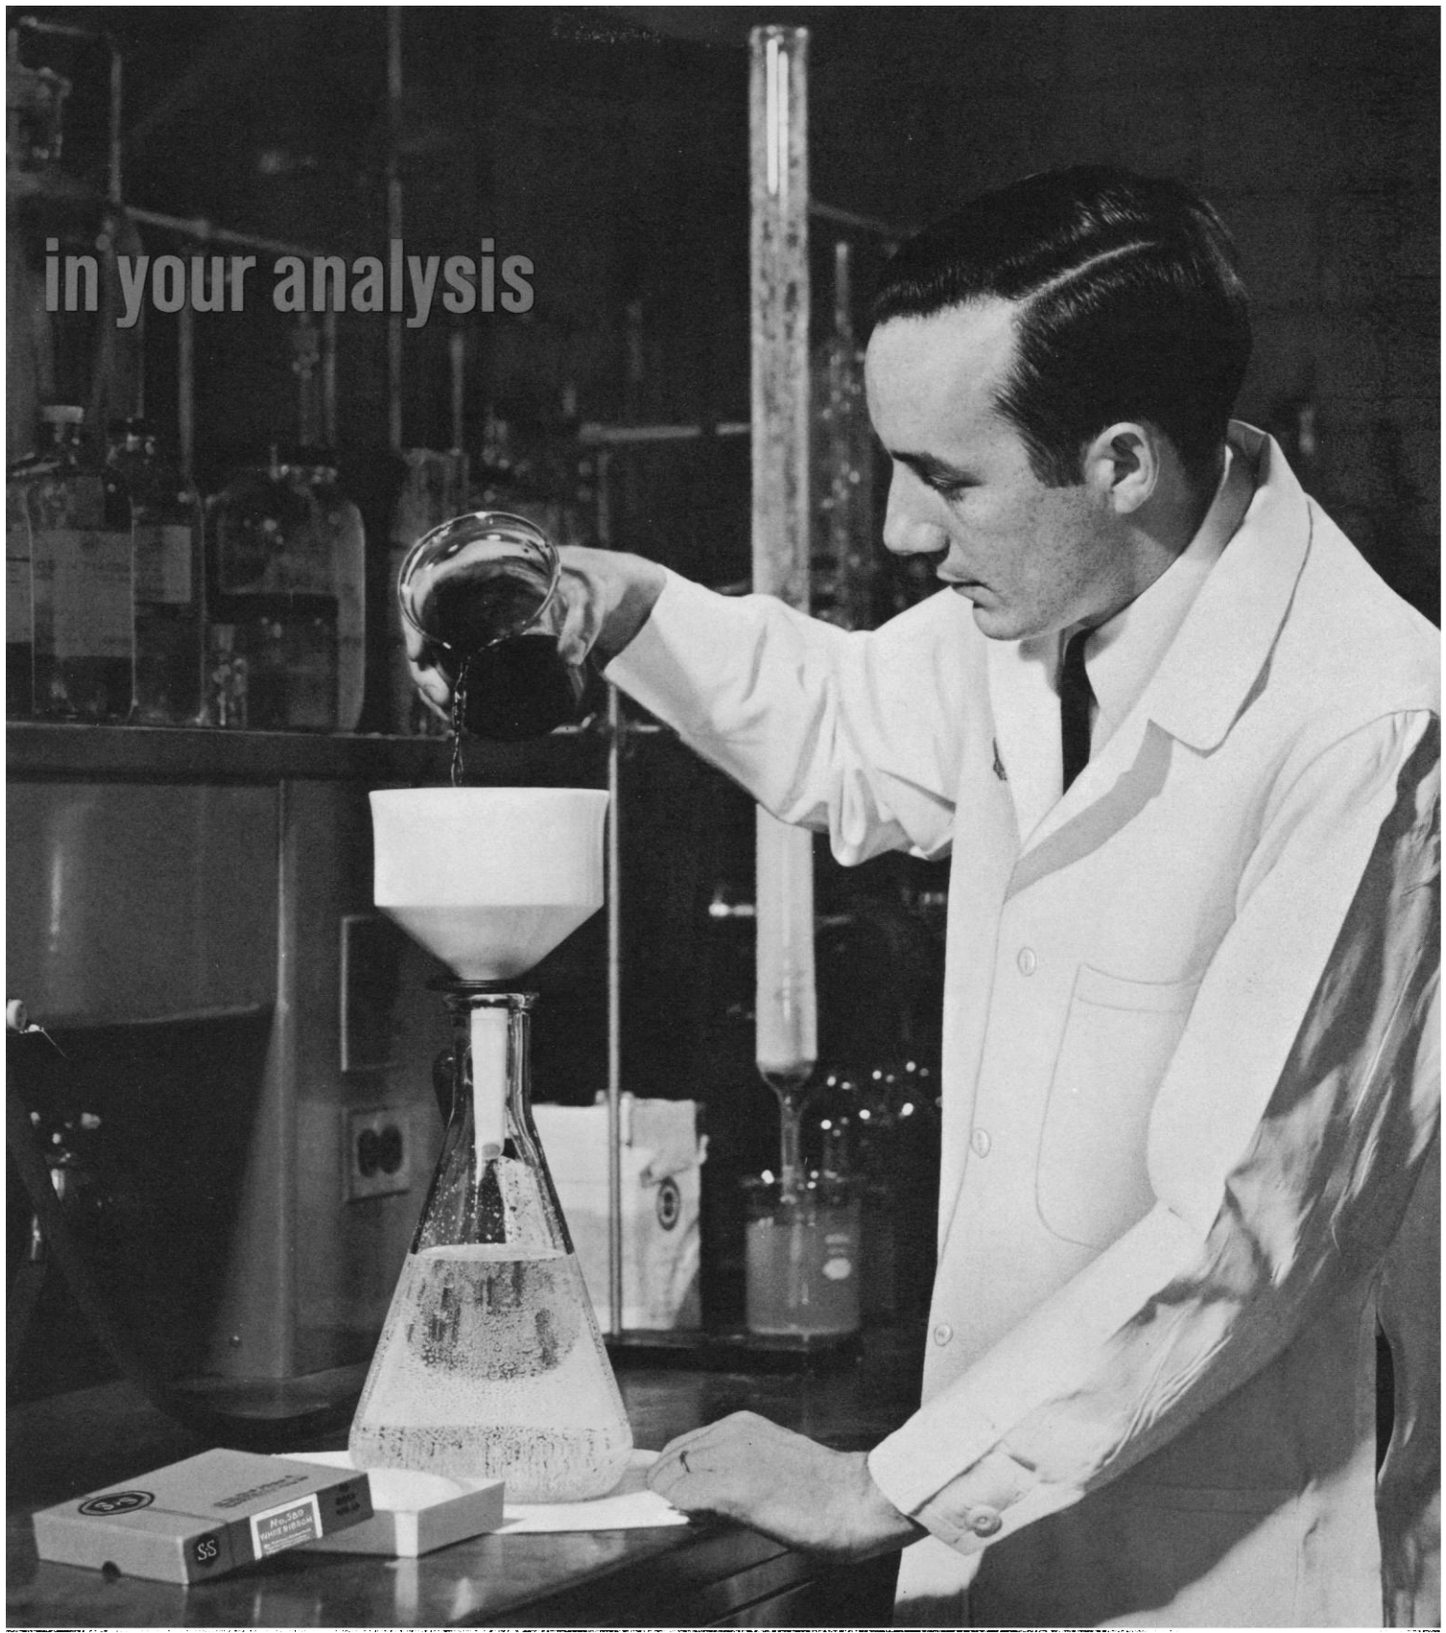

◁ Entrance to Technical Service Laboratory, Shell Chemical Company, Union, New Jersey. If you're considering some—or all—of these MEDICAL DATA PROCESSING FUNCTIONS

. . . call on **SANBORN**

If you can profitably apply digital computer techniques to the analysis of your physiologic data — to save time or to get more value out of your data — we can help you. Our instrumentation, from the patient signal pick-up stage through recording and readout, enjoys world-wide recognition and use — and now we are prepared to take the remaining steps to the digital computer.

What are these "steps" or instrumentation functions? Typically, they include *analog tape recording . . . coding . . . decoding . . . timing and sampling signal generation . . . multiplexing . . . analog-to-digital converting . . . format generation . . . buffer storage . . . digital tape recording.*

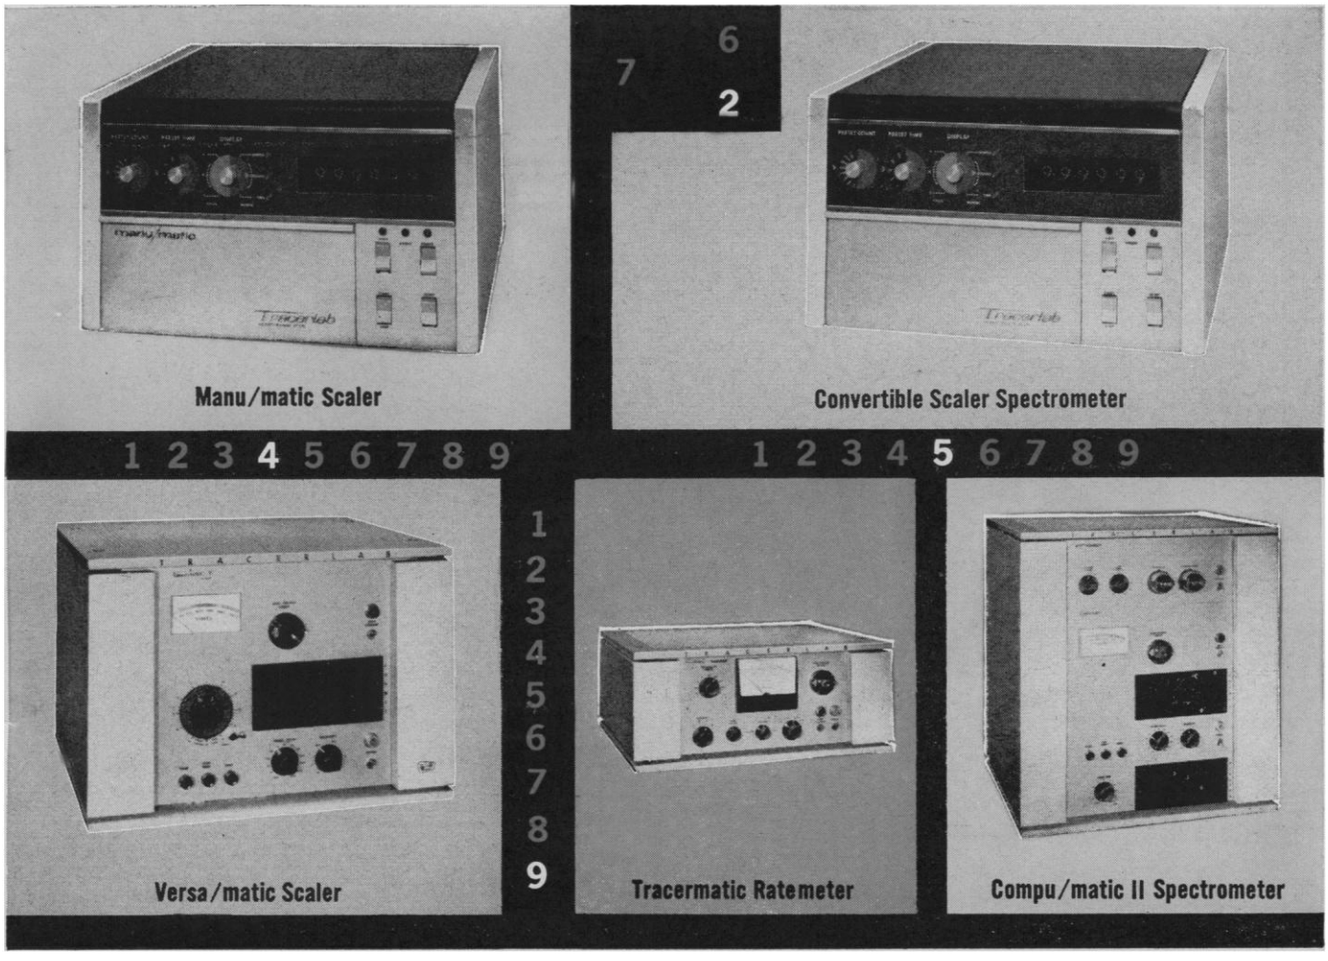

We believe you can get the system capabilities *you* want, and *more of them* per dollar invested, by doing business with people entirely familiar with medical diagnostic/research instrumentation. This has been our business since 1917. We expect no two requirements to be exactly alike, nor all laboratories to need complete instrumentation from transducer to computer (many already have considerable equipment, including Sanborn instrumentation).

If you have general plans you'd like to discuss, or are ready for a specific system proposal, call on us. When writing, address letters to the attention of Manager, Research Instrument Sales. (Postal Zip Code 02154).

from *Tracerlab:* a complete line of the most flexible analytical nuclear instruments

Tracerlab offers the most versatile, comprehensive counting instruments for radioisotope analysis. Broad in performance, modular in design, *Tracerlab* instruments meet your every application. There's no need for custom engineering, we've designed them with all possible applications in mind.

Need tubes or transistors, versatile scalers or ratemeters, precise spectrometers or flexible power supplies for any present or future application? Look no more — *Tracerlab* has them all — attractively priced too.

In single units, in multiple units, from timers to scaler/spectrometers, in performance and application, your single nuclear instrument source is *Tracerlab*.

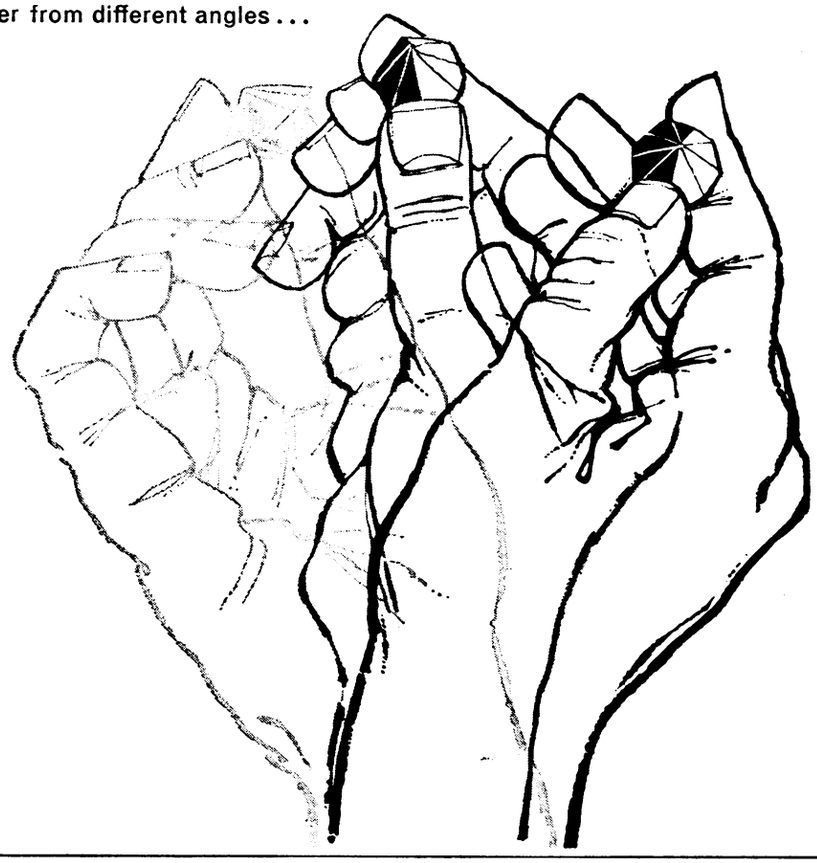

Chances are the instrument you need is available, right now, from *Tracerlab* — backed up by a national network of sales and service offices.

Locate your Tracerlab/Keleket representative in the yellow pages or write for our complete instrument catalog from
Tracerlab / Keleket — Your partners for progress in the Life Sciences.

looking at the matter from different angles . . .

. . . is equally easy with Norelco Electron Microscope EM 200

Two-dimensional lateral displacement and two independent angular movements of the specimen under investigation are obtained by replacing the standard specimen stage with the **new rotating/tilting specimen stage.**

This new accessory, the first of a series, is specially designed to meet the requirements of **metallurgists** interested in crystalline structures. The specimen holder of the new stage has a rotatable (± 160°) specimen carrier, and may be tilted ± 30° about its axis.
The specimen can also be moved a maximum of 2.4 mm in two directions at right angles, in a plane perpendicular to the beam axis. The new specimen stage is equipped with the same type of airlock as used in the standard stage; the specimen can be kept in vacuum during the exchange of film, plates, or of the filament. An extra opening is provided to insert auxiliaries for stressing, heating or cooling of the specimen. A point resolution of 10 A is obtainable.

CARY MODEL 31 VIBRATING REED ELECTROMETER

with ion chamber...for precise direct measurement of C^{14} or H^3 in gases

For details on Cary Model 31 and Ion Chambers send for Data File E303-113.

Model 31 detects less than 3 dpm C^{14}/cc air with Cary 250-cc ion chamber, provides measurements reproducible to better than 1%, and operates for months with a single calibration. It is ideal for simplifying measurement of either gaseous or combustible non-gaseous radioactive samples. Gaseous samples to 250°C are collected in or passed through the ion chamber for static or continuous flow measurements. Far more precise and sensitive than liquid trapping equipment, a Model 31 with ion chamber costs less than $2,000.

INTRODUCING THE SUCCESSOR TO THE WORLD'S MOST POPULAR ANALOG COMPUTER

This is the PACE® TR-20, the successor to the first fully-transistorized analog computer . . . the PACE TR-10.*

The TR-20 provides . . .

☐ Greater overall computing accuracy

☐ Simplified programming and problem set-up

☐ Lower cost of problem storage

☐ Improved high-speed repetitive problem solving facilities

☐ Wider selection of non-linear components

The same design team effort that developed the EAI HYDAC 2400, the ultimate in hybrid simulation systems, has been concentrated into the TR-20. Some of the design highlights are:

☐ Amplifier computing accuracy of .01%

☐ Internally packaged passive elements cut down patch panel clutter

*Over 600 now in use

☐ New variable diode function generators for simulating more complex functions . . . plus a greatly simplified VDFG set-up procedure

☐ A new solid state sine-cosine generator

☐ A new high-speed comparator and electronic switch

☐ A new four-channel oscilloscope display for improved readout of high speed repetitive solutions

. . . and all TR-20 components can be plugged into existing TR-10 computers.

With all of its ruggedness, portability, convenience of operations and other new features, the cost of the TR-20 is surprisingly low. **Each TR-20 owner will receive a free Computer Operations Course at one of EAI's modern Computation Centers.** Arrange for a demonstration and get more detailed information on the TR-20 and its applications by writing EAI.

you are about to see
the biggest advance
in laboratory glassware
in 48 years . . .

COREX pipets rebounding from a five-foot drop onto a tile floor.

Corning announces COREX® pipets

So strong you can bounce them, bump them, toss them, tumble them.

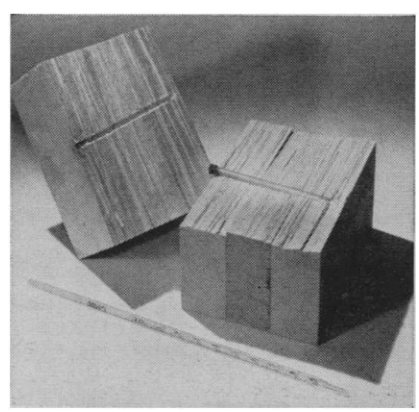

So strong you can shoot them through a laminated wood block.

So strong they will outlast *any other pipet* in your lab by 6 times*—and that is a conservative reading of field tests that have gone on for more than six months.

COREX pipets come to you out of Corning research into new ways to strengthen glass. They are the first labware items to be made with our new chemcor process that strengthens glass chemically. You can be sure that others will follow.

Do you sacrifice any chemical durability or accuracy for this phenomenal strength? The answer is no—none at all.

In fact, COREX pipets prove to be *more* resistant to both acids and alkalies than conventional pipets. And accuracy is all that you're accustomed to with PYREX® brand pipets—from

±0.005ml in the 1/10 in 1/100 size to ±0.06ml in the 10 in 1/10 size.

Fused-in ACCU-RED™ graduations and numerals mark off this accuracy for you permanently, crisply, legibly.

And we've put new size-sorting code marks in permanent ACCU-RED on COREX pipets. That's because they last so long that conventional color coding just doesn't endure.

The new size markings look like this:

Capacity ml	Graduated Interval	Sorting Code	Capacity ml	Graduated Interval	Sorting Code
10	1/10	▮▮▮▮	1	1/100	▬
5	1/10	▮▮▮	2	1/100	■■■
2	1/10	▮▮	2/10	1/100	■■
1	1/10	▮	1/10	1/100	■

All sizes come 12 pieces per case.

Labs in our field test report they prefer these markings to color coding.

You can get new COREX pipets now in our most popular sizes of serological No. 7085A and in our serological cotton-mouth No. 7086A. Other sizes and types will be added soon. Order now through your PYREX brand labware dealer.

Put COREX pipets to work—for a long, long time—in your lab. Try the biggest advance in laboratory glassware since we invented PYREX brand ware in 1915.

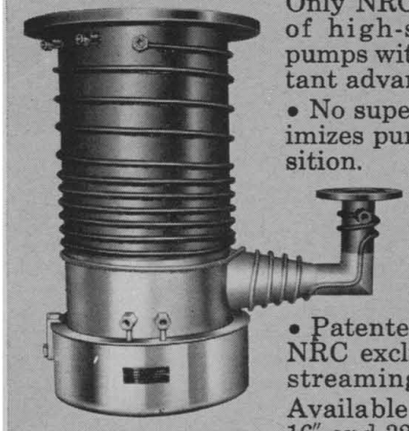

*Based upon a field test in which fourteen laboratories tested COREX pipets in actual use. The 6-to-1 ratio was confirmed by an additional 10-week test conducted in our own laboratory and involving 720 pipets.

CORNING
CORNING GLASS WORKS

PUMPS • VALVES • BAFFLES • GAUGES

VACUUM COMPONENTS

DIFFUSION PUMPS

Only NRC offers a full line of high-speed diffusion pumps with all these important advantages:

• No super-heating . . . minimizes pump fluid decomposition.

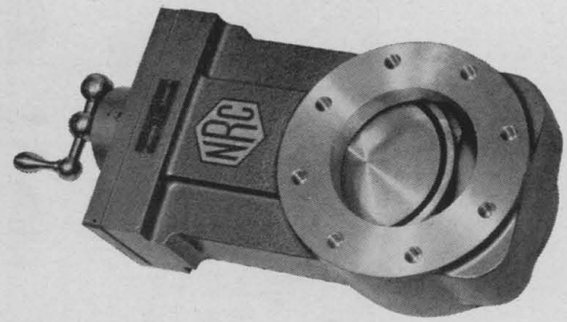

• Fractionating jet assembly . . . constantly purifies pump fluid . . . lower pressures can be held longer.

• Patented Cold Cap* . . . an NRC exclusive . . . cuts backstreaming 98%.

Available now in 4″, 6″, 10″, 16″ and 32″ sizes for all your high vacuum testing and production applications, where performance and reliability really count.

Licensed exclusively from Edwards High Vacuum Limited. U. S. Patent No. 2919061.

SLIDE VALVES

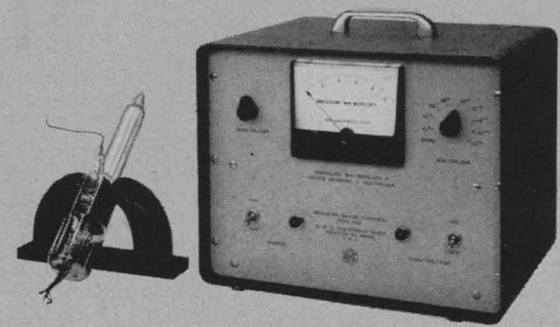

New NRC Slide Valves (HC Series) are *very-high* and *ultra-high* vacuum valves at *conventional* prices. Pressures of 10^{-8} to 10^{-10} torr range have been produced . . . without baking . . . in vacuum systems using these valves. 100% clear opening and low height provide highest conductance. Double-pumped stem seal cuts gas bursts 99%. They're available in 4″, 6″ and new 10″ sizes, either hand or air operated.

CRYO AND MOLECULAR BAFFLES

Now, your high vacuum system can be operated at lowest pressures for extended periods of time *with no detectable trace of hydrocarbons reaching the chamber!* The reason: NRC's Circular Chevron Cryo Baffle and the all-new NRC Molecular Sorbent Baffle (which utilizes three full trays of zeolite) virtually eliminate back-migration of pump fluid vapors. Yet, they provide exceptionally high conductance for maximum *useful* pumping speed.

VACUUM GAUGES

Get accurate, reproducible direct-readings to 10^{-13} torr with the new NRC Model 752 Redhead Magnetron Gauge! The only really satisfactory gauge commercially available for measurements below 1 x 10^{-9} torr. Increased current readings provide 50 times the sensitivity of hot-wire ionization gauges. Because there's no hot filament, it's magnitudes less "gassy", can't become contaminated by vaporizing of gauge elements. And the 752 Gauge is not X-ray limited.

NRC's full line of vacuum gauges and controls also includes an improved Bayard-Alpert type gauge, Model 751, for accurate, reliable measurement in the 1 x 10^{-3} to 10^{-10} torr range.

MANUFACTURING PLANTS IN NEWTON, MASS. AND PALO ALTO, CAL.

New Accuracy in Viscosity Measurement

THE FERRANTI-SHIRLEY CONE-PLATE VISCOMETER

With today's new formulations of liquid products, and the need for new and speedy handling, processing and packaging methods, a more precise knowledge of fluid behavior is essential. The advanced Ferranti-Shirley Electronic Viscometer fills this exacting need. It is especially valuable in handling complex non-Newtonian materials. Methods formerly used were often subject to error, which would be costly under today's streamlined production techniques. The viscometer shown here operates on the principle of a cone rotating against a stationary plate, with the material (less than 0.5 ml. in volume) in between.

Shear rate can be controlled, variable from 0.2 to 20,000 sec.$^{-1}$ and accurate to 0.2% under potentiometer control. The characteristics of the fluid can be read on a meter, or recorded as chart flow curves.

The viscometer permits rapid examinations, and importantly, it is very easy to clean. It is of great value both in the laboratory and in production.

VISCOSITY MEASUREMENT

A new attachment is now available which simplifies the use of the Ferranti-Shirley and makes it particularly suitable for use under production conditions where very highly skilled operators may not be available.

This latest improvement is the automatic gap stabilizer, a simple addition which insures that the gap is maintained to within 0.0001 inch at all times irrespective of temperature variations. Variations in results due to the techniques employed by different operators are thus eliminated and the full benefits of the instrument with regard to the speed and accuracy of making determinations and the very small sample size can be realized under production conditions. Other accessory items already available include:

AUTOMATIC PROGRAM UNIT—
for controlled condition rheograms

X-Y RECORDER—
plots shear rate/shear stress curves automatically when used with the automatic program unit.

TEMPERATURE CONTROL BATHS—
suitable for use up to 200°C.

SPECIAL CONES—
for increased range and to deal with larger particles.

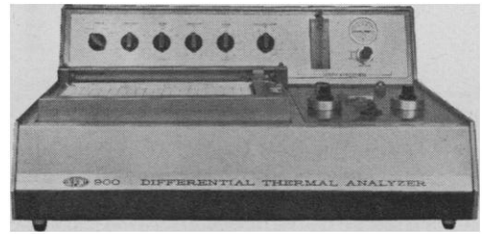

SPECIAL TORQUE SPRINGS—
500 and 2000 gm. cm. springs for increased range (1000 gm. cm. is standard).

Write for detailed literature.

New from Du Pont: economical plug-in accessories for DTA and TGA... both to 1200° C

Starting with the 900 Analyzer you use plug-in modules for DTA & TGA to 1200° C & Thermal Penetrometry

This is a new concept in instrumentation for thermal analysis.

You start with the 900 Analyzer and just add the economical plug-in unit specifically designed for the analysis you require.

The console unit offers flexible programming and precise temperature control while it records test results. Plug in one of the modules and you've got a "thermal analysis system."

For example the TGA (Thermogravimetric Analysis) module with its semi-micro balance, permits you to record changes in sample weight as a function of temperature. It gives you both qualitative and quantitative data on the stoichiometry and kinetics of volatilization, thermal decomposition and chemical reactions. Operating range of the TGA module is to 1200°C in vacuum or dynamic atmosphere. Its use of small samples permits maximum resolution at high scanning rates.

For differential thermal analysis, several modular cells are available. Use the High Temperature Cell for optimum performance in the 750 to 1200°C range. The Intermediate Temperature Cell has a working range to 850°C. The Low Temperature Cell extends the range to below −150°C and gives improved performance in experiments requiring programmed cooling.

A Thermal Penetrometer module is also available. This instrument provides information on the change of modulus of a material as a function of temperature. Its measurements are comparable to Vicat and Clash-Berg data but you get them more quickly and with automatic recording.

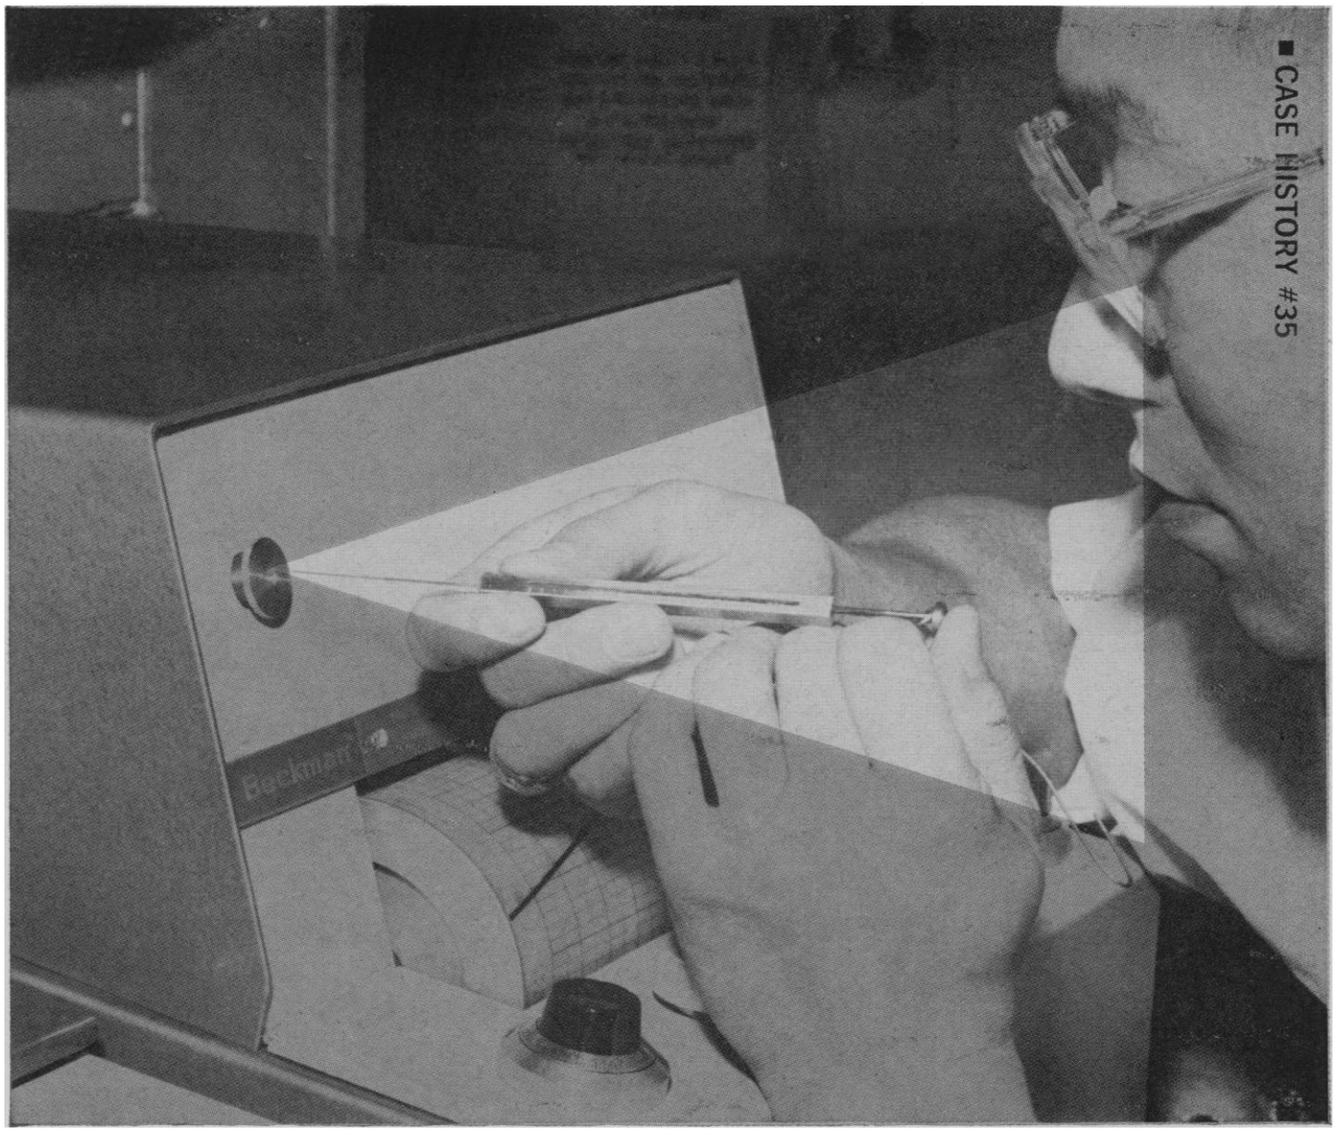

Other Du Pont modules include a Remote Cell for thermal analysis of hazardous or reactive samples, and a Visual Cell that lets you watch a sample during thermal analysis to detect coalescence of particles, color change, charring, etc. (Additional modules are now under development. They will soon become part of this family of thermal analysis systems.)

For more information write to: E. I. du Pont de Nemours & Co. (Inc.), Instrument Products Division, 2533 Nemours Bldg., S113, Wilmington 98, Delaware 19898. PATENT APPLIED FOR

"PRECISE SAMPLING UNDER EXTREME CONDITIONS

makes the new Hamilton All-Metal Syringe (2 μl capacity) a highly respected tool" reports Mr. Edward Chow of Union Carbide Chemicals Company, Torrance, California. Liquid mixtures with wide boiling ranges are analyzed for impurities at Union Carbide's laboratory by isothermal or temperature programmed gas chromatography. Better reproducibility was achieved because the long needle of the Hamilton HS7002 minimized transport time and sample mixing with the carrier, while the unimaterial construction minimized sample losses due to leaks which may be caused by differences in the coefficients of expansion of materials. Volatile losses of the sample are also reduced significantly during sampling by precooling the syringe to –70°C. in a dry ice and anhydrous methanol bath. **Hamilton manufactures a complete line of precision syringes from a capacity of 0.5 μl to 500 μl and other related chromatograph equipment.**

in an electron microscope

HIGH RESOLUTION

is the least you should expect

In the EM6 you get it as a matter of course: no unit may leave the factory unless it can demonstrate 10 Å or better (users report 6 Å in normal operation)

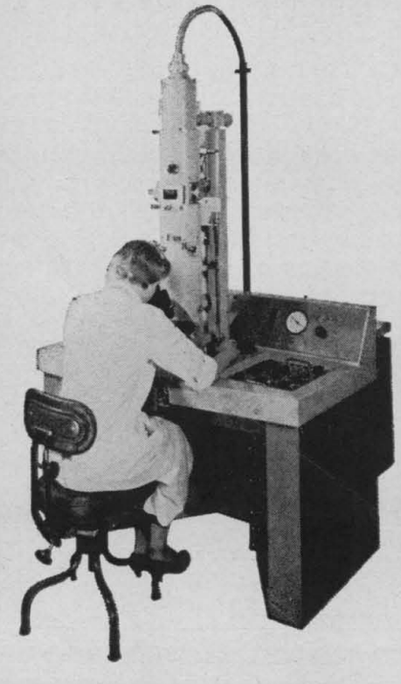

even more important is

EASY OPERATION

to achieve maximum resolution routinely and effortlessly

in this respect the (AEI) EM6 Electron Microscope is outstanding

in the **EASY MAINTENANCE** provisions that shrink cleaning time to less than two hours (no need to dismantle the column, or need for complete realignment afterward)

in the **ELECTRICAL BEAM ALIGNMENT** that remotely controls illumination from the desk (no manual adjustment whatever). Not only increases mechanical stability of column, but augments operational flexibility (including tilt for reflection microscopy).

in the **WIDE RANGE MAGNIFICATION** that smoothly yields 600 X to 120,000 **X** continuously without changing pole piece or losing field of view

in the **EASY KV SELECTION** that provides 30-40-60-80-100 KV through a single control — without turning power off.
AUTOMATIC LENS COMPENSATION evenly maintains selected magnification, image focus and field of view. No realignment necessary.

in the **ELECTROSTATIC ASTIGMATISM CORRECTION** that operates with impressive certainty and precision

in the **CAPACIOUS SPECIMEN CHAMBER** that permits quick easy mounting of reflection and goniometer stages
(and lets you easily insert accessories for dynamic studies, too!)

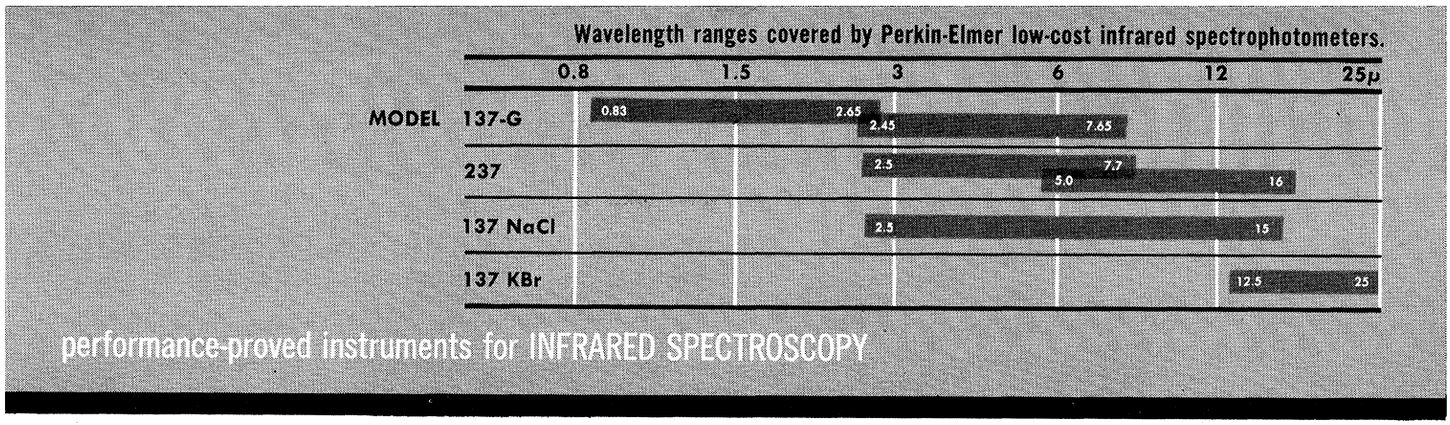

in the **VACUUM LOCKS** that let you change photoplates, samples and objective apertures rapidly without losing vacuum.

the **EM6** ELECTRON MICROSCOPE
a product of Associated Electrical Industries in England

is marketed and serviced in the U.S.A. by

KEEP YOUR LAB AHEAD IN INFRARED WITH THESE LOW-COST SPECTROPHOTOMETERS

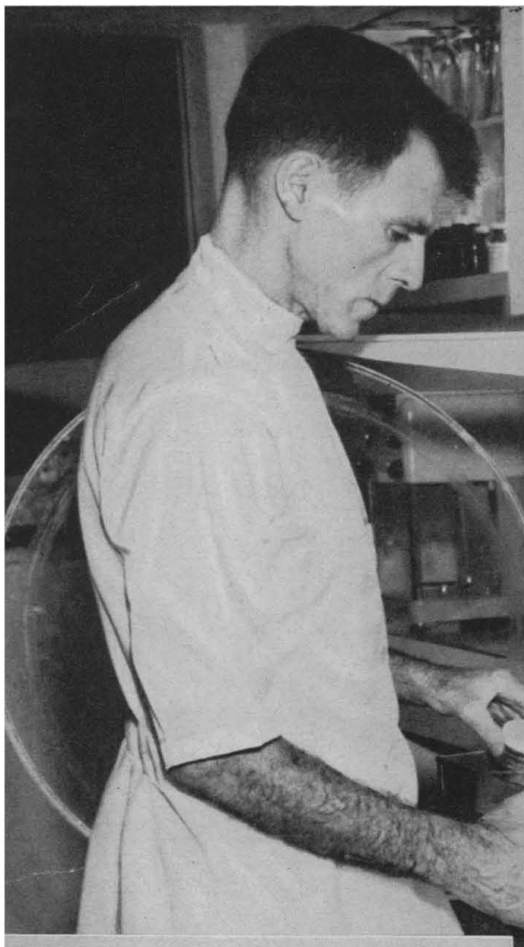

Each member of the Perkin-Elmer low-cost infrared spectrophotometer line does so many jobs so quickly and so well—in both large and small laboratories—it frequently saves its cost within a short period. Simple in design, all Perkin-Elmer low-cost spectrophotometers are easy to operate, rugged and reliable. They are capable of solving a high percentage of the problems encountered in chemical research and development, process and quality control.

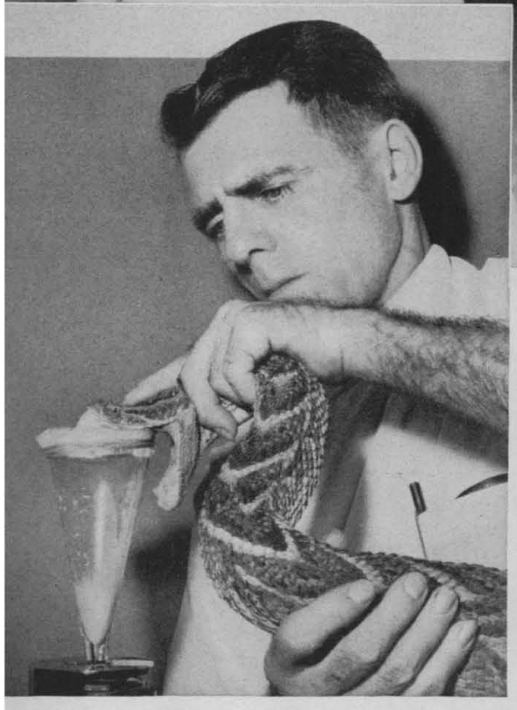

Low-cost infrared spectrophotometers can be ordered from Perkin-Elmer in any of four linear wavelength spectral ranges: the NaCl prism Model 137B from 2.5 μ to 15 μ; the KBr prism Model 137B from 12.5 μ to 25 μ; the high-resolution grating Model 137G, with two ranges covering .83 μ to 7.5 μ; and the double-grating Model 237, operating also in two ranges, from 2.5 to 7.7 μ and from 5.0 to 16 μ. Both 137G and 237 are available also in linear wavenumber modes. For descriptive literature, including sample spectra, write to Instrument Division, Perkin-Elmer Corporation, 910 Maine Avenue, Norwalk, Conn.

freeze-dry with the RePP sublimator

modern,
efficient research,
pilot plant and production facilities.

above:
William E. Haast, Director of Miami Serpentarium, preserving snake venom in the Sublimator model no. 16.

from exotic snake venoms to

gamma globulin, plasma, vaccine and vitamin preparations, the rugged RePP Sublimators consistently deliver ultra-high quality products with remarkable efficiency. In the sublimator design condensing coils are placed "inside the same chamber" with the materials to be dried. This exclusive design feature means compact, mobile freeze-dry installations at significantly lower original equipment and operating cost. Normally no plumbing connections are required. Simply plug the single electrical cord into a suitable outlet to operate the complete equipment.

Additional unique Sublimator features include full sample visibility, sterile operation, reverse cycle defrosting and internally staged refrigeration compressor. Tray capacities are available from 4.6 sq. ft. to 166 sq. ft. If required, Sublimators are supplied with internal stoppering plates for sealing vials under the original vacuum.

For full details on this major technological advance in freeze-dry equipment design write;

INSTRUMENTS FOR RADIOACTIVIT

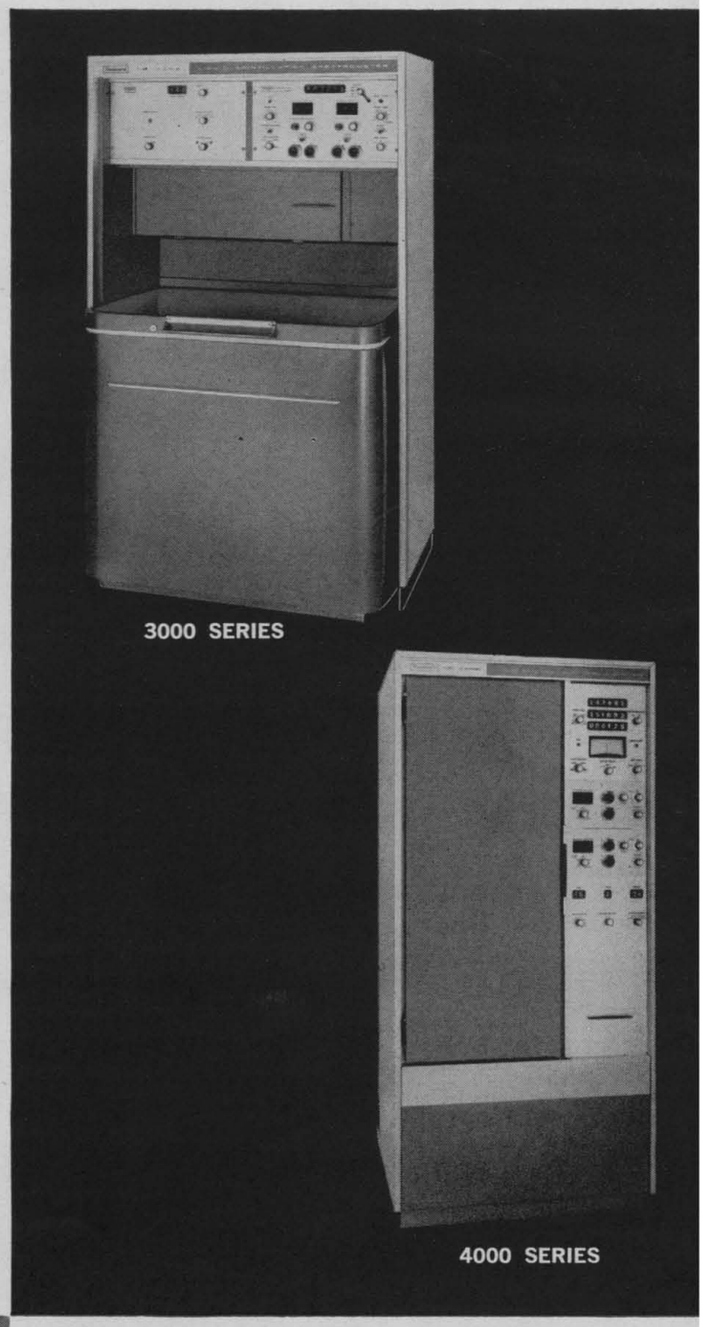

3000 SERIES | 4000 SERIES

TRI·CARB®

LIQUID SCINTILLATION SPECTROMETERS

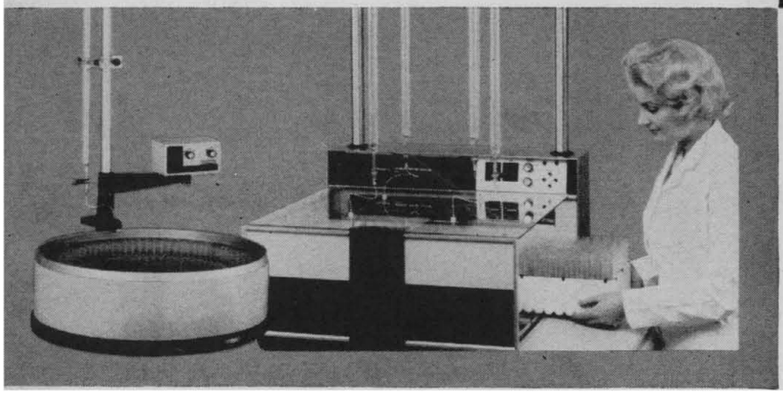

New 3000 and 4000 Series Tri-Carb Spectrometers embody more than a score of major design and operating improvements. The result: sensitivity, accuracy, and reliability of a degree never before achieved in liquid scintillation counting equipment. These ultra-modern instruments are available in configurations and with capabilities to match any research budget or counting requirement. Important features:

- **13-dynode photomultiplier tubes with signal pulse summation for highest efficiency and best isotope separation.**
- **Built-in automatic background subtraction for convenience and for accuracy of ratios calculated automatically.**
- **Rugged, "light-lock" detector assembly with new graded shielding and high-speed sample loading.**
- **Fast coincidence circuitry with wide dynamic range for best performance.**
- **Completely separate channels (two or three) of pulse-height analysis for optimum channel selection.**
- **Precision gain control and fast-recovery linear amplifiers for greatest accuracy.**
- **Highly stable and linear pulse-height analyzers for best operation with fast liquid and slow crystal pulses (switch selection).**
- **High-speed (20 megacycle) scalers with in-line, numerical display for greatest counting accuracy and best legibility.**
- **Low activity sample reject to save valuable counting time where many samples contain no material of interest.**
- **Highest quality digital printers or calculators for fastest and most reliable data presentation.**
- **Compact console designs to take minimum floor space and no bench space.**

3000 SERIES

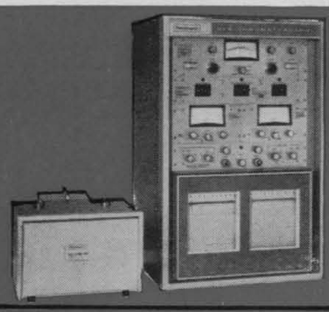

4000 SERIES

COLUMN FRACTION COLLECTORS

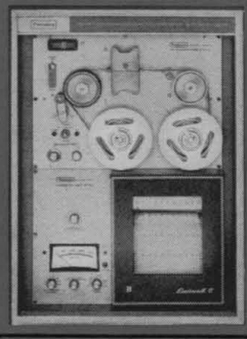

Two models designed for automatic fraction collection in time/drop/or volumetric modes (optional). Capacities of 216 or 400 standard size test tubes. Model 234 permits simultaneous collection of effluent from 1 to 4 columns. Percentage-sampling feature in both models permits the collection in alternate test tubes of aliquot samples of any volume. Both models have convenient operating controls and are completely self-contained. **Bulletin 1012.**

MEASUREMENT AND CHROMATOGRAPHY

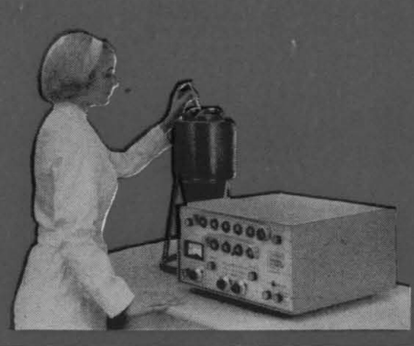

GAS CHROMATOGRAPHS

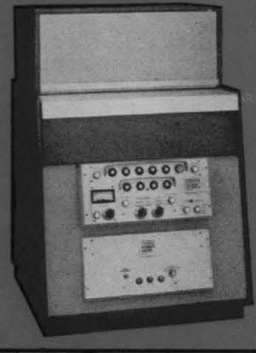

Model 7508 Dual Gas Chromatograph offers the research laboratory new and higher standards of operating capability, detection sensitivity and programming flexibility. Dual column oven accepts any of five plug-in detection systems: argon ionization, flame ionization, thermal conductivity, electron capture and d.c. discharge. System modules, housed in compact, space-savi cabinet permit selection of a complete gas chromatograph to meet your requirements. **Bulletin 1015.**

STRIP CHROMATOGRAM SCANNERS

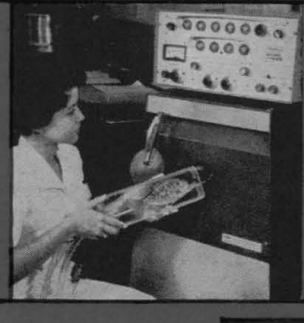

Series 7200 Chromatogram Scanning Systems are designed for automatic, precise localization of radioactivity on paper strip chromatograms. Optional attachment permits scanning of thin laye chromatograms. Either analog (Model 7201) or digital (Model 7211) presentation may be provide using standard Packard recording ratemeters or scalers and digital readouts. Radioactivity is measured in two windowless Geiger detectors—with lead shields and collimators—arranged in 4 p configuration to scan both sides of the strip. Large diameter, stainless steel reels accommodat up to 150 feet of paper in widths varying from ½" to 2". Reels are interchangeable and easily removable. **Bulletin 1038.**

AUTO-GAMMA® SPECTROMETER SYSTEM

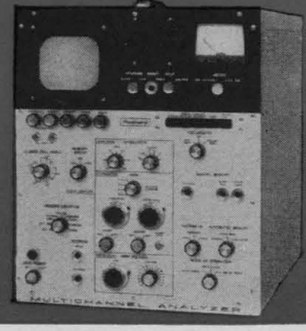

Manual and Automatic models designed for counting gamma-emitting isotopes in medical, biological, chemical, agricultural and industrial research. Series 400 automatic systems incorpora instrumentation, sample-change mechanism, digital printer, and all controls necessary to automatically handle and count as many as 100 samples. Patented design of automatic sample changer assures constant background, regardless of the activity levels of adjacent samples. Manual systems consist of completely transistorize Model 410A Auto-Gamma Spectrometer which may be used with any Packard crystal scintillation detector, either well-type or probe, or special detectors such as the Armac Scintillation Detector **Bulletin 1025.**

Counting live fish in flowing stream water. Oak Ridge National Laboratory, operated by Union Carbide Corporation for the U.S.A.E.C.

LARGE VOLUME DETECTORS

Armac® Model 445 Scintillation Detector is a large sample-volume well-type liquid scintillation detector ideally suited for radioactivity detection i bulk samples of food, water, blood, tissue, wastes, and for in vivo research on animals, fish, etc. High counting efficiency permits definitive results from very small doses of administered or residual radioactivity. Standard WHOLE BODY COUNTING FACILITIES with Liquid or Crystal Detectors are also available from Packard on a single-source responsibility basis. **Bulletins 1024, 1020.**

MULTICHANNEL, MULTIPARAMETER ANALYZERS

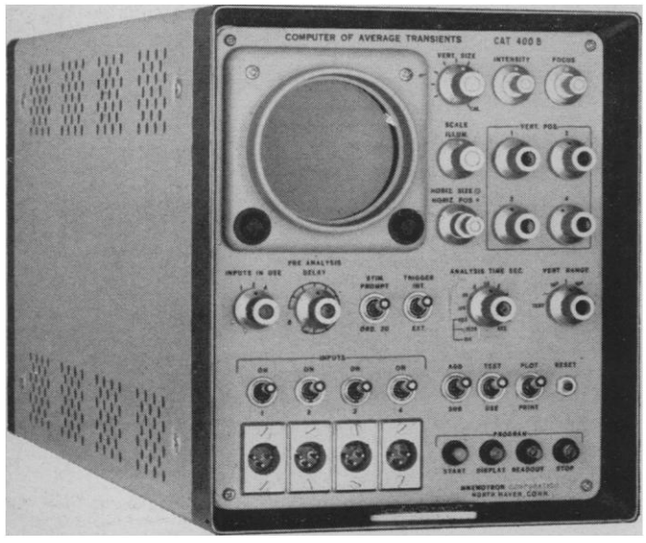

A complete range of Models for 400, 1024 and 4096 channels of analysis are available with a wid selection of data readout systems to suit research worker's convenience or requirements. Packard Multichannel and Multiparameter Analyzers offer a extremely high degree of linearity, stability, and accuracy while accepting a wide range of input waveshapes and signal levels. **Bulletins 1032, 1033, 1034.**

PACKARD INSTRUMENT COMPANY, INC.

BOX 428 • LA GRANGE, ILLINOIS • AREA CODE 312 • 485-6330

MNEMOTRON Leader in products for biological and NMR data processing

CAT 400B

Isolates Transient Signals from Background Noise

CAT 400B is the unique MNEMOTRON Computer of Average Transients. It is today's most invaluable instrument for processing biological data derived from investigations in Neurophysiology, Pharmacology, Ophthalmology, Psychology and Cardiology, among others.

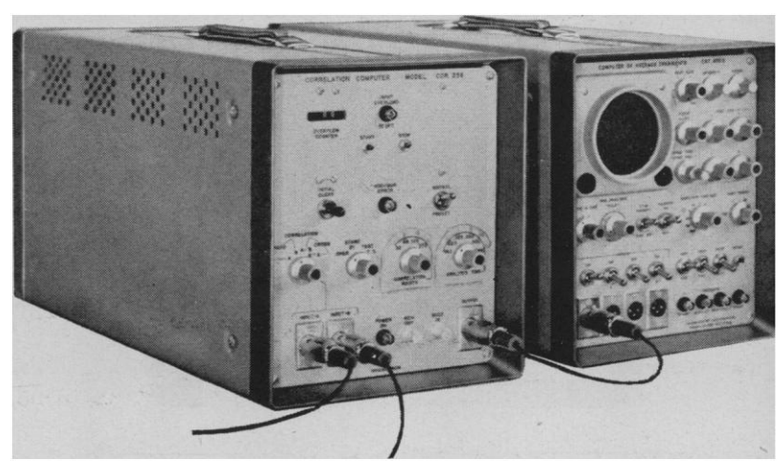

Where "on-line" definition of repetitive transient signals is indicated by the nature of the experiment, no other instrument approaches the capabilities of the CAT. In a transistorized package of only 38 pounds, the transportable CAT occupies less than one cubic foot of bench space.

CC-1

Multi-Purpose Computer for On-Line Auto- and Crosscorrelation studies

MNEMOTRON's Correlation Computer System (CC-1) consists of the COR-256 combined with the Computer of Average Transients (CAT 400B). This system performs real time auto- and crosscorrelation computations, thereby permitting the study of statistical properties of repetitive signals buried in random noise.

The Correlation Computer generates up to 256 points of the auto- or crosscorrelation functions. On-line operation eliminates the need for time-consuming and costly data analysis. Results computed by the system are immediately available as an oscilloscope pattern. Accessory units make results available as an analog plot or a printed or punched digital readout.

I would like full details about

NAME_____ TITLE_____

ORGANIZATION_____ ADDRESS_____

CITY_____ ZONE_____ STATE _____

101

700/1400 SERIES

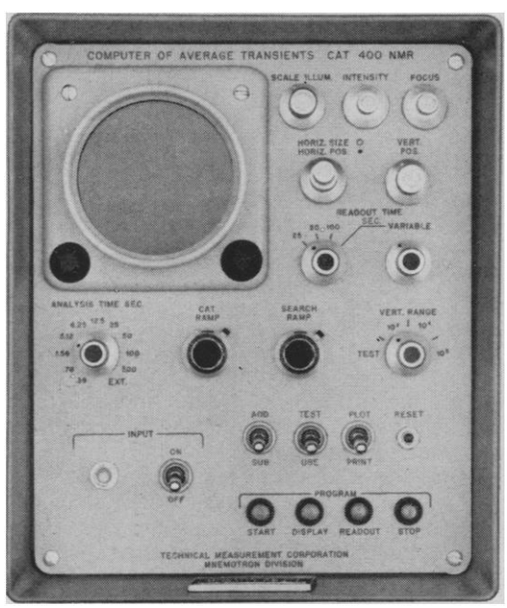

New Magnetic Tape Recording Systems

MNEMOTRON NEW MODEL 700/1400 SERIES MAGNETIC TAPE RECORDING SYSTEMS record any electrical quantity from DC up to 5000 cps. A uniquely simple pulse-frequency modulation technique insures that data signal intelligence is free from non-linearity due to tape coating or other distortions.

Select as many data channels as you need, up to 14. If standardization is desired, simply specify 7 channels on ½-inch tape in the standard IRIG configuration.

Record/Reproduce electronics for each channel are integrated in a single plug-in module featuring unity gain. An integral speed-switch permits selection of data conversion for 2, 3 or 4 tape speeds — no additional plug-ins needed. For maximum flexibility, each multi-channel input is isolated. Data can be accepted from unbalanced, differential or push-pull outputs — or different DC levels on input signal ground returns can be preserved. Test points allow monitoring of input during recording, output voltage level when reproducing.

CAT 400 (NMR)

Significant New Instrumentation for NMR Spectroscopy

Up to now the investigator has been severely limited in detecting trace quantities or samples of extremely high dilution. Random noise masking the desired signal has hampered the detection of resonance peaks for adequate identification.

CAT 400 (NMR) greatly increases the signal-to-noise ratio by extending the period over which measurement is made. This extension is accomplished on-line through use of an averaging technique. **The Spectroscopist is thereby provided with a clearly defined signal of the spectra under investigation.**

Computed results can be read out in analog form back onto the plotter associated with the spectrometer — or in digital form for further computer analysis.

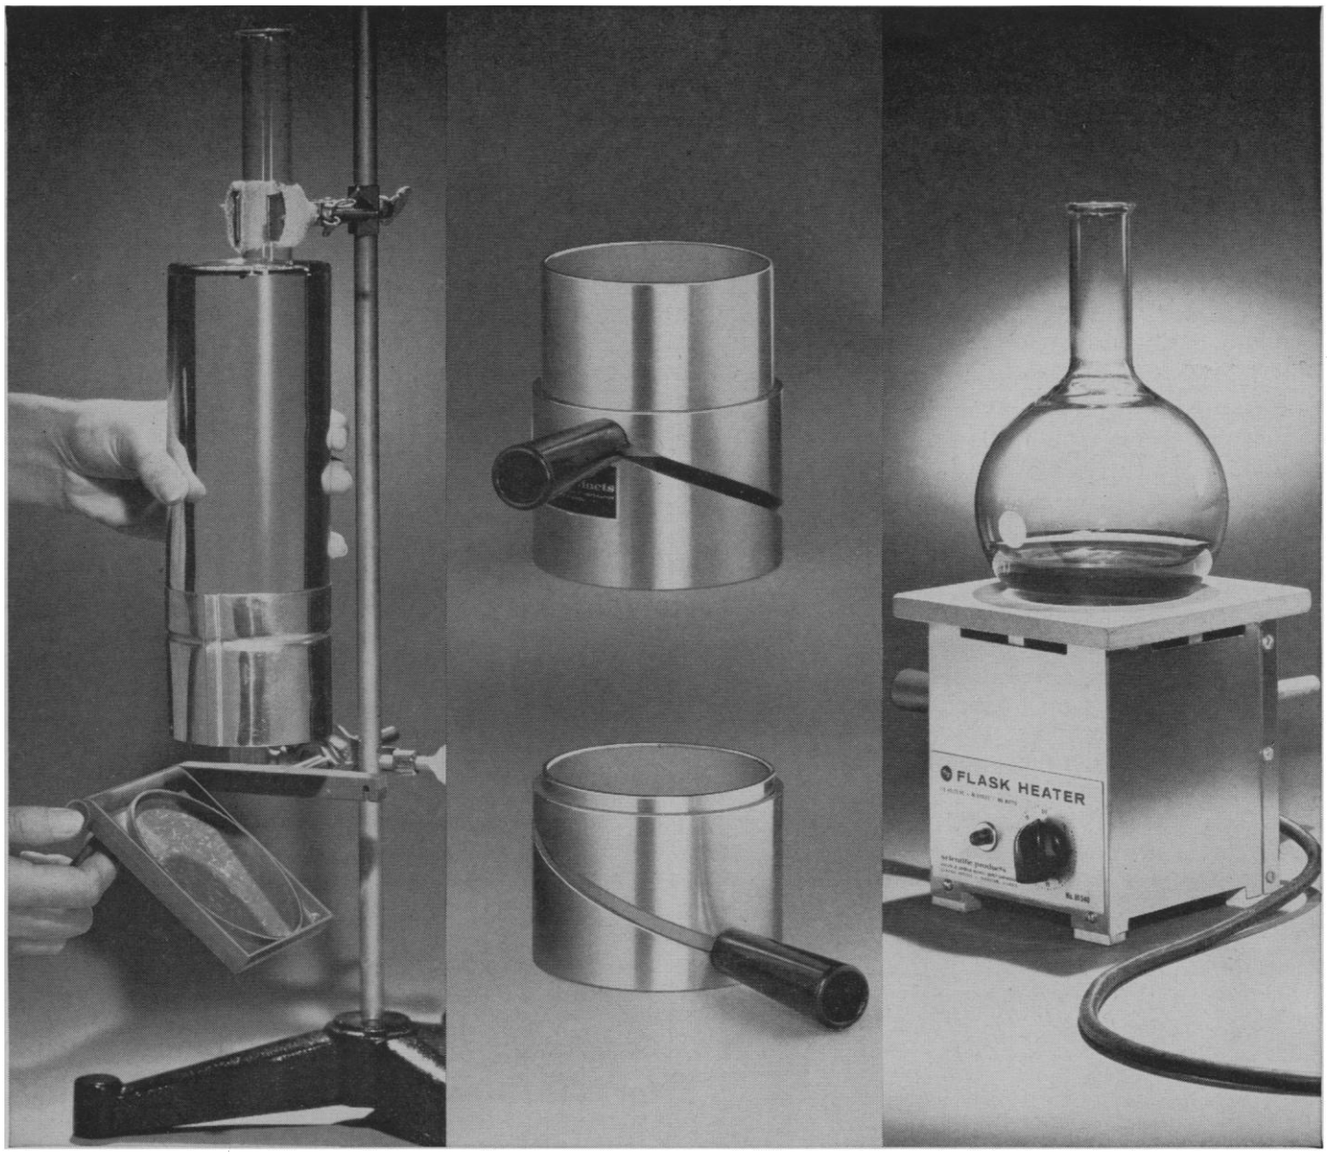

• See us at Booth 73, American Association for the Advancement of Science Meeting; Cleveland, Ohio, December 26-30.

From S/P—A trio of convenience items for your laboratory's

downs and . . . ups and downs . . . and ups

downs—Removing Dewar flasks or other apparatus from support rods is a convenient one-hand operation. Simply hold flask, release lever and VacRac nylon-fiberglas plate swings down out of the way. No. F4515—4″ x 4″ platform, 6″ support rod (without clamps) . . . $14.50. *ups and downs*—Raising and lowering laboratory apparatus is simple, sure with the S/P Roto-Lift support. Made of nickel-plated steel; cylindrical design distributes weight so capacity is almost limitless. Real simplicity . . . just loosen handle, set unit at desired height, tighten handle to lock in position. Adjusts from 2¾″ to 4¼″; top diameter of 3″. No. S9310 . . . $10.00. *ups*—Temperatures rise quickly with the S/P Flask Heater (you can boil 600 ml of water in less than 10 minutes)—concentrates heat where it's needed. No. H1540—dimensions: 6″ x 6″ x 6½″; 115 volts AC . . . $32.00. To take care of your ups and downs, order these items today.

HOW MANY OF THESE INSTRUMENTS BY SARGENT SHOULD BE IN YOUR LABORATORY—RIGHT NOW?

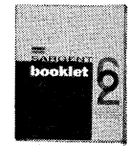

THESE ARE THE INSTRUMENTS BY SARGENT PICTURED ABOVE
1. Recorder—Model SR. 2. Multi-Range Recorder—Model MR. 3. Thermonitor-controlled Water Bath—S-84810. 4. Power Borer—S-23207. 5. Centrifuge (Micro and Semi-Micro)—S-15699. 6. Combustion Apparatus (Micro and Semi-Micro)—S-21580. 7. Oscillometer—Model V. 8. Recording POLAROGRAPH®—Model XV. 9. Recording Titrator—Model D. 10. Constant Rate Burette—Model C. 11. Analytical Oven—S-64080. 12. Slomin Electrolytic Analyzer—S-29460.

ANALYZING, RECORDING, CONTROLLING—some of the most important and most exacting jobs performed in your laboratory, as well as many mechanical tasks, can be performed *better* with the aid of Instruments by Sargent. Performed more easily, more rapidly, more accurately—oftentimes more economically.

So, as you study the equipment needs of your laboratory, we invite you to consider Instruments by Sargent—some of which are pictured above and identified at the left. How many of them should be in your laboratory—*right now... or as soon as they can be delivered to you?*

MORE INFORMATION? Send for the new Sargent Booklet 62—a 72-page illustrated booklet describing instruments above, and many others.

Magnetic alignment

Push-button automatic valving

Automatic plate advance

Specimen scanning

These time-saving features make the RCA ELECTRON MICROSCOPE today's most productive instrument

Because RCA's design philosophy considers the scientist and the instrument as a system, the EMU-3G is today's most productive electron microscope. A counter-balanced inertial drive mechanism assures rapid scanning of specimens; continuous as well as step focusing in known increments are provided. Exposure meter plus automatic and manual plate transport of the 5-frame plates produce more micrographs in less time. And automatic valving means rapid pump-down for fast starting, more production.

The EMU-3G combines flexibility with high resolving power. Magnetic alignment is panel controlled and 10 angstrom resolution or better is guaranteed. A new universal specimen chamber (optional equipment), including hot and cold stages, provides ten times more space for specimen manipulation than is offered in conventional chambers.

For complete information, write to RCA, SCIENTIFIC INSTRUMENT, Dept. CB-362, Building 15-5, Camden, N. J. In Canada: RCA Victor Company, Limited, Montreal.

RCA THE MOST TRUSTED NAME IN ELECTRONICS

COLEMAN

Coleman pH Instrumentation

Three pH meters and complete selection of electrodes meet full range of laboratory pH measurement requirements

Low-cost Metrion pH Meter is a line-operated instrument featuring a basic simplicity of design and operation which make it ideal for general-purpose laboratory use. With measurement accuracy to 0.05 pH, the Metr*ion* provides a level of performance far out of proportion to its moderate cost.

Features:

- Stabilized against line voltage fluctuations over 95-125 volt range.
- Easy-to-read duplex scales cover 0-14 pH range.
- Calibration control provides compensation for temperature effect.
- Simplified operation—"push-to-read" pH control.

Cost—only $139.00.

Increased versatility, Metrion II pH Meter offers the same simplicity of design and operation as the basic Metr*ion*. It also features two additional circuits for increasing versatility of the instrument:

...a true temperature-compensating circuit with a control knob conveniently located on instrument's front panel.

...an output jack for use with an automatic titrator such as the Coleman Titr*ion*.

Addition of these two circuits makes the Metr*ion* II valuable for an increased variety of specialized laboratory applications with only a small price increase.

Cost—$160.00.

Fully-versatile Companion pH Meter is a zero-restoring instrument ideal for a broad range of laboratory applications. It provides pH measurement over the 0-14 pH range with a routine accuracy of 0.05 pH and reproducibility within 0.02 pH. The instrument also may be used for millivolt measurements over a 1400 mv span.

Features:

- Zero-restoring circuit for drift-free operation.
- May be used with recorder, automatic titrator, and automatic temperature compensator accessory.
- Simplified control system for easy operation.
- Manual Temperature Compensator control permits accurate measurement over 0-100° C. range.

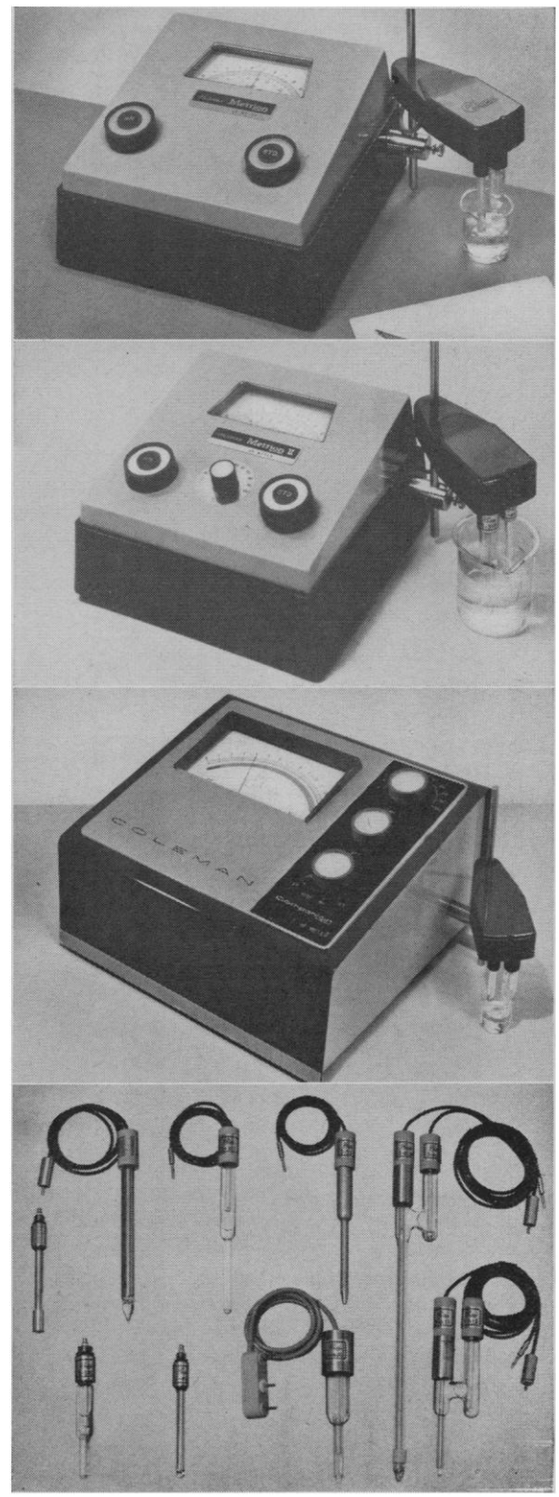

Cost—$300.00

Complete selection of electrodes—Coleman electrodes cover virtually every practical application of laboratory pH measurement. They are usable with any Coleman pH meter or other instrument of modern manufacture.

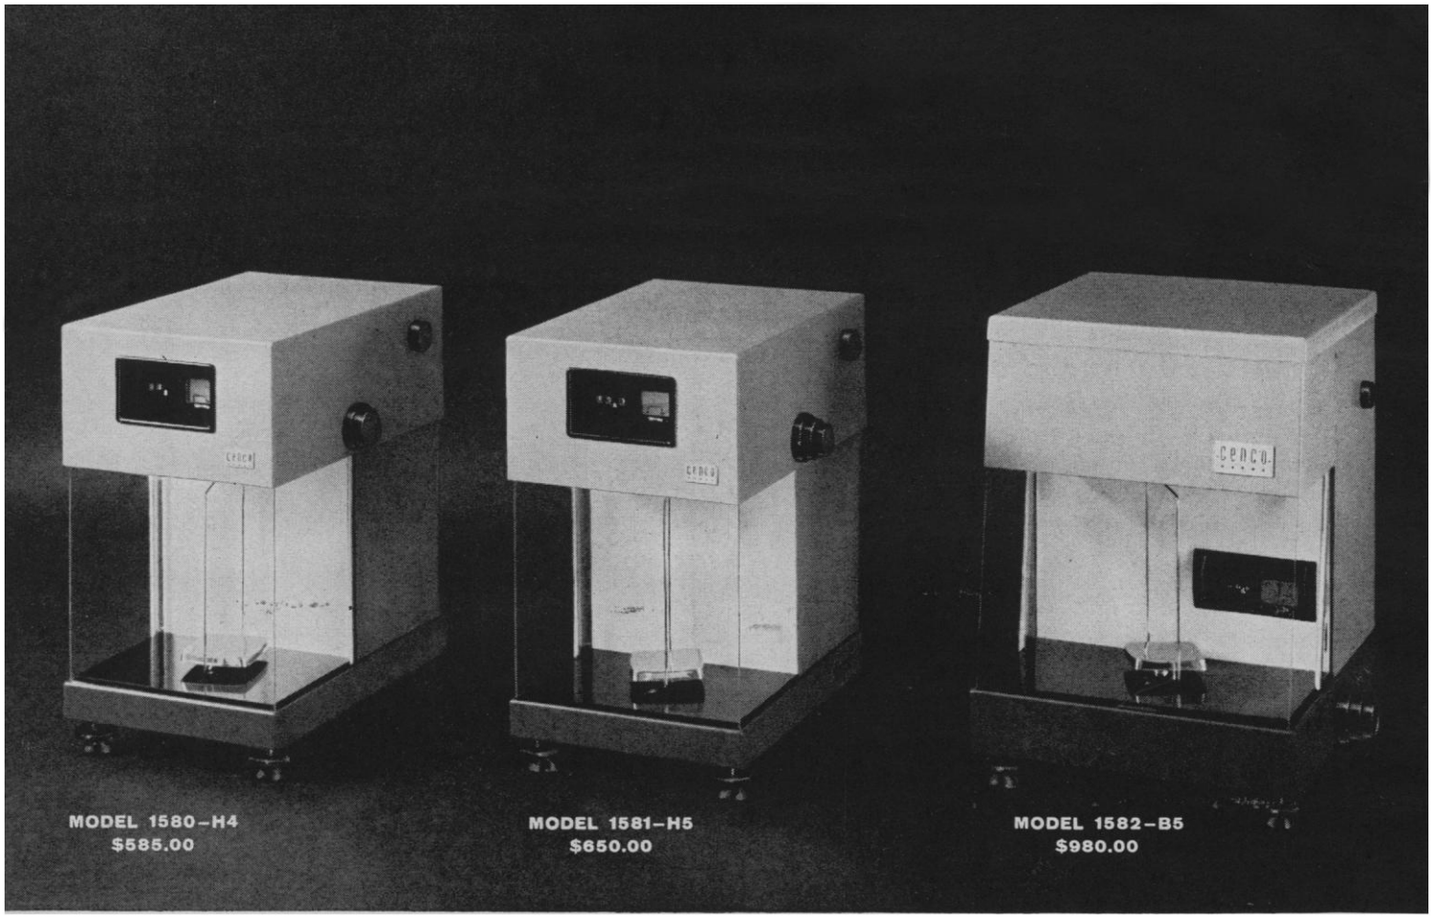

- Glass electrodes, shielded against stray electrical fields, permit precise measurement over widely-varying conditions of temperature, viscosity, alkalinity.
- Reference electrodes are available in standard calomel or non-mercurous types.
- Metallic electrodes for electometric titrations.
- Special-purpose electrodes for unusual applications.

Coleman electrodes are priced about one-third less than the closest competitive designs.

CENCO'S NEW ANALYTICAL BALANCES

A. SOLID TITANIUM BEAM / JEWELED MECHANISM: beam surfaces can't flake—lose weight—as do plated beams. Synthetic ruby knife on synthetic sapphire plane, jeweled bearings at all critical points for long-term accuracy. **B. POSITIVE, CHAIN-DRIVEN WEIGHT CONTROL:** stainless steel chain not affected by environment or age, no cord-and-pulley drive to slip. Ring weights are stainless steel, corrosion resistant, non-magnetic, precisely calibrated. NBS Class "S" weights used in models 1581 and 1582; "S-1" in model 1580. **C. ALL-METAL HOUSING:** durable, rugged, minimum dust attraction. Heavy, multiple-coat baked enamel finish. **D. EASY-VIEW WEIGHING CHAMBER:** non-corroding base impervious to chemical attack. Crystal clear glass walls highly resistant to scratching, will not discolor. **E. EFFICIENT, NON-FATIGUING CONTROLS:** simple, speedy operation through natural, straight-line movement of operator's hands from side loading of sample to controls manipulation. With hands off to side, operator always has clear view of readout. **F. EASIER, MORE ACCURATE READOUT:** fixed vernier with cursor for quick, accurate readout.

now automatically ...up to FIVE amino acid chromatograms in 24 hours

(without human intervention)

Load it, set it and forget it...samples are automatically programmed one after the other...next day you'll have up to five complete chromatograms from a like number of samples. Technicon's accelerated Amino Acids AutoAnalyzer separates and analyzes the amino acids normally found in protein hydrolysates in less than five hours ...one machine completes the separation and analysis of up to *five different* samples in just one day. One Chromatogram automatically follows another from start to finish with no human intervention. Here's how...merely arrange the required chromatographic columns (up to five) in series and autoanalyze the column effluents in pre-timed sequence. This advance in ion exchange chromatography is made possible by the superior resolving power of Technicon's unique Chromobead* resin...plus new chromatographic columns which are eluted by a very steep pH and ionic strength gradient.

Load 1, 2, 3, 4 or 5...

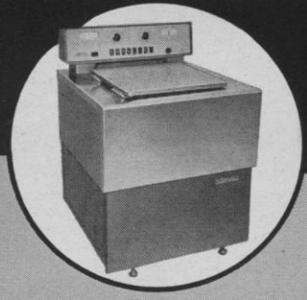

columns depending on your daily workload. What's more, you can adapt your present AutoAnalyzer system to this new technique.

TECHNICON® AutoAnalyzer®

TECHNICON CHROMATOGRAPHY CORP. Research Park · Chauncey, New York

RC-2 Automatic Superspeed Refrigerated Centrifuge* — 17,500 rpm — 37,000 x G
Accepts six different rotors on Gyro-Action direct drive

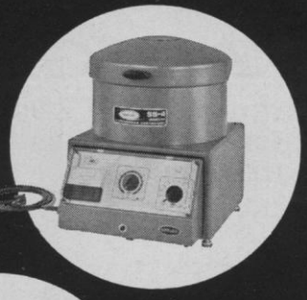

RC-3 Automatic Refrigerated Centrifuge — 5,000 rpm — 5,140 x G — 70 seconds to top speed.
Ideal for routine operations

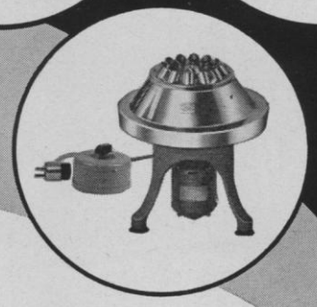

SS-3 Automatic Superspeed Centrifuge* — 17,000 rpm —34,800 x G
with push-button simplicity and heavy-steel safety guard

SS-4 Enclosed Superspeed Centrifuge* — 17,000 rpm —34,800 x G with removable control panel for cold room or fume hood use

CENTRIFUGES

SS-1 Superspeed Centrifuge* — 16,000 rpm — 31,000 x G
The original Superspeed Angle Centrifuge

Type "A" Centrifuge & XL, M, SP, SP/X — This series offering five rotors for one motor base goes to 6,000 rpm — 4,600 x G

SORVALL

Ivan Sorvall, Inc.

NORWALK • CONNECTICUT

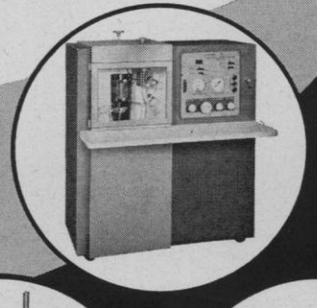

*Adaptable to "Szent-Gyorgyi & Blum" Tube Type Continuous Flow System

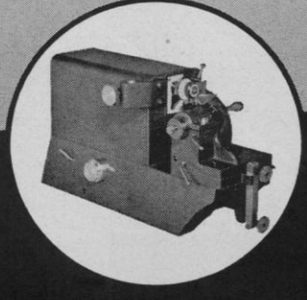

INSTRUMENTS

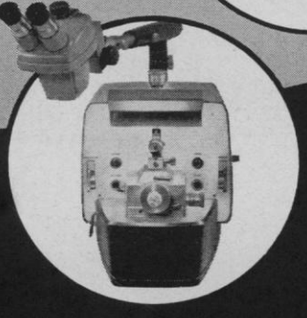

Automatic Pipettes — 0.5 to 3.0 ml and 1.0 to 10.0 ml— 25,40, or 95 deliveries per minute.

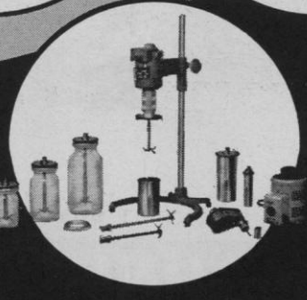

Ribi Refrigerated Cell Fractionator— for isolating cell walls and subcellular particles of the cytoplasm

For illustrated literature on all or any of these instruments, please ask for bulletin SC-11C

"Porter-Blum" MT-1 Ultra-Microtome— $1/40\mu$ to $1/2\mu$ — for electron and light microscopy

"Porter-Blum" MT-2 Ultra-Microtome— 100 Å to 4μ — automatic operation— the finest instrument of its kind in the world

Micro-Macro Omni-Mixer Homogenizer— for processing 0.5 ml to 2,000 ml. Speeds with Micro-Attachment up to 50,000 rpm

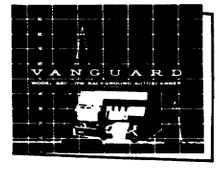

VANGUARD

MODEL 880 4 PI AUTOSCANNER REDUCES BACKGROUND TO LESS THAN 10 CPM, REVOLUTIONIZES COUNTING OF H^3, C^{14}, AND S^{35}

Directly below you see the Vanguard Model 880 Autoscanner which combines low background (actually less than 10 cpm) with 4 pi detection, plus automatic operation. The result is remarkable sensitivity in chromatogram scanning of low-energy, beta-emitting radioisotopes. Since its introduction, the Model 880 Autoscanner has been in constant demand from medical, agricultural and pharmaceutical research laboratories.

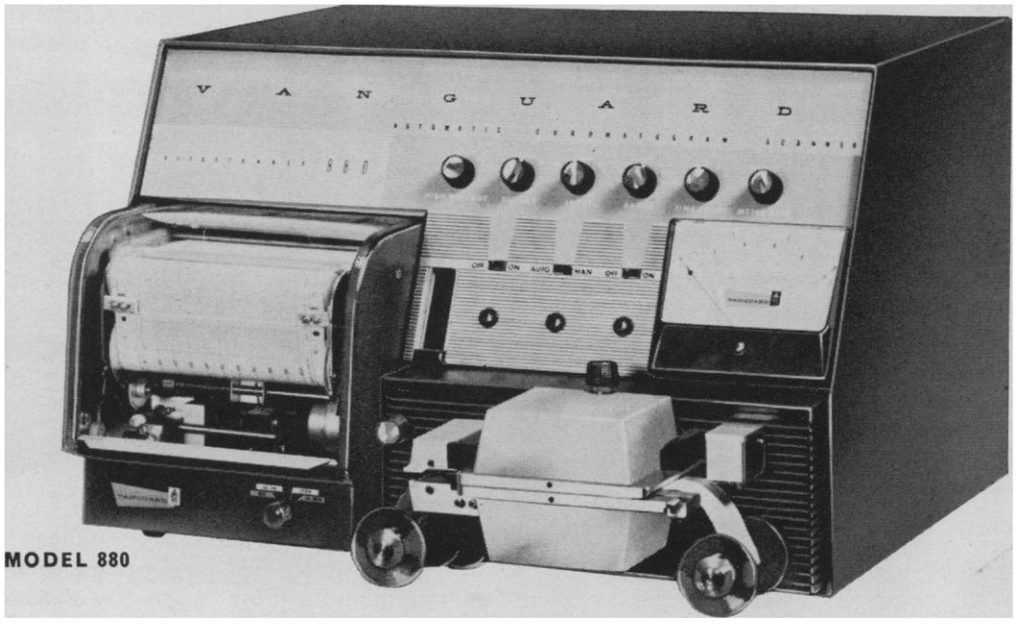

■ Windowless gas-flow, geiger detection, counts radiation on both strip sides simultaneously ■ Completely transistorized ■ Automatic shut-off of gas and power ■ Handles chromatograms 1½ to 4 cm. wide in lengths to 100 ft. ■ Automatically marks solvent fronts, leading and trailing edges of strips ■ 10 scanning speeds, 5 rate meter time constants, 7 count rate ranges, 5 individual slit width collimations ■ Better than 2% accuracy of count rate on all ranges ■ Compact, one unit system, adaptable to direct digital quantitation.

Informative brochure available! If you would like detailed information about Vanguard's Model 880 Autoscanner, send for this free brochure. It outlines distinctive features and lists all operational characteristics.

New unit for automatic-exposure photomicrography gives you pictures with computer correctness and speed . . . on any microscope

The new Vickers Camera Computa virtually eliminates all human error in photomicrography, as well as producing pictures much faster than conventional methods. Note these specific advantages:

- Laboratory personnel with *no* photographic training or experience can take pictures of technically professional quality.
- Since no attention to light or exposure is required, the operator can concentrate entirely on the specimen — particularly critical where moving specimens are involved.
- With light constantly monitored on a total integrating basis, any fluctuations in power supply are compensated for, preventing under- or over-exposure.
- Camera Computa is set instantly for any film speed, allowing film type to be changed at any time, with uniformly excellent results.
- Camera Computa offers a Polaroid® Land Camera back, as well as a conventional 35mm camera back.
- Either model fits all standard microscopes, and is easily transferred from one microscope to another for a new series.
- Needless delay is eliminated, and personnel can devote more time to essential duties. Camera Computa does not experiment with expensive film.

EMI* PHOTOMULTIPLIER TUBES

EMI photomultiplier tubes have earned a reputation for superior performance around the world. Reports from leading research laboratories, universities, government agencies, and instrument manufacturers confirm their excellence. If your project requires the utmost in sensitivity, gain, and stability coupled with lowest noise—choose an **EMI** photomultiplier. ■ When used in gamma ray spectroscopy, **EMI** tubes are remarkably stable as to pulse height versus change in count rate. Shift as little as 0.6% has been reported. ■ **EMI** tubes have also proven to be superior in both short and long term gain drift. A gain drift of ±0.5% under reasonably stable environmental and operational conditions has been reported. ■ Many of the tubes listed here are available with silica (Spectrosil) windows for use either in the ultraviolet region or for very low background counting applications. New types are constantly under development at **EMI**'s advanced development laboratories. ■ **EMI** photomultiplier tubes are available through qualified engineering representatives located in major marketing areas through the United States. A request on your company letterhead will bring you the name of your nearest representative as well as a copy of the latest catalog.

If you've got asymmetric carbon atoms

you've got a new analytical tool.

Our automatic polarimeter can analyse, follow the course of, or control any reaction involving optically active reactants, intermediates or products. In a nutshell, if what you want analysed has asymmetric carbon atoms in it, you can use our polarimeter.

It's an electronically controlled, self-balancing, photoelectric polarimeter which employs the Faraday magneto-optic effect to measure the rotation of the plane of polarization of light passing through a sample.

Standard sample cells permit analysis of optically dense solutions, very small specimens (16 μ liter), and samples requiring constant temperature control. Alternate light sources between 450 mμ and 750 mμ may be used. Precision is .0001° of arc; accuracy is $\pm$ .0002°. Measurements can be made in normal lighting with automatic recording or digital presentation. For more information, write us at 3625 Hauck Road, Cincinnati 41, Ohio. Your inquiry will receive prompt attention.

Refractometers

by Carl Zeiss WEST GERMANY,
represent the ultimate
in modern design

CARL ZEISS
WEST GERMANY

Abbe Refractometers, Models A and B

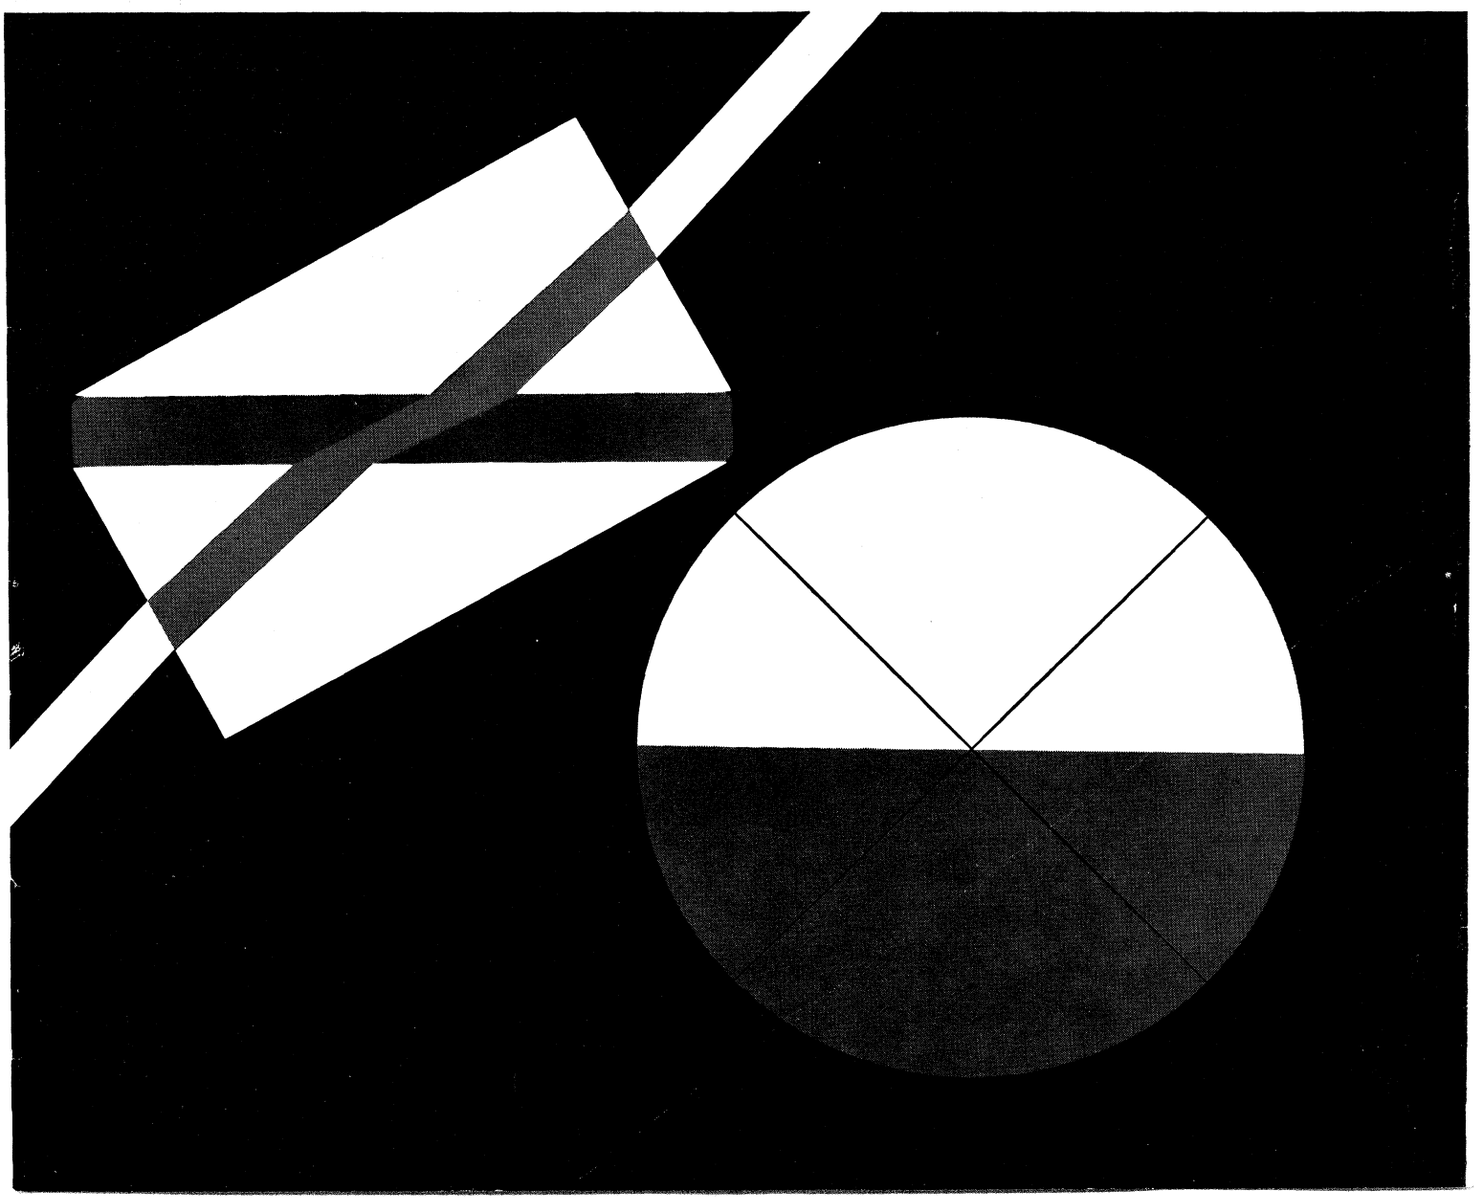

Measuring range:
n_D=1.30-1.71 and 0-95% sugar content
n_D=1.17-1.56 n_D=1.45-1.85
Determination of mean dispersion
Temperature-controlled prisms
Prism with flow-through cell
Immersion Refractometer

Measuring range: n_D=1.3254 to 1.6470
Accuracy: ± 1 unit of the fifth decimal place
Temperature-controlled prisms
Flow-through cells—Sodium spectral lamp.

Write Dept. RP for catalog, or visit our
showrooms in New York, San Francisco,
or Los Angeles for a demonstration.

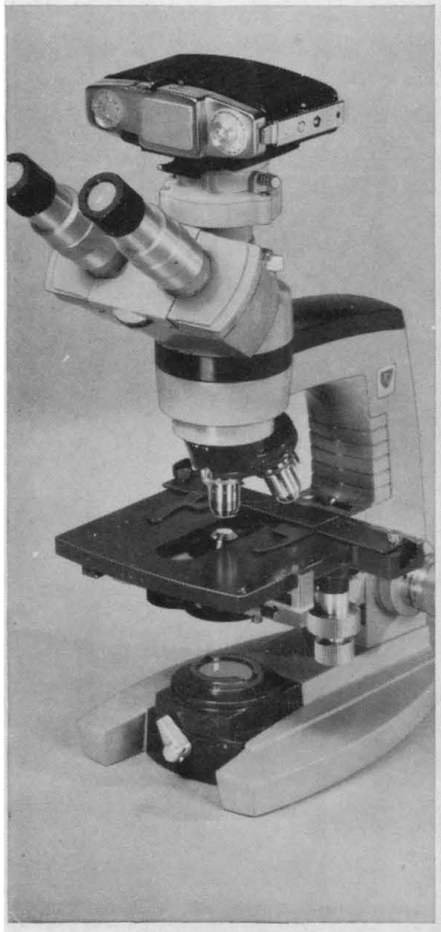

Branch offices in Atlanta, Chicago, Los Angeles,
San Francisco, Seattle
In Canada: Toronto, Montreal, Winnipeg, Vancouver

CARL ZEISS, INC. 444 Fifth Avenue, New York, N.Y. 10018

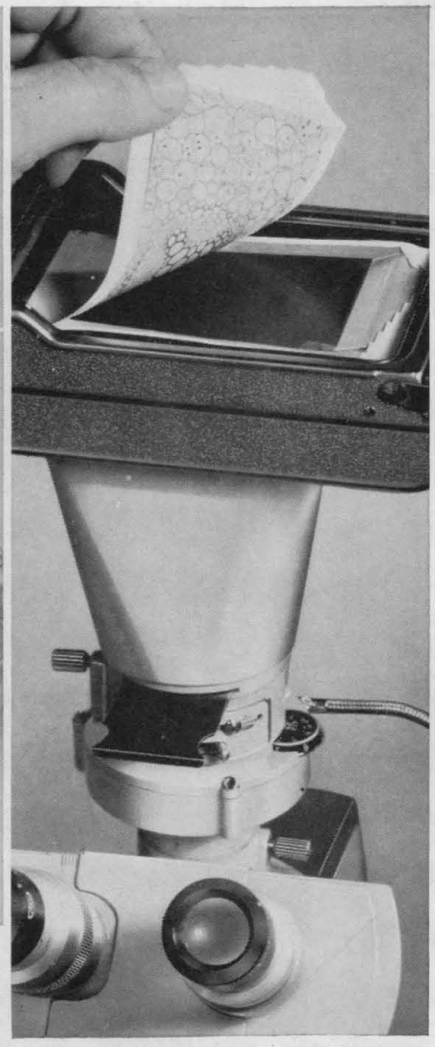

NEW AO MICROSTAR...

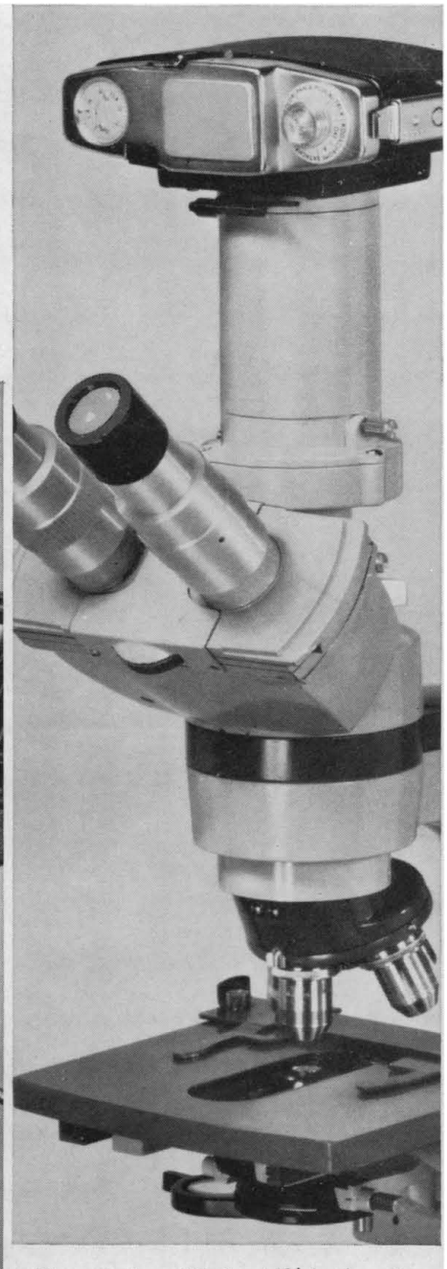

your key to better photomicrography!

It's no longer necessary to accept photomicrographs that are crisply in focus only in a small, pre-selected area of the field of view. The new AO Microstar® Microscope's unique infinity-corrected optics provide a visual image that's amazingly flat over the entire field. This superior image quality means you now can make photomicrographs that are flat and in focus from edge-to-edge and corner-to-corner of the print.

Camera work is easier, too. Visual and photomicrographic systems are parfocal... you just focus the specimen through the eyepieces and snap the shutter. Field coverage and film magnification remain constant regardless of changes in interpupillary settings. No compensations to make.

Your choice of Polaroid®† back and exclusive, inexpensive 35mm back that provides *both* 2.8X and 5X film magnifications. Polaroid 3¼" x 4¼" back and 35mm camera back are used interchangeably with the same lens and shutter assembly. New Microstar also accommodates famous AO 682 camera.

Ask your AO Sales Representative to demonstrate the superior visual and photomicrographic image produced by the new AO Microstar. Or, write for descriptive brochure.
