Young Lives at Stake. The Education of Adolescents. Charity James. Agathon, New York, 1972. xiv, 258 pp. \$6.95.

\$5.40
Per year.

10¢
Per year.

Hardco will save you 30-40% of your animal care costs.

Every year the typical 5,000 cage facility spends around \$20,000 just to maintain their obsolete bottle watering system. \$20,000 just for labor.

But—there is virtually no labor with a Hardco automatic watering system.

And almost no labor costs. So that in about 17 months you usually get a full return on your investment.

And get to use that 30-40% savings for more important things.

Think about it. Over 450 labs have automated with Hardco. And that includes some of the biggest.

We will design a system specifically for your lab, install it ourselves, train your personnel, guarantee it for two years.

The only thing we don't do is tell you how to allocate your new found funds.

THE BOARD OF TRUSTEES of the Educational Council for Foreign Medical Graduates, Philadelphia, Pa., invites applications for the position of Executive Director.

The Executive Director of the Educational Council for Foreign Medical Graduates functions as the chief administrative officer for the programs of the ECFMG which include the conduct of examinations, the analysis of credentials and the certification of graduates of foreign medical schools.

The Executive Director is directly responsible to the Board of Trustees of the ECFMG.

Qualifications include extensive experience in predoctoral and postdoctoral medical education in the United States with a knowledge or interest in international medical education. Candidates for the position must have the M.D. degree and have had appropriate administrative experience.

The selected candidate should be available after September 1, 1972.

If qualified, please respond with a dossier to: Leonard D. Fenninger, M.D., National Institutes of Health, Bldg. 1, Room 111, Bethesda, Md. 20014.

Personnel Placement

POSITIONS WANTED

Biochemist, Ph.D., female. Grants, publications. Experience teaching graduate, undergraduate, and medical students. Research interests: plant and microbial biochemistry. Teaching or teaching and research position desired. Box 309, SCIENCE. X

Biology chairmanship sought. Ph.D. Books and journal publications. Grant- and contract-supported research now current. Appropriate administrative experience. Box 310, SCIENCE. X

Botanist, Ph.D.; 6 years of teaching and 2 years of research experience. Specialized training in plant physiology and forestry. Seeks academic position. Available immediately. Box 311, SCIENCE. X

Cell Biologist/Botanist Ph.D. Extensive teaching, research, and publications. Special interests: plant cell/tissue culture, anatomy, cytobiology, morphogenesis, cinematography. Available fall 1972. References. Box 312, SCIENCE. X

Coleopterist, Ph.D. 1965, 34, 15 years of research experience on many families of beetles and phylogenetic systematics, including major senior postdoctoral fellowships in Germany and Canada, teaching experience in England and the United States. Ninety-six research publications. Available anytime. Seeks research/teaching/curatorial position. Mohammad Abdullah, Zoologische Staatssammlung, Munich 19, Germany. X

Developmental Biologist, Ph.D. Seeks academic position. Five years at major universities. Superior instruction, vertebrate embryology, physiology, entomology, biochemistry. Publications. Box 313, SCIENCE. X

Editor-Publisher-Reporter: Record and transcribe, and publish any scientific technical meeting. Extensive experience with NRC-NAS and others. Individual meetings accepted. Box 314, SCIENCE. X

Entomologist-Electron Microscopist-Neurophysiologist; 32, Ph.D. Form and function of insect sensory (photo-, mechano-, sound, olfactory) receptors. Pharmacological agents as tools to study mechanisms of transduction and nerve conduction. Publications. Four years of teaching experience in general biology and research related courses. Box 315, SCIENCE. X

Marine Biologist, Ph.D. Specialized in hermatypic corals, tropical meiofauna. Ecology, taxonomy, microanatomy trained. Research and museum experience. Seeking research position domestic or foreign. Experienced in Latin America. Box 316, SCIENCE. X

Microbiologist/Immunologist, Ph.D. Experienced in hospital clinical microbiology, oncogenic viruses, immunopathology of autoimmune disease. Experience in teaching undergraduate and graduate immunology and microbiology. Desires academic, industrial, or hospital laboratory position. Box 317, SCIENCE. X

Molecular Biologist, Ph.D. Postdoctoral training. Experience, publications. Seeks research position. Box 318, SCIENCE. X

Ph.D. Aquaculturist, certified fisheries scientist, 7 years of experience in freshwater, brackish-water, fish, shrimp culture. Seeks teaching, research or industrial position. Publications. Box 319, SCIENCE. X

Ph.D. Nutritional Biochemistry, Massachusetts Institute of Technology, 1970; D.M.D., Tufts, 1964. Experience includes biostatistics, electron microprobe, SEM. A. J. Saffir, 1342 Fieldfair Court, Sunnyvale, California 94087. X

Psychologist, Ph.D. 1967, desires position involving teaching and research. Learning theory: basic research issues and applications in behavior modification and social learning; experimental methodology. Numerous publications and papers. Two grants. Research with human and animal subjects. Box 320, SCIENCE. X

Research Technician, M.S. bioengineering, August 1972. Ten years of research experience on membrane characteristics, cancer and neuromechanical research. Available September 1972. Box 321, SCIENCE. X

POSITIONS OPEN

ANATOMIST

Recent Ph.D. interested in contributing to an integrated, innovative program. Primary teaching duties in Neuroanatomy with some participation in Gross Anatomy. Limited research. Rank and salary open. Contact

Dr. Roger Senty, Dean
College of Osteopathic Medicine
& Surgery
722 Sixth Ave.
Des Moines, Iowa 50309

FELLOWSHIPS

POSTDOCTORAL FELLOW

Ph.D. in biochemistry or cell biology. Work involves isolation and site of action at the membrane level of a myotoxin from *Aspergillus*. Begins September, for a period up to 3 years. Apply with curriculum vita to:

Dr. Herman Meisner
Department of Biological Sciences
Duquesne University
Pittsburgh, Pennsylvania 15219

POSTDOCTORAL FELLOWSHIP

for research-oriented biochemist interested in lipid metabolism and enzymology. Some experience in lipid biochemistry desirable. Write to:

University of Minnesota
The Hormel Institute
Austin, Minnesota 55912

POSTDOCTORAL FELLOWSHIP

Recent Ph.D. in biochemistry with experience in the area of steroid hormone-protein interactions to participate in long-term project related to steroid hormone regulation of growth. Salary commensurate with experience. Appointment now available. Send résumé to Box 322, SCIENCE.

PROPOSAL

It is the intention of the Carcinogenesis Area of the National Cancer Institute to advertise the availability of a request for proposals for a contract activity entitled "Nicotine Levels in Blood: Detection by Radioimmunoassay."

Individuals representing research organizations who wish to receive copies of this request for proposal when it becomes available are invited to submit their names to the following address prior to 9 August 1972 (request must reference RFP No. NCI-E-C-73-2):

Mr. Maurice Fortin
National Cancer Institute
Building 37, Room 1A07
National Institutes of Health
Bethesda, Maryland 20014

INSOLUBLE ENZYMES

Sigma Insoluble Enzymes are produced by reacting the conventional "soluble" enzyme with an inert base that results in an insoluble compound retaining the activity of the original enzyme. This is one of the most exciting developments in Biochemistry in recent years. Applications are almost unlimited. By selecting the "inert" base carefully, a highly active "resin" or "gel" can be produced with which the enzyme reaction can be quickly catalyzed by momentary contact with the substrate in a suitable medium.

Many different kinds of inert bases can be used as the matrix for attaching the enzyme. At present, we offer Insoluble Enzymes attached to Polyacrylamide, Beaded Agarose, and Cellulose & Cellulose Derivatives. Work is under way to prepare Insoluble Enzymes attached to Sephadex. We also hope to offer enzymes attached to porous glass and to soluble macro-molecules.

Numerous other combinations of enzyme and matrix are possible. Your suggestions are welcome. Until more is learned about each type of preparation, the matrix of choice remains a matter of trial and error.

INSOLUBLE ENZYMES ON POLYACRYLAMIDE MATRIX

Prepared by Sigma

The following enzymes are already available:

Alcohol Dehydrogenase	Phosphoglucose Isomerase	3-Phosphoglyceric Phosphokinase
Aldolase	Pyruvate Kinase	Glucose Oxidase
α -Amylase	Ribonuclease A	Glyceraldehyde-3-Phosphate Dehydrogenase
Glucose-6-Phosphate Dehydrogenase	Trypsin	Glyceraldehyde-3-Phosphate Dehydrogenase/3-Phosphoglyceric Phosphokinase
Hexokinase	Urease	
Lactic Dehydrogenase	α -Glycerophosphate Dehydrogenase/Triose-phosphate Isomerase	
Malic Dehydrogenase		

INSOLUBLE ENZYMES ON BEADED AGAROSE MATRIX

Prepared by Sigma

The following enzymes are already available:

Asparaginase	Glyceraldehyde-3-Phosphate Dehydrogenase/Phosphoglycerate Kinase	Glucose-6-Phosphate Dehydrogenase/Hexokinase
Alcohol Dehydrogenase		Hexokinase
Creatine Phosphokinase/Hexokinase/Glucose-6-Phosphate Dehydrogenase	Glucose-6-Phosphate Dehydrogenase	Neuraminidase Peroxidase

Insoluble Enzymes available on Cellulose Matrix:

α -Chymotrypsin	Papain	Protease
Ficin	Peroxidase	Ribonuclease A

See our newest catalog for more details (May 1972 issue now available). If the enzyme you want is not listed, please inquire.

"Love
that
luvMonitor!"^{T.M.}

So will anyone involved with open column chromatography—and rising costs. Priced under \$1200, LDC's new ultraviolet absorbance #1250 luvMonitorTM has a minimum detectable sensitivity of 0.002 O.D. units at 254 or 280 nm. Ranges of 0 to 0.1, 0.25, 0.50, and 1.0 density units full scale. 25 μ l cell volume, 3 mm path length. Linear chart presentation data are directly convertible to concentration. Built-in 5" servo graphic recorder. Remote and manual event marker. Write or phone us now for complete information about LDC's new #1250: the under-\$1200 UV monitor that cost-conscious chromatographers learn to luv.

LABORATORY DATA CONTROL

P.O. Box 10235, Interstate Industrial Park
Riviera Beach, Florida 33404 (305) 844-5241

Circle No. 60 on Readers' Service Card

Does S/P give you more for your money than anyone, anyplace?

Do birds fly?

The only thing a distributor really has to sell is service. That's *his* product. So the next time you order laboratory supplies or equipment, check his product as closely as you do the manufacturer's. In our case, you'll find S/P has more laboratory-trained representatives than anyone. Over 300 of them in 17 distribution centers throughout the U.S.A. More servicemen than anyone, 150 including manufacturer-trained technical specialists for sophisticated systems. More warehouse space than anyone. 13,553,000 cubic feet. More in-stock items than anyone. An inventory of 129,000 items in all (More than Marshall Field or Sears carry). Worth \$28,000,000 with every item in our national stock available to every customer through our computer program. More delivery capabilities than anyone. Every major carrier and our fleet of 43 S/P trucks. More backup people than anyone. 1,580. The more you think about it, the more you'll realize that S/P products give you more for your money than anyone else's. Just as sure as birds fly.

Circle No. 1 on Readers' Service Card

To take advantage of our More-For-Your-Money Service, call your S/P Representative or write Scientific Products, Division of American Hospital Supply Corporation, 1430 Waukegan Road, McGaw Park, Illinois 60085. S/P...a single source for laboratory equipment, supplies and scientific instruments.
