The attendees at the meeting were informed of the efforts of Congressman Schmidhauser (D-Iowa) to introduce a bill (H.R. 3434) designed to provide support for research on and development of means for utilizing solar energy.

REICHERT ZETOPAN FOR ALL MICROSCOPIC INVESTIGATIONS

The Reichert Zetopan is ingeniously designed for maximum working comfort and operational ease.

It has built-in illuminating systems for transmitted, reflected and "mixed" light, and offers unlimited versatility, for investigating transparent, opaque and semi-opaque specimens.

Outstanding features are:

Contrast Fluorescence Microscopy • Anoptral & Interference Contrast • Polarization Interferometry • Cinephotomicrography and Time Lapse System • Four alternate Light Sources • Components for research in metallography & Polarized Light • Photomicrography with 35 mm. and Polaroid Land Cameras

Where the finest separation, analysis and purity evaluation of protein systems is being carried out...

DISC ELECTROPHORESIS

is in the act.

Copyright 1965 Canal Industrial Corp.

Now in use in more than 2000 laboratories, Disc Electrophoresis offers unequalled sensitivity (to 0.01 microgram), speed (separation in 10-30 minutes), simplicity and reproducibility. Disc Electrophoresis is applicable to almost every area of protein research and clinical investigation, improving over separations by other methods and giving new separations never before possible by any technique.

In Disc Electrophoresis, migration of sample substances through specially prepared columns of polyacrylamide gel produces exceptionally sharp bands of isolated fractions, "stacked" in disc-like zones as little as tens of microns thick. A random sample of the recent literature reporting uses of Disc Electrophoresis includes:

SOURCES: Amoebae, *E. coli*, flu virus, micobacteria, neurospora, polio virus, ribosomes, slime mould, staphylococci, tubercle bacilli; algae, cats, cattle, dogs, earthworms, fish, guinea pigs, hamsters, horses, humans, insects, lobsters, mice, pigs, plants, quail, rabbits, rats, sea urchins, sheep, snails, squid; tissue extracts of aorta, brain, horny tissue, kidney, lens, muscle, pancreas, parotid, pituitary, skin, thymus, thyroid; fluids such as axoplasm, blood, cerebrospinal fluid, milk, pancreatic juice, saliva, sperm, umbilical cord serum, urine and uterine fluid.

SUBSTANCES SEPARATED: Proteins, including C-reactive proteins, glycoproteins, mucoproteins, nucleic acids, nucleo-proteins and thyroxine-binding proteins; hemoglobins and haptoglobins; globulins, histones, human and bovine growth hormones, ovine follicle stimulating hormone, human chorionic gonadotropin, enterotoxins, Hageman factor, α -crystallin, collagen, diglyceride and prolactin; amylase, aminopeptidase, phosphatases; β -galactosidase, carbonic anhydrase, carboxypeptidase, dehydrolipamide dehydrogenase, glycogen phosphorylase, lipase, lactic and malic dehydrogenase, Phosphorylase, ribonuclease, sialidase, transaminase and transpeptidase.

DIAGNOSIS OF: Acute schizophrenia, cancer of the breast and lung, glomerulonephritis, liver pathology, lupus erythematosus, macroglobulinemia, milk allergy, myeloma, myocardial infarction, nephrosis, normal and abnormal pregnancy, pneumonia, primary tumor sites, rheumatic fever, sickle cell anemia, thalassemia, tuberculosis and uremic-hemolytic syndrome.

TIME SCOPE LABELS

Identify glass slides in an instant with Time Scope Labels. Permanent self-sticking adhesive labels meet all legal requirements . . . eliminate unsanitary licking. Available in Standard or Tissue high thickness, Time Scope Labels measure $\frac{7}{8}$ " x $\frac{7}{8}$ ". In plain white or imprinted with laboratory name, Time Scope Labels can be pre-numbered if desired. Plain white end labels $\frac{3}{8}$ " x $\frac{7}{8}$ " also in Standard or Tissue high thickness. Pencil, pen, grease marker — all write perfectly on Time Scope Labels. In easy-to-use dispenser or sheet form.

what you
should know
about VYCOR®
BRAND

96%
silica labware

Our octagon design trademark means it is VYCOR brand ware. Nearly pure silica, it is capable of continuous service at 900°C. It can be quenched safely and repeatedly in ice water from that temperature. It may be safely used in place of fused silica or quartz.

You can do that with VYCOR brand ware because its coefficient of expansion is only 0.0000008/°C, the lowest of any commercial glass except fused silica.

Chemically, VYCOR brand ware is superior to borosilicate glasses in its resistance to acids and to alkalis even at high temperatures.

VYCOR brand ware is available nationwide. Your local labware supplier stocks beakers, flasks, crucibles, ground joints, and tubing. Choose from 132 types and sizes of this unique ware. It is in our PYREX® brand Labware Catalog LG-3.

Item for item, VYCOR brand ware generally costs you less than transparent fused quartz, performs just as well, and is more readily available. You can bring its price down even lower by combining VYCOR brand items with your PYREX brand labware order to save as much as 28 cents on the dollar with quantity discounts.

Bad Day at the Fujiyama Sake Mill

Hon. Plant Manager makes sudden cut in production, chief chemist fails again in search for instant sake, and Hon. Board Chairman arrives for inspection tour. Ah, so. But fortune yet may smile. Confucius say, "wise man find no pressing problems when he use E-D filter paper."

A modest exaggeration, perhaps, but one thing is sure . . . wherever you find a laboratory, these days, or a processing operation utilizing filtration, you will probably find E-D, the ubiquitous filter paper, on the job. Why? Three good reasons:

First — Users know that the quality and uniformity of E-D papers is assured by meticulous quality control at every stage of manufacture.

Second — E-D can supply a broad standard assortment of both laboratory and industrial papers to meet most requirements.

Third — Users like the service they get from E-D. Nowhere else can they get such prompt, courteous attention to small orders, special requirements, etc.

Write for catalog information on the complete E-D line of laboratory and industrial filter papers. If you have a special filtering problem, let our paper engineers help you with the solution.
