

AIR CONSERVATION

A wealth of information presented by authorities in the fields of conservation, pollution control, pollutants and their effects, law, economics, meteorology, public health, public opinion and government.

Report of the AAAS Air Conservation Commission. 348 pages. Illustrated. Bibliography. Index. Retail price: \$8. AAAS member price: \$7. ISBN 087168-080-7

OCEANOGRAPHY

Thirty papers presented at the first International Oceanographic Congress. An interdisciplinary reference for those concerned with oceans as a potential food source, the influences of oceans on our weather, and other similar phases of oceanography.

Edited by Mary Sears. 665 pages. 146 illustrations. Bibliography. Subject and author indexes. Retail price: \$14.75. AAAS member price: \$12.50. ISBN 087168-067-X

ESTUARIES

Knowledge of estuarine environments has not kept pace with the necessity to resolve problems arising from their intensive use. This is the first comprehensive collection of scientific papers covering the comparatively new field of estuarine research.

Edited by George H. Lauff. 776 pages. Illustrated. Bibliography. Indexes. Retail price: \$27. AAAS member price: \$24. ISBN 087168-083-1

GROUND LEVEL CLIMATOLOGY

Twenty papers dealing generally with the theme of weather and agriculture (including forestry), and specifically with the climate closely surrounding plants and animals . . . the microclimate.

Edited by Robert H. Shaw. 408 pages. 144 illustrations. Bibliography. Index. Retail price: \$12.50. AAAS member price: \$10.50. ISBN 087168-086-6

AAAS member price applies only when remittance accompanies orders

Personnel Placement

POSITIONS WANTED

Bio-Organic Chemist, Ph.D.: 16 years of research experience. Synthesis, analysis, medicinal chemistry, clinical biochemistry, biochemistry, reaction mechanisms. Broad experience background literature. Spectral interpretation, bioanalytical instrumentation, computer programming, bacteriology. Publications, patents. No agencies. Box 287, SCIENCE. X

Environmental Educator/Psychologist, Ph.D., research and teaching experience in environmental attitude formation and change. Experience with three universities. Numerous articles and two environmental texts. Currently completing 1-year appointment. Seeking teaching/research position. James Swan, University of Michigan School of Natural Resources, Ann Arbor, Michigan 48104. X

Microbiologist, Ph.D., research experience in carbohydrate chemistry, amino acid biosynthesis, DNA mediated transformation and *Bacillus subtilis* L-forms. Taught general microbiology, microbial physiology, microbial genetics, and microbiology (for nurses). Publications in *JACS*, *J. Biol. Chem.*, *J. Bacteriol.* Desires teaching, industrial, or research position. Box 288, SCIENCE. X

Molecular Biologist-Microbiologist, Ph.D. 1971, postdoctoral experience. Seeks teaching/research or research position. Research and teaching experience includes computer applications to biology, biophysical aspects of bacterial spores, RNA-DNA hybridization techniques as well as other biochemical methods. Publications. Box 289, SCIENCE. X

POSITIONS OPEN

ENZYMOLOGIST—for research in neurochemistry under Department of Psychiatry. Ph.D. in biochemistry with concentration in enzymology.

BIOCHEMIST—with knowledge of protein chemistry. Basic problem in the enzymes which handle drugs in man. Recent Ph.D. or Masters with related experience.

BOTH openings are immediate. Send résumé to: Miss M. Kerans, Personnel Dept., New York University Medical Center, 587 First Avenue, New York, N.Y. 10016.

An Equal Opportunity Employer

POSITIONS OPEN

PHARMACOLOGIST—Ph.D.

Faculty of Dentistry, University of Alberta, Edmonton, Alberta, Canada, invites applications for a position, the principal duty of which would be to assist a medical pharmacology department with the teaching of pharmacology to dental students. Research facilities are available. Experience in dental medicine and a dental degree are preferred but not necessary. Apply to:

K. A. McMurchy
Oral Biology Department
Faculty of Dentistry
University of Alberta
Edmonton, Alberta, Canada

virologist immunologist

Due to continued expansion our Bioscience Research Laboratory has a position open in the areas of virology and immunology. Duties involve research projects in antiviral drug screening, interferon research and other assignments in immunology. Position is located in St. Paul, Minnesota.

Candidate must possess a Ph.D. in Virology with a strong background in immunology. We prefer up to 3 years in virology and some exposure to immunology. Candidate should be highly motivated and flexible to conduct a wide variety of research projects.

Salary commensurate with experience. Outstanding employee benefits.

For confidential consideration send your résumé to:

3M
COMPANY

Jerry Q. Buegler
Special Recruitment Supervisor
Employment Department
3M COMPANY - 3M CENTER
St. Paul, Minnesota 55101

An Equal Opportunity Employer

POSITIONS OPEN

ANATOMISTS

The college will be pleased to receive applications for appointment to newly created positions in the Department of Anatomy. Teaching experience in the anatomical sciences is desirable but not necessary. Rank and salary commensurate with ability and background. Please submit résumé and salary requirements, in confidence, to: **Chairman, Department of Anatomy, Philadelphia College of Osteopathic Medicine, Spruce at 48th Streets, Philadelphia, Pa. 19139.**

BIOCHEMIST, Ph.D.

Experience including hybridization techniques. Work in human cancer research program with emphasis on viral oncology and tumor immunology. Long-term funding available. Send résumé to **Arthur Y. Elliott, Ph.D., University Hospitals, Box 394, Minneapolis, Minnesota 55455.**

The Department of Biochemistry in the University of Kentucky College of Medicine has openings at the level of **Assistant Professor**. Applicants should have completed at least 1 year of postdoctoral training. Although training experience and potential for future development will be the determining factors in these appointments, the department has a particular interest in candidates who have worked in the fields of cell membranes, protein or nucleic acid synthesis, or biochemistry of hormone action. Inquiries should be addressed to the **Chairman, Department of Biochemistry, College of Medicine, University of Kentucky, Lexington, Kentucky 40506.**

CHEMIST/BIOCHEMIST

Academic-based Research Laboratory Group. Candidate to perform structural studies on biologically active peptides. Experience in one or more of the following areas required: Composition, sequence, synthesis, modification. Opportunity for university teaching and staff appointment. Send curriculum vitae and salary requirements.

Box 285, SCIENCE

Chemistry

Male/Female

Biochemists

Positions in drug metabolism at our Corporate Biological Research Center in Bloomfield for M.S./B.S. biochemists with 1 to 4 years of experience in the absorption, distribution, excretion, and metabolic disposition of potential drugs. Experience in GLC, TLC & radioisotopes techniques desirable.

For further information & consideration please direct a résumé of your qualifications to: Research Personnel

Schering Corporation

60 Orange St., Bloomfield, N.J. 07003

APPLICANTS OF ALL RACES
ARE ENCOURAGED TO APPLY

DEAN COLLEGE OF PURE AND APPLIED SCIENCE

Applications are invited for the position of Dean of the College of Pure and Applied Science, which includes the Departments of Biological Sciences, Chemistry, Mathematics, Meteorology, Physics and Applied Physics, and Radiological Sciences, with 92 faculty members, 520 undergraduate majors, 75 M.S. and 29 Ph.D. students (Ph.D. programs offered only in Physics and Chemistry). The College is one of several colleges at Lowell Technological Institute which has a total enrollment of 3700 day students and is located 30 miles north of Boston. Applicants should have a terminal degree in a branch of the physical, life sciences or mathematics, teaching, research, administrative experience, and recognition in his or her field. Send résumé to **Dr. Gunter Kegel, Chairman of Dean's Search Committee, Lowell Technological Institute, Lowell, Massachusetts 01854.**

APPLIED MICROBIOLOGISTS, B.S. OR M.S.

a) Person to assume responsibility for and assist with production of several virus vaccines.
b) Persons qualified by training and/or experience to perform in vivo in vitro testing of animal biologicals.

An equal opportunity employer.

Send résumé of education and experience to

Box 286, SCIENCE

POSITIONS OPEN

DIRECTOR, PHARMACEUTICAL R & D

Exceptional opportunity for a D.V.M., Ph.D. Pharmacologist to develop new pharmaceutical products for a dynamic, growing organization. Previous academic or industrial experience required. Some work related to clinical research would be of value. Send résumé and salary requirements to:

**D. T. Stoneburner, Personnel Manager
Jensen-Salsbery Laboratories
Box 167—Kansas City, Mo. 64141**

An Equal Opportunity Employer (M/F)

YORK UNIVERSITY FACULTY OF SCIENCE

Applications are invited for the position of **Director** of the Centre for Research in Environmental Quality. The Director will be responsible for coordinating and administering the activities of physical and life scientists in environmental research, an important component of which is related to atmospheric quality. It is anticipated that the successful applicant will have a demonstrated breadth of interest in the environment, an established reputation in a related area of physical or life science, and administrative and teaching experience in the university community. Applications should be received by 15 July 1972. All inquiries should be addressed to: **Dean H. I. Schiff, Faculty of Science, York University, Downsview, Ontario, Canada.**

Ph.D. MICROBIOLOGIST

Primary interest in research related to the infections of immunosuppressed patients. Multidisciplinary research group with well-equipped laboratories and 22-bed research unit. For further information contact **G. A. Andrews, M.D., Chairman, Medical Division, Oak Ridge Associated Universities, P.O. Box 117, Oak Ridge, Tennessee 37830.** "An Equal Opportunity Employer."

TECHNICAL EDUCATION SPECIALIST Opportunity to join Scientific Relations Section of the Ames Company, worldwide manufacturer of medical laboratory instruments and reagent systems. Degree in science and/or law. Excellent communication skills. Submit résumé in confidence to: **Ronald E. Pozzi Placement Representative, Dept. 581-A, Miles Laboratories, Inc., Elkhart, Indiana 46514.**

An equal opportunity employer.

FELLOWSHIPS

NEW ZEALAND SENIOR AND POSTDOCTORAL RESEARCH FELLOWSHIPS

The New Zealand National Research Advisory Council invites applications for 10 Senior and Postdoctoral Fellowships to be taken up in New Zealand in 1973. The awards will be for scientific research in Government Departments. A good working knowledge of English is required.

The emoluments will be: Senior, within the range NZ\$8865 to NZ\$13257, Postdoctoral NZ\$7409. All emoluments are taxable. NZ\$1 is approximately 47p sterling or US\$1.19. If reciprocal social security between the applicant's country and New Zealand does not apply a medical insurance premium will be paid.

Senior Fellowships will normally be for a period of from nine months to a year and Postdoctoral Fellowships for a period of from two to three years.

Application forms and further particulars may be obtained from: the **Secretary, National Research Advisory Council, P.O. Box 8004, Wellington, New Zealand**; The **N.Z. Scientific Liaison Office, C.S.C., Africa House, Kingsway, London W.C.2, England**; from the **N.Z. Embassy, 19 Observatory Circle, N.W., Washington, D.C. 20008, U.S.A.**; from the **Office of the High Commissioner for New Zealand, Suite 804, Commonwealth Buildings, 77 Metcalfe Street, Ottawa, Ontario, Canada**; from the **Office of the High Commissioner for New Zealand, P.O. Box 820, Canberra 2601, A.C.T., Australia**; from the **N.Z. Embassy, 26 Sanbancho Chiyoda-ku, Tokyo 102, Japan**; from the **New Zealand Embassy in Bonn, Djakarta, Paris, Rome, The Hague, Bangkok, Saigon**; and from the **Office of the High Commissioner for New Zealand in Sydney, Athens, New Delhi, Kuala Lumpur, Singapore, San Francisco, and Los Angeles.**

Applications must reach the Council Secretary by 30 September 1972.

POSITIONS OPEN

VETERINARY PATHOLOGIST

Independent contract research laboratory has an immediate opening for a pathologist experienced in gross and microscopic pathology of dogs, primates and laboratory rodents. Specific experience in experimental and/or toxicologic pathology desirable. Salary commensurate with experience. An equal opportunity employer. Send detailed résumé to:

**Dr. Robert G. Geil
International Research & Development Corporation
Mattawan, Michigan 49071**

FELLOWSHIP

Cancer Research Postdoctoral Fellowship. Study of hormone-sensitive cells in culture experience with mammalian cell culture required. Send curriculum vitae, two references, and citizenship status to: **Res. Inst., Hospital for Joint Diseases (affiliated with Mt. Sinai School of Medicine) 1919 Madison Ave., New York, N.Y. 10035.** An equal opportunity employer.

PRIZE COMPETITION

announced by the

ANNA - MONIKA - FOUNDATION

for the investigation of the physical substrate and functional disturbances of endogenous depressions by approval of the Minister of the Interior of the State Nordrhein-Westfalen, Düsseldorf, on 9 June 1965.

The Foundation announces the following prizes:

FIRST PRIZE\$10,000
SECOND PRIZE\$ 5,000
THIRD PRIZE\$ 2,500

preferably for studies of biochemical, histological, neurophysiological, neuropathological, psychopharmacological, psychiatric or psychosomatic nature.

The papers may be written in German, French, or English and should be submitted to the chairman of the committee, Professor Dr. Kielholz, Basle, Switzerland.

The studies should be carried out in close cooperation with a psychiatric clinic, a university institute or an equivalent scientific institution. So far as possible, the papers should give information about recent advances in knowledge that would be helpful in promoting treatment and would open up new paths of progress.

Besides hitherto unpublished studies, papers published in the past 2 years in a German or international professional journal may also be submitted.

Deadline for submission to the Committee is 31 December 1972.

To help the Committee to come to a speedy decision it is requested that at least four copies be submitted.

Prizes will be awarded on 30 June 1973.

If, in the opinion of the Committee, no papers of sufficient merit are submitted, it reserves the right to make no award.

Prizes and their amount will be awarded according to the merits of the study in question. Subject to the Committee's decision, each prize can be divided between two papers.

The Committee of Judges includes:

Chairman: Professor Dr. P. Kielholz, Director of the Psychiatric Clinic of the University of Basle, CH 4056 BASLE/SWITZERLAND, Wilhelm Klein-Strasse 27.

Professor Dr. Karl Bernhard, Director of the Physicochemical Institute of the University of Basle, Basle, Switzerland.

Professor Dr. Otto Creutzfeldt, Director of Max Planck Institute of Biophysical Chemistry, Göttingen, Germany.

Professor Dr. H. J. Dengler, Director, Medical Clinics and Out-patient Clinics, Justus Liebig University, Giessen, Germany.

Professor Dr. med. Fritz A. Freyhan, Director of Research Medical Centre, St. Vincent's Hospital, New York, N.Y., United States.

Professor Dr. H. Hippus, Director of the Psychiatric Clinic and Out-patient Clinic, München, Germany.

Professor Dr. Horst Jatzkewitz, Head, Neurochemical Department of the Max Planck Institute for Psychiatry, München, Germany.

Professor Dr. D. Palm, Director of the Pharmacological Institute of the University of Frankfurt/Main, Germany.

Professor Pierre Pichot, Head of Medical Psychology, Centre Psychiatrique Sainte-Anne, Paris, France.

Professor Dr. Walter Schulte, Director, Neuropsychiatric Clinic, University of Tübingen, Tübingen, Germany.

Professor Dr. med. Dr. rer. nat. Wilhelm Stoffel, Director of the Institute for Physiological Chemistry, University of Cologne, Cologne Rhein, Germany.

Director of the Foundation: Peter Rehme, 46 Dortmund, Töllnerstr. 9/11.

Does S/P give you more for your money than anyone, anyplace?

Does the sun rise?

You might spend days, weeks or even months determining which manufacturer's product to buy. So maybe you should spend a few minutes to determine which laboratory equipment and supply distributor you should buy it from. The product might be the same, but the service isn't. For example, S/P has more laboratory-trained representatives than anyone. (Over 300 in 17 coast-to-coast distribution centers.) More servicemen than anyone (150), including manufacturer-trained technical specialists for complex systems. More warehouse space than anyone (13,553,000 cubic feet). More in-stock items than anyone (129,000). More inventory than anyone (\$28,000,000 worth)—with every item of national stock available to any customer through our computer program. More delivery capabilities than anyone (every major carrier plus our 43 S/P truck fleet). More backup people than anyone (1,580). Our prices are competitive. But if anyone offers you a better price, ask what they offer in service. You'll find S/P gives you more for your money than anyone. As sure as the sun rises.

To take advantage of our More-For-Your-Money Service, call your S/P Representative or write Scientific Products, Division of American Hospital Supply Corporation, 1430 Waukegan Road, McGaw Park, Illinois 60085. S/P...a single source for laboratory equipment, supplies and scientific instruments.

Instructions for Contributors

The Editors of *Science*

Manuscripts submitted to *Science* for consideration for publication can be handled expeditiously if they are prepared in the form described in these instructions.

Submit an original and two duplicates of each manuscript. With the manuscript send a letter of transmittal giving (i) the name(s) of the author(s); (ii) the title of the paper and a one- or two-sentence statement of its main point; (iii) the name, address, and field of interest of four to six persons in North America but outside your institution who you think are qualified to act as referees for your paper; (iv) the names of colleagues who have reviewed your paper for you; (v) the field(s) of interest of readers who you anticipate will wish to read your paper.

Editorial Policies

All papers submitted are considered for publication. The author's membership or lack of membership in the AAAS is not a factor in selection. Papers are accepted with the understanding that they have not been published, submitted, or accepted for publication elsewhere. Authors will usually be notified of acceptance, rejection, or need for revision in 4 to 6 weeks (Reports) or 6 to 10 weeks (Articles).

Types of papers. Five types of signed papers are published: Articles, Reports, Letters, Technical Comments, and Book Reviews. Familiarize yourself with the general form of the type of paper you wish to submit by looking over a recent issue of the journal, and then follow the instructions for that type of paper.

Reviews. Almost all Articles, Reports, and Technical Comments, whether solicited or not, are sent to two or more outside referees for evaluation of their significance and soundness. Forms showing some of the criteria reviewers are expected to consider are available on request.

Editing. Papers are edited to improve the effectiveness of communication between the author and his readers. The most important goal is to eliminate ambiguities. In addition, improvement

of sentence structure often permits readers to absorb salient ideas quickly. When editing is extensive, with consequent danger of altered meanings, papers are returned to the author for correction and approval before type is set. Authors are free to make additional changes at this stage.

Proofs. One set of galley proofs or an equivalent is provided for each paper. Keep alterations to a minimum, and mark them only on the galley, not on the manuscript. Extensive alterations may delay publication by 2 to 4 weeks.

Reprints. An order blank for reprints accompanies proofs.

Writing Papers

Organize your material carefully, putting the news of your finding or a statement of the problem first, supporting details and arguments second. Make sure that the significance of your work will be apparent to readers outside your field, even if you feel you are explaining too much to your colleagues. Present each step in terms of the purpose it serves in supporting your finding or solving the problem. Avoid chronological steps, for the purpose of the steps may not be clear to the reader until he finishes reading the paper.

Provide enough details of method and equipment so that another worker can repeat your work, but omit minute and comprehensive details which are generally known or which can be covered by citation of another paper. Use metric units of measure. If measurements were made in English units, give metric equivalents.

Avoid specialized laboratory jargon and abbreviations, but use technical terms as necessary, defining those likely to be known only in your field. Readers will skip a paper they do not understand. They should not be expected to consult a technical dictionary.

Choose the active voice more often than you choose the passive, for the passive voice usually requires more words and often obscures the agent of action. Use first person, not third; do

not use first person plural when singular is appropriate. Use a good general style manual, not a specialty style manual. The University of Chicago style manual, the style manual of the American Institute of Physics, and the *Style Manual for Biological Journals*, among others, are appropriate.

Manuscripts

Prepare your manuscript in the form used by *Science*. Use bond paper for the first copy. Submit two duplicates. Double-space title, abstracts, text, signature, address, references (including the lines of a single reference), figure legends, and tables (including titles, columns, headings, body, and footnotes). Do not use single spacing anywhere. Put the name of the first author and the page number in the upper right-hand corner of every page.

Paging. Use a separate page for the title; number it page 1. Begin each major section—text, references and notes, and figure legends—on a new sheet. Put each table on a separate sheet. Place figure legends and tables after the references.

Title. Begin the title with a word useful in indexing and information retrieval (not "Effect" or "New").

References and Notes. Number all references to the literature, footnotes, and acknowledgments in a single sequence in the order in which they are cited in the text. Gather all acknowledgments into a single citation, and keep them short ("I thank," not "I wish to thank"). Cite all references and notes but do not cite them in titles or abstracts. Cite several under one number when feasible. Use *Access—Key to the Source Literature of the Chemical Sciences* with the few suggested revisions in *International List of Periodical Title Word Abbreviations* for abbreviations of journal names. If the journal is not listed there, provide the full name. Use the following forms:

- Journal:** H. Smith, *Amer. J. Physiol.* **98**, 279 (1931).
Book: F. Dacheille and R. Roy, *Modern Very High Pressure Techniques* (Butterworth, London, 1961), pp. 163–180.
Chapter: F. Dacheille and R. Roy, in *Reactivity of Solids*, J. H. de Boer, Ed. (Elsevier, Amsterdam, 1960), p. 502.

Illustrations. Submit three copies of each diagram, graph, map, or photograph. Cite all illustrations in the text and provide a brief legend, to be set in type, for each. Do not combine line

drawings and photographs in one illustration. Do not incorporate the legend in the figure itself. Use India ink and heavy white paper or blue-lined coordinate paper for line drawings and graphs. Use heavier lines for curves than you use for axes. Place labels parallel to the axes, using capital and lower-case letters; put units of measurement in parentheses after the label—for example, Length (m). Plan your figures for the smallest possible printed size consistent with clarity.

Photographs should have a glossy finish, with sharp contrast between black and white areas. Indicate magnification with a scale line on the photograph.

Tables. Type each table on a separate sheet, number it with an Arabic numeral, give it a title, and cite it in the text. Double space throughout. Give each column a heading. Indicate units of measure in parentheses in the heading for each column. Do not change the unit of measure within a column. Do not use vertical rules. Do not use horizontal rules other than those in the heading and at the bottom. A column containing data readily calculated from data given in other columns can usually be omitted; if such a column provides essential data, the columns containing the other data can usually be omitted.

Plan your table for small size. A one-column table may be up to 42 characters wide. Count characters by counting the widest entry in each table column (whether in the body or the heading) and allow three characters for spaces between table columns. A two-column table may be 90 characters wide.

Equations and formulas. Use quadruple spacing around all equations and formulas that are to be set off from the text. Most should be set off. Start them at the left margin. Use the solidus for simple fractions, adding the necessary parentheses. But if braces and brackets are required, use built-up fractions. Identify handwritten symbols in the margin, and give the meaning of all symbols and variables in the text immediately after the equation.

Articles

Articles, both solicited and unsolicited, may range in length from 2000 to 5000 words (up to 20 manuscript pages). Write them clearly in reason-

ably nontechnical language. Provide a title of one or two lines of up to 26 characters per line and a subtitle consisting of a complete sentence in two lines with a character count between 95 and 105 for the sentence (spaces between words count as one character each). Do not break words at the ends of lines. Write a brief author note, giving your position and address. Do not include acknowledgments. Place title, subtitle, and author note on page 1. Begin the text on page 2.

Insert subheads at appropriate places in the text to mark your main ideas. The set of subheads should show that your ideas are presented in a logical order. Keep subheads short—up to 35 characters and spaces.

Provide a summary at the end.

Do not submit more than one illustration (table or figure) for each four manuscript pages unless you have planned carefully for grouping. With such planning many illustrations can be accommodated in the article. Consult the editorial office for help in planning.

Reports

Short reports of new research results may vary in length from one to seven double-spaced manuscript pages of text, including the bibliography. Short papers receive preferred treatment. Limit illustrative material (both tables and figures) to two items, occupying a total area of no more than half of a published page (30 square inches). A research report should have news value for the scientific community or be of unusual interest to the specialist or of broad interest because of its interdisciplinary nature. It should contain solid research results or reliable theoretical calculations. Speculation should be limited and is permissible only when accompanied by solid work.

Title. Begin the title with an important word (preferably a noun) that identifies your subject. The title may be a conventional one (composed primarily of nouns and adjectives), a sentence (containing a verb), or a structure with a colon (Jupiter: Its Captured Satellites). Limit it to two lines of complete words of no more than 55 characters per line (spaces between words count as one character each). Do not use abbreviations. Type the title in the middle of page 1.

Abstract. Provide an abstract of 45 to 55 words on page 2. The abstract

should amplify the title but should not repeat it or phrases in it. Qualifying words for terms used in the title may be used. Tell the results of the work, but not in terms such as “——— was found,” “is described,” or “is presented.”

Text. Begin the text on page 3. Put the news first. Do not refer to unpublished work or discuss your plans for further work. If your paper is a short report of work covered in a longer paper to be published in a specialty journal, you may refer to this paper if it has been accepted. Name the journal. If the manuscript has not been accepted, refer to it as “in preparation.” Omit references to private communications. Do not use subheads.

Signature. List the authors on the last page of the text and give a simple mailing address.

Received dates. Each report will be dated the day an acceptable version is received in the editorial office.

Letters

The Letters section provides a forum for discussion of matters of general interest to scientists. Letters are judged only on clarity of expression and interest. Keep them short and to the point; the preferred length is 250 words. The editors frequently shorten letters.

Technical Comments

Letters concerning technical papers in *Science* are published as Technical Comments at the end of the Reports section. They may add information or point out deficiencies. Reviews are obtained before acceptance.

Book Reviews

The selection of books to be reviewed is made by the editors with the help of advisers in the various specialties; arrangements are then made with reviewers. A sheet of instructions accompanies each book when it is sent to the reviewer.

Cover Photographs

Particularly good photographs that are suitable for use on the cover are desired.
