What  
degree of accuracy  
do you need  
in a polarimeter?

0.005°

PHOTOELECTRIC PRECISION POLARIMETER 0.005° gives you the ultimate in accuracy and speed of measurement. High precision is achieved by use of a Faraday modulator and electronic circuitry. Automatic control maintains full measurement accuracy even for strongly absorbent (approx. 97%) samples. Scales of divided circles and verniers are projected onto ground-glass screens at a magnification of 20x. This assures direct, parallax-free readings. The power supply provides stabilized voltages.

0.01°

POLARIMETER 0.01° is available in two models for tubes up to 200 and up to 400mm. in length. This uniquely designed instrument is built for convenience. All controls are within easy reach. For the first time a sliding tube changer has been built in, making a change of tubes possible from the outside without having to open the instrument housing.

0.05°

POLARIMETER 0.05° is perfectly suited as a standard instrument in the medical, chemical and pharmaceutical laboratory. The dividing line of the half-shade field has uniform sharpness regardless of length of tubes or turbidity of liquids tested. No need to refocus eyepiece after zero-setting the instrument.

## StereoZoom® helps compile a new atlas of fishes

This will be the first complete atlas of the early development stages of the bony fishes of the Chesapeake Bay area. The National Science Foundation awarded a grant to Mrs. Alice J. Mansueti to complete the project started by her husband, the late Dr. Romeo J. Mansueti, for the Chesapeake Biological Laboratory of the University of Maryland.

Mrs. Mansueti makes her own illustrations of tiny eggs and larval stages of fish. Some of the eggs, from which drawings are made, are only 0.75mm in diameter. She uses the StereoZoom exclusively. Mrs. Mansueti says: "I have been illustrating the egg and larval stages of fish for approximately 10 years, using the StereoZoom exclusively since it was purchased in 1960. I particularly like the zoom feature which enables me to draw details without danger of losing track of my specimen while changing to higher power to more clearly show the intricate structures."

To learn how one of the 24 StereoZoom models can help in your investigative work, send for Catalog 31-15. Write Bausch & Lomb, 64220 Bausch St., Rochester, New York 14602.
