

SAVE YOUR COPIES OF Science

These custom-made, imprinted cases and binders are ideal for protecting your valuable *Science* copies from damage. Each binder or case holds one volume of *Science*, or 13 weekly issues—order four binders or cases to hold a complete year of issues. Constructed from reinforced board and covered with durable, leather-like red material and stamped in gold, the cases are V-notched for easy access; binders have a special spring mechanism to hold individual rods which easily snap in.

Quantity	Cases	Binders
One	\$ 7.95	\$ 9.95
Two	\$14.95	\$18.95
Four	\$27.95	\$35.95

R & D A New Twist

In the scientific world, "R & D" stands for Research and Development. It's an important part of your professional life. But when it comes to your personal life, "R & D" could stand for *Responsibilities and Dreams*. And in this day and age, it takes a lot of both to see a family through.

That's why the American Association for the Advancement of Science makes the AAAS Term Life Insurance Plan available to you. It's an easy and affordable way to protect your family's future. The Plan provides benefits that can be used to help with basic living expenses and can enable your family to follow through with the plans you made together. You can request up to \$240,000 of coverage for yourself. And generous protection is available for your family too.

Don't experiment with your family's financial security! Contact the Administrator of the AAAS Term Life Insurance Plan today. We'll send a brochure and application right away.

B Meson Lifetime

Please allow me comment on Gary Taubes' interesting and informative article about B factories (*News & Comment*, 22 Mar., p. 1419) recalling important results from B physics. The MAC Collaboration at the Stanford Linear Accelerator published the first measurement of the B meson lifetime (1). The publication alluded to by Taubes (2) (the MARK II experiment) came later, confirming the surprisingly long lifetime reported by MAC.

1. E. Fernandez *et al.*, *Phys. Rev. Lett.* 51, 1022 (1983).
2. N. S. Lockyer *et al.*, *ibid.*, p. 1316.

Erratum: In the report "Isolation of sequences that span the fragile X and identification of a fragile X-related CpG island" by D. Heitz *et al.* (8 Mar., p. 1236), in the first line of figure 1 ("Chromosomal breakpoints"), PeCH should not have appeared. The breakpoint indicated corresponds to the APC5 cell line described by G. K. Suthers *et al.* [*Am. J. Hum. Genet.* 47, 187 (1990)].

Erratum: In Constance Holden's *News & Comment* article "Kuwait's unjust deserts: Damage to its deserts" (8 Mar., p. 1175), the second sentence of the fifth paragraph should have read, "Any rock that has sat on the desert for a long time develops a shiny 'desert varnish' of light-absorbing manganese and iron oxides."

The Science Book Issue, 17 May

Accounts of current books about Halley the man and Halley the comet, the lives and times of other scientists and other heavenly bodies, the dynasties of the Andes, and the biology of aging. Further consideration of gender in science and society, the role of history in comparative biology, and sociological questions about scientific truth. With information about *récréations scientifiques* in France and thoughts about Florida, New York, and other nice places to visit.
