

AAAS Annual Meeting

26-31 January 1975

New York City

As in years past, AAAS will present a variety of science films for your enjoyment during the Annual Meeting, running daily from 10:00 a.m. until 3:00 p.m. from Monday to Thursday. A complete list of titles and starting times will be found below.

In a departure from past practice, we offer you a new concept in scientific exhibits in the form of an inter-

disciplinary and international instrument and book show. The exhibits will run from Tuesday until Thursday at the times indicated on the preliminary and partial list of exhibitors below.

The final program for the 141st Annual Meeting in New York City, 26-31 January 1975, can be found on pages 1016 to 1025 of the 13 December issue of *Science*, and a complete list of

tours of cultural and scientific interest to take place during the Meeting will be found on page 918 of the 6 December issue. In all, we are confident that you will find this Meeting to be one of great variety and interest and well worth your attendance. Come join us—fill out the advance registration forms on pages 1026 and 1027 of the 13 December issue.
