

The Optical Society of America's Adolph Lomb medal has been presented to **Gordon H. Spencer**, of Scientific Calculations, Inc., Rochester, N.Y., for his work in lens design.

Carl Levenson, medical director of the Moss Rehabilitation Hospital and director of the physical medicine and rehabilitation department at Albert Einstein Medical Center, has been appointed clinical professor of physical medicine and rehabilitation at Temple University's medical school, Philadelphia, Pa.

Fred S. Honkala, chairman of the geology department, Montana State University, has been appointed graduate dean of the university, and research director of the MSU Foundation, effective 1 July.

Recent Deaths

Cecil L. Brown, 65; recently retired manager of the office of scientific liaison, Esso Research Engineering, Linden, N.J., and newly appointed assistant program administrator in the division of research grants and fellowships, American Chemical Society; 27 April.

Rachel Carson, 56; author of *The Silent Spring*, which touched off a nationwide controversy over misuses of pesticides; 14 April.

Gerhard Domagk, 68, winner of the 1939 Nobel Prize in physiology and medicine for his discovery of protosil, the first sulfonamide; 24 April.

Arthur Hill, Whitehead professor emeritus of organic chemistry at Yale University; 22 April.

Hugh E. Keeler, 75; professor emeritus of mechanical engineering at the University of Michigan; 21 April.

Charles Leutz, 65; retired senior staff member, Applied Physics Laboratory, Johns Hopkins University; 25 April.

James Persons Simonds, 85; professor emeritus and former chairman of the pathology department, Northwestern University medical school, Chicago, Ill.; 17 March.

Theodor Wanko, 40; head of the electron microscopy program, in the ophthalmology branch, National Institute of Neurological Diseases and Blindness; 3 April.

Joshua Whatmough, 67; retired chairman of the department of linguistics at Harvard University; 25 April.

CHLORINE DETERMINATIONS

Chlorine determinations are now performed faster and at lower prices than ever before by General Atomic's Activation Analysis Service. Results are telephoned within 5 working days of receipt of the samples (or within 2 days if required), and then immediately confirmed by air mail. Prices for these sensitive instrumental chlorine determinations are now as low as \$15 per sample when contracted for in quantity, and only \$25 per sample in small lots.

The activation analysis method is rapid, nondestructive, accurate (± 2 per cent of the value at higher chlorine levels), and sensitive—down to 0.05 μg or 0.005 ppm in 10 gram samples. The method consists of activating the chlorine with neutrons and counting the radioactive chlorine which results. Routine determination of chlorine in most organic and many inorganic sample types is included in this fast, economical service.

The activation analysis method for chlorine has been greatly advanced and thoroughly proven at General Atomic with the analysis of thousands of samples of such materials as plastics, petroleum hydrocarbons, agricultural products, synthetic fibers, rubber, animal tissue, beryllium, carbon, coal, aqueous solutions, solvents, and many others. In cases where the purely instrumental method is not feasible, radiochemical separations can be used to obtain the desired results. Analyses for F, Br, and I are similarly rapid, sensitive and low in cost.

For detailed price schedule and delivery information, please complete and return the coupon below.

FOR FREE ACTIVATION ANALYSIS BROCHURE AND CHLORINE DETERMINATION INFORMATION, fill out this coupon and mail to:

COLLODION BAGS

Concentration and enrichment of protein solutions is a preliminary step to electrophoretic differentiation. A simple, time saving method is by use of S&S Collodion Bags, an exclusive specialty marketed only by S&S.

Properties of S&S Collodion Bags

Collodion bags retain proteins of a molecular weight of approximately 70,000 to 100,000. Each bag is about 8 cm in height with a maximum open end width of 1.5 cm. Capacity is 8 ml. The bag tapers to the closed end where albumen is concentrated. Filtration rate is 6-9 ml of distilled water per hour. Bags may be reused as many as 5 times, if carefully cleaned and kept in moist condition.

Apparatus is simple, inexpensive

S&S Collodion Bags require a special glass holder, which is shown on the illustration above. The apparatus is inexpensive, simple in construction, and easy to operate.

Ask your laboratory supply house for S&S Collodion Bags—an important advancement in preparatory techniques for albumen determination that saves time, effort, and contributes to increased accuracy of measurement.

For free data sheet and prices, mail coupon below. Information will be sent with no obligation.

Calcification in Biological Systems

AAAS Symposium Volume No. 64

Edited by R. F. Sognnaes

July 1960

526 pp., 283 illus., \$9.75,
AAAS members' cash orders, \$8.50

This monograph deals comprehensively with the mechanism of mineral deposition throughout the animal kingdom. Current research approaches, findings and hypotheses are presented by investigators representing disciplines ranging from physical chemistry and histochemistry to electron microscopy and tissue culture. The central theme revolves about the question, "Why do certain normal and pathological tissues calcify?"

The 22 chapters are organized in an evolutionary sequence; (1) calcification within unicellular organisms and various lower animals, that is, the shells of the mollusc, the gastrolith and exoskeleton of the lobster, the mineralizing leg tendon of the turkey and the otolithic organ of the rat; (2) elements and mechanisms involved in the calcification of cartilage, bone, dentin, enamel and various pathological concretions; (3) experimental observations in organ transplants and in tissue culture; and culminating with (4) the physical and chemical nature of and relationship between the ultimate inorganic and organic building blocks most typical of normal calcification in the human organism.

POSITIONS WANTED

Editor-Writer. Versatile, experienced science editor with physics and medical training; available for freelance assignments. Box 404, SCIENCE. 5/8

Research Officer 2, Ph.D., Canada Department Agriculture. Desires position in U.S.A. or rehiring at Grade 2A. Present salary \$7340. Box 411, SCIENCE.

Virologist, D.Sc. Broad experience tissue culture, different aspects virus-cell relationship. Wishes teaching, directing research program. Box 413, SCIENCE. X

POSITIONS WANTED

Endocrinologist, M.D., Ph.D. Certified internist, considerable laboratory and clinical experience, seeks position emphasizing teaching and research. Box 412, SCIENCE. X

(a) **Organic Chemist, Ph.D.,** 10 yrs. exp. R&D with drug mfr.; available for administrative level position. (b) **Biology-Cytology Ph.D.,** college teaching exp.; desires teach-research appointment. For details write Woodward Medical Bureau, Science Dept. 185 N. Wabash, Chicago, Ill. 60601. X

(a) **Ph.D. Biologist;** training strength in cytology, cytogenetics, histology, physiology; prefers university teaching-research or research. (b) **Ph.D. Biochemist** (minors: organic and bacteriology); teaching, clinical research experience; prefers teaching/clinical. (c) **M.S. Physiologist** (endocrinology, neurology minors); doctoral candidacy complete; prefers electrophysiological CNS, reproductive endocrinology, physiology research or teaching. (Please write for information regarding these and other scientists, senior and junior, in all fields.) Science Division, The Medical Bureau, Inc., 900 North Michigan Avenue, Chicago, Illinois 60611. X

Physiologist, Ph.D., 20 years of experience in teaching and research in medicine. Cardiovascular, renal, and endocrine research. Seek academic medical administrative position. Box 409, SCIENCE. 5/8

POSITIONS OPEN

RESEARCH ASSOCIATE

LOBUND LABORATORY, UNIVERSITY OF NOTRE DAME
Division of Biochemistry and Nutrition

Opportunity to work independently on cholesterol and bile acid metabolism in the unique germ-free animal. Position requires M.S. in biochemistry with background in nutrition. Direct inquiries to **Personnel Director, University of Notre Dame, Notre Dame, Indiana.** 5/8

POSITIONS OPEN

Graduate assistantships and research associates in **Tropical Medicine and Medical Parasitology** are available beginning September 1964. Salary ranges from \$2400 to \$3000. Course and research activities leading to the M.S. or Ph.D. are available. Departmental research activities include studies on the ultrastructure, immunology, and biochemistry of endoparasites. Interested applicants should apply to **Dr. J. C. Swartzwelder, Chairman, Department of Tropical Medicine and Medical Parasitology, Louisiana State University School of Medicine, 1542 Tulane Avenue, New Orleans 12, Louisiana.** 5/8, 15, 22

SENIOR PHARMACOLOGIST

HAZELTON LABORATORIES, a leading independent company specializing in the Life Sciences, needs a Senior Pharmacologist (Ph.D.) with a minimum of 5 years of industrial experience preferred. Position involves design, coordination and evaluation of interdisciplinary research programs; liaison with clients and federal regulatory agencies. Opportunity for scientific meetings attendance and publications. Liberal employee benefit programs including profit sharing. Salary commensurate with experience and degrees. Please send résumé to: K. T. Paynter, Personnel Manager

185 N. Wabash Ave., Chicago, Illinois 60601

Full-time Researchers in the fields of internal medicine, biochemistry and physiology desired for research-teaching program in continuing education. Salary \$25,000 to \$30,000 per annum.

Box 367, SCIENCE

HISTOCHEMIST EXPERIMENTAL MORPHOLOGIST

Ph.D. or equivalent. Active research program in enzyme and electron histochemistry. Hospital-affiliated research institute. New York.

Box 376, SCIENCE

(a) **Ph.D. Microbiologist**, virology training; direct, conduct R&D of viral vaccines; to \$11,000; pharmaceutical firm; East. (b) **Cytologist**, registered/degree; experienced screening, reporting on slides; busy private laboratory; Midwest; to \$7500. (c) **Chemists**, all levels for expanding industrial chemical company; Midwest. (d) **Ph.D. Clinical Biochemist**, interest in clinical applications; some experience; 600-bed eastern hospital; \$12,000. (e) **Junior Pharmacologist**, B.S. biology or pharmacy; major eastern drug house prefers candidates in area; to \$7200. (f) **Clinical Biochemist**, direct department in 700-bed eastern hospital. (g) **Testers**, two or more years' college chemistry/hospital chemistry laboratory experience; electronics, optics, or physics helpful; Central instrument company; to \$6000. *Faculty Appointments:* (h) **Ph.D. Biologist**, genetics, embryology, general physiology teaching small Central college. (i) **Ph.D./M.S. Pharmacologist**, small professional college; Central. (j) **Ph.D. Zoologist**, some experience, strong teaching interests; small eastern professional college. (k) **Ph.D. Bacteriology**, nursing microbiology; microbiology, biology laboratory; North-central university. Many other opportunities available for junior and senior scientists. Please write to **Science Division, The Medical Bureau, Inc.**, 900 North Michigan Avenue, Chicago, Illinois 60611. X

Predoctoral Assistantships and Traineeships in Physiology. Excellent opportunities for graduate students leading to the Ph.D. Ample stipends and free tuition. Training and research in biophysics, cellular physiology, endocrinology, muscle, water metabolism, cardiovascular, gastrointestinal and environmental physiology. Write for details to Head, Department of Physiology, University of Illinois at the Medical Center, Chicago, Illinois, 5/8, 15, 22

RESEARCH BIOCHEMIST

Biochemist or Biologist with Ph.D. or M.S. for biochemical and immunological research on lipocarbohydrates. Age under 35. Excellent salary. Direct résumé to Personnel Director, **Evanston Hospital Association**, 2650 Ridge Avenue, Evanston, Illinois.

FELLOWSHIPS

The **University of Melbourne** invites applications for a Research Fellowship tenable for 1, 2, or 3 years. The fellowship is intended for a scholar who has recently obtained a degree of Doctor of Philosophy (or equivalent qualification). The salary will be in the range of £A1850 to £A2600 and up to £A200 may be paid for transport to Melbourne. Applications should be lodged with the Office of the Dean of Graduate Studies, University of Melbourne, Parkville, N.2, Victoria, Australia, by 31 July 1964. Conditions for the fellowship may be obtained from the Australian Consulate-General, 636 Fifth Avenue, New York, N.Y. 10020, U.S.A., or from L. R. D. Pyke, Secretary for Graduate Studies. X

AAAS Symposium Volumes

AGING . . . SOME SOCIAL AND BIOLOGICAL ASPECTS

Edited by Nathan W. Shock. 436 pages. 65 illustrations. References. Index. 1960. \$8.50 (\$7.50 prepaid, for AAAS members).

"This monograph should be of immense interest to scientists wishing to gain a general understanding of the subject. In fact it could be profitably read by a large number of well informed nonscientific people who are desirous of recognizing the aging process and its consequences. The publishers have done excellently as to printing and binding. It is easy to read, and the illustrations are of top quality. The indexing of authors and subjects is quite adequate."

Food Technology, May 1962

ALCOHOLISM—BASIC ASPECTS AND TREATMENT

Edited by Harold E. Himwich. 220 pages. 33 illustrations. References. Index. 1957. \$5.75 (\$5.00 prepaid, for AAAS members).

"This collection is a fine factual, and healthily undigested, presentation of research on alcohol . . . arranged, edited, and summarized . . . with concision and clarity."

Contemporary Psychology,
Jan. 1959

LOW-LEVEL IRRADIATION

Edited by Austin M. Bruce. 158 pages. 18 illustrations. References. Index. 1959. \$3.75 (\$3.25 prepaid, for AAAS members).

" . . . reveal the authors' skill in summarizing for the informed layman the status of extremely complex and only partially understood information . . . these articles . . . discuss the crux of the problem."

*American Journal of
Roentgenology, Radium Therapy
and Nuclear Medicine*, Feb. 1961

CONGENITAL HEART DISEASE

Edited by A. D. Bass and G. K. Moe. 372 pages. 147 illustrations. References. Index. 1960. \$7.50 (\$6.50 prepaid, for AAAS members).

" . . . precise editing . . . maximum amount of information . . . distinguished panel of authors . . . constantly high and informative level in its presentation . . . a valuable and concise summation of the more important aspects of congenital heart disease."

American Journal of Cardiology,
Aug. 1961
