Play it cool

Use Porta-Cool for your cooling baths.

New Porta-Cool is the answer for fast, easy set up of your cooling baths. It's compact and completely portable. Cools rapidly and keeps cool. Cooling begins immediately at the flip of a switch. No need for "watch dog" monitoring. Simply turn it "on" and forget it (forget about ice, too). Porta-Cool is a self-contained unit consisting of a compressor-type refrigeration system that works through an efficient multi-coil cooling head. The rapid cooling rate will reduce the temperature of a five gallon uninsulated tank of water from 25°C to 0°C in less than two hours.

Use the new Porta-Cool with a Porta-Temp.

Used in conjunction with Precision's Porta-Temp—a compact, constant temperature bath heater, controller, stirrer (only \$125)—the Porta-Cool makes any container a low cost, wide range constant temperature bath and circulating system. Will maintain a temperature from 5°C to 90°C at a uniformity of $\pm 0.25^\circ\text{C}$ or better. Priced at only \$295 the Porta-Cool offers low operating cost and virtually maintenance free operation. Play it cool . . . buy now from your near-by Precision Distributor or write us for Bulletin No. 628.

**PLATINUM
BY BISHOP
BECAUSE NOTHING
ELSE DOES IT
AT SO LITTLE COST**

Platinum, the miracle metal of so many uses, is surprisingly economical to use.

Platinum metals resist high temperatures, provide exceptional resistance to corrosion and erosion, perform catalytic actions. Yet, after years of service, the original metal can be recovered at a dollar value almost equal to original cost. This makes Platinum the soundest possible investment.

Bishop's broad line of lab ware, tubing, wire, gauze, sheet, strip, salts, and chemicals are described in detail in our Catalog P-7. Request a copy. Also P-5B, CD-6 and P-12.

TIME LABORATORY
TAPES and LABELS

Self-sticking tapes and labels eliminate a direct source of personal contamination in laboratories. Pre-printed or plain tapes and labels provide a quick means of marking laboratory equipment. Just write necessary data on label (use pencil, pen or grease marker) and place it on any surface — glass, metal or plastic. Labels stick tight through autoclave (up to 250°), deep freeze (to -70°), or water bath. When no longer needed these tapes and labels can be quickly removed leaving no sticky residue. Vinyl Coated — available in white or colors.

See your laboratory or hospital supplier for a complete selection of Time Tapes and Labels.

LONGEVITY...

IS AN
UNBREAKABLE STEM

Most separatory funnels lead a short, expensive life. Snap a fragile stem, and it's all over. Not so with a **NALGENE® SEPARATORY FUNNEL**... here's a stem that can't break or chip. One-piece molding of polypropylene produces smooth, continuous surfaces—insuring free flow. So translucent you see separation lines between two phases clear down to the stopcock housing. Stopcock is non-stick TEFLON® TFE... provides a perfect seal without lubrication, eliminates contamination. This funnel resists virtually all chemicals—including HF—and can be autoclaved. Nalgene Separatory Funnels are available in 125, 250 and 500 ml sizes. May be assorted with other Nalgene labware for maximum discount. Ask your lab supply dealer, or write Dept. 21191, The Nalge Co., Inc., 75 Panorama Creek Dr., Rochester, N.Y. 14625.

RELIABILITY

*Ultra high speed
Monroe DATA/LOG®
MC 4000 Printer
delivers*

**6000 lines
per minute!**

That's 100 lines per second, synchronous or any speed less than 100 lines per second that your application might require. The MC 4000 is truly synchronous or asynchronous.

A non-impact printer. Completely silent. Absolute reliability.

It's available in a numeric model (15 characters in each column) or in an alphanumeric model (43 to 64 characters in each column). Both models are 32 columns wide and have the same 6000 lines per minute printing speed.

Look at these MC 4000 features: Character serial input, bit parallel. Data transfer time of 50 microseconds (no buffers required). Only two moving parts—the paper feed stepping motor and the fan. Compact: 10½" high, 10¾" wide. Rack mount available. All solid state with cathode ray tube through fiber optics.

Any 4 line code for the numeric model; any 6 line code for the alphanumeric model. Any logic level.

Price, just \$5650 for the numeric, \$5850 for the alphanumeric model.

Reliable. Silent. Ultra high speed Synchronous or asynchronous.

And, like all Monroe DATA/LOG printers, the MC 4000 is covered by a full year's warranty with on-site maintenance.

For additional information, specification sheets or a demonstration, write or call Monroe DATA/LOG Division of Litton Industries, 343 Sansome, San Francisco. (415) 397-2813.

HIGH SPEED PRINTERS
AT NEW LOW PRICES!**

Check the new low prices on these two printers:

The MC 10-40, which prints 1040 lines per minute and has 4, 8, 12 or 16 columns of printing with 15 characters (0 through 9 plus 5 symbols) in each column. Prints legibly, reliably.

The MC 13-80, which prints 1380 lines per minute and delivers 4, 8, 12 or 16 columns of printing with 10 characters (0 through 9) in each column. Prints legibly, reliably.

Both are priced at:

4 column capacity	\$1790
8 column capacity	1890
12 column capacity	1980
16 column capacity	2480

Quantity discounts are available—and the cost of any unit is \$100 less than quoted above if it is to be used only with 3M Action paper.

Both models have parallel input, accept any 4 line code, any logic level, flat pack or roll record, and have low audible noise level. (No extra charge for any of these.) Options include high order zero suppression or high speed (250 microseconds transfer time) buffer registers.

Both models have cam driven hammers and clear, legible printouts. Neither model has hot and cold, sometimes running, solenoids. Both models have reliability.

The MC 10-40 and MC 13-80 are both covered by a one year warranty which includes parts and on-site maintenance.
