LAB-LINE  
**EXPLOSION-PROOF**  
**FRIGID-CABS...**

Patents Pending

Safety reports indicate an alarming increase in laboratory refrigerator explosions! Ordinary household refrigerators, modified, or so-called hazard-safe refrigerators, cannot give you the absolute protection required for storage of flammable liquids. Tests show that a refrigerator will produce up to 155 electric arcing contacts in normal daily lab use. Any one of these could ignite volatile vapors causing a violent explosion resulting in property damage, personal injury, even death.

Lab-Line FRIGID-CABS are U.L. listed for hazardous locations, Class 1, Groups C & D. Also, approved by the New York City Board of Standards and Appeals. Lab-Line Explosion-proof FRIGID-CABS are available from stock.

3 sizes—5, 9 and 13 cubic feet.

**do you  
want to  
measure  
radiant  
energy?**

Now you photochemists and photobiologists can measure radiant energy directly in ergs/cm<sup>2</sup>/sec and milliwatts/cm<sup>2</sup>. No need for complicated conversion tables and mathematical gymnastics.

The Model 65 YSI-Kettering Radiometer is wavelength-independent with seven full-scale ranges from 2.5 x 10<sup>3</sup> to 2.5 x 10<sup>6</sup> ergs/cm<sup>2</sup>-sec (0.25 to 250 mw/cm<sup>2</sup>). Readings are accurate to ±5% of full scale. Easy balance offset for up to 1.2 x 10<sup>5</sup> ergs/cm<sup>2</sup>-sec ambient radiation. Recorder output provided.

Small, interchangeable thermistor bolometer probe fits limited access areas. YSI 6551 probe has standard fused quartz window with a 0.25 to 3.3 micron range.

Instrument and probe \$385.  
Write for specifications.

### INHALATION TOXICOLOGIST

Hazleton Laboratories' Inhalation Division, one of the world's largest facilities for experimental work in inhalation toxicology, requires an Inhalation Toxicologist with a Ph.D. in Physiology, Pharmacology, or Toxicology with 0-3 years' experience, preferably in inhalation research. Duties include fundamental investigations of air pollutants and airborne hazards; supervision of technical staff members. Equipment and instrumentation include over 50 stainless steel and glass dynamic exposure chambers, body plethysmographs, spirometers, gas and particle analyzers, specialized transducers and recorders, and an IBM 1800 real time computer. Resumes and publications of Inhalation staff members are available on request. Excellent employee benefit program including a profit sharing plan. Please send resume to: Hall A. Acuff, Assistant Personnel Manager, HAZLETON LABORATORIES, INC., P.O. Box 30, Falls Church, Virginia 22064.

An Equal Opportunity Employer M/F

**MEDICAL TECHNOLOGISTS.** R&D laboratory in Suburban Washington, D.C., needs two Medical Technologists with B.S. or M.S. degrees and 2 to 5 years' experience in clinical chemistry, hematology, urine analysis and/or parasitology and serology; 40-hour week; excellent employee benefits, including 100% tuition refund for job-related courses, and profit sharing. Please write: **HALL A. ACUFF, Assistant Personnel Manager, Hazleton Laboratories, Inc., P.O. Box 30, Falls Church, Virginia 22064.**

An Equal Opportunity Employer M/F

### POSITIONS OPEN

B.A., M.A. or Ph.D. level

**HISTOLOGIST or ZOOLOGIST** with interest in action of chemicals on cells.

**ANATOMIST** with interest in embryology.

**BIOCHEMIST** with knowledge of thin layer and vapor phase chromatography.

Academic institution. Send detailed Curriculum Vitae to

Box 472, SCIENCE

### UNIVERSITY OF OTAGO DENTAL SCHOOL Dunedin, New Zealand

#### LECTURER OR SENIOR LECTURER IN BIOCHEMISTRY

Applications are invited by the Council of the University of Otago for the position of Lecturer or Senior Lecturer in Biochemistry at the University of Otago Dental School.

The salary range is £1,500 x £100—£2,200/£2,200 x £100—£2,700 per annum. Initial salary will depend on the qualifications and experience of the person appointed. The status of Senior Lecturer may be awarded as a mark of personal distinction either on initial appointment or by subsequent promotion. The salary of a Senior Lecturer will be not less than £2,300 per annum. A particularly well qualified applicant may be appointed at the grade of Associate Professor, at a salary within the range of £2,800 to £3,300 per annum.

The successful applicant would be responsible for the undergraduate dental course in biochemistry and would assume direction of the Biochemical Research Unit at the School.

Further particulars are available from the Secretary-General, Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London, S.W.1, or from the Registrar of the University.

Date of commencement of duty, 1 February 1968. Applications close in New Zealand and London on 1 July, 1967.

## POSITIONS OPEN

### BIOLOGISTS

**HAZLETON LABORATORIES**, a leading independent company specializing in the Life Sciences, needs B.S. or M.S. Biologists with 1-3 years' experience to train for responsible technical or supervisory positions in the Toxicology Division. Chemists who have undergraduate minors and strong interests in biology will also be considered. Applicants must have an undergraduate average of B or better, draft exempt, and experience or interest in supervising small groups. Stable employment, chance for advancement, competitive salaries, excellent educational assistance policy, and a profit-sharing plan. Please send resume or write for application. **HALL A. ACUFF, ASSISTANT PERSONNEL MANAGER, HAZLETON LABORATORIES, INC., P. O. BOX 30, FALLS CHURCH, VIRGINIA 22064.** (Metropolitan Washington, D. C.)

An Equal Opportunity Employer M/F

### The Community College of Philadelphia, Pa.

Is looking for several Experienced, Quality Teachers in Biology. Submit resume to **Dean James A. Richards, 34 South 11th Street, Philadelphia, Pennsylvania.**

Director of Computer Center for new University of Connecticut Health Center, Farmington, Connecticut. Integrated complex including Schools of Medicine and Dental Medicine, University Hospital, and administrative services is under construction. Director will work with academic and administrative staffs in early planning for the maximum utilization of computers in the areas of medical research, administrative services, and patient care. Faculty appointment possible. Write: **Dr. Charles Jerge, University of Connecticut Health Center, 39 Woodland Street, Hartford, Connecticut 06105.**

### Predoctoral Assistantships and Traineeships in Physiology

Excellent opportunities for graduate students leading to the Ph.D. Ample stipends and free tuition. Training and research in endocrinology, gastrointestinal, water and electrolyte metabolism, cardiovascular, sensory physiology, energy metabolism and bioengineering. Write for details to: **Head, Department of Physiology, University of Illinois at the Medical Center, P.O. Box 6998, Chicago, Illinois 60680.**

**Statistician**, faculty position (12 months) immediately available in Department of Biometry for Ph.D. or Ph.D. candidate in Statistics. Write **S. J. Kilpatrick, Jr., Medical College of Va., Box 923, MCV Station, Richmond, Va. 23219.**

**ASSISTANT TOXICOLOGIST.** \$8,617-\$10,747. Will help supervise Toxicological Analysis and poison information, and will assist in teaching and research. Requires: U.S. citizenship, Masters level with courses in Toxicology, and at least 2 years appropriate experience. Outstanding fringe benefits. Contact **Dr. Frederick Rieders, Medical Examiners Office, 13th & Wood Streets, Philadelphia, Pa. 19107.** Call collect (215) MU 6-9700, Ext. 5187.

## TOXICOLOGIST MALE OR FEMALE

We have an immediate opening for an individual at the B.S. or M.S. level with experience in general toxicologic & irritation procedures & with a potential for supervisory responsibility.

Send Resume In Complete Confidence

**WANTED:** Chemist, Ph.D., or well-qualified M.S., developmental and supervisory capacity, to work in newly established drug addiction research laboratory. The person we are seeking would be a basic research chemist, but would work in close association with clinical personnel, with no direct patient responsibility. Salary flexible and commensurate with level of training and experience. If interested, please contact **J. C. Schoolar, Ph.D., M.D., Drug Addiction Research Section, Houston State Psychiatric Institute, Houston, Texas 77025.**

**PHYSIOLOGIST or CELL BIOLOGIST** to develop courses in these fields, help teach general biology in liberal arts college in Central Appalachia. Start Sept., rank open, \$7000-\$15,000 9-mo. plus 1/6 for 5-wk. summer term. Write **Chm., Biol. Dept., Concord Col., Athens, W. Va.**

**Physiologist, Ph.D. or M.D.** Instruct first year medical students and graduate students at M.A. and Ph.D. level in growing two year medical school. Renal or pulmonary physiologist preferred. Adequate time for research in well equipped research laboratories. Rank, assistant professor, \$12,500. Send resume to: **Dr. W. O. Read, Dept. Physiology, University of South Dakota, Vermillion, South Dakota 57069.**

**PHYSICIST OR RADIOCHEMIST, M.S. or Ph.D.**, for health physics position in active research and clinical program using isotopes at the VA Hospital on the Indiana University Medical Center Campus. Integration into medical school teaching program. Participation in various research projects, establishment of new techniques. Independent research encouraged. Salary depends on qualifications. Civil Service. Write to **Leo Oliner, M.D., VA Hospital, 1481 West 10th Street, Indianapolis, Indiana 46202.**

## PHYSIOLOGIST / PHARMACOLOGIST — Ph.D. —

Seeking a Ph.D. in Physiology or Pharmacology with strong interests and training in the gastrointestinal system. Person will participate in planning, investigating, and evaluating a research program designed toward developing new chemotherapeutic agents to be used in gastrointestinal disorders. Will supervise a group of two to three junior scientists. Position offers an opportunity to work closely with scientists trained in a variety of disciplines. Company offers a liberal salary and benefit plan. Please send resume and salary requirements to: **Cyrus M. Greenberg, Ph.D., Director of Scientific Employment—**

**SMITH KLINE &  
FRENCH LABORATORIES**

1542 Spring Garden Street  
Philadelphia, Pa. 19101

An Equal Opportunity Employer

## POSITIONS OPEN

### GROSS ANATOMIST

Ph.D. to assist in teaching gross anatomy in expanding program in new quarters. Opening exists at assistant professor rank; minimum salary \$10,000 on nine month contract with seven month teaching schedule.

Please send experience and qualifications on initial inquiry to **Dr. R. V. Gregg, Chairman, Dept. of Anatomy, School of Dentistry, University of Southern California, Los Angeles, California 90007.**

## POSITIONS OPEN

### RESEARCH PHARMACOLOGISTS

Hazleton Laboratories, a rapidly expanding company located in Suburban Washington, D.C., requires two Pharmacologists with Ph.D. degrees. One should have 2-5 years' experience and will serve as the principal investigator of an ongoing cancer chemotherapy research program. The other should have a strong research background, 5-10 years' experience, and an interest in developing new contract research programs in renal, cardiovascular, or neuropharmacology. Excellent employee benefits program including profit sharing. Please write:

**HALL A. ACUFF, Assistant Personnel Manager  
HAZLETON LABORATORIES, INC.  
P.O. Box 30, Falls Church, Virginia 22046  
An Equal Opportunity Employer M/F**

## GRADUATE STUDY

**GRADUATE SCHOOL, MEDICAL COLLEGE OF GEORGIA.** Study leading to Ph.D., M.S., in Biochemistry, Endocrinology, Microbiology, Physiology, Anatomy, and Pharmacology. Graduate Fellowships, Traineeships: NSF and NIH. Also Institutional Graduate Teaching and Research Assistantships. Write to: **F. J. Behal, Ph.D., Director of the Graduate School, Medical College of Georgia, 1459 Gwinnett Street, Augusta, Georgia 30902.**

## ASSISTANT SCIENTISTS

Nationally known midwestern manufacturer, tops in its field, seeks research oriented young men for parasitology research. Applicants with a B.A. degree in zoology and some work in parasitology will be considered.

Company markets widely recognized diversified line, enjoys substantial and ever-increasing sales, and wishes to develop the parasitology research accordingly. Excellent starting salary and fringe benefits.

Please send complete resume and transcript of courses to: **Personnel Manager, Salsbury Laboratories, 500 Gilbert St., Charles City, Iowa 50616.**

*An equal opportunity employer*

**"Where the Industry Action Is!"**

## PHARMACEUTICAL REGISTRATION

The time, energies and investment of a company's research, product development and clinical testing activities are keyed to the effectiveness of its Government Registration team. The tact, salesmanship, and knowledge required to gain government acceptance of any product or project calls for people with a unique blend of experience and talents.

If you detect an air of excitement and strategic importance about this field, it's because Government Registration has become the focal point of the drug industry. This is where the action is . . . and you can be part of it as a member of one of the world's largest health care organizations.

This company is rapidly expanding and reorganizing its Government Registration department. Numerous positions are available at both supervisory and specialist levels. The need is for people with graduate educations in the physical or life sciences, experienced in the compiling and filing of IND's and NDA's. Some travel and direct government contact involved with supervisory positions.

The responsibilities are great. The opportunity unlimited and backed by an attractive starting salary and exceptional benefit program. For full details, respond in strict confidence to:

**Edward J. Freeland  
BFM Associates  
303 First Federal Bldg.  
Indianapolis, Indiana 46204**

These are not farm type buildings. A very real surprise awaits you. Write **Owner, Box 355, Wolfeboro, N.H. 03894.**

# PERKIN-ELMER'S NEW MODEL 290B\* IS THE BEST SINGLE-BEAM ATOMIC ABSORPTION INSTRUMENT MADE

## HERE'S THE PROOF:

**Precision and Detection Limit.** This chart shows the repetitive determination of a very small concentration of calcium — 0.5 ppm — in water solution. Appropriate scale expansion was used.

Note that all traces cover  $92 \pm 1$  divisions. This indicates that the precision of this analysis is better than 1%, even at this low concentration level. The detection limit for calcium is shown to be under 0.01 ppm.

**Sample:** 0.5 ppm Ca

**Instrument:** Model 290B

**Burner:** Premix with 3-Slot Boling Head

**Lamp Current:** 9 ma

**Lamp:** Perkin-Elmer Ca-Mg dual-element

**Noise Suppression:** 3

**Readout Linear in Concentration.** Atomic absorption is generally very fast: a sample can be run and recorded in typically 15 sec. However, with conventional instruments, which are usually not linear in concentration, about 30 sec. are required to make calculations converting the absorption reading to concentration. By reading directly and linearly in concentration, the 290B can save as much as two-thirds the total analytical time.

The trace on the left is an impressive demonstration of the capabilities of the 290B in this regard. Not only are the traces linear for 0, 20, 40, 60, 80, and 100 ppm Ca, but the values can be read directly off the recorder! Also, note again the repeatability and accuracy of the results.

**Sample:** 0-100 ppm Ca

**Instrument:** Model 290B

**Burner:** Premix with standard head, turned 90°

**Lamp current:** 9 ma

**Lamp:** Perkin-Elmer Ca-Mg dual-element

**Noise Suppression:** 2

A natural question:

**HOW CAN A SMALL (25" x 15" x 12") MODERATELY-PRICED UNIT SURPASS MUCH LARGER AND COSTLIER INSTRUMENTS?**

**Because of concept:** The original Model 290 was designed from the start for atomic absorption, not as an afterthought to a flame photometer or UV spectrophotometer.

**Because of design:** Among the most important contributors to performance are the quality of lamps and burner. The 290B employs the same units as the Perkin-Elmer high performance double-beam Model 303.

**Because of fabrication:** Perkin-Elmer produces its own gratings and aspheric optics, enabling us to package an optimum design into a small space.

\*Since the 290 was introduced two years ago, it has received so many improvements that we have decided to give it the "B" designation. Among the features now included are: extended wavelength range adding arsenic and selenium to the determinable elements (extra-cost option); switch-selectable resolution settings from 2A to 20A; built-in air and fuel gas controls; flame emission accessory; printed-circuit electronics; fine-wavelength control; extra-stability design.

For details, including information on specific applications, write to the Instrument Division, Perkin-Elmer Corporation, 723 Main Avenue, Norwalk, Connecticut, 06852.

## PERKIN-ELMER

## Now—a cooled, high-performance liquid scintillation system for under \$9900.

Just about all the good things that could come your way in liquid scintillation counting are yours in our new bench-top system—the Unilux® II.

Unilux II is a *constant-temperature* system controlled by cooling. And cooling is the best way to control the counting environment for stability and reproducibility—sample after sample.

Unilux II is a *high-performance* counting system. In fact, it performs at a level equal or superior to that of any other manufacturer's system, regardless of price.

Unilux II is a true *two-channel* system. You get two independent, identical counting channels that are easy to set-up and operate. And you can

add a third channel whenever you're ready.

Unilux II is designed for *your needs*. You don't have to be an electronics expert to know that Unilux II's integrated circuits mean the ultimate in reliability. Its bench-top format (pioneered by Nuclear-Chicago) is a proved design—for convenient, simplified operation. You can choose either barium-133 or radium-226 external standardization. The barium-133 standard most closely approximates the beta spectrum.

And Unilux II is priced *under \$9900*. At last you can cut the cost of a liquid scintillation system to the bone without sacrificing performance.

Consult your local Nuclear-Chicago

sales engineer or write to us about application-matched liquid scintillation systems that can be tailored to your specific needs. And please ask about our other performance-planned products and services for liquid scintillation counting.

More and more life-science researchers come to Nuclear-Chicago first. Performance is why.
