ESTUARIES

Estuaries is the first comprehensive collection of scientific papers covering the comparatively new field of estuarine research. The volume contains seventy-one articles on physical and biological factors, geomorphology, sediments and sedimentation, microbiota, ecology, evolution, fisheries, human influences, and pollution. *Estuaries* is based on the 1964 Conference on Estuaries, Jekyll Island, Georgia; additional papers have been included to make it the definitive work on the subject. A supplementary bibliography

lists the more recent contributions to the discipline.

Edited by George H. Lauff and published in April 1967 by the American Association for the Advancement of Science, *Estuaries* consists of 776 pages, a supplementary bibliography of 437 entries, 1639 literature citations, 525 illustrations, 85 tables, and an index of more than 14,000 entries.

Announcing the New EA System for ELECTROPHORESIS

EA-4 Power Control Supply

Designed especially for electrophoresis. Continuously variable voltage 0 to 500 V. *Stable*: Supplies constant voltage. (Ripple less than $\pm 0.1\%$. Unit regulates to $\pm 0.1\%$.) Also can supply constant current over entire range. No variance in mA with change in load $\pm 90\%$. Double scale meter shows V and mA. Exclusive built-in timer with automatic shut-off. Four chambers—simultaneous operation (7 tests per chamber). Constant current control over entire electrophoretic range.

EA-1 Electrophoresis Chamber

High impact polystyrene; water cooling jacket. Domed see-through lid. Safety interlock. Platinum electrodes run entire chamber length. Polarity reversing switch. Simple, accurate method of attaching sample strip with flexible holders in integral part of chamber unit.

This system offers features and advantages never before found in electrophoresis equipment. The design is superb—and the system was precision built by scientists expressly for scientists. Our free brochure will give you a full description complete with additional pictures.
