FULL SCALE VALUES

HIGHER SENSITIVITY RECORDER

V.O.M.-6

by Bausch & Lomb

Records Signals of 2.5 Millivolts Full Scale Accurately!

... a self-balancing, complete 5-inch strip-chart recorder ... brings you complete versatility ... without costly extras ... at one low price. Its higher sensitivity extends its usefulness in a great number of applications ... with the B&L Opacimeter—determine and record opacity of paper ... with the B&L Data Acquisition System—it extends the range of the Spectronic-20 to 340m μ ... many transducers can be used directly with the V.O.M.-6, no further amplification is normally required in gas chromatography applications.

COMPARE THESE EXCLUSIVE ADVANTAGES:

- Six voltage ranges, 2.5 millivolts to 125 volts
- Six linear ohms scales, 0.25 ohms-to-25,000 ohms full scale, with zener diode D.C. supply
- 5 D.C. current ranges, 2.5 microamperes to 25 milliamperes
- Off balance input impedance—over 10 megohms
- Five chart speeds, 400-to-1 range
- Event marker, with solenoid operated marking pens
- Function switch with mechanical pen letdown
- Operates in flat, 30° tilt, or wall-mounted position
- Compact, only 4 $\frac{3}{4}$ " x 14 $\frac{1}{2}$ " x 11 $\frac{3}{4}$ "
- Portable, only 18 lbs.

UNBREAKABLE

NALGENE® PIPETS...

with Permanent Graduations

Don't just *reduce* pipet breakage . . . *eliminate* it . . . with unbreakable Nalgene pipets. And for the first time you're safe . . . they're chip-proof . . . they can't cut . . . they never get ragged. They're so easy to read, too. Big, bright "Magni-Vue" markings can't be removed, chemically or mechanically . . . last the full life of the pipet. The non-reflective polypropylene lets you see the entire column of a water-clear liquid, not just the liquid line. See-through clarity simplifies reading. Accuracy, well within published tolerances, is further enhanced because the non-adherent surface eliminates meniscus. Drops form on the inside of the tip, not around it, and are more uniform. The non-wetting surface drains dry . . . to the very last drop . . . faster than ever before. You can autoclave them again . . . and again . . . and again. And price-wise, they're surprisingly inexpensive . . . from \$2.10 to \$2.80 each. Sizes available are 1, 2, 5 and 10 ml, in transfer, serological and measuring styles. Why not get the full story from your lab supply dealer . . . or write Dept. 2701, The Nalge Co., Inc., 75 Panorama Creek Drive, Rochester, New York 14625.
