

Our Digital Data Recording Systems are designed with your analytical problem in mind, and matched to your instrumentation through use of superior digital transducers, translation and programming equipment. In addition, computer subroutines are available for use in the set-up of the program for your analysis.

Incorporating a Perkin-Elmer System makes greater use of your existing computer and instrument facilities. Heart of the System is an all-solidstate Digital Data Recorder, working with appropriate encoding components from our full line of digital transducers, and matched to your instrumentation. A complete selection of terminal equipment is available. Output can be on line, or via punched paper tape or punched cards.

For complete product line brochures of our Digital Data Recording Systems, write Perkin-Elmer Corporation, Electronic Products Division, 723 Main Avenue, Norwalk, Connecticut. (203) 847-0411

Come in and discuss your analytical instrument readout requirements with us at Booth F-120 at the Pittsburgh Conference.

5 FEBRUARY 1965

the phytoplankton, large and small, not amenable to preservation by usual methods. M. B. Allen mentioned some effects of pollution on the marine biota.

Various activities of marine microorganisms were considered. The primary production of organic matter by photosynthetic microorganisms in the sea was discussed by J. D. H. Strickland. R. Y. Morita (Oregon State University) presented recent results from his laboratory on the effects of low temperature on marine bacteria and the factors responsible for obligate cryophily. The nutrition of phytoplankton and the possible role of soluble organic compounds produced by phytoplankton in the nutrition of zooplankton were discussed by M. B. Allen. (Allen also commented on the cycles of nitrogen and sulfur.) C. E. ZoBell described various geomicrobiological activities of marine microorganisms.

A general discussion period concluded the conference.

M. B. Allen Kaiser Foundation Research Institute, Richmond, California

Forthcoming Events

February

8-10. American Astronautical Soc., annual, Denver, Colo. (Miss G. W. Heath, Flight Safety Foundation, 468 Park Ave. S., New York 10016)

8-11. Managerial Implications of the Emerging Technology, Washington, D.C. (P. W. Howerton Center for Technology and Administration, American University, 2000 G St., NW, Washington 20006)

8-12. American Soc. for Testing and Materials, spring meeting, Cleveland, Ohio. (ASTM, 1916 Race St., Philadelphia, Pa.)

9-10. International Soc. of Terrain Vehicle Systems, U.S.-Canadian regional meeting, Houghton, Mich. (E. W. Niemi, Dept. of Mechanical Engineering, Michigan Technological Univ., Houghton)

10-11. Corrosion of Water Supply Systems, 7th sanitary engineering conf., Urbana, Ill. (B. B. Ewing, Univ. of Illinois, Urbana)

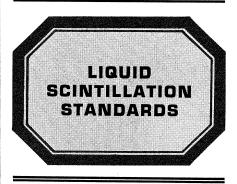

10-12. American Educational Research Assoc., annual, Chicago, Ill. (R. A. Dershemer, 1201 16th St., NW, Washington, D.C.)

10-12. National Assoc. Corrosion Engineers, conf., Calgary, Canada. (T. J. Hull, NACE, 980 M&M Bldg., Houston, Tex. 77002)

10-13. National Soc. of College Teachers of Education, annual, Chicago, Ill. (E. J. Clark, Indiana State College, Terre Haute)

10-13. American College of Radiology, annual, Philadelphia, Pa. (F. H. Squire,

NUCLEAR-CHICAGO RESEARCH QUALITY RADIOCHEMICALS

Four sets, two individual scintillation standards, and two standardized solutions for internal calibrating are available.

SCINTILLATION STANDARDS SETS

Consist of calibrated samples containing PPO and POPOP in toluene. Volume of each and POPOP in toluene. Volume of each standard is 15 ml, sealed in a 20 ml low-activity glass vial. Packaged in foamed-plastic holders which double as storage racks. Stated activities within $\pm 3\%$ of true values. Certification of each standard supplied with each set.

Unquenched C14 and H3 Set. Consists of unquenched samples of carbon-14 and tri-tium labelled toluene plus a toluene blank. Model 180040 Set, complete\$65.00

Quenched H³ and C¹⁴ Sets. Accurately assayed standards. Each has different counting rate due to quenching.

Model 180050 Tritium Set (5 standards

1 x 10⁶ dpm nominal each).....\$65.00 Model 180060 Carbon-14 Set (6 standards, 2 x 10⁵ dpm nominal each)......\$ 75.00

Model 180070 (both sets).....\$125.00

Quenched S³⁵ Set. Six accurately assayed quenched standards.

Model 180080 Sulfur-35 Set (6 standards 4 x 10⁵ dpm nominal each)......\$80.00

INDIVIDUAL STANDARDS

P³² and S³⁵ Scintillation Standards, Furnished in flame-sealed, 20 ml low-activity glass vials. Stated activities within $\pm 4\%$ of true values. Individual certification supplied with each standard.

Model 188350 Phosphorus-32

(15 ml, 2 x 10⁶ dpm nominal)......\$40.00 Model 188240 Sulfur-35 (15 ml, 4 x 10⁵ dpm nominal)......\$30.00

Standardized Solutions of Toluene-C¹⁴ and Toluene-H³. For internal calibration in liquid scintillation counting. Supplied in flame-sealed glass ampoules. Stated activities are $\pm 2\%$ of true values. Individual certification supplied with each standard. Model 188270 Toluene-Cl4

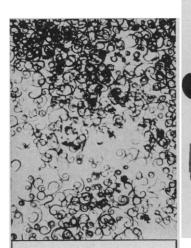

(5 ml, 3 x 10⁶ dpm nominal)......\$20.00 Model 188280 Toluene-H³ (5 ml, 5 x 10⁶ dpm nominal)......\$20.00

Detailed specifications are available on request, as are current schedules containing complete radiochemical listings and information. Please write, or call 312 827-4456 collect.

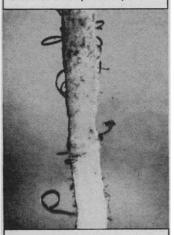

NUC:G-4-271

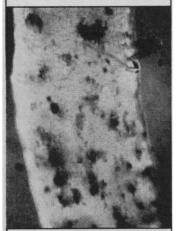

349 Howard Avenue, Des Plaines, Illinois 60018

Photomicrograph of a mass of spiral nematodes showing their characteristic spiral shape. 6×.

Specimens penetrating a small root of boxwood. 24×.

Boxwood root showing lesions caused by R. buxophilus. Note the two specimens partially embedded in the root. 48×.

Spiral nematodes are soil-inhabiting, plantparasitic organisms, the first one being described by deMan in 1876. They're found in temperate and tropical countries throughout the world. They feed on their host ectoparasitically and are detected in the soil or partially or completely embedded in their particular hosts. They are the cause of stunted, nonvigorous plants with reduced root systems. And they're small--only about 1mm in length.

Government agencies and crop protection and research workers around the globe are searching for a sound program for control of these and similar parasites. To study the pathogenicity of spiral nematodes, many nematologists enlist the aid of a Bausch & Lomb StereoZoom Microscope. Microvision in natural 3-dimension with magnified views of the diminutive Rotylenchus and Helicotylenchus

... too small to be seen clearly with the unaided eye . . . is now possible. All aspects of their life cycle and modus operandi can be studied vividly and realistically.

Let the sharp, bright imagery of the Stereo-Zoom . . . at any magnification from $3.5 \times$ to $120 \times \ldots$ help you in your precision studies. To find out how you can benefit from the versatile StereoZoom, circle ad number below on magazine's reply card and mail it for Catalog D-15; call your dealer; or write for a demonstration-right in your own laboratory. Bausch & Lomb Incorporated, 85614 Bausch Street, Rochester, New York 14602.

All photomicrographs of a spiral nematode, Rotylenchus buxophilus, were originally published in University of Maryland Agricultural Experiment Station Bulletin A-85 in 1956 by A. Morgan Golden, Nematologist, Crops Research ۶Þ, **BAUSCH & LOMB** Division, ARS, USDA, Beltsville,

1964 MASTER DESIGN AWARD WINNER-Microscopes for Science Teaching and Flexiscope 640

Presbyterian-St. Luke's Hospital, 1753 West Congress St., Chicago, Ill. 60606)

11-13, Biology of Human Variation, conf., New York Acad. of Sciences, New York, N.Y. (NYAS, 2 E. 63 St., New York 10021)

12. Science Programs for General Education and the Preparation of Elementary Teachers, conf., Long Beach, Calif. (A. F. Eiss, National Science Teachers Assoc., 1201 16th St., NW, Washington, D.C.)

12-17. All Science Conf., annual, Karachi, Pakistan. (N. Ahmad, Secretary General, Pakistan Assoc. for the Advancement of Science, Karachi)

13-15. National Assoc. for Research in Science Teaching, annual, Chicago, Ill. (J. D. Novak, Bio-Science Dept., Purdue Univ., Lafayette, Indiana)

14. Scientific Conference on Psychoanalysis, 3rd annual, Council of Psychoanalytic Psychotherapists, Inc., New York, N.Y. (Miss M. Nelson, 1965 Conference Program, Box 255, East Setauket, Long Island, N.Y.)

14-11. German Foundation for the Developing Countries, Public Health Training Problems in Asia, intern. seminar, Berlin, Germany. (GFDC, Tagungsreferat, Agrippinenstrasse 10, 53 Bonn, Germany)

14-18. American Inst. Mining, Metallurgical and Petroleum Engineers, annual, Chicago, Ill. (R. W. Taylor, AIME, 345 E. 47 St., New York, N.Y. 10017)

22-26. American Soc. for **Metals**, western metal and tool exposition and conf., Los Angeles, Calif. (ASM, Metals Park, Ohio 44073)

22–26. Society for Nondestructive Testing, spring convention, Los Angeles, Calif. (SNT, 914 Chicago Ave., Evanston, Ill. 60202)

23–24. National **Dairy** Engineering Conf., East Lansing, Mich. (C. W. Hall, Agricultural Engineering Dept., Michigan State Univ., East Lansing)

23-25. High Polymer Conf., East German Chemical Soc., Magdeburg. (East German Chemical Soc., Unter den Linden 68/70, Berlin W.8)

24–26. Biophysical Soc., 9th annual, San Francisco, Calif. (R. B. Setlow, Biophysical Soc., Oak Ridge National Laboratory, P.O. Box Y, Oak Ridge, Tenn. 37831)

24–26. American Crystallographic Assoc., Suffern, N.Y. (W. L. Kehl, ACA, Gulf Research and Development Corp., P.O. Box 2038, Pittsburgh, Pa. 15230)

24–28. Canadian Assoc. of **Radiologists**, annual, Toronto, Ontario. (Miss A. I. Ekstrand, CAR, 1555 Summerhill Ave., Montreal, Canada)

25-26. Society for **Information Display**, 5th natl. convention and symp., Santa Monica, Calif. (R. E. Bernberg, 591 Tigertail Road, Los Angeles, Calif. 90049)

25–27. American Acad. of Forensic Sciences, annual, Chicago, Ill. (W. J. R. Camp, 1853 W. Polk St., Chicago 12) 26–27. American Physical Soc., Norman,

Okla. (R. G. Sachs, Argonne National Laboratory, Argonne, Ill. 60440)

27–15. Apr. Commonwealth Mining and Metallurgical Congr., Australasian Inst. Mining and Metallurgy, Australia and New Zealand. (AIMM, Osborne House, 299 Little Collins St., Melbourne, C.1, Victoria, Australia)

28-3. Gas Turbine Conf., American Soc. Mechanical Engineers, Washington, D.C. (D. J. Schneider, ASME, 345 E. 47 St., New York, N.Y. 10017)

5 FEBRUARY 1965

This is a plan of level premium Term insurance which provides its largest amount of protection initially, reducing by schedule each year over a 20year period to recognize decreasing insurance needs. There are several other insurance periods, and Home Protection policies are available at all ages under 56.

ARE YOU ELIGIBLE FOR TIAA? Yes, if you are employed by a college, university, private school, or other nonprofit educational or scientific institution that qualifies for TIAA eligibility.

Send the coupon for the new Life Insurance Guide and a personal illustration of TIAA policies for your age. TIAA is nonprofit and employs no agents.
