

-76°C Ultra-Cold. -96°C Ultra-Colder.

Both from Kelvinator Commercial. Upright drops to -76°C. Ultra-cold. Chest model dips to -96°C. Ultra-colder. Upright's six French doors open individually. And you can label each door to know what's inside. Easy labeling for what's under the chest's stainless steel sliding lids, too. Want more? Automatic alarm systems? 2" portholes for recorders? The Kelvinator Commercial name? You got them. Don't be caught in the cold without ultra-cold. Contact J. E. Hirssig at Kelvinator Commercial, the company that knows how to give you 12 cubic feet of the best cold you ever had.

Upright UC-105 (-76°C/-105°F) Chest UC-520 (-85°C/-120°F)
Chest UC-540 (-96°C/-140°F)

New From Klett 4 Vertical Gel Electrophoresis Cells

FEATURES

- * Transparent lucite body.
- * Full view of gel columns during preparation.
- * Full view of dye front.
- * All safety features.
- * Precision ground channels.
- * Leveling legs.
- * Rapid, simple and complete removable of gel columns with spatula.

BIOCHEMIST/ENZYMOLOGIST

A leading manufacturer of medical instruments has a senior level position available for an innovative enzymologist.

Applicant must have the background required to design stable enzyme substrates and other biochemical reagents for instrumentation applications; and the ability to investigate new approaches to, and methods for, the measurement of clinically important body fluids.

Experience in preparation of enzymes or co-factors from raw materials is not required, nor is an instrumentation background necessary.

Personnel Placement

POSITIONS WANTED

Cell Biologist, Ph.D. Seven years of teaching experience. Publications. Seeks teaching/research or research position. Research interests—human and animal cytogenetics. Have taught courses in general biology and zoology, genetics, histology, anatomy and physiology, and in comparative and mammalian anatomy. No geographical preference. Box 324, SCIENCE. X

Ph.D. Nutritional Biochemistry, Massachusetts Institute of Technology, 1970; D.M.D., Tufts, 1964. Experience includes biostatistics, electron microprobe, SEM. A. J. Saffir, 1342 Fieldfair Court, Sunnyvale, California 94087. X

POSITIONS OPEN

CARTOGRAPHER

Ph.D., Assistant Professor, Fall 1972. Salary according to qualifications. Teaching undergraduate students cartography and introduction to geography. Apply:

D. A. Fraser, Chairman
Department of Geography
Sir George Williams University
Montreal 107, Quebec
CANADA

CHAIRMAN, DEPARTMENT OF CHEMISTRY, STATE UNIVERSITY OF NEW YORK AT ALBANY. Appointment to be effective fall 1973. The Department works with a faculty of 25 and supporting staff of 14 carries out a comprehensive program from undergraduate through doctoral levels in a University Center of 14,000 students. The successful individual for this position will be a senior person with a broad background and record of distinction in some combination of teaching, research and administration. EEO/Affirmative Action Employer. Please reply with curriculum vitae to: Professor J. J. Zuckerman, Recruitment Committee, Department of Chemistry, State University of New York at Albany, Albany, New York 12222.

DIRECTOR

Applied Research Laboratory

A major not-for-profit research organization is seeking a Director whose experience and educational background qualify him in special ways to direct an established research entity with an enviable reputation which offers the right individual an unusual and challenging opportunity for distinctive service and leadership. Prior substantial experience in a comparable organization desirable. Scientific-Engineering education preferred. Write to:

Box 329, SCIENCE

An Equal Opportunity Employer

FACULTY POSITION

Associate Professor to teach physiology to medical students. Qualifications include (i) experience in teaching all areas of medical and cellular physiology, (ii) ability to present patients to students and to discuss clinical cases, and (iii) extensive research experience and active research program. Send curriculum vitae and three letters of recommendation to **Chairman, Department of Physiology, University of Missouri School of Medicine, Columbia, Missouri 65201.** An equal opportunity employer.

POSITIONS OPEN

RUSSIAN TRANSLATORS

Scientists, graduate research students, and junior lecturers in all branches of science and technology.

Immediate openings for qualified candidates who have good command of English and Russian and who are actively participating in their field of interest.

Our expanding translation activities reflect work in the forefront of research. Steady employment is assured all suitable applicants.

Please contact **Translation Editor, The Allerton Press, Inc., 150 Fifth Avenue, New York, New York 10011.**

PHARMACOLOGIST

A vacancy exists in our pharmacology department for a research pharmacologist to lead a new laboratory studying mainly psychoactive substances at the beginning, in collaboration with our chemistry department. We are a rapidly growing Italian pharmaceutical company located in Milan (northern Italy) and we are now in the process of major expansion of our research activities. An ideal candidate should hold either a recent medical qualification or Ph.D. in pharmacology or physiology together with about 2 years of postdoctoral experience, preferably in drug research. Knowledge of Italian would be an asset but is not essential. Please send résumé indicating two referees to **Dr. G. Ferrari, Simes S.p.A., Via Bellerio 41, 20161 Milano.**

PHARMACOLOGIST OR PHYSIOLOGIST

To perform research on effect of prolonged exposure to cadmium on the blood pressures of rats and monkeys and on mechanisms that regulate blood pressure. Other research projects available later. Some opportunity for teaching, if desired. Apply with curriculum vitae to **Dr. J. H. Wills, Institute of Experimental Pathology and Toxicology, Albany Medical College, Albany, New York 12208.**

PROTEIN CHEMIST

Young Ph.D. Knowledge and experience in study of primary structure of proteins. Contact

Akira Yoshida, Ph.D.
City of Hope
Duarte, Calif. 91010

CYANAMID

VIROLOGIST-Ph.D.

Key opportunity for professional qualified to head a group charged with developing human viral vaccines.

Qualifications include at least 5 years of postdoctoral research experience; strong background in immunology; and preferably, expertise with cell associated viruses.

This opening presents exceptional opportunity for fulfillment of both professional and personal objectives.

Please send details of education, experience, and salary history, to:
Mr. C. L. Hill

Varian EPR research helps you solve today's problems.

Although E-Line Spectrometers are the world's most sensitive and easiest to use EPR systems, Varian scientists and engineers are never satisfied. That's why you see continuing advances like these:

New Applications. Here are just two of the many exciting new areas where E-Line is helping solve today's problems: Research on EPR analysis of lyophilized human blood for possible cancer diagnosis. Routine screening of urine samples for drugs of abuse as part of a FRAT™ Spin Immunoassay System. And Varian scientists welcome the opportunity to discuss with you the benefits of EPR that may help solve your particular problems.

New Products. Three new additions broaden E-Line capability: the E-700 ENDOR (for electron-nuclear double resonance), E-800 ELDOR (for electron-electron double resonance), and the low price EM-500 EPR Spectrometer (just \$7,490 with recorder, in the U.S.).

Higher Performance. E-Line's signal-to-noise ratio specification, using the E-231 Cavity at 100-kHz modulation on weak pitch without quartz inserts, has been increased from 60:1 to 90:1; in the standard E-233 Cylindrical Cavity the signal-to-noise ratio is 150:1.

New Information. New EPR literature is available to help bring you up-to-date and give you some ideas for your own research. For the latest on Varian EPR, just mail the coupon. Or if your need is urgent, contact your local Varian Instrument Division office.

Does S/P give you more for your money than anyone, anyplace?

Does the sun rise?

You might spend days, weeks or even months determining which manufacturer's product to buy. So maybe you should spend a few minutes to determine which laboratory equipment and supply distributor you should buy it from. The product might be the same, but the service isn't. For example, S/P has more laboratory-trained representatives than anyone. (Over 300 in 17 coast-to-coast distribution centers.) More servicemen than anyone (150), including manufacturer-trained technical specialists for complex systems. More warehouse space than anyone (13,553,000 cubic feet). More in-stock items than anyone (129,000). More inventory than anyone (\$28,000,000 worth)—with every item of national stock available to any customer through our computer program. More delivery capabilities than anyone (every major carrier plus our 43 S/P truck fleet). More backup people than anyone (1,580). Our prices are competitive. But if anyone offers you a better price, ask what they offer in service. You'll find S/P gives you more for your money than anyone. As sure as the sun rises.

Circle No. 5 on Readers' Service Card

To take advantage of our More-For-Your-Money Service, call your S/P Representative or write Scientific Products, Division of American Hospital Supply Corporation, 1430 Waukegan Road, McGaw Park, Illinois 60085. S/P...a single source for laboratory equipment, supplies and scientific instruments.
