*how much  
does a  
butterfly  
weigh  
after  
breakfast?*

Our specimen weighed .009 gram more than before his meal of nectar. Perhaps you're not interested in weighing a butterfly. But if you are interested in one transducer that is capable of measuring a variety of physical parameters, you will want Satham's Universal Transducing Cell—it costs only \$150. Interchangeable accessory heads are available for measuring **WEIGHT, DISPLACEMENT, FORCE or PRESSURE**. Accessories are priced at \$20 and \$50. A companion readout system is available for \$150. # For scientific spelunkers

Garden variety spelunkers explore caves. And good equipment helps insure their safety.

That's what Blickman's small lead caves are for.

They help scientists safely explore and process radioisotopes for medical, biological, agricultural or industrial use.

The job may be dissolving, blending, mixing, filtration, use of centrifuges, filling containers or you name it. These junior size lead caves can be adapted to a variety of small manipulators. You get great flexibility with maximum security.

Blickman has tailor-made lead caves for many institutions or companies such as Squibb and Union Carbide. You can share in this experience. The coupon gets you a catalog on radioisotope and other safety enclosures.

# Improve the performance of your lab staff... **AUTOMATICALLY**

This is the Shandon-Elliott 23-station automatic slide staining machine. With it you are assured an extremely high degree of reproducibility when preparing Pap stains, blood films, bone marrow spreads and tissue sections. It is equally well suited for routine slide staining or where absolute quality from slide to slide is required. Automatic slide staining improves the performance of your lab staff by releasing skilled technicians to do other important work.

The Shandon-Elliott 23-station slide staining machine, which holds up to 54 slides, is actually three machines in one. It acts as two separate machines operating simultaneously on different cycles, or as two separate units operating on the same staining cycle at the same time, or as one machine operating at all 23 staining positions. Cost: \$2200.

Other slide staining machines include 8-station model at \$1250 and 12-station model at \$1460. Also available is a Shandon-Elliott coverslip staining machine with a capacity of 72 coverslips at \$1250.

For more information on Shandon-Elliott slide and coverslip staining machines and other quality scientific tools, contact Shandon Scientific Company, Inc., 515 Broad Street, Sewickley, Pa. 15143 (Pittsburgh District).
