# Vibration protection for sensitive instruments! **MICRO-g® Tables** and Bench Top Units.

Low cost MICRO-g air-isolation systems can reduce building vibration at least 95 to 98%. Even low frequency (7-25 Hz) vibrations that conventional static systems can't handle. The self-leveling top surface is supported on ultra-sensitive air-pistons that adjust automatically to changing loads. Performance is guaranteed.

Standard MICRO-g Tables and Bench Top units cost approximately \$1000 and will support equipment loads of over 900-lbs. All that is needed for operation is a compressed air supply or bottled air or gas.

If you're using microscopes, microtomes, interferometers, mask alignment tools or other ultra-sensitive equipment you need to know about MICRO-g systems. There are six standard configurations in a wide range of sizes. Special configurations are readily available. Write for a catalog and price list today.

# You're Seated and you're comfortable.

**WILD M-400 PHOTOMAKROSKOP.**  
 The binocular automatic macro recording system, shown here with transmitted light illumination on darkfield / brightfield transillumination stand, with lens, and 35mm magazine.\*

With the M-400, we took the guesswork out of producing macro photographs. All adjustments, setting desired magnification, perfect composing and framing, and accurate focusing are at the tip of your finger. Plus automatic exposure timing with center weighted photodiode reading. Plus automatic 35mm film advance. Plus expected exposure time indicator. Plus elapsed exposure time, shown while taking the picture. Plus instrument portability.

How easy and automatic can photomacrography be?
