Biotech Poetry

CHARLES SEIFE'S NURSERY RHYME (Random Samples, 8 Feb., p. 963) was certainly amusing and well done. One good rhyme, however, deserves another. So here is my second poetic contribution to *Science* (1).

I think it's rather mawkish
To jingle on things porkish
Specially when it's seen
The silly pig is green;
Alas yon purple cow
Your luster's faded now
In spite of literary fame
Gene splicing's now the game
So for the coming trick
Please cross the pig and chick
It's what this writer begs
One source for ham and eggs.

CORRECTIONS AND CLARIFICATIONS

RANDOM SAMPLES: "Taxonomic Tussle" (22 Feb., p. 1459). The name of the "dinosaur listserv" mentioned in this story was not given. It is called the "Dinosaur Mailing List," or the DML. The site location is www.dinosaurmailinglist.org

NEWS FOCUS: "Plant scientists see big potential in tiny plastids" by J. Gewolb (11 Jan., p. 258). In the third column of page 259, *Rhodospirillum rubrum* was misidentified as a red alga. It is a bacterium.

PERSPECTIVES: "Water on a metal surface" by D. Menzel

(4 Jan., p. 58). In panel B of the figure, a (blue) hydrogen atom should have been attached to the first (pink) oxygen atom from the left in the second row from the bottom, forming an H-bond to the oxygen below it.

REVIEW: "The initial mass function of stars: evidence for uniformity in variable systems" by P. Kroupa (4 Jan., p. 82). The penultimate version of Fig. 1B, in which the x axis scale was 4 to 10 M_{\odot} , was mistakenly published. The final version appears below.

Specialty Rodent Models

Micropipette Fabrication Tools

Sutter Instrument Company is the world leader in micropipette fabrication technology. With over 25 years of experience, our puller technology ranges from the simple and inexpensive P-30 vertical puller to the P-2000, an advanced CO₂ laser based quartz puller. Our P-97 has become the industry standard for repeatability and reliability. Contact us, or see our web site today to find out more about Sutter products.
