

efforts aimed at full clarification and prevention of cases of brain damage due to exogenous chemical agents. Protection of the public is the primary goal.

In their final recommendations the participants made the following points:

1) There is a strong need for continued and greatly expanded basic research relating to the developing nervous system.

2) Another paramount need is for the development of more effective monitoring systems for the collection and dissemination of data on drugs and toxic agents. The group welcomed the initiative of the FDA in embarking on a comprehensive review of drug efficacy, which should be immensely helpful in facilitating the evaluation of drug effects.

3) Long-term, follow-up studies should be undertaken of patients known to have been intoxicated, and surveillance of intoxicated patients should be maintained so that possible latent effects leading to manifestations of brain damage may be detected.

4) Massive efforts should be instituted to gather data to determine whether a relationship exists between the incidence of damage to the central nervous system and changes in environment and continued exposure to drugs and other agents. There was strong emphasis on the need for planning and study to devise appropriate, effective, methodological approaches in order to attain these objectives.

The meeting was held under the sponsorship of the National Institute of Neurological Diseases and Blindness. Detailed proceedings of the conference will be published by the Institute.

Econo-Cage Disposables ...the lowest-cost cages on the market

If you're looking for ways to save money, use a #21 Econo-Cage Disposable. It costs less than you pay for time, labor and equipment to clean and sterilize an ordinary cage. No problem getting rid of one, either. It incinerates with 1-2% residue.

Of course, you can reuse it if you prefer. Econo-Cages are precision molded of clear, sturdy polystyrene by the leading manufacturer of plastic cages. They stand by themselves, without supports.

This cage is roomy. It meets NIH standards, and houses up to eight mice in a 11½" x 7½" x 5" deep space. It can be fitted with either our #22D or 22H lid, illustrated in our catalog.

See for yourself why this is the best buy in disposable cages on the market—why more and more hospital, government, and private breeding and testing labs are using this low-cost rigid cage for mice.

Call your Econo-Cage distributor for complete details and prices . . . or send for our new catalog showing our complete line of disposable and permanent cages for mice, rats, hamsters, and guinea pigs.

COMPLETE ANIMAL HOUSING FACILITIES FOR LESS THAN \$100.00

For less than \$100.00, you get 48 #21 Disposable Econo-Cages, 24 #22D Econo-Lids, and one #111 Econo-Cage Rack.

Radiation Effects in Optical Materials

What defects are formed 0.01 microsecond after irradiation?

NRL invites you to help find the answer.

This is just one of the problems currently being studied at the Naval Research Laboratory. There are hundreds of others equally intriguing.

NRL, the Navy's corporate laboratory, is engaged in research and development embracing practically all branches of physical and engineering science and covering the entire range from basic investigations of fundamental problems to applied and developmental research.

The Laboratory has current vacancies and a continuing need for physicists, chemists, metallurgists, mathematicians, oceanographers, engineers (electronic and mechanical), and technical editors and writers for challenging assignments.

Persons appointed receive the full benefits of career Civil Service including regular salary increases and liberal retirement. The Metropolitan Area offers excellent living conditions and recreational facilities to suit a variety of needs. Six local universities provide opportunities for graduate study in almost any field.

The Laboratory encourages its employees to further their professional education. Send resume or Standard Form 57 to:

The Year's Biggest Value! Newest Lab-Line CO₂ INCUBATOR

...with more extras built-in*

...*at no extra cost!

Exclusive! Vertical Instrument Panel

Exclusive! Direct temperature dialing

Exclusive! All stainless steel—adjustable trays

Exclusive! "Full-vue" glass door

ONLY \$995

Cat. No. 417

Exceptional chamber uniformity

Individual controls for CO₂ and Air

Saves you time getting precise environmental control—and keeping it stable. Use as a CO₂ incubator, with or without humidity. Get important extras built-in . . . at no extra cost! Dollar for dollar, feature for feature, it's your best buy!

Temperature to 70°C
CO₂ tension: 0 to 20%
Humidification: to 98% R.H.
Chamber: 18" W x 17" D x 24" H
Overall: 26" W x 20" D x 38" H
